THE McGILL NEWS

Merry Christmas and a Happy New Year

WINTER 1959

"Remember how Grandad showed me?"

How could he forget his grandfather — the man who knew how to build a toy bridge or a real one, the man who always had time for a small boy, who was himself a small boy grown taller and wiser.

How could *she* forget him — his strength, his gentleness, his thoughtfulness. He was part of this house, part of the living that belonged to every room. He had seen to it that she had an adviser and protector always — there *when needed* to settle the estate, to manage investments to *safeguard* assets.

Acting in trust for others, The Royal Trust Company has a part in the welfare of Canadians in every sphere of living. Widows, children and other dependents of those whose estates are entrusted to our care, look to us for help and guidance and receive the experienced assistance that will best assure their comfort *and security*.

ABOUT OUR COVER

Dr. F. S. Howes, professor of electrical engineering and head of McGill's Extension Department, is seen here in McGill's first "Anechoic Room", a feature of the McConnell Engineering building. (See page 7).

The room is totally free of echoes which are absorbed on all sides by 3-foot wedges of fibreglass. It will be used for acoustical research, under Dr. Howes' supervision. Here, he is placing a microphone, preparatory to making frequency-response measurements on a loudspeaker.

Letters

Westmount, P.Q.

The Editor:

In the summer issue of The McGill News it was interesting to read of the work which is being carried on at the Redpath Museum.

However, it was somewhat surprising to find that in the descriptions of the educational work carried on by the Museum staff there was no reference, at all, to the assistance which has been given to the Museum and its staff by individuals not directly associated with the University.

An example of this is the work done there by members of The Junior League of Montreal, who have assisted the Museum in various ways since 1950. Annually, since then, Junior League Guides — or Docents — have been trained to take groups of children on tour through the galleries. During the year 1958-59, 52 groups, totalling 2,190 children, were shown the Museum by these Docents. Other members of the Junior League have taken special training enabling them to make the "Dioramas" — small scale museum exhibits — which are used as an extension of the Museum's work in schools and other institutions in the city. The delivery and installing of loan exhibits, the showing of films and film strips, assistance in the care of certain items in the collection are other activities which have been carried on by Junior League members in or on behalf of the Redpath Museum.

Since 1951, the League has contributed funds and materials to further the work of the Museum. To date, the value of these contributions has been in excess of four thousand dollars.

It might, I think, have been a courtesy to the members of The Junior League of Montreal, as well as being of interest to readers of The McGill News, to have included in the articles some mention of this community interest in the University's Redpath Museum.

Miss Barbara Whitley, B.A. '40.

In This Issue . . .

Frankly, we've gone overboard this issue with pictures of **reunion groups** and homecoming weekend activities. But this has become a very important activity each year and embraces the interest of many, many hundreds of graduates . . . At that, pity the poor editors with some 100 photos to choose from (and all excellent!) . . .

When **Wilder Penfield** talks, he invariably sheds new light and perspective. For that reason we have "lifted" liberal portions of his Convocation address on Founder's Day, page 3 . . . We are resuming a popular feature of yesteryear with a column in "The Campus" section written by **Roger Phillips,** editor-in-chief of The McGill Daily, whom we also welcome to the editorial board of The McGill News . . .

Prof. J. R. Mallory discusses the Commonwealth universities conference at Oxford, page 8, with attention to the human as well as the business side of the event . . . And **Rowan Coleman** recounts other travels, page 18, in a very human way, and of interest to many graduates . . .

Harry Griffiths didn't intend to pen an *apologia* for **McGill football,** but when your editor asked him for something on the prospects last August, the ensuing account was so poignant that our hearts bled for him and we said, "Gee, why don't you write it down just as you've said it so all our readers will have a picture of the day-to-day trials." It's the clearest appraisal of the football facts of life we've seen — page 12.

Leacock Likeness in Lectures

809203

M2M3
V.41

Montreal

The Editor: The last issue was particularly interesting because of the sketch of Stephen Leacock which appeared on page 9. This naturally brought my thoughts back to the time when I attended Leacock's lectures. Though he was even more interesting to listen to than to read, I nevertheless whiled away some moments to make a random sketch or two of that gentleman. I looked over my papers and found a few sketches that had been made in class in 1927, and I enclose them in the event that they should be found of interest.

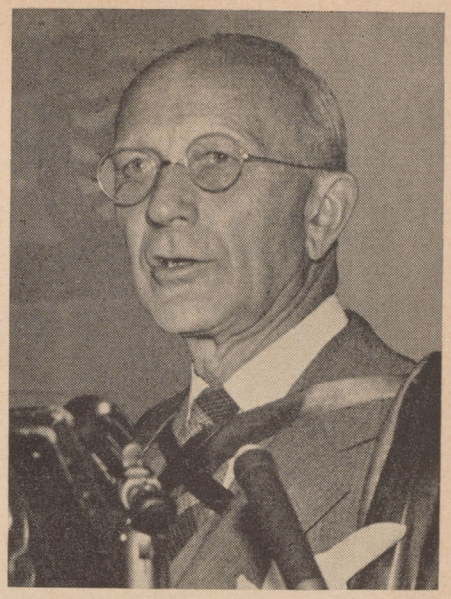

I had always admired Leacock because he was able to stimulate one's thinking. Unlike most professors you did not wind up at the end of the school year with a miniature textbook; instead he discussed fundamental problems and questions and we were able to carry away useful thoughts that stimulated thought.

S. J. Smiley, B.A. '27.

Down the Stream of Time

by Wilder Penfield

Dr. Penfield delivering the Convocation Address during Founder's Day ceremonies. The occasion marked the twenty-fifth anniversary of the Montreal Neurological Institute for which more than 100 former fellows and residents of the Institute returned from many parts of the world. For other pictures, please see page 15.

IT IS MEN who make the university, not lecture halls, nor the right to grant diplomas. Student and teacher and investigator make a college what it is. And in a larger sense those who support it and know its fame and tell its story — they make it, too, and belong to it. The graduate wherever he may go, is always a member.

The character of McGill University, and, to some extent, the nature of its contributions, were determined by the fact that it was created without the help of Church or Government, created by independent action of the English speaking pioneers of Montreal.

Thus it may be said that McGill is an independent University. It is like Harvard and Yale and Princeton in that sense, and as Oxford and Cambridge are, or rather were, before a Welfare State began to introduce a new order of things. McGill's past history was filled with perils and strange adventures. Peril and great decisions face her in the years that lie ahead.

Although McGill is not quite the oldest incorporated university in Canada, her medical school was founded before all others. The University began with only one faculty, the Faculty of Medicine. That is quite as it should be, of course. The world's oldest university began that way. In the 11th century A.D., Italian medical students in Salerno incorporated themselves as a guild and hired teachers to teach them physic and to examine them and declare them fit for the practice of medicine. Students who longed to learn Roman law did the same at Bologna in the 12th century, and Paris followed with a first faculty in theology. In those times the terms "University" and "Collegium" too, were understood to mean a body of men and not a place.

Let me tell the thrilling story of McGill, a story not without its moral. The Medical School was born by spontaneous generation, the other Faculties by long and painful labour.

Start of Medicine

In 1800, Lower Canada had its French speaking ecclesiastical seminaries, but there was no medical school and no incorporated university. Immigration from England and Scotland came then with a rush. Montreal's population was only 10,000 and the hospital accommodation was soon taxed beyond the limit. The Hotel Dieu, which had been founded by Jeanne Mance in 1664, was filled beyond capacity although the Sisters of St. Joseph did their best, as they always have, and always will, no doubt.

To meet the emergency, English-speaking women came to the rescue, forming the Female Benevolent Society of Montreal. They opened a 4 bed hospital and gave it the optimistic title of *House of Recovery*. That was in 1818. The following year, a group of local business men, each of whom, I suspect, had been shamed into action by his wife, or perhaps nudged to it by someone else's wife, took over the hospital. They enlarged it, and moved it, and so in 1822 the Montreal General Hospital opened its doors to the helpless.

And here is where the story of a University begins, for on the Medical Board of the new hospital there were four physicians all well trained at Edinburgh University, which was then pre-eminent among the medical centres of Europe. Two of these men, Robertson and Caldwell, had been born in Scotland and came to Canada as Army Surgeons. Two were younger, brilliant products of Canadian generation, Stephenson and Holmes. These two had travelled through the hospitals and universities of Europe together after graduation.

At the very beginning there was talk of the teaching of medicine. Consequently, when application was made for a hospital charter to legalize the new Montreal General the application was opposed in the legislature. A politician named O'Sullivan said, among other things, that the patients in the new hospital would be experimented upon by the Edinburgh physicians. So one of the elder physicians, William Caldwell, wrote hotly to the local newspaper, the *Courant*, denying such notions. He received, in return, a challenge to mortal combat from O'Sullivan. This was not child's play. The duel which followed was fought with pistols at close range. O'Sullivan received a bullet through his chest and Caldwell a shattered arm. Fortunately, both duelists recovered.

The hospital charter was soon granted and the doctors began to teach at once. Furthermore, they opened a school called the Montreal Medical Institution at 20 St. James Street and taught the whole body of medicine. They applied for permission to create what they called a "Seminary of Medical Learning". But incorporation was refused. Two reasons were given: First, they were not associated with an institution of learning, and, second, they had no endowment.

That was in 1822. Unexpected help from another quarter was at hand. McGill University had been incor-

porated in 1821. But there was no teaching yet. Consequently, in 1829, a meeting was called at the former home of James McGill. That was Burnside Manor. Today a stream of traffic passes the site along Burnside Street instead of the burn that once wound its way through the forest. The four doctors came to the meeting and were declared professors in the Faculty of Medicine of McGill University. Then they went away and continued to teach without University remuneration at the Medical College on St. James Street and in the Montreal General Hospital nearby.

The new professors were now in charge of the only medical college in Canada. They took in other teachers and, astonishing as it may seem, they established at once a four year course in medicine although no college in the United States required more than two years at that time.

They used the Edinburgh method of teaching medicine at the bedside. This method, modified and elaborated in Montreal, was to be introduced in the United States when McGill's William Osler became professor at Johns Hopkins more than a half century later.

Thus, McGill's medical faculty continued by its own momentum. It was not until 43 years after that meeting at Burnside Manor that the University opened a medical building on its own property. That was in 1872, the year young Osler graduated.

From Holmes to Osler

Men it is that make a university and the spirit of the founding physicians has never disappeared. Holmes proved to be the outstanding genius of the quartet. He left his collection of herbs and flowers and minerals in the Redpath Museum. Students still strive to win the Holmes medal. But his spirit passed down through Palmer Howard to Osler, like the magic ring of genius that John Buchan described in "The Path of the King". "The sons and daughters blunder and sin and perish", Buchan wrote, "but the race goes on, for there is a fierce stuff of life in it."

So Osler, returning from study abroad, spent 10 years as Professor of the Institutes of Medicine here, working hard at basic science. His pathological collection he left to McGill, and eventually his historical library. He introduced cold realism into Medicine, sweeping out the useless drugs. He was scholar and classicist and yet he was also the embodiment of compassion and of love for humanity. His great spirit went out into the world and lives on in the hearts and minds of medical men.

But Osler, like other members of the University belongs to us still. His laughter is heard in the corridors of the medical building. And, in the silence of the medical libraries, he whispers common sense to those who will listen. ▼

The Vulgar Subject of Money

by F. Cyril James

OUR Victorian grandmothers taught their children that it was improper — not to say vulgar — to mention in conversation the prices of one's possessions or the income of one's friends. It is a tenable and comfortable philosophy if one is well off, but one of the great Victorians, George Gissing, emphasized in *The Private Papers of Henry Ryecroft* that the unwillingness to talk about money did not diminish its importance. "You tell me that money cannot buy the things most precious. Your commonplace proves that you have never known the lack of it. When I think of all the sorrow and the barrenness that has been wrought in my life by want of a few more pounds per annum than I was able to earn, I stand aghast at money's significance. What kindly joys have I lost . . . Meetings with those I loved made impossible year after year; sadness, misunderstanding, nay cruel alienation, arising from the inability to do the things I wished, and which I might have done had a little more money helped me . . . I think it would scarce be an exaggeration to say that there is no moral good which has not to be paid for in coin".

If that be true of individuals, it is no less true of universities. The total of the annual deficits of McGill University, published each year in the *Annual Reports* during the period from 1944-45 to 1957-58 was $3,460,424 and, even after allowance is made for special contributions to operating revenues from various sources, the net drain that operating deficits imposed on our endowments during the period was $1632,490. The deficit on the operations of the 1958-59 session, in spite of an increase in tuition fees that raised them to a level higher than those at any other university in Canada, was $116,481, and the present estimates put the deficit on this year's operations at $675,479.

These deficits, which represent the expenditure of capital funds from the invested endowments of the University, have been deliberately incurred by the Board of Governors, during these difficult years of controversy over federal grants, to enable McGill to raise salaries and wages to a level that would bring the University closer to the level attained by other Canadian universities. A sense of appreciation of the work of the men and women who are members of the staff encouraged the Board of Governors to this decision, supported by the practical realization that if McGill salaries fell far below the level ruling at other Canadian universities we should be unable to attract new staff members of outstanding quality to follow in the footsteps of those who reach the age of retirement. It would be tragic if McGill should fall into "sorrow and barrenness . . . for want of a few more pounds (or dollars) per annum".

The fundamental reason why McGill — like all universities in the Province of Quebec — has found itself short of money is to be found in the constitutional controversy which, for the past seven years, has made it impossible for the University to receive the grants made available annually by the Government of Canada — grants that have augmented the revenues of universities in all of the other nine provinces and made it possible for them to pay steadily increasing salaries without the necessity of any substantial increase in the tuition fees paid by students.

The financial statistics of the problem that has confronted all Quebec universities are eloquent — if laconic — in the editorial that appeared in The Montreal Star on Friday, October 23, 1959, the day that McGill inaugurated its third Open House:

> "In the period between 1952-53 and 1958-59 Quebec's Provincial annual grants rose 58% from $6.5 million to $10.3 million, whereas Ontario's grants rose 168% from $11.8 to $31.6 million. During this time Ontario universities also received some 29.5 million dollars from Ottawa. Comparative figures on the increase of university students in these provinces during the same period are also interesting. Quebec's student population jumped 50%, from 20,200 to 30,300 as against Ontario's 43%, from 18,800 to 27,000. In a word, there have been more students here and much less total income for the institutions which serve them. For this reason, among many others, the deficits have been mounting steadily."

At the moment at which these words are being written (October 26, 1959) the financial outlook is brighter than

(*Continued on page 29*)

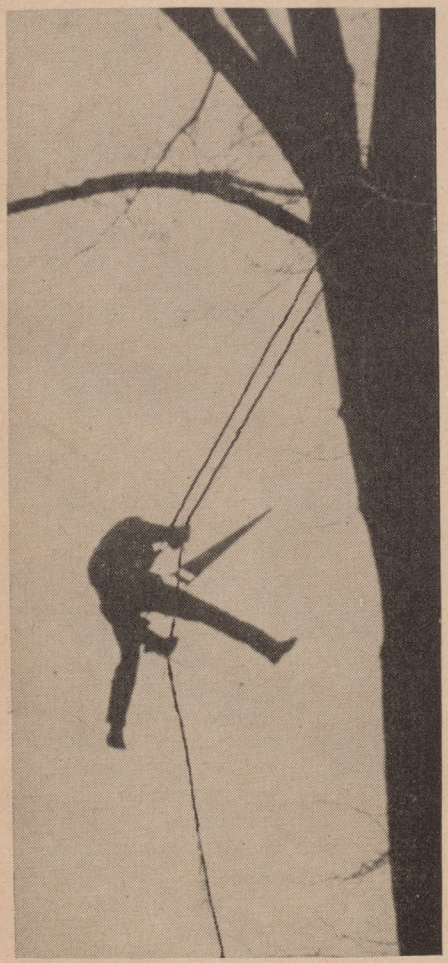

THE CAMPUS

by Roger Phillips

Photos by Charles Kinghorn

LIFE on the McGill campus this fall was surprisingly typical (the Redmen lost all seven of their football games) but in other respects the students had much about which to rejoice (a site for the long proposed New Union was finally selected by the Board of Governors).

Hazardous work pruning McGill's elm trees.

The announcement that a site for the New Union had at long last been chosen culminated several years of hard work and persuasion on the part of the students' New Union Committee. Several times in the past the Governors and the students' committee had seemed on the verge of selecting a site agreeable to both, only to find hitches developing at the last minute. This time it's for real though — the chosen site is that presently occupied by the Bishop Mountain House on the corner of Milton and University Streets. The new building will be given "high priority" but the University lacks funds to begin immediate construction.

Successful Open House

The Third Annual Open House, coinciding with homecoming weekend, saw some 50,000 persons visit McGill. Special exhibits prepared by the various faculties and student groups combined to make "Meet McGill '59" the best ever. Students served as guides and played a major role in the student-faculty committee in charge of the event. Two student dramatic events, "Revuer's Choice", comprising the best numbers in the last three Red and White Revues, and Eugene Ionesco's "The Bald Soprano", performed by the Players' club, were presented before packed houses. Four performances, instead of the originally planned one, had to be presented by the Players' Club.

Student Conferences

Several national and international student conferences took place at McGill this fall. Almost 100 delegates from the World University Service of Canada convened at McGill in October for their annual national assembly. The McGill Conference on World Affairs celebrated a third birthday by holding its largest conference ever in November. Student-delegates from many Commonwealth nations, as well as the U.S. and Canada, were present to discuss "Afro-Asia: The problems of Underdeveloped Countries". Among scheduled guest speakers and panelists were the Hon. Lester B. Pearson, Dr. Arthur Smithies, Director of the U.S. State Department's Foreign Aid Division, and Sir Leslie Monro, past-President of the U.N. General Assembly.

Provocative Debate

In the realm of foreign affairs McGill students received two groups from abroad. First was the United Kingdom's University Champion Debating Team which provided a good contest for two Debating Union members. The teams took opposite sides on the question "Resolved that Britain is pushing her colonies to independence too fast." Many students from present or former British colonies attended and gave the debaters a difficult time with penetrating questions from the floor. Later in the season McGill was visited by Igor Biriukov, vice-president of the Soviet Council of Students. Making a whirlwind, weekend tour he did not meet many students but was entertained by various members of the Students' Executive Council.

Record Blood Drive

McGill's annual Red Cross blood drive broke all records obtaining the previously unheard of total of 2,613 pints, some 400 more than the previous year. Nevertheless, the campus was shamed by the smaller University of Montreal which totalled over 3,200 pints.

As mentioned earlier, the football Redmen had another bad year, dropping every game. Many observers claimed the team was better than last year's and all but three games were

close contests. An innovation this year was floodlight football on one Friday evening. The experiment, designed to see if greater crowds would be the result of night games, demonstrated that disinterest in college football was not caused by the scheduling of games.

A minor controversy raged over the campus early in the fall when a McGill Daily editorial accused several campus groups, including the fraternities, of discriminating along religious or racial lines. While not criticising the state of affairs the editorial asked the question "Is it right?" and concluded, "Far better to admit we are out-and-out segregationists than to remain hypocrites the rest of our lives."

The commencement of the winter season was marked by an increasing number of campus activities. With a record budget of almost $160,000 the Students' Society seemed headed toward one of the most active sessions in years.

RVC Swimming Pool Opens

THE Royal Victoria Swimming Pool was officially opened November 27th by Principal James.

A unique feature of the pool, which is situated at the corner of Sherbrooke and Shuter streets, is the incorporation into the end wall of three beautiful windows from Lord Strathcona's old home on Dorchester street.

The attractive regulation-length pool is now open for all women students as well as all women who graduated from McGill, for the fee of $7.50. The hours will be 4-10 p.m. and anyone interested in swimming should call the Warden's office, RVC.

Enrollment sets Record

ENROLLMENT at McGill reached a record 7,714 this year, with Arts and Science leading the faculty count.

All departments in this faculty showed increases this year, bringing total enrolment to 2,817, or 281 more than last year.

The Faculty of Engineering, including architecture, dropped from 1,580 last year to 1,434 while Law gained 25. In Graduate Studies and Research enrollment is not yet officially announced but, when complete, the McGill total enrollment is expected to stand somewhere between 7,800 and 8,000 for the 1959-60 season.

Governor General Opens New Engineering Building

THE Governor-General, Georges P. Vanier, in his first official act at McGill, opened the new McConnell Engineering Building on November 30th.

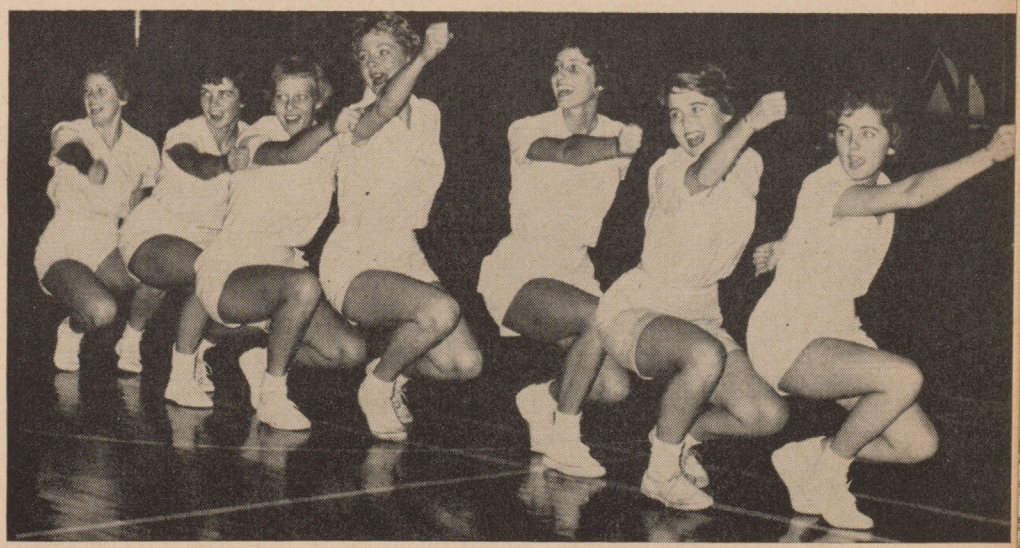

The new wing is part of the university's plan to accommodate much larger undergraduate enrollments in the 1960's. Thanks to the generosity of Emeritus Governor J. W. McConnell, a fine building now stands at the corner of Milton and University streets. It provides excellent quarters for the School of Architecture, the Department of Electrical Engineering and also part of the Department of Mathematics. It also provides facilities for a Computer centre.

Among the facilities and accommodations in the new building are: two auditoria with a capacity of 204 each, equipped with projector room, microphone, etc., a smaller lecture theatre with a capacity of 70 for the architects, one class room with 130 capacity; six classrooms, 72 capacity; six classrooms, 40 capacity.

The Architects' quarters include drafting rooms, exhibition rooms, seminar rooms, offices, etc. The Electrical Engineers have seminar rooms, staff offices, and laboratories, as well as space for the IBM 650 and ancillary equipment. There are fifteen offices for the department of Mathematics.

Action on the rugger field during recent McGill-Dartmouth game.

An innovation since most graduates' time: girl cheerleaders.

McGill Men Attend Commonwealth Conference

J. R. Mallory
Professor of Economics and Political Science

THREE McGill men were members of the Canadian delegation to the Commonwealth Education Conference, which was held in Oxford July 15-28, 1959. They were D. C. Munroe of the Institute of Education, T. H. Matthews (who, although he is executive secretary of the Canadian Universities Foundation, was our Registrar for so long that I cannot regard him as anything but a member of the McGill family), and myself. The Conference consisted of representatives appointed by the governments of the United Kingdom, Canada, Australia, New Zealand, South Africa, India, Pakistan, Ceylon, Ghana, Malaya, and the Federation of Rhodesia and Nyasaland. Included in the British delegation were representatives from a large number of dependent and colonial territories. The Canadian delegation was led by Hon. George A. Drew, High Commissioner in London and included a number of senior officials as well as members from the universities and other Canadian educational bodies.

Shortly after our arrival in London we were taken for a week on a number of tours organized by the British Council to let us see for ourselves as many facets of the educational system of the British Isles as possible. We from McGill were attracted to the "Celtic fringe". David Munroe went on the tour of Wales, while Mr. Matthews and I went to Scotland. Then, stuffed with hospitality and information, we were taken to Oxford for the Conference itself.

The delegations lived in Christ Church, which is one of the largest of the Oxford Colleges, and most of the working sessions were in Rhodes House. Before our arrival some of us had heard that reconnaissance showed that the beds would be hard and the plumbing remote and scarce. These reports turned out to be exaggerated. Since the war most Oxford Colleges have gone into what they call the "hotel business" for extra revenue. Without it many of them cannot live adequately off their endowments. Calculations have shown that some colleges would, without extra revenue, have eaten up all their capital by 2500 A.D. Prudent management has thus forced them to supplement their income from conferences during vacation periods. Competition is brisk and has compelled them to pipe hot water into rooms, buy mattresses, and even in some cases install baths in staircases to supplement those located in remote back quadrangles. Christ Church has never been noted for comfort, but it has always claimed a better than average kitchen and an excellent cellar. The result was an ideal situation for an educational conference, made all the more attractive to the overseas visitor by the dry, warm summer. Our hospitable hosts arranged many opportunities for us to see the beauties of Oxford and its environs, and even transported us to Stratford to see *Coriolanus*.

But the Conference was not all entertainment. Most of the business of the

The Canadian Delegation to the Commonwealth Education Conference in Oxford, July, 1959. The picture is taken in front of the Canadian Delegation rooms in Peckwater Quadrangle, Christ Church. Front centre is Hon. George A. Drew, Leader of the Delegation. Front row, extreme right is T. H. Matthews; extreme left are J. R. Mallory and D. C. Munroe.

Conference took place in its four main Committees, which dealt with the principal matters to be considered: Scholarships; Teacher Supply; Teacher Training; and Technical Education. Mr. Matthews and I were on the first of these committees, while David Munroe was one of the chief Canadian spokesmen in dealing with the complex and difficult problems which arose in the Committee on Teacher Training. The Canadian delegation met each morning after breakfast, the Committees sat each morning and afternoon, and most of us worked late in the evenings preparing papers and reports for the following day. The mimeographing machines ran all night and deposited large bundles of material into our mail boxes at breakfast time. We did not have an idle moment.

Commonwealth Scholarships Plan

The purpose of the Conference was to implement the plan agreed to by the Commonwealth Trade and Finance Ministers at Montreal in September, 1958, to set up one thousand scholarships for study within the Commonwealth. In presenting the report of the Education Conference at its closing session in Oxford on July 28, the Conference Chairman, Sir Philip Morris of Bristol University, described the decisions reached as a constructive effort to share the educational resources of the Commonwealth to even greater common advantage. Only through education in the deeper and wider sense, he said, can the good life and happiness of the 600 million citizens of the Commonwealth be attained. The Conference agreed that those with more highly developed educational resources have an obligation to help their fellow members. It recognized that "all races and peoples have made their characteristic contribution to the building up of knowledge, culture and values and all have something to give" and its report states that, if its recommendations "are implemented with vigour and determination, all the people of the Commonwealth will reap the benefit, and the bonds which bind the Commonwealth will be strengthened by service given and received."

The most far-reaching of the plans set up at the conference is that which calls for the provision for over 1000 scholarships which will facilitate the regular exchange, in the future, of students within the Commonwealth. Of these 500 are to be provided by the British government for study in the United Kingdom, and 250 by the Canadian government for study in Canada. Most other Commonwealth countries are participating in the plan. The aims and purposes of the Scholarships Plan were described in the report in the following terms:

"We believe that the Commonwealth is founded as much on common ideals as on historical associations. We also believe that the maintenance and strengthening of these common ideals is of supreme importance in building up a good society for all mankind . . . Common ideals in themselves are not enough. They need fertile soil in which to flourish; as the Montreal Conference recognized, economic well-being is an important condition of cultural development . . . In addition to . . . technical assistance, it is vitally important that there should be available to all of our countries the widest range of educational facilities of all kinds. The improvement of education in itself encourages economic growth by increasing the supply of trained people which an economy of growing complexity requires. It also develops in all responsible men and women the qualities of judgment and wisdom, insight and sympathy which become increasingly important as civilization advances ... But educational interchange between all the countries of the Commonwealth is essential if we are all to get the best out of the Plan and to share to the full the benefits of the special experience and facilities which our countries possess. Each has something to learn from the others; each has something to give. If the Plan is to achieve its purpose, we must bring about the widest possible variety of cultural exchange between all parts of the Commonwealth and so facilitate the development of a multilateral trade in ideas."

The scholarships are designed to recognize and promote the highest standards of intellectual achievement. In the main they will be awarded for post-graduate study or research. A limited number will be awarded to senior scholars of established reputation and achievement who will be designated "Commonwealth Visiting Fellows". It is intended that the awards shall be made by the country receiving the scholar. In each country a special agency will be set up for the purpose of appointing scholars and to assist in the handling of applications for awards offered in other Commonwealth countries. It is expected that these agencies will be independent bodies, on which the university community will be represented.

Other Educational Needs

The Conference recognized that the provision of advanced training for the future leaders of educational and public life was by itself insufficient for the present educational needs of the Commonwealth. The gaps that must be filled, in the underdeveloped countries, in the provision of trained technicians, in the training and provision of teachers in the field of elementary and secondary education, and in learning to apply the latest and most effective techniques in mass education, remain the most immediate and pressing problem. Accordingly, the Conference devoted much of its time to studying the ways by which the present assistance from the more advanced to the underdeveloped countries of technical assistance could be increased and improved. Special attention was given to improving facilities for the training of teachers, for increasing the supply of teachers, and improving the facilities for technical education.

Already, under the Colombo Plan and similar programmes, Canada is making a considerable contribution in these matters. Arrangements were made at the Conference for increased contributions of facilities and special skills to meet the urgent needs of the underdeveloped sister countries of the Commonwealth. Much useful information was gained in re-evaluating existing programmes by direct discussion of problems and experiences of receiving countries.

The nature of the expanded programme of technical assistance is hard to particularize, since it is simply an expansion of programmes already under way. But in it, as in the Scholarships Plan, Canada will play an important part. ▼

Graduates' Society Nominations

The following nominations have been submitted by the Nominating Committee, and approved by the Board of Directors of the Graduates' Society for consideration by the membership at large.

Additional nominations for any office, signed by at least fifteen members of the Society entitled to vote, shall also be placed on the ballot by the Secretary if received by him before December the 31st., 1959.

For President: — term 1 year:

ALAN D. McCALL, B.Sc. '24, President of Drummond, McCall Ltd.; Director of Canadian Iron Foundries Ltd.; Director, Paton Manufacturing Ltd.; Past President, Boys' Clubs of Canada; a former member of the Graduates' Society Council and Alma Mater Fund Committee.

For Alumnae Vice-President: — term 1 year:

MRS. GAVIN GRAHAM (Thelma Mitchell) B.A. '32; Past President of the Alumnae Society of McGill University; Mrs. Graham is Vice-President of the Women's Auxiliary of the Montreal General Hospital and has been active with this organization for several years.

For Honorary Secretary: — term 2 years:

ROBERT F. SHAW, B.Eng. '33, Vice-President of the Foundation Co. of Canada Ltd.; Director of Construction Equipment Co.; Foundation of Canada Engineering Corporation Ltd.; and a member of the Board of Directors of the Graduates' Society 1957-'59. During his term of office Mr. Shaw served as chairman of the Graduates' Society Reunions Committee.

For 1st Vice-Pres.: — term 1 year:

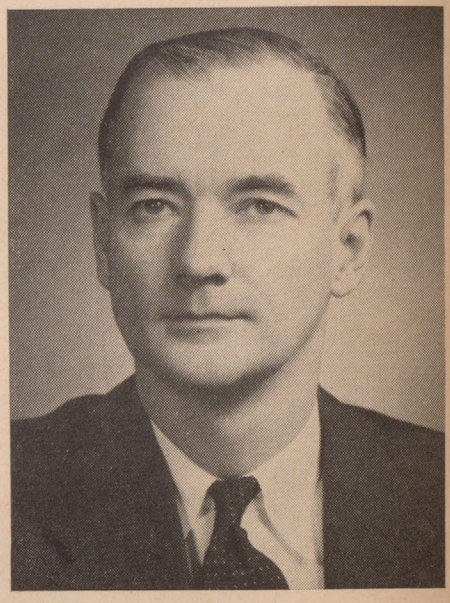

THE HON. MR. JUSTICE G. MILLER HYDE, B.A. '26, B.C.L. '29, Judge of the Court of Queens Bench, (Appeal side); Province of Quebec; Member of the Board of Management of Montreal General Hospital; Governor of Trinity College School; and a former Director of the Graduates' Society. The Hon. Mr. Justice Hyde has been active with the Graduates' Society for a number of years and has represented the Society on the Students Open House Committee in '56 and again in '59.

For Honorary Treasurer: — term 2 years:

JOHN F. CLOSE, B.Com. '33, B.Sc (Economics) London '40, C. A. Treasurer of the Royal Trust Co.; Mr. Close has been active with the McGill Society of Montreal having served on the Council of the McGill Society of Montreal as Executive Vice-President and as President of the McGill Society of Montreal in 1954 and '55.

PAUL S. SMITH, Q.C. B.A. '26, B.C.L. '29, Vice-President and Secretary of the Dominion Rubber Co. Ltd.; Director of the Industrial, Public Relations, and Legal Departments of the Company. Paul Smith has been a Graduates' Society representative on the McGill Placement Board during the past year.

For 2nd Vice-Pres.: — term 1 year:

CHARLES H. PETERS, B.A. '28, President of the Gazette; President Canadian Press 1958-1960; Director of Canadian Daily Newspapers Publishers Association; Delegate to the Commonwealth Press Meetings held in Great Britain in 1946 and in Australia in 1955.

T. R. DURLEY, B.Sc. '28, Assistant to the Vice-President and Engineer of the Manufacturers Mutual Fire Insurance Co.; "Tim" Durley is on the retired list of Officers as Commander (L) R.C.N. (R) and is active in the Navy League of Canada being a member of the Board of Management, National Council and President of the Quebec Division.

J. GILBERT TURNER, M.D., C.M. '32, M.Sc. '47 (Columbia, in Hospital Administration;) Executive Director of the Royal Victoria Hospital since 1947. During World War II, Dr. Turner saw service with the R.C.A.F. Medical Services 1940-'46 as Principal Medical Officer Eastern Air Command

with the rank of Wing Commander on discharge. Dr. Turner is a member of the Executive Committee of the Quebec Hospital Association and Delegate at large of the American Hospital Association. He has also been President of the Canadian Hospital Association 1955-'57; President of the Montreal Hospital Council 1958-'59; Trustee, American Hospital Association 1952-'55; Fellow of the American College of Hospital Administration; Member General Council, Canadian Medical Association 1955-'59.

MONTY BERGER, B.A. '39, M.S. '40 (Columbia). Director of Public Relations Canadian Industries Ltd. Monty Berger served overseas with the R.C.A.F. 1941-'45 and was the first R.C.A.F. ground officer to land in Normandy on "D" Day plus one. He has been Editor of the McGill News since 1957. He is a Director of the Montreal Festivals; Canadian District Chairman Public Relations Society of America and has held office in numerous professional and community organizations.

RALPH M. JOHNSON, B.Eng. '49, P.Eng. M.E.I.C. District Sales Manager, Canada Cement Co. Ottawa; Governor, Trinity College School, Port Hope.

During the Second World War, served with the R.C.A.F. 1940-'45 as a Flight Lieutenant; he is President of Engineering '49 and a First Vice-President of the Ottawa Valley Society of McGill University.

Annual Meeting

Notice of Annual Meeting.

Notice is hereby given that the Annual General Meeting of the Graduates' Society will take place as follows:—

DATE: Thursday, February 25, 1960.

TIME: 5:30 p.m.

PLACE: Redpath Hall, McGill University, (Formerly the reading room of the Redpath Library).

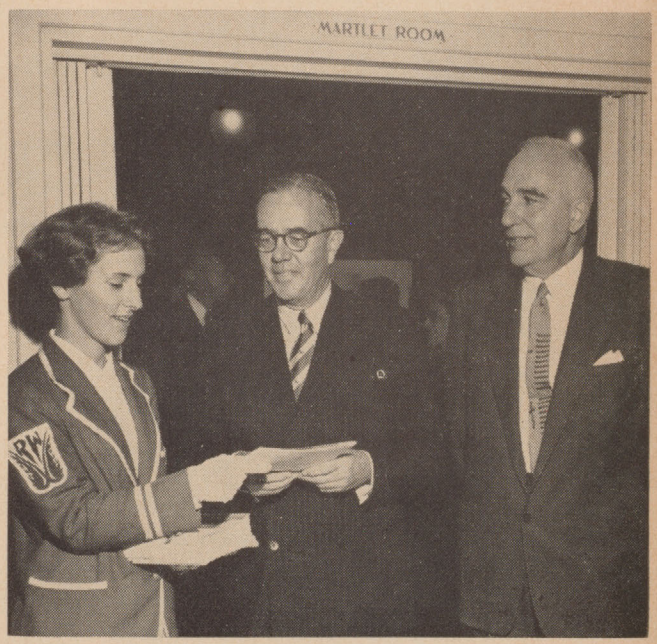

The work of the Society during the past year will be reviewed and audited financial statements will be presented; amendments to the By-Laws will be placed before the meeting for confirmation. The newly elected officers will be installed.

JAMES O'HALLORAN,
Honorary Secretary.

Martlet House Opening

Arriving for the official opening of "Martlet House": architect Jim Woolven, responsible for the redecorating; Dave Tennant, president of the Montreal branch, Dr. John Moore, director of the School of Social Work, Scarlet Key representative.

A Red Wing hands a booklet on the Graduates Society to next president, Alan McCall, while president Stuart Finlayson looks on.

Dr. F. Cyril James, after unveiling the plaque officially opening Martlet House, shakes hands with Mr. Finlayson.

Pity the poor football coach!

The day-to-day trials and tribulations in building the "this is our year" team

by Harry E. Griffiths
Director of Athletics

THE MAJORITY of graduates inquiring about sports generally want to know what kind of a Football team McGill is going to field. It invites disappointment to advise them that we will only have an inexperienced team or a contender. Real enthusiasm is evident if the prediction is: "This is our year".

Unfortunately James McGill couldn't have been thinking about football championships when he chose the site for the Royal Institution for the Advancement of Learning in Montreal. Up to this point, Quebec has not been the home province of the majority of college football heroes, nor has it been the birthplace of the majority of McGill Senior gridders. Take a look at the statistics for 1958, the latest year available. They show the number of male students at McGill from each province in Canada, and the U.S.A.; and those from each of these localities who made a place on the "Redmen" football team. Approximately 30% of our football team learned their football in the province of Quebec.

	Male students enrolled at McGill	*Senior Footballers 1958*
Quebec	3800	10
Ontario	395	10
U.S.A.	320	8
Nova Scotia . .	53	2
New Brunswick .	47	1
Saskatchewan . .	31	1
Manitoba . . .	26	1
B.C.	38	0
Alberta	20	0

Mc Gill would like to win its share of football championships and proudly display the Yates trophy in the Sir Arthur Currie Gymnasium foyer. However, the odds are against it happening often if we examine the statistics and observe the geographical sources for football material. It isn't likely that a university which does not offer athletic scholarships will be highly successful on the gridiron unless suitable player material is found within the province in which the institution is located.

In Ontario high schools there are 258 senior football teams; we can draw from only 14 in Quebec. And in Ontario the boys are bigger and stronger, graduating at Grade 13, as against Grade 11 in Quebec.

As interested graduates study these statistics, they will probably conclude that scouting and recruiting programs could bring in more talent. This may be the answer; however, we must depend on our alumni to execute such a plan successfully — in most instances, the athletics staff are too few and often too far from the scene to achieve positive results.

Within the Montreal area, because of the cooperation of the principals and coaches of the various high schools, we are aware of most of the prospects who are capable footballers and have met the high academic standards required to enter McGill. There are few student athletes who have an average of 70% on their matriculation and who could hold a place on the "Redmen" football squad. They therefore leave Montreal to pursue their studies elsewhere.

Many cases have been brought to our attention and investigation generally shows that the boys in question went to other universities because they lacked the required academic standing to enter McGill. Although we are grateful for any material coming from the western and Maritime provinces, our statistics indicates that there is not enough of it.

While dealing with statistics, it may be of interest to see a breakdown of our footballers by faculty. It indicates

that footballers cannot be associated with any particular profession.

Arts 4	Science 2	Commerce 2
Dentistry 8	Medicine 5	Eng. 6
Phys.Ed. 2	Arch. 1	Soc. Work 1
Law 1	Divinity 1	

Last April McGill had the "This-is-our-year team". However, a few academic casualties were apparent when examination results were published. When you have the team to beat, you have depth; consequently, losing three players didn't change the positive feeling that this would be our year for the Yates trophy.

Most of our players were returning with additional experience and were a year older. In addition, Carl Hansen, the fleet halfback from Hamilton College, New York, and Rae Brown, a sturdy tackle at 245 lbs., both having been named to the Intercollegiate All Star team in 1957, were returning after a year's absence. Tom Skypeck, who was rated Cornell's most versatile quarterback in a decade (6'2" 210 lbs.) would be passing to Dan Fanning (215 lbs. 6' 5"), an All New England end. Ed deGraw, a regular guard from Boston college would be teaming with Paul Harasimowicz (240 lbs.), a 1958 All Star Intercollegiate tackle, to form a formidable defensive and offensive weapon. Tom Stefl, 220 lbs., a former Maryland guard who sat it out at McGill last year due to a technicality in our eligibility regulations, was raring to go and was looking forward to teaming with Leo Konyk, Chuck Arnold and Mike Byrne. McGill certainly had the team, but that was last April.

The summer passed and bad news was in store for us. Here are extracts from a few letters received:

Tom Skypeck: "I am one credit short of receiving a Degree. Will this effect my football eligibility next fall?" (Yes).

Dan Fanning: "I have been accepted into third year Engineering at McGill but my relatives would like to have me complete my education in the U.S.A. It is therefore doubtful that I shall be with the Redmen football team this fall."

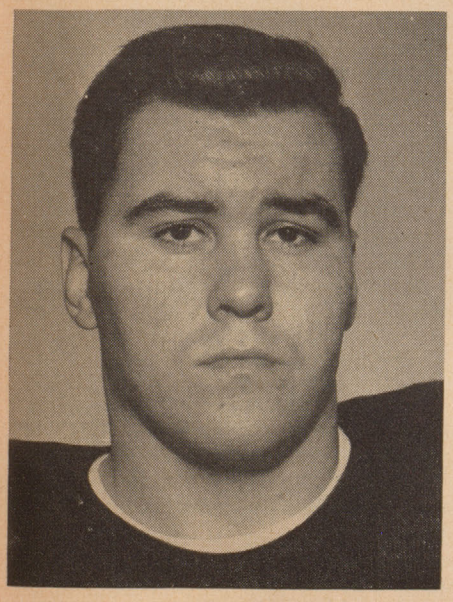

Ed deGraw: "In addition to the attractive bursary which I received to continue research work in Chemistry, I have been offered the position of assistant freshmen football coach at Boston College. The combination is most attractive and I feel that it would be to my advantage to continue studies in the States."

Mike Byrne: A friend speaks for him: "Mike must be put on the doubtful list as he was recently married and is not too sure whether Architecture, married life and football will all combine to make a pleasant fall."

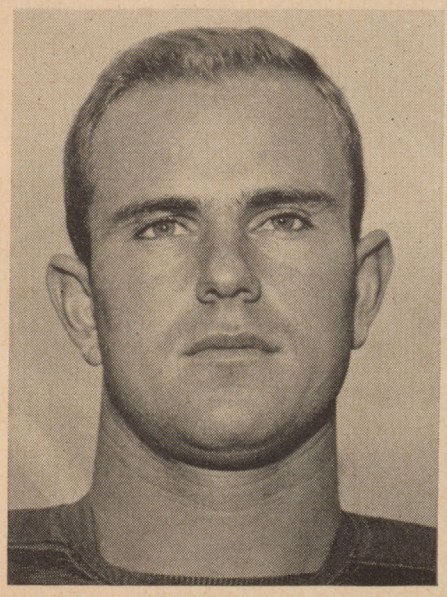

Chuck Arnold: "I will be entering fourth year Medicine and was recently married. I regret to advise you that I will not be turning out for football this fall."

There is no reason to believe that bad news like this will continue to come into our office, and we are hoping to field a good team next fall. In fact, I'm getting ready to say — you guessed it — "This will be our year!"

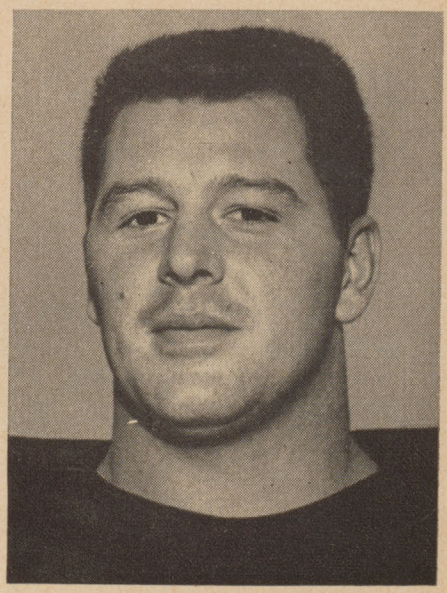

McGill Redmen Selected As Intercollegiate All-Stars This Year

WHAT HEARS the MARTLET

Vice-Principal in New Brunswick

DR. David L. Thomson, Vice-Principal and Dean of Graduate Studies and Research at McGill, addressed the annual dinner-meeting of the New Brunswick branch of the McGill Graduates' Society in Saint John this fall.

The meeting was held under the chairmanship of Dr. Cecil H. Turner and a good number of graduates and their families from in and near Saint John attended the meeting and enjoyed Dean Thomson's remarks on McGill's activities.

Joan Marsters Fund

THE Reunion Committee of RVC '29 have been collecting for the McGill Alumnae Scholarship Fund "In Memory of Joan Marsters", one of their class members who died, suddenly, while visiting Rome this summer.

At the time of going to press, the committee had received the sum of $370.00.

Kellogg Grant

AS a basis for the long-range strengthening and expansion of its program of dental education and research, the Faculty of Dentistry will use a $60,000 commitment from the W. K. Kellogg Foundation to meet a portion of the salaries of two additional full-time teachers.

Through a five-year period, the annual payments from the Foundation will be in decreasing amounts, with the University gradually assuming a greater portion of the salary load and after the fifth year assuming full responsibility for the salaries. The added full-time teachers are for the areas of Oral Surgery and Denture Prosthesis. During the past few years, a Consultation and Accreditation Program, carried on by the Council on Dental Education of the Canadian Dental Association and financed partly by the Foundation, led to many advances in dental education — from curriculum to physical plant — related directly to recommendations from the CDA survey team reports. These reports and the implementation of improvement recommended therein led to the eventual accreditation of all of Canada's dental schools, and the additional full-time teachers will enable McGill to comply with another recommendation from the broad-gauged survey program.

Thoughtful Med Students

THE members of the class of Medicine 1960 have devised a unique plan aimed at swelling McGill's funds in years to come.

The investment program will run over the next 25 years, at the end of which time the class of '60 will present their Faculty with a gift of $100,000. Every member of the class, a total of 96, is taking part in the contributory program, conceived and initiated by three of their number: Robert E. Becker, New York, chairman of the investment committee; Robert Fortuine, Surry, Maine, President of the Class and John Rosenberger, Cleveland, Ohio, President of the Medical Undergraduate Society.

The class arrived at the conclusion that in addition to the annual gifts embodied in the Alma Mater Fund, McGill was in need of substantial endowment funds as well. In explaining their program, Mr. Becker said: "In tribute to the excellent instruction we have been receiving at McGill, and in recognition of the needs of the medical faculty, it was our desire to work out a program which would permit us to provide a generous endowment fund for the use of the medical faculty upon our 25th anniversary of graduation". Mr. Becker explained that the $100,000 gift would be equivalent to the interest on an endowment of $2,000,000.

A special investment committee has been elected for a five-year term and in conjunction with representatives of the Graduates' Society of McGill University, they will act as trustees for the fund.

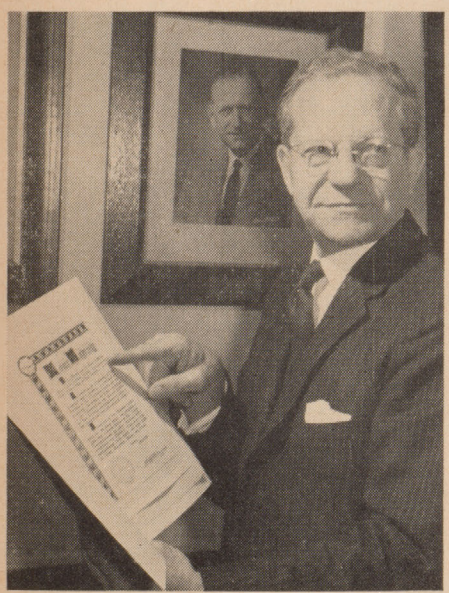

Since the plan started, there has been 100 per cent participation of the class. There has also been interest expressed by the class of '61 in following the example of their seniors.

The Hon. Brooke Claxton, receiving the degree of Doctor of Laws at the University of Saskatchewan.

Hon. Brooke Claxton

THE Hon Brooke Claxton, BCL '21, former Liberal Minister of National Defense, and at present chairman of the Canada Council, was honored this fall by the University of Saskatchewan, where he received an honorary degree, also by the University of Alberta which granted him an honorary degree in absentia.

H. E. Herschorn, BA '11, BCL '14, recently elected president of the Royal Life Saving Society, Canada, shown here with the scroll which he presented on behalf of the Society to Her Majesty the Queen on her visit to Montreal.

Mr. Claxton received an honorary doctor of laws degree from McGill in 1951.

Founder's Day

Founder's Day celebrations were combined this year with ceremonies marking the twenty-fifth anniversary of the Montreal Neurological Institute.

Dr. Wilder Penfield, director of the MNI, delivered the convocation address and two fellows of the institute who carried out postgraduate studies here and then went on to fame, received honorary DSc degrees. They were Dr. Dorothy Russell of London, England and Dr. Jerszy Chorobski of Warsaw, Poland.

Also honored on Founder's Day were two McGill graduates, David Johnson, Canadian ambassador to Russia, and Dr. John James Ower, pathologist. They received LLD degrees.

Off the Press . . .

Gerald Clark, BSc '39, distinguished foreign correspondent of *The Montreal Star*, is winning critical acclaim for outstanding reporting and analysis in his book, just published, *The Impatient Giant: Red China Today*.

An unusual contribution is made to an important segment of society today in *Hospital Trusteeship*, an authoritative work by Dr. Charles U. Letourneau, O.B.E., MD '37, BCL '48, Director of Hospital Administration, Northwestern University.

A new volume of poetry, *The McGill Chap Book*, just being published by Ryerson, is a collection of works by McGill student poets.

Voters and Education

DR. Alfred B. Udow, BA '39, MSc '40, engaged recently in a unique public service for his community of Great Neck, L.I., when he conducted a survey for the local Education Association to determine why citizens voted down the education budget in May by a 60-40 margin and seven weeks later passed it by almost the same margin.

Main conclusions of the study: Citizens of Great Neck "know little about the issues they debated hotly in the budget fight and even less about the workings of their schools."

Dr. Udow is research director of one of the large New York advertising agencies.

Such findings, unfortunately, would apply to almost any community on this continent.

David Johnson BA '23, Canadian ambassador to Russia receives honorary degree at fall convocation. Chancellor Powell looks on.

Miss Eileen Flanagan, Director of Nursing, Montreal Neurological Institute, with Dr. and Mrs. Haddad of Beirut.

Mrs. Wilder Penfield chats with visitors to Montreal Neurological Institute's anniversary celebrations.

Dr. William W. Francis 1878-1959

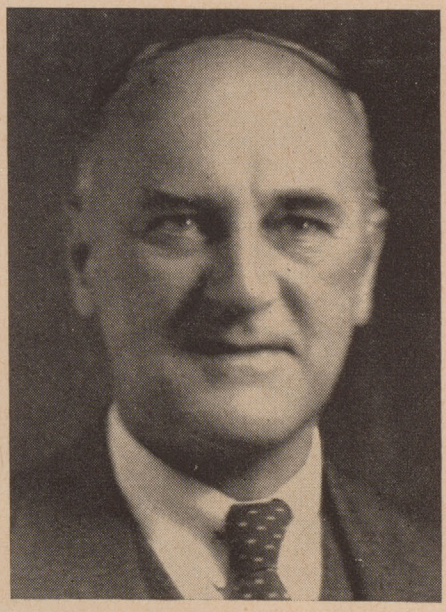

by H. E. MacDermot

Dr. Francis died this summer and will be greatly missed by many friends as well as visitors to the Osler Library, of which he was Curator for the past forty years.

THREE years ago the Osler Society of McGill presented Dr. Francis with a volume of *Tributes From His Friends.* It was a most happy idea and gave him intense pleasure. In a sense the book was biographical, for it mirrored both the general high regard for his unusual scholarly powers and the affection of his friends. Others, however, may not immediately appreciate just why Dr. Francis came to fill such a large place in the world of learning. His work lay in the field of bibliography and medical history, which may sound too narrowly specialized to be of general appeal or influence; and his actual output of writing was small. But with "a waking eye, a prying mind" specialism becomes a key to many doors; and so far as writing is concerned volume may be misleading. One never thought of him as a specialist; he had deeply rooted knowledge, but it was derived from many sources.

He seemed to grow only slowly to the full maturity of his powers. Born in Montreal in 1878 he was educated at Trinity College School, Port Hope, and took his degrees in Arts and Medicine at Johns Hopkins University in 1898 and 1902 respectively. After two years of internship at the Royal Victoria Hospital, Montreal, he followed the custom of the day in studying abroad in England and on the Continent. He began practice in Montreal in 1906, but illness forced him to discontinue this, and in 1912 he turned to editorial work on the *Canadian Medical Association Journal*, under Dr. (later, Sir) Andrew Macphail, then editor. In 1915 he went overseas with No. 3 Canadian General Hospital, as its registrar.

After the war came the culmination of his long, intimate association with Sir William Osler, his mother's first cousin and always "Uncle Willie" to the Francis children among whom William Willoughby was his great favourite. Osler died in 1919, leaving his

Dr. W. W. Francis

famous library to McGill, with Dr. Francis as its librarian. Who else could have been as happy a choice? He knew the books as if they were his own, and he brought to their interpretation a scholarship truly worthy of such a noble collection.

For seven years he laboured at Oxford in the Osler home as chief editor# of the *Bibliotheca Osleriana*, the catalogue designed by Osler for his library, and one to which the word "unique" amongst its kind may quite properly be applied; the very production of the book deserves a history to itself. In 1929 the Library arrived at McGill. An apocryphal story describes Bill Francis sitting on the wharf surrounded by the 88 packing cases of books, waiting for the boat to come and take them. And who would be less likely than he to show a "nicely calculated less or more" devotion in the guardianship of such an incomparable treasure.

Happy Atmosphere

That the Library should attract international attention was to be expected; it was a collection unrivalled in many respects. But it was the warm and generous nature of its librarian that created the happy atmosphere so pleasantly familiar to its multitudes of visitors. And it was he who continually recreated the vivid personality of its founder, his great kinsman.

No one dispensed learning with less ostentation or with more perfect amiability than Bill Francis; he truly displayed the "aequanimitas" so finely described by Osler in his famous essay. He made sure of having a Visitors' Book for the Library from the very first day of its being opened. What a striking muster of names from all fields of learning it contains, and scattered through it are his occasional pencilled comments on those specially associated with Osler.

He gives elsewhere in his own humorous style the following description of one visit in particular:

"When Tweedsmuir (John Buchan) as Governor General paid his first offi-

The other two were Mr. R. H. Hill, who became librarian of the National Central Library, London; and Dr. Archibald Malloch, who became librarian of the New York Academy of Medicine.

cial visit as Visitor to McGill he was given a dinner in the Assembly Hall of the Medical Building. I suggested to the Dean that T. was the sort of man that would be interested, and that I should be on duty upstairs. The idea was poohpoohed. The first thing T. asked was to be shown the Osler Library, and they had to make excuses.

"Not long afterwards I heard from an A.D.C. that the G.G. was to be in Montreal on 15 February, 1936, that 5.30 to 6 had been set aside for a private visit to the Osler Library, and that I was to tell no one. There was an unregal delay; he arrived after 6 and had only ten minutes.

"He was chiefly interested in the Brownes, which he collected himself, and asked to see the edition of a posthumous work which was dedicated to his ancestor, "the mad Earl of Buchan". The second book I got from the shelves was the rare first edition of 'Christian Morals', 1716, which he had never had a sight of before. He read through the dedication by Browne's daughter, Elizabeth Lyttelton, whom I think he also claimed as a forebear. He told me that one of the main reasons for his settling near Oxford in 1919 was to be near Osler whom he had once talked to and had always hoped to meet again, but never got another opportunity.

"Next day the Registrar, Dean, *et al.* demanded why I had neglected to notify them, and it was with smug satisfaction that I answered, 'Visitor's orders.' "

Like Osler, Bill Francis was a master of the art of letter-writing, and especially of short notes, slangy, witty, often in rhyme. Some day these should be brought together and published — with judicious editing! He sent special letters (typing them himself, with all his oddities) to every one of the 39 contributors to the Tributes. "Yours . . ." he wrote to me, "fills me with unearned pride. And why shouldn't I put on the dog? Didn't the Principal AND Vice-chancellor write me as 'Dear Bill', *manu propria?* both of him." His comment on my saying in my tribute that I had never brought him a sentence which he did not improve, was: "Never a sentence which I did not improve makes me feel like a Goldfishsmith epitaphed by Johnson . . ." And finally, because I had suggested his writing a "Religio Bibliothecarii" he says: "But though I've somehow inspired 39 illusory eulogies, please spare me the writing of a Religio,

A task that would make life precarious

For Osler's bibliothecarius."

Medicine 1909 FRONT ROW (left to right) Charles Cron, Albert Branley-Moore, John James Owes, David H. Ballon. BACK ROW: Lionel M. Lindsay, C. Ernest Cross.

To his knowledge of books was added an instinct for clearing up the intriguing obscurities that are apt to gather around them. One of these concerned the Library copy of Burton's *Anatomy of Melancholy*. This has an inscription showing that it had belonged to "Alexander Boswell/L.B.: 1728". There was not much doubt that this was the father of Johnson's biographer, but the letters "L.B." were a mystery until Dr. Francis suggested that they probably stood for "Lugduni Batavorum" (Leyden University). It was known that Boswell senior had been a student at Leyden in that year.

One last piece of his work should be mentioned; it was literally the "last" as he had only just completed it before his death. This was the translation from the Latin of the graduation thesis of Dr. John Stephenson, one of the four founders of the Montreal General Hospital, and the first registrar of the McGill Medical Faculty. The thesis, submitted for his medical degree at Edinburgh in 1820, is entitled *De Velosynthesi*, that is, on the repair of cleft palate, a malformation from which Stephenson himself suffered. He had been operated on for this in Paris by Professor Roux, and his is believed to have been the first case in which the operation was successfully performed.

The thesis belongs to the Medical Library, but until this labour of love by Dr. Francis no one had ever gone through it. Now, with its translation, it is to be ceremoniously exhibited as an item of unusual historical interest at an international conference dealing with plastic surgery, to be held in Montreal in 1961.

Bill never allowed himself to be hurried; his seven years' labour on the Catalogue was an example of that; the result, too, was an example, of unsurpassed accuracy and pleasing, solid workmanship. I prefer to avoid using the somewhat overworked term "meticulous", but if it implies carefulness, exactitude, patience, and anxiety for the truth—almost anything rather than haste — then it may be applied to him.

His work gave him much opportunity for criticism, but he had a wide charity which " was not easily provoked and thought no evil": and with this he had a sturdiness of character which soon made one realize that he was not to be persuaded against his judgment. Of the many tributes—affectionate, admiring, respectful — in his special presentation volume, I think one of the best was that sent by the headmaster of his old school:

"Magni doctors umbra, iustus, et rei studiosus; vir; filius delectissimus Collegii Trinitatis Scholae.

"His torch was lighted at the infinite and steadfast will remain".

Spotlight on Marriage Problems

McGill School of Social Work takes the lead in studies on Family Stress

A crucial concern for the problems of marriage and family living has long been the hallmark of professional social work and social work education at the McGill University School of Social Work.

Personal and family problems are a normal part of living in our complicated modern world. Vast technological change, increased urbanization, the changed role of women in society, the younger age of marriage, and the smaller more isolated family—all these are among the factors inevitably imposing additional stress on the family today. In the face of such stress, family members in increasing numbers seek professional help with such problems as: "Are we ready for marriage?", "Our life is changed since the baby came—", "Is this marriage right?", "He doesn't even listen when I talk to him", or "She nags me so much that I've learned to close my ear".

In response to this increased demand for help, a new professional entity has emerged — the profession of marriage counselling. A professional organization, The American Association of Marriage Counsellors, represents the professional platform and meeting ground for social workers, educators, physicians, lawyers, ministers and psychologists who are engaged in marriage counselling. In the United States, over the years, there have been established a number of formal training programmes for marriage counsellors.

In Canada, until recently, no similar formal post-graduate training programme existed. However, in 1957, following close collaboration with the newly created Marriage Counselling Centre of Montreal, the first of its kind in Canada, the McGill University School of Social Work initiated a post-graduate course entitled "Advanced counselling, with an Emphasis on Marital Conflict", under the leadership of

Prof. Dorothy Freeman. This course was designed to further the skills of a select group of social work practitioners as well as to inaugurate a post-masters training programme, one area of which would be marriage and family counselling.

The envisaged programme, emphasizing marital interaction, has already been augmented by a second continuation seminar. Yet another course, stressing comparative approaches to personality and counselling and related to the total post-masters programme, is projected for the second term of the 1959-60 academic session.

Dr. Myer Katz, newly appointed Associate Professor (a professional social worker having completed his doctoral studies in this area) is working closely with Professor Dorothy Freeman in extending the marriage and family counselling area at the post-masters level. Dr. Katz also carries responsibility for the planning of a complete post-masters curriculum which will also afford educational emphases in such developing areas of social work practice as rehabilitations and corrections. These areas, together with marriage counselling, are presenting additional challenge to social work education to broaden the application of knowledge from the behavioural sciences.

Also projected for the second term is an extension course for college students and other young people planning marriage.

Thus, in looking ahead to the development of a formal post-masters programme with one area stressing marriage and family counselling, and through its existing extension programme and staff collaboration with the Marriage Counselling Centre of Montreal, the McGill School continues to demonstrate its concern for both the increasing professional competence of social work practitioners and the strengthening of the family in Canadian life. ▼

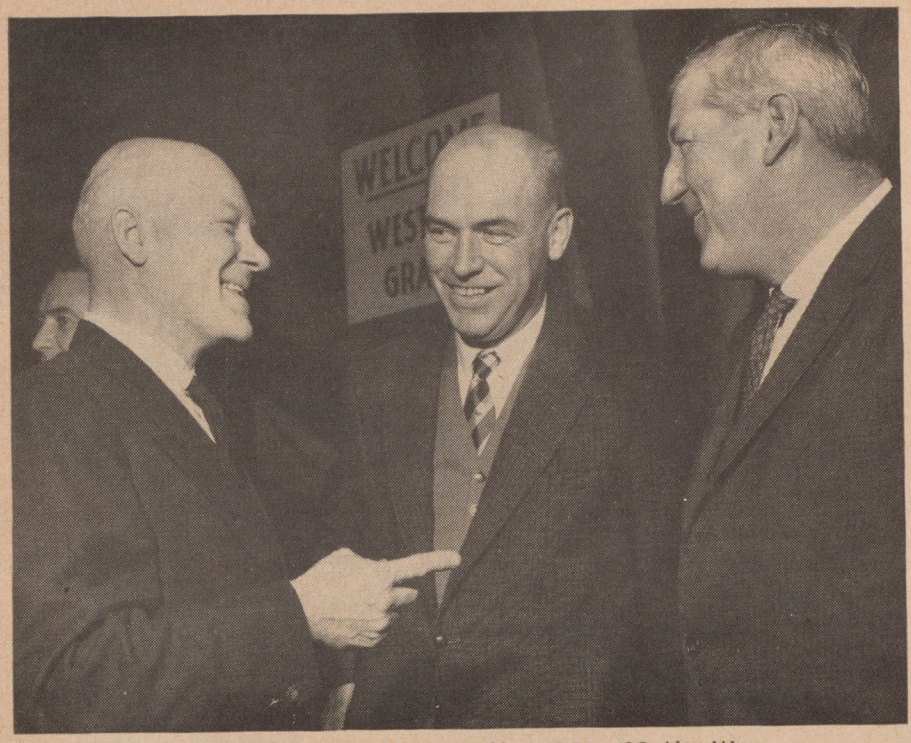

REUNIONS - 1959

On October 23 and 24, over 1200 graduates returned to McGill for their class reunions. It was a happy time, a reminiscent time: old friendships renewed, new ones made, and for everyone — a first-hand view of the McGill of today. It's pretty difficult to give an overall picture of everything that went on at this busy time, but on the following pages we have made a selection of class photographs taken during Reunion Weekend — 1959

— The Editors

A highlight: The football luncheon in the Sir Arthur Curry Memorial Gymnasium.

DURING HOMECOMIN

YOU LOOK pretty good — considering . . . How often that refrain, by the thousand and more graduates swarming in and around the gym, the campus, the new buildings, the old buildings during Homecoming Week-end, October 23 and 24 . . .

Here's one who felt the tug over the 20-year span since leaving McGill . . . and many another volunteered how their normally blasé or cynical outlook was dented by the enjoyment — more than anticipated — of catching up on old friends and profs and former stamping grounds . . .

The new McConnell Engineering Building was the focal point for visiting on the campus . . . and brought a wistful look to the face of many an old Plumber remembering the facilities of bygone days (Ed. note: Not so bygone) . . . the new Redpath Library sleek and sparkling compared with its predecessor . . . for the rest, nostalgia quickly heightened by familiar surroundings, little changed . . .

But the spirit and the curiosity and the enthusiasm were more important. McGill people from anywhere, and everywhere, clearly have a lot to talk about, and a lot to ask. The reunion aspect turned out to be more meaningful than most might have expected . . .

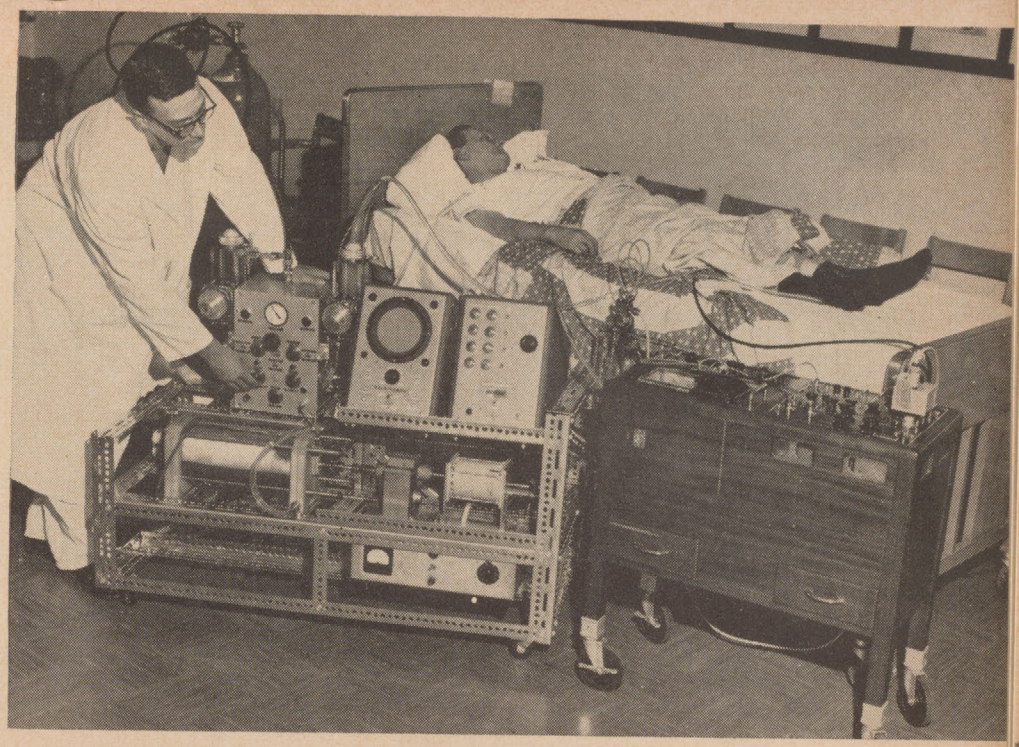

Long queues at the cyclotron . . . a distinguished medical graduate escorting his teen-age son through it after a tour of the Medical Building . . . in fact, many a grad was giving his — or her — offspring a first taste of the University . . . one graduate looking for graduates living in Fredericton, where he now visits regularly . . .

Grads Society staff running ragged to cope with more—by far—showing up for pre-football lunch than originally booked . . . Herb Westman looking as though he could get out and still boot that ball as he used to . . . a soggy football field, and a rather soggy Big Red Team . . . they had a lot, but not quite enough that day: close but no cigar — familiar refrain . . .

Graduates-to-be: The devoted parents who motored from Boston at

...on Studies, shows visitors to the Physics Build-...Weather lab.

Technician Pierre Morin demonstrates the circulatory assistor pump to be used to treat cases of coronary artery heart disease in shock. This new unit developed by the RVH operating team under the leadership of Dr. Arthur Vineberg, was shown to the public for the first time during McGill Open House.

Mr. and Mrs. Timur Jaylani, recent graduates of McGill's School of Islamic Studies, visit Open House exhibits.

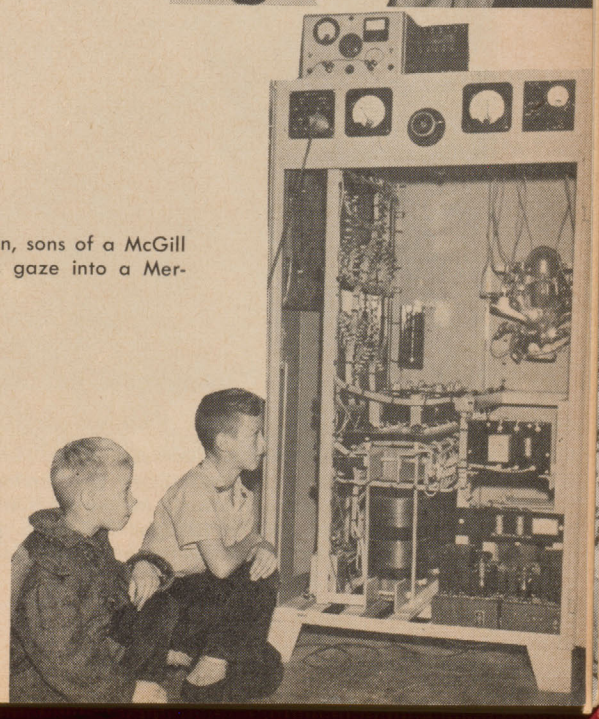

...WEEKEND....

by mub

dawn to see their daughter perform in the band, and sat out the game in the rain . . . Continuing the reunion spirit: One old grad to an older grad settling the site for a duck-hunting weekend . . . Many a grad from distant places — Virginia, Ohio, New York, Arvida . . .

Festive and warming, the Principal's Reception in Redpath Hall (the former library) after the game . . . and the Principal's hand-shake firm to the end . . .

The harrassed commercial photographer, muttering about 50 class pictures to take, paused long enough to pay tribute to the nine of Med '04 and Med '09: "They showed enough life to put the rest of you to shame." ▼

Fritz and Albert Klein, sons of a McGill chemistry technician, gaze into a Mercury Rectifier.

COMMERCE '29

Seated (left to right): Harry Sinclair, C. Albert Burk, William Consiglio, Harold U. Banks, I. Messinger. Standing (left to right): Hyman Freedman, Andrew W. D. Swan, Roderick D. Macleay, I. R. Weinstein, Harry Abramovitch, Charles Hyman, Peter S. Wise, Carew Temple-Hill, Saul Miller, W. H. Budden, Samuel S. Feiner. Also present, but arrived after picture was taken: David P. Aber, Edgar R. Brodhead.

R.V.C. '24

Front Row (left to right): Miss D. Vernon Ross, Miss E. Massy-Bayly, Mrs. D. H. Woodhouse (Helena Thomson), Mrs. W. D. H. Buchanan (Gwen Feilders), Mrs. Frank Campbell (Emmy Lou Herzberg). Second Row: Miss Jean Matheson, Mrs. Davidson Ketchum (Dr. Katherine Dawson), Miss E. D. Russel (Eileen), Miss C. M. Morton (Christina), Miss Ruth M. Fergusson, Mrs. Chas. D. Evans (Phyllis Murray), Mrs. Otto Maass (Carol Robertson). Third Row: Miss S. Thorna Rountree, Mrs. A. L. Rothwell (Maud Dobbie), Miss Meredith H. Dyke, Mrs. J. J. Harold (Eileen Basken), Mrs. W. Roland Kennedy (Helen Gillies), Dr. Florence Johnston.

SCIENCE '29

Left to right Standing: Bob Hamilton, Prof. J. A. Coote, Jim Crawford, Bill Rosenbloom, Ky Taggart, Prof. G. A. Wallace, Jack Lynde, Ken Chisholm, Hugh Montgomery, John Legg, Alex Grant, Fred Clarke, Tom Doherty, Fred Weldon, Ernie Viberg, Mr. Stephens. Seated: Prof. R. E. Jamieson, Eric Jacobsen, John Sargent, Bill Cramp, Tom Gavin, Charlie Judson, Mr. Slattery, Herm Eberts.

DENTISTRY '24

Front Row (left to right): M. H. Toker (Class Secretary), W. S. Swetnam, Campbell Morris (Class President). Other Rows (Left to right): C. R. E. Cassidy, S. Hershon, A. W. Hyndman, A. D. Richardson, H. E. Purcell (Huntingdon, P. Q.), Henry T. Brown, Frank Radway (London, Ont.).

54TH DINNER OF SCIENCE 1912

Beginning in 1931, this class has held a Spring and Fall dinner meeting every year. At their 45th Anniversary, 32 were present, some from California. The above picture was taken at the Fall dinner this year, which was their 54th gathering. Front Row: l. to r.: Bruce Robb, A. B. McEwen, D. A. Shaw, John McNiven, E. A. Ryan, J. H. Wheatley. Second Row: l. to r.: A. F. Duquid, Ralph Skelton, P. H. Skelton, E. J. Gohier, J. A. Kearns, M. A. Downes, E. A. Lockhart, C. K. McLeod, A. N. Scott, W. M. Bolan, F. S. B. Howard.

R.V.C. '19

Front Row (left to right:) Mrs. M. Kirsch (Ruth Solomon), Miss HelenHague, Mrs. R. R. Bogie (Florence MacLaren), Mrs. J. Odell (Mary Taylor), Miss Bertha Baker, Mrs. David Proudfoot (Marion Lindsay). Back Row (left to right): Mrs. G. W. Bourke (Beatrice Mitchell), Mrs. J. Whyte McCammon (Nora Morgan), Mrs. L. Harrison (Gwynett Craig), Mrs. L. Terrill (Betty Abbott), Miss Elizabeth Monk, Miss Gladys Banfill, Mrs. Allan Smart (Doris Lewis).

Travels of a Martlet in the Wild West

by Rowan C. Coleman,
Director, Placement Service

LAST spring I was ordered West by the Placement Committee in furtherance of our relentless campaign to ensure that every company in Canada is entirely in the hands of a McGill-trained management. In due course there came forth a suggestion from Martlet House, beneath whose frowning battlements we crouch, that this trip might be combined with a visit to some of the branches of the Society. So, early in June I trotted down to Windsor Station to board the steamcars carrying my possessions in a red and white bandana, armed with five hundred yards of railway tickets, and wearing a large tag telling kindly-disposed conductors where to put me off. During a long and disreputable life I have made many journeys, but never such a rewarding one— for me. If there are any sceptics who want to see what McGill means to its sons and daughters, and what their support can mean to McGill, let those sceptics do what I did.

Short notice, summer holidays and the comparative obscurity of such a functionary as the Placement Director did not deter the graduates. Winnipeg, Saskatoon, Edmonton, Calgary, Trail, Vancouver, Victoria, Seattle, San Francisco, Los Angeles, Houston is what railwaymen describe as a "long haul", but it was worth every mile of it.

Caught in the iron grip of the Editor, I have space only to record a few impressions, a statement which will doubtless be greeted with relief, and list a few names, never forgetting for a minute the dozens of other graduates who spread out the "living" University before me.

The following paragraphs, lifted from my diary by a persistent editor, record a few impressions only, a statement which will doubtless be greeted with relief. They list a few names, but the writer will never forget for a minute the dozens of other graduates who spread out the "living" university before him.

Monday, June 18th — Winnipeg, being first on the list, was at a distinct disadvantage. Other plans had been made for another date, and I was the victim of a fixed schedule. But I was royally entertained by Jacques Bernard, and made calls on several individual members, including my old roommate Dick Murray, now General-Manager of the Hudson's Bay Co., and Christopher Flintoft. Here in Winnipeg, which has the honour of being my birthplace, I was on familiar ground, and it was more Placement Service than Graduates' Society.

Thursday, June 11th, Sunday, June 14th — At **Saskatoon** there were no official engagements with the Graduates, as "Brad" Walsh and I were delegates to the Annual Meeting of the University Counselling and Placement Association, the genial trade union for those of us who engage in this fascinating business. Our chests swelled beneath our red and white sweaters when Dean Donald Mordell of Engineering delivered positively the outstanding talk of the entire meeting. Time permitted only one outside visit to another Flintoft — John this time. He is Assistant Superintendent of the C.P.R.

Tuesday, June 16th. Resolutely heading Westward I landed right in the hospitable arms of the **Edmonton** Branch. My destinies were marvellously taken in hand by Thurston Hunt, Tony Salvatore, Don Love and many others. A dinner of over seventy graduates and wives honoured one of the greatest of McGill men, George H. MacDonald, B. Arch '11 who was presented with the certificate of Honorary Life Membership in the Society.

Thursday, June 18th — Calgary, my old stamping ground, was the next stop, and in the hospitable purlieus of the Ranchmens' Club I met a group of stalwarts presided over by Judge Hugh Farthing, devoted graduate and regional vice-president. The distinguished Honorary President of the Branch and former Governor of the University "Ernie" Bowness was present, crackling with all the Western verve familiar to all who know him. He was joined by Fred Wilmot the President, who is married to Carol Giles, Dr. Jim Gibson, Merle and Dr. Alec. Duncan, Bob Bion, Harry Younger, and Dr. John Weyman whose wife was Barbara Tidmarsh. Between visits to Calgary companies which recruit at McGill, I also called on other graduates, notably Dr. "Paddy" Mackid and the ever-whimsical Bill Sellar.

(Continued on page 30)

(*Continued from page 29*)

Wednesday, June 24th — Trail means Dr. Charlie Wright, Dr. Frank Wilson, Dr. Harry Christie, the late S. C. "Monty" Montgomery, and many others. In the famous mountainside city the spirit of "Old McGill" has been kept burnished these many years. We had a most inspiring dinner attended by a large group whose endurance in listening to my harangue was rewarded by socializing and reminiscing in the Wilson's delightful home after the dinner. Here I started filling the first of several notebooks with messages and greetings to be carried forward and backward between classmates and old friends. That's just one of the many functions a visitor can perform.

Friday, June 26th — In **Vancouver** it was Branch President Peggy Marr, with her husband Bill, Bob and Chickie Payne, Gordon Spratt and his wife, Peter and Sheila Candy and young Bill Ellis, who, incidentally, had come all the way from Chilliwack where he is with the R.C.E. At this gathering, as everywhere, there was an eagerness to know what was going on at the University. The larger issues confronting us are ever present in peoples' minds, and there is an equally absorbing interest in the familiar things of campus life, extending even to the quality of the Union coffee!

Monday, June 29th — That most beautiful of short voyages, from Vancouver to **Victoria,** brought me to the old Empress Hotel and there into the hands of that most thoughtful of men, Dr. Hugh Borsman, Med '48. Our activities included a visit to Geoffrey Gilbert, formerly of Trail, in hospital and shortly to be discharged; a McGill luncheon and attendance the next day at a service club luncheon, where I met several graduates including Dr. T. F. Rose, who could not attend our purely McGill gathering. At the latter, apart from Hugh Borsman, I foregathered with Judge Clerihue, Law '11; his daughter Dr. Joyce Clerihue, Med. '53; Brahm Wiseman, Arch. '48; Dr. Hughes Music '25; Dr. W. W. Bell, Med. '23; Dr. Moreau, Dentistry and Guy Blanchet, Engineering whom I last met in 1935 on the North shore of Lake Athabasca. You can change the scene of these functions, but you can never change the spirit. It was there.

Wednesday, July 1st — Over to **Seattle** to be greeted and most hospitably housed during my stay by Dr. Jack Callahan, Med. '42. Nothing could have been more friendly and delightful than the dinner at the Seattle Tennis Club, presided over in splendid style by Dr. Brandt Bede, ably assisted by his good lady Elspeth. I cannot name everyone present, but among those who made it a memorable evening for me were Dr. and Mrs. Wark; Dr. Al. Creighton; Professor Vincent Jolivet; Dr. Bob and Mrs. Hall; Dr. and Mrs. Forbes; Professor and Mrs. Behrman and their daughter; Barbara Hampson, the indefatigable secretary, and her husband Dr. Bob; Dr. C.E.M. Toughy Sr. and Mrs. Toughy; Dr. Jack and Margaret Callahan; Robin McKay and his wife and Dr. Rubin.

At Seattle I entrained for **San Francisco,** and in the course of that journey encountered a distinguished Japanese professor who earned his place in Heaven by remarking when I told him that I was from Montreal, "Ah you have a great University there, McGill". Telling such a tale may strike some as unduly smug, but this was only one of many similar encounters involving non-McGill acquaintances. ▼

I went to the reunion of the class of '31,
I went with some misgiving, would it be fun?
I'm back from the reunion, and writing now to say
It was indeed a pleasure, though we missed those far away.

We toured that well-known campus and much that's new was shown,
It really is amazing how old McGill has grown!
The highlight of the morning, of course, was R.V.C.,
They've made a lot of changes — a swimming pool, T.V.

They even now have dating rooms and lounges too galore,
A brand-new wing with everything built in to wall and floor;
The males of the late fifties don't stand out in the hall,
They wait for dates in easy chairs on broadloom, wall to wall.

But in the midst of all the changes our R.V.C.'s still there,
Aging like the rest of us, and so in need of care;
Impervious to the upstarts, who all around have grown;
She keeps a time-tried dignity which they have never known.

Then later, in the evening, we gathered in a home
That the former Eileen Fairbairn so graciously did loan,
It was a gala party that started out with wine,
And after all the chatter, thirty-one sat down to dine.

I've ne'er the wit nor yet the time to tell about it all;
Mary Hill, our president, has kept a fine roll-call;
Suffice to say that each looked well and, whether gray or no,
The years had given something in grace and warmth and glow.

And, like our Alma Mater, we've added much that's new,
Our children number dozens and our achievements too;
Here's hoping we'll continue to prosper, grow and thrive,
Until we gather once again in 1965.

—Connie Hunt MacLean
Written on the train on the way home from the reunion.

The Vulgar Subject of Money

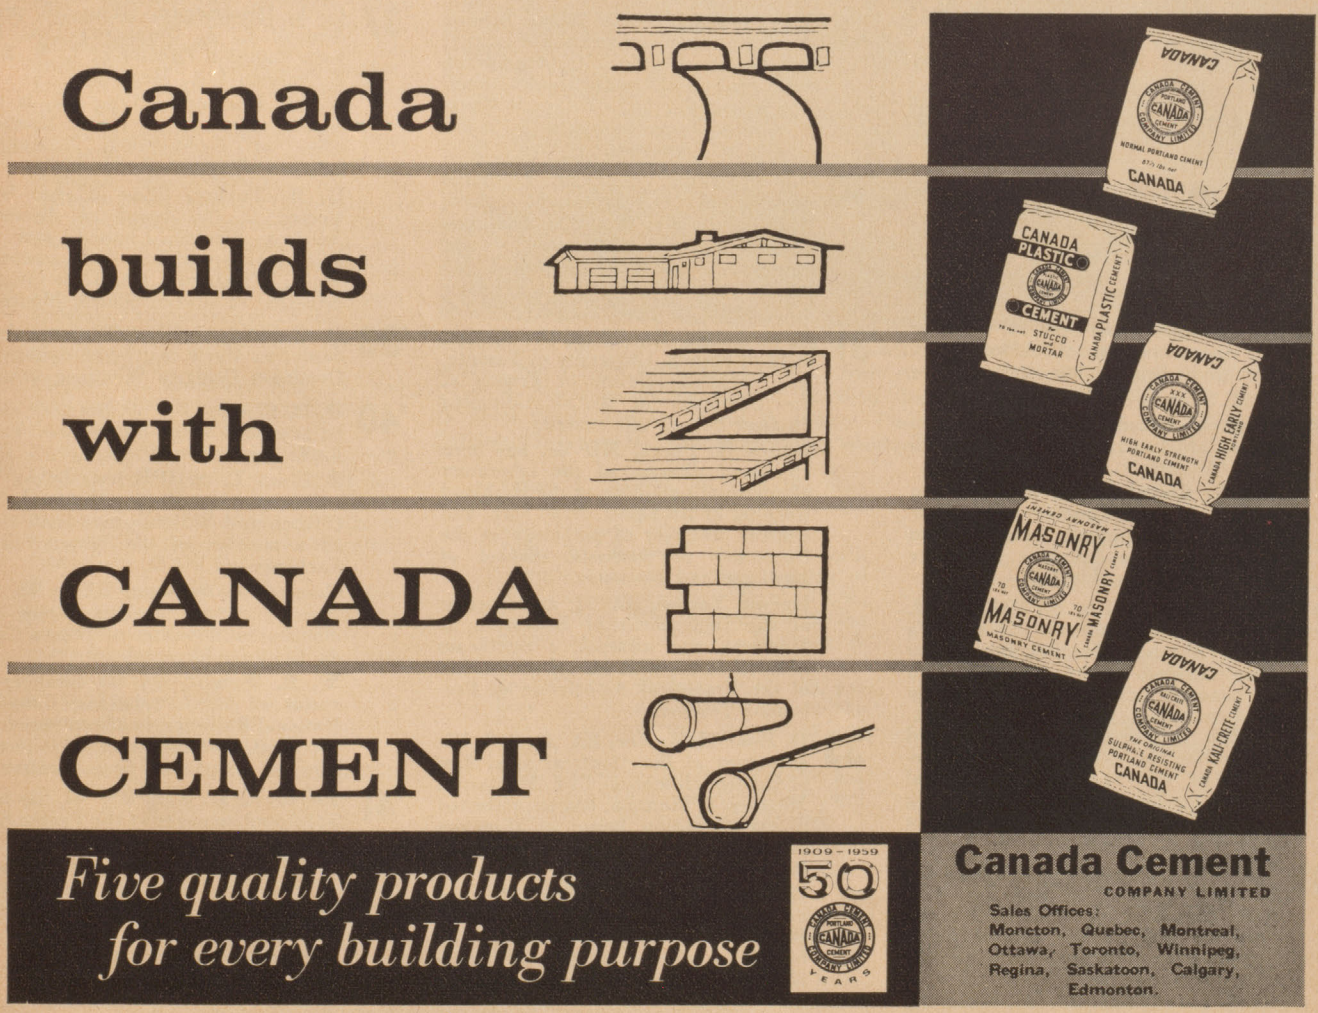

(*Continued from page 5*)

it has been at any time during the past seven years. The Honourable Paul Sauvé, Prime Minister of the Province of Quebec, has announced that he is trying to work out in cooperation with the Government of Canada a formula that will make it possible for the universities in this Province to receive the federal grants, or an equivalent sum, in addition to the grants that are now received from the Provincial Government.

The wisdom embodied in proverbs suggests that one should not count upon chickens not yet hatched — but no caution of this kind can prevent the members and friends of McGill University from realizing that the prospects will be brighter if such a solution to this financial problem is reached. The University would then be able to return to the invested endowments the amount that has been borrowed by way of annual deficits, to consider the possibility of salary and wage increases for members of the staff, to review the question of tuition fees and (what is just as important as any of these) to study the matter of additional appointments in those parts of the University where individuals have carried during these years of penury a burden that loyalty offered but conscientious administration should not indefinitely accept.

It is an exhilirating prospect to contemplate the possibility that, by the solution of the constitutional controversy between the Provincial and Federal Governments, McGill may once again be in a position at least as good as that of the universities in the other nine provinces.

But exhilaration should not blind us to the fact that McGill must do more than attain equality if it is to preserve that leadership in Canadian education which has for more than a century enriched the community and augmented the prestige of its graduates. During the past seven years, the teaching staff has stood by the University from a sense of loyalty, but the reputation of McGill was built on the fact that this University in earlier periods could attract outstanding scholars and scientists from all over the world because it offered the highest salaries and the best research facilities that could be found anywhere in Canada. We must regain that reputation if McGill is to continue to attract outstanding scholars and scientists, and I am hopeful that the steady growth of the Alma Mater Fund will provide the revenues to enable the University to do so. Without the contribution of graduates to that Fund, the last few years would have been even more bleak than Gissing's picture of poverty, but our knowledge of the interest and support of the thousands of graduate-contributors enhanced the value of the amounts that were received. During the years ahead, I hope that the continued growth of the Alma Mater Fund will enable McGill to regain, and to hold, its position as a leader in the field of Canadian education. ▼

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'13 **A. E. Cameron,** BSc '13, MSc '14, was awarded the honorary degree of Doctor of Engineering recently at the Nova Scotia Technical College. Dr. Cameron is a former president of the College.

'14 **L. Dana Wilgress,** BA '14, of the Department of External Affairs, has been appointed Chairman, Canadian Section, Canada-United States, P.J.B.D.

'15 **C. E. Chapman,** MD '15, has completed post-graduate work at the Upstate Medical Center of the University of the State of New York, Syracuse, and returns to practice in Cortland, N.Y.

Morgan M. Johnston, BSc/Arts '15, a director of the board of the Montreal Alouette Football Club, has been elected chairman of the board.

'17 **William L. Fraser,** BSc '17 has been appointed Ontario Hydro's director of the St. Lawrence Power Project.

'18 **Hugh Crombie,** BSc '18, vice-president and treasurer of Dominion Engineering Works, Ltd., has been elected president of the Machinery and Equipment Manufacturers' Association of Canada.

'20 **R. M. Robertson,** BSc '20, manager of operations at Lachine, Que., Dominion Bridge, has retired after many years with the company.

'21 **P. G. A. Brault,** BSc '21, has been named chief engineer, structural division (Montreal), Dominion Bridge.

Brooke Claxton, BCL '21, Chairman of the Canada Council and former Minister of Defence, received an honorary degree from the University of Saskatchewan this fall.

'22 **Harold R. Griffith,** BA '14, MD '22, medical supervisor of Montreal's Queen Elizabeth Hospital, became the first Canadian to be presented with an honorary fellowship in the Faculty of Anesthetists, London, England. Dr. Griffith is president of the World Federation of Societies of Anesthesiologists and renowned in medical circles for his success in introducing primitive curare poison to modern medicine.

'23 **Rev. Dr. G. Campbell Wadsworth,** BA '23, minister of Montreal West United Church, was a delegate to the 18th General Council of the World Presbyterian Alliance in Sao Paulo, Brazil, this summer.

E. R. Smallhorn, BSc '23, consulting engineer, has been elected mayor of Senneville, P.Q.

'24 **George M. Dick,** Sc '24, who is Chief Engineer of Canadian Ingersoll-Rand Company, Montreal, has been appointed Vice-Chairman of the newly formed Engineers Confederation Commission. This Commission has been set up jointly by the Engineering Institute of Canada and the Canadian Council of Professional Engineers to implement the "Confederation" of these two groups.

'26 **H. J. Leitch,** BSc '26, has been named sales manager, structural division (Montreal) Dominion Bridge.

'28 **T. T. Arnold,** BCom '28 has become an officer of a new Canadian company, D-F Loaders Limited. Mr. Arnold has been associated with International Equipment Co. Ltd. and with Canadian railways as an officer of Manitoba Steel Foundries.

'30 **Robert Japp,** MA '30, personnel director of the Protestant School Board of Greater Montreal, has been named director of education and secretary treasurer of the board, following the retirement of Thomas Sommerville.

'31 **E. A. Joliet,** BA '31, of the Department of French, University of Toronto, was visiting professor of French at the University of British Columbia Summer School this summer.

James H. Peers, MD '31, has been appointed director of the laboratory of anatomic pathology at the Highland Hospital of Rochester, New York, and clinical professor of pathology at the University of Rochester School of Medicine and Dentistry.

Harold Young, BA '31, an inspector of the Department of Education in Montreal, was awarded a certificate of merit at the 95th annual convention of the Provincial Association of Protestant Teachers.

'33 **D. Ross McMaster,** BA '30, BCL '33, a partner of the Montreal legal firm of Holden, Hutchison, Cliff, McMaster, Meighen & Minnion, has been elected to the Canadian Board of Directors of The Standard Life Assurance Company.

D.O.D. Ramsdale, BEng '33, manager of the transformer department, English Electric Co. of Canada Ltd., has been elected chairman of the Niagara Peninsula Branch of the Engineering Institute.

'35 **Miss Barbara Lax,** BA' 35, Chairman of the McGill Alumnae Public-Speaking Contest, was awarded a certificate of merit at the 95th annual convention of the Provincial Association of Protestant Teachers, in Montreal.

'36 **Col. W. S. Hunt,** BEng '36 has recently been appointed Canadian Military, Naval and Air Attache to Yugoslavia. Col. Hunt was formerly electrical and mechanical engineer, Eastern Command, Halifax.

Mortimer Weinfield, BA '33, BCL '36, a Montreal lawyer, is now associated with the firm, C. J. Hodgwon & Co.

'37 **C. A. Duranceau,** BEng '37, president of C. A. Duranceau Ltd., has been named a director of L. N. & J. E. Noiseau Ltd., Montreal.

W. O. Horwood, BEng '37, is the general sales manager for the Montreal office of International Equipment Company Limited.

D. R. Taylor, BEng '37 has been elected to the board of directors, Aviation Electric Limited, and appointed vice-president of the company.

W. A. Wilkinson, BA '37, is the new principal of Roslyn School, Montreal.

'38 **D. C. Holgate,** BEng '38, formerly of Sault Ste. Marie, is general manager of Dominion Bridge's Winnipeg branch.

'40 **O. H. Cheses,** BA '40, has been elected president of the Boston firm, Trans Radio Productions.

William L. S. O'Brien, BCom '40, senior partner of the Montreal firm O'Brien and Williams, has been elected a member of the Toronto Stock Exchange.

George W. Stewart, BEng '40, has been appointed manager, supply and distribution department, Texaco Canada Limited, Montreal.

W. R. Wright, BA '40, formerly director of public relations, Canadian National Railways, has been appointed president, McCann-Erickson (Canada) Limited advertising firm, Montreal.

'41 **Raymond H. Ball,** BSc '41, has been appointed manager of the Pacific Soap Company, San Diego, California.

S. E. Jamieson, BEng '41, has been elected president of The British Metal Corporation (Canada) Limited, Montreal.

J. R. Murray, BA '38, BCL '41, has been appointed general manager. The Hudson's Bay Company, Winnipeg.

'42 **Brock F. Clarke,** BCL '42, has been appointed to the board of directors of Donohue Brothers Limited. Mr. Clarke is a partner in the law firm of Messrs. Common, Howard, Cate, Ogilvy, Bishop, Cope, Porteous & Hansard, Montreal.

William R. Holden, BEng '42, has been appointed manager of the Montreal division of British Oxygen Canada Limited.

G. Redlich, BEng '42, has been appointed manager, economics and development, Polymer Corporation Limited, Sarnia, Ontario.

R. A. Reid, BEng '42, has been appointed manager of manufacturing services at the Dominion Bridge head office in Lachine.

T. B. B. Wainman-Wood, BA '42, of the Department of External Affairs, has been posted from the Canadian Legation, Warsaw, to the Canadian Embassy, Paris.

'43 **W. R. Carson,** BEng '43, has been appointed manager, operations analysis department, Polymer Corporation Limited, Sarnia, Ontario.

William T. Stewart, BA '40, BCL '43, Montreal attorney, has been re-elected to the national board of directors of the Family Service Association of America.

'44 **F. Hugh Brennian,** BEng '44, is the new vice-president and general sales manager for Brencoat Sales Limited of Ville St. Pierre, Montreal.

Alvin Jacobs, BA '41, BCL '44, has been appointed a director of Dalfens Ltd., newly formed Department Chain Store Enterprise.

'45 **H. D. Hylands,** BSc '45, has been appointed vice-president and general manager of Dechaux, Inc. Mr. Hylands was formerly manager of the drycleaning departments at Canadian Industries Limited and the Standard Chemical Company Limited.

'47 **D. M. Culber,** BSc '47, has been appointed vice-president of the newly formed Alcan International Limited, Montreal.

Eugene R. Zentner, BSc '47, has been appointed senior copywriter, F. H. Hayhurst Co., Montreal.

'48 **Guynemer T. Giguere,** BEng '48, formerly vice-president of Bolton Tremblay & Co., Montreal, has been appointed director of the department of financial and economic research, Trust General Du Canada.

W. B. Duggan Gray, BCom '48, has been named general manager of Columbia Pulp Sales Limited, a newly-formed company with its head office in Vancouver.

R. G. Lippert, BSc '48, has won a master of science in neurosurgery, University of Minnesota.

Charles F. MacLeod, BSc/Agr '48, has received the degree of Doctor of Philosophy from the University of Minnesota.

H. J. T. Patterson, BEng '48, has been appointed Montreal district sales manager for the Dominion Structural Steel Limited.

John G. Piesley, BSc '48, has been appointed brewmaster of Molson's Brewery (Ontario) Limited.

Gordon M. Pfeiffer, BCom '48, has been appointed assistant zone manager, Quebec Zone, Chrysler Corporation of Canada, Ltd.

D. W. Stairs, BEng '48, is the new chairman of the Saguenay Branch of the Engineering Institute.

'49 **Richard Birks,** BA '49, MSc '54, PhD '57, has returned to McGill after teaching in England, to join the Department of Physiology.

G. M. Boissoneault, BEng '49, has been appointed assistant manager of The Shawinigan Water and Power Company's hydraulic resources department.

A reunion of the original officers of the 1st Canadian Medical Unit to go overseas in World War II, No. 9 Field Ambulance: L. to r. (front row): Dr. F. Victor Ogulnik, Dr. C. V. Ward, Dr. R. H. Stevenson, Dr. Douglas W. Sparling. (Back row) L. to r: Dr. Donald A. Young, Dr. G. Earle Wight and Mr. David M. Legate. The meeting was held at the University Club, October 23rd, over McGill's Homecoming Weekend.

Frank P. Brady, BCL '49, has been appointed assistant secretary of Dominion Textiles Company Limited.

John W. Dobson, BCom '49, until recently assistant to the president of Dominion Engineering Works, Ltd., Montreal, is now associated with the brokerage firm of C. J. Hodgson & Co.

Jean-Claude Dubuc, BCom '49, has been appointed vice-president of the Life Underwriters Association of Montreal.

A. S. Graydon, BA '37, BCL '49, has been appointed vice-president and secretary of John Labatt Limited.

K. U. Lunny, BA '49, formerly Canadian manager of Donahue & Coe, advertising agency, has been appointed manager of the Montreal office, McCann-Erickson advertising firm.

W. G. Peacock, BEng '49, has been appointed sales manager of the plate-work division (Montreal), Dominion Bridge.

R. Kenneth Robertson, BEng '49, is the general manager of the Quebec division of Cooksville-Laprairie Brick Limited.

P. D. Scott, BA '49, PhD '55, of the Department of External Affairs, has been posted from Ottawa to the Canadian Embassy, Warsaw.

Clayton G. Thompson, BEng '49, has been appointed assistant chief engineer in charge of maintenance, Escambia Chemical Co., Pensacola, Florida.

'50 **Russell G. Chambers,** BEng '50, has been appointed western superintendent, Atlas Copco Canada Ltd. (Montreal).

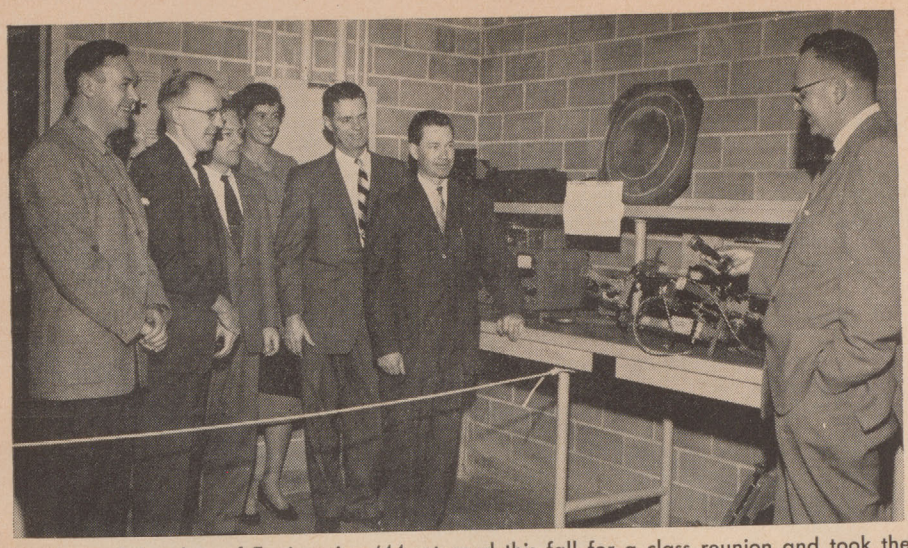

Ross H. Curtis, BEng '50, has been appointed sales manager of Andrew Antenna Corporation, Ltd., Whitby, Ontario.

W. E. Dowbiggin, BEng '50, has recently been appointed manager, gas products, of Linde Company in Alberta.

Ronald Melzack, BSc '50, MSc '51, PhD '54, has been appointed assistant professor in the department of economics and social science at the Massachusetts Institute of Technology.

'51 **J. R. MacKay,** BEng '51, is in charge of sales of water tube boilers and steam storage schemes in the Boiler Division, Dominion Bridge.

'52 **Thomas J. Egan,** MD '52, is director of the research lab at the Children's Hospital of Akron with affiliation with the department of pediatrics,

Members of the class of Engineering '44 returned this fall for a class reunion and took the occasion to visit the new McConnell Engineering building. Here shown with a former classmate and present professor at McGill, T. J. F. Pavlasek, right, from left to right: A. Cohen, L. Doherty, D. Webster, Mrs. (Shirley Potter) Dempster, Lou Dempster, Art McKellar.

Western Reserve School of Medicine, Cleveland, Ohio.

'53 **J. Cyril Sinnott,** MD '53, Dip Med '58, MSc '58, has opened an office in the Charlottetown clinic, P.E.I. for the practice of internal medicine.

'54 **David Bourke,** BArch '54, received his master of architecture at Harvard, 1959, and is now with Parkin Associates, Montreal.

David E. Mundell. BEng '54, has been appointed vice-president of Canadian-Dominion Leasing Corporation Limited.

A. M. Nicholson, BA '54, of the Department of External Affairs, has been posted from Ottawa to the Middle East Centre for Arab Studies, Shemlam.

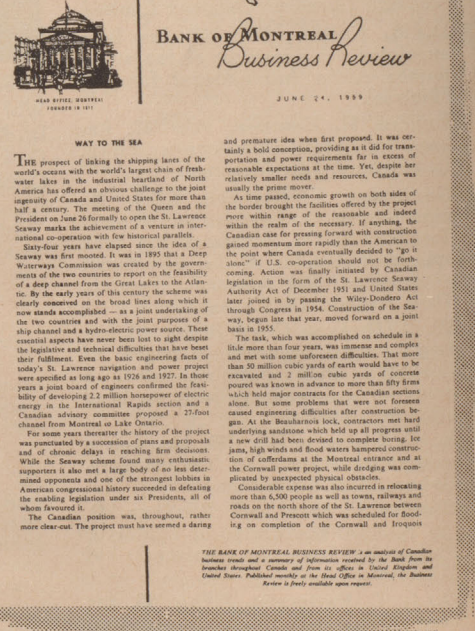

'55 **Peter Benjamin,** BSc '51, MD '55, is chief medical resident at the Montreal Children's Hospital.

Brian W. Faughnan, BEng '55, a specialist in the field of microwave physics, has joined the research staff of RCA Laboratories at the David Sarnoff Research Center in Princeton.

WAY TO THE SEA

THE prospect of linking the shipping lanes of the world's oceans with the world's largest chain of fresh-water lakes in the industrial heartland of North America has offered an obvious challenge to the joint ingenuity of Canada and United States for more than half a century. The meeting of the Queen and the President on June 26 formally to open the St. Lawrence Seaway marks the achievement of a venture in international co-operation with few historical parallels.

Sixty-four years have elapsed since the idea of a Seaway was first mooted. It was in 1895 that a Deep Waterways Commission was created by the governments of the two countries to report on the feasibility of a deep channel from the Great Lakes to the Atlantic. By the early years of this century the scheme was clearly conceived on the broad lines along which it now stands accomplished — as a joint undertaking of the two countries and with the joint purposes of a ship channel and a hydro-electric power source. These essential aspects have never been lost to sight despite the legislative and technical difficulties that have beset their fulfilment. Even the basic engineering facts of today's St. Lawrence navigation and power project were specified as long ago as 1926 and 1927. In those years a joint board of engineers confirmed the feasibility of developing 2.2 million horsepower of electric energy in the International Rapids section and a Canadian advisory committee proposed a 27-foot channel from Montreal to Lake Ontario.

For some years thereafter the history of the project was punctuated by a succession of plans and proposals and of chronic delays in reaching firm decisions. While the Seaway scheme found many enthusiastic supporters it also met a large body of no less determined opponents and one of the strongest lobbies in American congressional history succeeded in defeating the enabling legislation under six Presidents, all of whom favoured it.

The Canadian position was, throughout, rather more clear-cut. The project must have seemed a daring and premature idea when first proposed. It was certainly a bold conception, providing as it did for transportation and power requirements far in excess of reasonable expectations at the time. Yet, despite her relatively smaller needs and resources, Canada was usually the prime mover.

As time passed, economic growth on both sides of the border brought the facilities offered by the project more within range of the reasonable and indeed within the realm of the necessary. If anything, the Canadian case for pressing forward with construction gained momentum more rapidly than the American to the point where Canada eventually decided to "go it alone" if U.S. co-operation should not be forthcoming. Action was finally initiated by Canadian legislation in the form of the St. Lawrence Seaway Authority Act of December 1951 and United States later joined in by passing the Wiley-Dondero Act through Congress in 1954. Construction of the Seaway, begun late that year, moved forward on a joint basis in 1955.

The task, which was accomplished on schedule in a little more than four years, was immense and complex and met with some unforeseen difficulties. That more than 30 million cubic yards of earth would have to be excavated and 2 million cubic yards of concrete poured was known in advance to more than fifty firms which held major contracts for the Canadian sections alone. But some problems that were not foreseen caused engineering difficulties after construction began. At the Beauharnois lock, contractors met hard underlying sandstone which held up all progress until a new drill had been devised to complete boring. Ice jams, high winds and flood waters hampered construction of cofferdams at the Montreal entrance and at the Cornwall power project, while dredging was complicated by unexpected physical obstacles.

Considerable expense was also incurred in relocating more than 6,500 people as well as towns, railways and roads on the north shore of the St. Lawrence between Cornwall and Prescott which was scheduled for flooding on completion of the Cornwall and Iroquois

THE BANK OF MONTREAL BUSINESS REVIEW is an analysis of Canadian business trends and a summary of information received by the Bank from its branches throughout Canada and from its offices in United Kingdom and United States. Published monthly at the Head Office in Montreal, the Business Review is freely available upon request.

Informed businessmen wishing to stay informed read the Bank of Montreal Business Review regularly.

Here, in black and white, is a concise monthly spotlight on the Canadian business scene that's invaluable in keeping you abreast of economic affairs. And it's read by businessmen all over the world!

Marriages

Adams: At Saskatoon, Sask., recently, John Adams, B'Eng '55 and Dorothy Blyth.

Ader: At Montreal, recently, Ruth Ader, Dip. P.T. '56 and Zvi Klatchko.

Arsenault-Kelly: At Cornwall, July, 1959, Jean Paul Arsenault, B'Eng '57 and Barbara Kelly, BA '59.

Ballon-Levy: At Montreal, on Sept. 9, 1959, Judith Ballon, BA '59 and Norman Levy, BA '59.

Bascom: At Toronto, on July 11, 1959, Anne Bascom, BA '57 and Douglas Junkin.

Bates: At Montreal, on Aug. 29, 1959, Richard Bates, MD '58 and Marilyn-Jean Strang.

Beauparlant: At La Tuque, Quebec, recently, Philippe Beauparlant, B'Eng '57 and Nicole Paradis.

Benoit: At Peterborough, Ont., on Sept. 12, 1959, Norman Benoit, B'Eng '58 and Eleanor Jewell.

Bessner-Lieff: At Ottawa, on July 19, 1959, Morton Bessner, BCL '59 and Lois Lieff, BA '58.

Binning: At Manhasset, L.I., on Aug. 29, Bruce Binning, BCom '56 and Catherine Simpson.

Blanchard: At Montreal, on Aug. 1, 1959, Valene Blanchard, BSc/HEc '58 and Alexander Ward.

Blanshay: At Montreal, on July 12, 1959, Bernard Blanshay, BCom '59 and Rhona Hertzman.

Blanshay: At Montreal, recently, Israel Blanshay, BA '55, BCL '58 and Barbara Besner.

Bowe: At Montreal, recently, John Bowe, BSc '56 and Edith Gillis.

Brierley: At Montreal, recently, James Brierley, BA '54, BCL '57 and Helen Alexander.

Brodeur: At Mount Bruno, Quebec, on July 23, 1959, James Brodeur, BEng '56 and Barbara Drummond.

Carr-McCauley: At Montreal, on Aug. 8, 1959, Richard Carr, DDS '59 and Maureen McCauley, BA '56.

Carruthers: At Montreal, on Aug. 22, 1959, Ian Carruthers, BCom '56 and Edith Pitcher.

Charlap: At Ottawa, on June 6, 1959, George Charlap, BEng '51 and Janet Northwood.

Chauvin: At Montreal, on Sept. 12, 1959, Guy Chauvin, BCom '59 and Margaret Cain.

Ciprick: At Cornwall, on Aug. 15, 1959, William John Ciprick, MD '58 and Patricia Hartle.

Coffin: At Montreal, July, 1959, David Coffin, BSc/Agr. '53, MSc '56, PHd '59 and Joyce Luke.

Cohen: At Montreal, July, 1959, Lawrence Cohen, BCom '56 and Elaine Sherwin.

Collins: At Vancouver, on July 8, 1959, George Collins, DDS '56 and June Tidball.

Davies-Quirk: At Montreal, on Sept. 19, John Davies, MEng '59 and Wendy Quirk, BA '58.

Delorme: At Sherbrooke, Quebec, on Sept. 7, 1959, Jacques Delorme, BArch '59, and Charlotte Demers.

Denis: At Cornwall, recently, Robert Denis, BEng '59 and Maryse Jerome.

Dolphin-Ashton: At Montreal, on July 11, 1959, Walter Dolphin, BA '58 and Joan Ashton, BA '59.

Dorn-Strohsahl: At Sparta, N. J., on Aug. 29, 1959, John Dorn, BCom '59 and Jean Strohsahl, BA '58.

Druker: At Montreal, recently, Gordon Druker, BSc '57 and Binnie Kanigsberg.

Drupals: At Montreal, recently, George Drupals, BEng '58 and Mara Vilemsons.

Duanne: At Arvida, recently, William Duanne, BEng '57 and Arlene Boily.

Dundas: At Montreal, recently, John Dundas, BSc '55, MD '59 and Mary Watson.

Dunn: At Montreal, on Sept. 5, 1959, John Dunn, BCom '57 and Joyce Lamond.

Edsforth: At Montreal, July, 1959, John Edsforth, BEng '56 and Sheila Southern.

Eisenstat: At Montreal, July, 1959, Brahm Eisenstat, BA '52, BCL '56 and Norda Cohen.

English: At Montreal, recently, Stanley English, BA '57 and Catherine Soor.

Ferrabee: At Montreal, recently, John Ferrabee, BCom '56 and Lydia Sharman.

Firth: At Mount Bruno, recently, Ross Firth, Phy'Ed '51 and Phyllis McLean.

Fish-Johnson: At Hudson Heights, on Sept. 19, 1959, Michael Fish, B'Arch '56 and Anne Johnson, BA '56, MSW '59.

Fortier-Eaton: At Montreal, on Sept. 26, 1959, Yves Fortier, BCL '58 and Carol Eaton, BA '59.

Freedman: At Montreal, recently, Allan Freedman, BA '57 and Frances Schanfield.

Friedman: At Montreal, recently, Leon Friedman, BSc '53 and Maria Rosen.

Gaherty-McKnight: At Port Credit, Ont., on Sept. 4, 1959, William Gaherty, BEng '58 and Joan McKnight, Dip. P.T. '58.

Gistrak: At Montreal, on Sept. 20, 1959, Allan Gistrak, BSc '53, MD '57 and Loretta Roskin.

Glickman: At Montreal, recently, Morton Glickman, BCom '53 and Barbara Soles.

Godel: At Ottawa, recently, Morris Godel, BSc '54 and Raylene Freedman.

Grant: At Montreal, recently, Malcolm Grant, BCom '55 and Sharon O'Rourke.

Haber: At Bronx, N.Y., July, 1959, Bernard Haber, BSc '56, MSc '57 and Barbara Spaner.

Hastings: At Montreal, recently, Elizabeth Hastings, MSW '55 and Peter Beswick.

Hawke: At Farnham, Quebec, on Aug. 1, 1959, Lois Hawke, BSc/HEc '59 and Eric Johnson.

Hemmings-Brooks: At Montreal, recently, Dennis Hemmings, BSc/Phy'Ed '58 and Lynda Brooks, BSc/Phy'Ed '58.

Henderson: At New Glasgow, N.S., recently, Reginald S. Henderson, MD '24 and Caryl Falconer Walker.

Hodgins: At Montreal, on Aug. 15, 1959, Dorothy Hodgins, BSc/HEc '59 and Ross Sager.

Hood: At Montreal on Sept. 5, 1959, Alan Hood, MD '56 and Dorothy Barnett.

Hymer-Guttman: At Montreal, recently, Stephen Hymer, BA '55 and Gilda Guttman, BA '59.

Ingram: At Montreal, recently, Donald Ingram, BEng '56 and Florence Johnson.

Irvine: At Rosemere, Quebec, William Irvine, BSc/Agr '57 and Brenda Ticehurst.

Katronge: At Montreal, on Aug. 1, 1959, George Katronge, BEng '58 and Catherine Kingan.

Kaufman-VanStraten: On June 21, 1959, Sylvia VanStraten, BSc '46, PhD '50 and Hyman Kaufman, BSc '41, MSc '45, PhD '48.

Knowles: At Montreal, on Aug. 29, 1959, Ann Knowles, BA '58 and Alan Keith Andrew.

Lamb: At Montreal, on Oct. 3, 1959, Sydney Lamb, BA '49, and Silvia Freddi.

Land: At London, Ont., on Sept. 6, 1959, Enid Land, BA '54 and Jack Lesser.

Leonard: At Montreal, recently, Ronald Leonard, BEng '50 and Sheila McCubbin.

Lewis-McPhee: On May 31, 1958, Edmund Lewis, BSc '58 and Marjorie McPhee, Dip. P.T. '58.

Liptrap: At Montreal, Aug. 1959, Richard Liptrap, BCom '56 and Saundra Powers.

Lyman: At Montreal, on Aug. 15, 1959, Corinne Lyman, BA '54 and Ronald Gibson.

Marpole-Miller: At Montreal, on Aug. 29, 1959, Derek Marpole, BA '59 and Donalyn Miller, Dip. Teach '55, B'Ed '58.

Martineau: At Montreal, on Aug. 29, 1959, Jean Martineau, B'Arch '59 and Huguette Tetrault.

McKee: At Montreal, on Sept. 5, 1959, Beverley McKee, BSc '59 and Carol Batty.

McMullan: At Montreal, on Sept. 12, 1959, James McMullan, BCL '58 and Margaret (Peggy) Aikins.

McQueen: At South Bend, Ind., on Aug. 1, 1959, Hugh McQueen, B'Eng '56 and Josephine Bremmer.

Miller-Channell: At Montreal, on Sept. 5, 1959, James Miller, BSc/Agr '57 and Barbara Channell, BSc/HEc '58.

Milne: At Montreal, on July 11, 1959, Shirley Milne, LMus '59 and Henry King.

Morrison: At Montreal, on Aug. 22, 1959, Ross Morrison, BEng '57 and Carole Millard.

Mosher-Burwash: At Toronto, on Sept. 26, 1959, John Mosher, MD '59 and Elizabeth Burwash, BA '59.

Mulholland: At Montreal, recently, Jane Mulholland, BA '58 and Leslie Haslett.

Munro-Lewis: At Montreal, recently, Robert Munro, BSc '57 and Judy Lewis, BSc/Phy'Ed '56.

Newton: At Montreal, July 1959, Thomas Newton, BEng '56 and Sandra MacDougall, BA '56.

O'Farrell: At Montreal, on July 25, 1959, Stephen O'Farrell, BEng '59 and Millie Laumets.

Ogryzlo-Trofimiak: At Montreal, recently, Elmer Ogryzlo, PhD '59 and Marie Trofimiak, BA '58.

Patenaude: In July, 1959, Hubert Patenaude, DDS '57 and Dolores LeBlanc.

Peers-Gaherty: At Montreal, on July 17, 1959, Michael Peers, BCom '53 and Diana Gaherty, BCom '55.

Perkins: At Perth, Ont., recently, Sherle Perkins, BA '57 and Michael Vasey.

Philipp: At Brantford, Ont., on Aug. 22, 1959, Edward Philipp, BA '59 and Anne Westaway.

Polack: At Montreal, recently, John Polack, BEng '55 and Mary Hlopasko.

Pollock: At Lachute, recently, Olive-Jane Pollock, BA '59 and Douglas MacKay.

Primak: On Aug. 15, 1959, George Primak, BEng '58 and Monique Gagnon.

Raff: At Montreal, recently, Anton Raff, BA '58 and Heather Burton.

Reeves-Roberton: At Montreal, Sept. 1959, Jacques Reeves, B'Arch '57 and Barbara Roberton, BArch '57.

Ruby: At Montreal, recently, Jason Ruby, BA '51, BCL '54 and Frima Mona Shaffer.

Salts: At Manchester, England, on Sept. 5, 1959, William Salts, BCom '51 and Patricia Kearns.

Schmidt: At St. Sauveur des Monts, Quebec, recently, Richard Schmidt, MSc '55, PhD '56 and Mary Jane Hutchison.

Schwartz-Ostroff: At Montreal, on June 7, 1959, Gerald Schwartz, BCom '58 and Geraldine Ostroff, BA '59.

Seaman: At Charlottetown, P.E.I., on June 27, 1959, William Seaman, BSc/Agr '56 and Olive Parkman.

Segal: At Montreal, Aug., 1959, Lionel Segal, BA '56, BCL '59, and Sheilah Hershenfield.

Shaffer: At Montreal, recently, Gloria Shaffer, BSc '59 and Allan Tannenbaum.

Shapiro: At Montreal, recently, Maynard Shapiro, BSc '56 and Beverley Wolfe.

Siegler: At Montreal, recently, John Siegler, DDS '58 and Josephine O'Reilly.

Sluzar: At Montreal, recently, Luba Sluzar, LicMus '51, BMus '56, and Hans Bauer.

Smith: At Toronto, recently, Gordon Smith, BEng '58 and Margaret Hamilton.

Solomon: At Montreal, recently, Harriet Solomon, BA '58, BLS '59 and Alan Spiro.

Spector: At Montreal, recently, Bernard Spector, BA '55 and Ida Gordon.

Spevack: At Montreal, June 1959, Allan Spevack, BArch '58 and Lois Caplan.

Sproule: At London, Ont., on August 22, 1959, Robert Sproule, BCom '49 and Eleanor McLeod.

Steels: At Montreal, on Sept. 19, 1959, Lawrence Steels, BEng '57 and Elaine Tomaschuk.

Tardif: At Montreal, recently, Jean Tardif, BCL '59 and Therese Magnan.

Taussig-Peto: At Montreal, recently, Andrew Taussig, BSc '52, PhD '55, and Margaret Peto, BSc '54, MSc '56, PhD '59.

Tornay: At Montreal, recently, Edgar Tornay, BArch '58 and Glen Small.

Thompson: At Edmonton, Alta., on Aug. 26, 1959, James Thompson, BCom '47, and Vivian Brushett.

Van Gelder-Singer: At Montreal, Aug. 1959, Nico Van Gelder, BSc '55, PhD '59 and Louise Singer, BA '55, MSW '58.

Vardanis: At Montreal, recently, Alexander Vardanis, MSc '58 and Irene Polichronis.

Verschingel: At Chateauguay, Quebec, July, 1959, Roger Verschingel, PhD '55 and Selena Lang.

Wahlstrom: At Montreal, recently, Robert Wahlstrom, BEng '58 and Lucile Burland.

Walcot: At Montreal, recently Winifred Anne Walcot, Physio & O.T. '56 and William Sainas.

Watson: At St. Johns, Quebec, recently, Beryl Watson, BSc '45 and Gordon Whatman.

Weiner: At Montreal, recently, Gerald Weiner, BA '54 and Judith Rosen.

Welter: At Boston, Mass., recently Rene Welter, BArch '55 and Gilean Blunt-Mackenzie.

Wertman: At Montreal, recently, Ruth Wertman, BA '58 and Hayim Calof.

Wiesenfeld-Mendelsohn: At Montreal, on August 16, 1959, Mark Wiesenfeld, BA '56 and Sheila Mendelsohn, Mac/Teach '54.

Whitman: At Chipman, N.B., recently, Donald David Whitman, BEng '55, and Joan Legassie.

Wilcock: At Montreal, July, 1959, John Brian Wilcock, DDS '59 and Sonya Odell.

Wilson: At London, Ont., on Aug. 22, 1959, Douglas Wilson, BCom '55 and Ruth Rahn.

Wolfe: At Montreal, recently Paul Wolfe, BCom '55 and Sharon Miller.

Yetman: At Toronto, on Aug. 23, 1958, Gordon Yetman, BEng '54 and Joan Blakely.

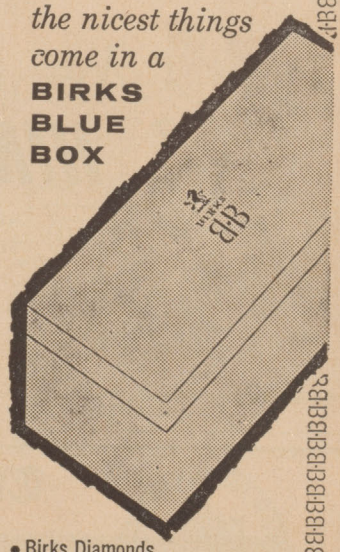

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

MADE IN CANADA

MADE IN CANADA

Dr. J. C. Meakins

ONE of McGill's most distinguished medical men, Dr. Jonathan Campbell Meakins, died on October 12th. The following is a tribute reprinted from the Canadian Medical Association Journal.

"Dr. Meakins was distinguished for his contributions to internal medicine, for his contributions to education and for numerous writings, the best-known of which was his textbook "The Practice of Medicine", which reached its 6th edition in 1956.

Dr. Meakins was born in Hamilton, Ontario, on May 16, 1882, and was educated at the Hamilton Collegiate and at McGill University where he graduated M.D. in 1904. His subsequent degrees and diplomas included a Fellowship of the Royal College of Physicians of Edinburgh in 1919, a Fellowship of the Royal Society in 1920, and a Fellowship of the Royal Society of Canada in 1926. In addition he had received many honorary degrees from universities in Scotland, Australia and Canada. He began his medical career as resident physician of the Royal Victoria Hospital, Montreal, 1904-06, and then went to Johns Hopkins Hospital, Baltimore, 1906-07, as assistant in medicine, after which he gravitated to New York where he was resident pathologist to the Presbyterian Hospital 1907-10. At this point he returned to Montreal as assistant physician to the Royal Victoria Hospital, 1910-14, being also a lecturer in clinical medicine at McGill University during this period.

He served in the Canadian Army Medical Corps from 1914 to 1919, during which time he made a number of contributions to research in cardiology, writing a number of papers on "irritable heart", and on irritant gas poisoning. He was at this time a member of various committees appointed by the Director-General, Army Medical Services, for clinical investigations into chemical warfare. He held the post of Director of Experimental Medicine, McGill University, from 1913-19. On his return to civilian life he was appointed Christison Professor of Therapeutics in Edinburgh University 1919-24, after which he was recalled to McGill to assume the post of Professor of Medicine and Chairman of the Department of Medicine. He held these appointments until 1947, also carrying on the duties of Physician-in-Chief and Director of the University Medical Clinic, Royal Victoria Hospital. Finally he was Dean of the Faculty of Medicine of McGill University from 1942-47.

This was not all, however, for during World War II Dr. Meakins served with the rank of Brigadier as Deputy Director of Medical Services, R.C.A.M.C., for the period 1942-45 and was awarded the C.B.E. for his services.

Dr. Meakins was a prolific writer, and his published articles cover a wide field in internal medicine ranging from a study of typhoid perforation in 1905 through studies of immunity and vaccine treatment to articles on many aspects of cardiovascular disease, pulmonary disease and diabetes. His best known work, "The Practice of Medicine", first appeared in 1926 and was virtually one of the last one-man textbooks of medicine, although chapters were contributed by three of his colleagues. In contrast, the 6th edition in 1956 had a list of 87 contributors from Canada, the United States and Britain, with Dr. Meakins as editor.

Dr. Meakins was also active in organized medicine, and was at one time president of the Montreal Medico-Chirurgical Society, the Royal College of Physicians and Surgeons of Canada, the American College of Physicians and the Canadian Medical Association. Senior membership in this Association was conferred upon him at the Annual Meeting of the C.M.A. in Edmonton in 1957."

Dr. J. R. Fraser

A former dean of the McGill Faculty of Medicine, Dr. John R. Fraser, died in the Royal Victoria Hospital, Montreal, on October 7th. The following appreciation is reprinted from the Canadian Medical Association Journal. "The full value of his contribution in public service was great, extending over a period of almost 50 years. He is mourned by a multitude of friends, practitioners and patients.

His brilliance, industry and devotion were evident at an early age when he graduated in medicine from McGill at the age of 20. After postgraduate studies in Montreal, London and Vienna, he returned to the Royal Victoria Hospital and McGill as a member of the staff in the Department of Obstetrics and Gynaecology.

During the First World War he served with the Canadian Army on active duty overseas, and in 1919 he retired with the rank of major.

In 1929, he had achieved the rank of full professor and he was appointed Chairman of the Department of Obstetrics and Gynaecology at McGill University and the Royal Victoria Hospital. During the Second World War he was appointed Dean of the Faculty of Medicine at McGill, in which position he served for four years. On account of impaired health he retired in 1945, at which time he established residence in Almonte, Ontario.

During his tenure of office, great developments were achieved in the Women's Pavilion of the Royal Victoria Hospital. Clinical and research activities were stimulated to such an extent that they received world-wide recogni-

tion. Personal honours were evident by his appointments as Fellow of the Royal College of Physicians and Surgeons of Canada, Fellow of the Royal College of Obstetricians and Gynaecologists of Great Britain, and Fellow of the American College of Surgeons.

Though Dr Fraser relinquished his administrative posts at McGill University and at the Royal Victoria Hospital in 1945, he maintained a keen interest in public affairs. This interest was demonstrated by his appointments as president of the Almonte Hospital as well as president of the Almonte Hockey Club. In addition, he continued as a member of the Board of Governors of McGill University until the time of his death.

Dr. Fraser is survived by his widow."

Deaths

E. D. Alexander, BSc '14, at Vancouver, on August 29th.

Hubert Smith Atkinson, MD '04, at Bay Roberts, Nfld., on June 19th.

Allan M. Auclair, BEng '58, accidentally, at Montreal, on September 12th.

Frederick C. Auld, BA '17, leading adult educationist and professor of law at the University of Toronto, at Toronto, on September 27th.

Gerard J. Beaudet, BEng '48, at Montreal, on January 21st.

Mrs. J. C. Binnie (nee Mackenzie), BA '32, at Stoney Lake, Ontario, on August 9th.

Clarence H. Brown, MD '98, well-known Ottawa surgeon, at Ottawa on May 14th.

Mrs. H. R. Burke (nee Rexford), L. Mus. '22, at Montreal, recently.

Mrs. Dwight E. Burns (nee Wisdom), BA '09, at New Glasgow, N.S., on March 5th, 1958.

Charles J. Chaplin, BSc '04, MSc '05, at Ottawa, on August 21st.

Charles MacKay Cotton, BA '99, BCL '02, at Montreal, recently.

Frederick Cowans, BSc '00, at Pasadena, California, recently.

Basil Cuddihy MD '30, at Montreal, recently.

F. J. Dawson, BSc '09, at Vancouver, last January.

Mrs. Maxwell J. Dunbar (nee Jackson), MA '43, wife of McGill professor Max Dunbar and former member of the McGill English Faculty, at Montreal, on August 23rd.

LEONARDO DA VINCI *possessed what was possibly the most imaginative and versatile mind of all time. He was, among other things, an artist, an engineer, and an inventor. Reproduced here are original sketches by Da Vinci for a foot-propelled paddle boat, showing details of gear mechanism, paddles, cam, and fly wheel.*

IMAGINATION

In their offices and drafting rooms and in their huge, all-enclosed yards, Canadian Vickers put imagination and creative skills to work. Here, ships are built on a year-round basis . . . passenger ships, destroyer escort vessels, tankers, tugs, ferries, dredges, scows . . . all built by Canadian Vickers to play an important role in our economy.

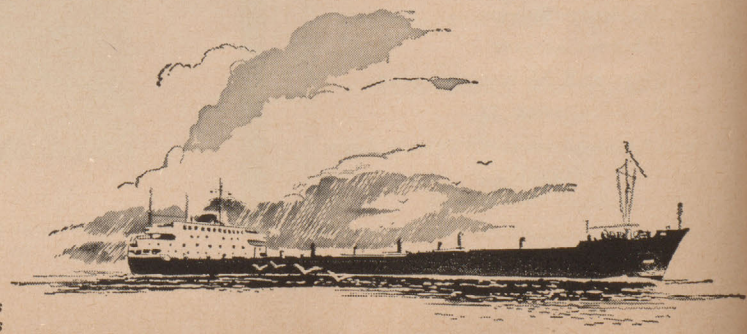

In their shops, Canadian Vickers also design and manufacture machines and equipment for every imaginable industrial need . . . thereby fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

When is a Right a DUTY?

Today everyone enjoys as his birthright, privileges which once were the possession of only a few. But his birthright also includes responsibilities with respect to the privileges he enjoys.

Education is one of the privileges which carry responsibilities. All of us have the responsibility, for example, of helping to ensure that every young person has the opportunity to complete his education, and of seeing that the quality of instruction at our schools and colleges is maintained at a high level.

Sun Life Assurance Company of Canada is preparing, for free distribution, a series of booklets on educational matters of importance. These booklets, issued as a public service, discuss problems in which all of us share responsibility. Inquiries about this series should be addressed to:

VALUES IN EDUCATION,
SUN LIFE ASSURANCE COMPANY OF CANADA,
SUN LIFE BUILDING, MONTREAL.

Canadians, more than any other people, benefit from electric power. Abundant low-cost electricity is one of the important reasons for so many busy factories . . . greater production of goods . . . and better paying jobs. In offices, on farms, and in homes, everywhere, electric power makes life easier and more enjoyable.

What Does LBE Mean to You?

LBE stands for "Live Better . . . Electrically", and these words have a very real meaning behind them.

In the home, for example, planned lighting brings new charm and cheerfulness to every room. Modern appliances in the kitchen and laundry save time and toil. Other appliances contribute to our leisure and entertainment. Automatic heating and air conditioning add to our comfort. There probably isn't an area in your home that cannot be equipped electrically to give *more* convenience, *more* comfort, and *more* service.

In home, office or factory the first essential is an up-to-date wiring system — to get the best results from the electrical products now in use, and provide for those you expect to acquire. Your local power company, your provincial Electric Service League, or any qualified electrical contractor will be glad to provide expert advice and help you to plan to "Live Better . . . Electrically".

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturers of equipment that generates, transmits and distributes electricity . . . and the wide variety of products that put it to work in home and industry.

SPRING 1960

The promise of days to come

SOON SHE'LL BE READY . . . and out of springtime's promise of sun and wind and white sails on blue water, father and son share the spirit that holds a family close.

Through sharing, the problems and plans of the one find deep response in the other, each knowing well his own responsibilities. The father has entrusted to us the management of his investments and, if necessary, arrangements for operating the family business until his son is trained to take over.

In such ways, a man of foresight does more than enrich the living years with those he holds dear. He builds that something *worthy* will mark his passage. And he has the constant satisfaction of knowing we shall carry out his plans to protect his family's future, with care and *understanding* . . . from one generation to another.

SOUTH AMERICA

President — Mr. Kenneth H. McCrimmon, C.B.E., (B.A. '13), Caixa Postal 4965, Rio de Janeiro, Brazil.

Manager of one of the Royal Bank's Calgary (Alta.) branches watches construction of a customer's new building

What's a Banker Doing Here?

The Royal Bank manager (with hat) is getting a ground-floor look at his wheat-pool customer's expansion plans. Such visits won't make him an expert on construction, but they will give him a closer insight into his customer's problems... provide a better background for an informed banking service. This habit of seeking information in the field is typical of Royal Bank managers everywhere... one reason why the Royal stands so high at home and abroad and why it is Canada's largest bank.

ABOUT OUR COVER

Montrealers walking along University Street can gaze up at the wall of the new McConnell Engineering Building at sculptures depicting various phases of the science of Engineering. Armand Fillion, S.S.C., was the sculptor, using the medium of limestone. Readers of The McGill News are invited to formulate their own interpretations from the designs, which were arranged on the cover by our own Gordon Webber.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

Gifts with the McGill crest

The tumblers are in ful crystal by Val St. Lambert, with engraved crest—12 oz. size, $3.25 each; 15 oz. $3.75. The tea cup and saucer is of English Bone China, with the crest in raised enamel —$1.95. There are also breakfast cups and saucers, $2.95 each; Sugar and Creams, $2.95 the pair; Cigarette Boxes oblong, $3.75; Ash Trays, $1.50 each; Salt and Pepper Shakers, $2.75 the pair; and Bon Bon Dishes, $1.25 each.

Letters

March 1st, 1960.

Dear Mr. Editor:

I would like to make some corrections and at the same time add a few additional facts to the report that appeared in the Autumn 1959 issue of the News concerning the life of the late Charles E. Fraser, a distinguished graduate of the Faculty of Engineering at McGill.

Prior to attending McGill and not after as was reported in the News, Charles Fraser worked as a newspaper reporter and photographer for the old and well-known Montreal newspaper, The Witness. After graduation from McGill in 1899 he moved to the United States, became a citizen of that country, and in 1903 superintended the construction of the Manhattan side of the Pennsylvania Railroad tunnels under the East River. When only 29 years of age he was placed in charge of completing one of the earlier sections of the East Side IRT subway between 14th and 42nd streets.

It was in 1908, after completion of the above work that, with the late Major James H. Brace, he formed the contracting firm of Fraser Brace & Co. and later, Fraser Brace Engineering Co. Ltd., of Montreal, Canada. Through the Canadian Company he was responsible for the construction of more than 20 hydro-electric power plants in Canada and the United States.

The Fraser concern also built the Federal shipyard ways at Kearny, N.J. and dry docks at Rosebank, Staten Island, N.Y. During both world wars he supervised the construction of 11 explosive and chemical plants, including Weldon Springs Ordnance Works at Weldon Springs, Mo.

In 1954 McGill University awarded him an honorary Doctor of Science degree for his contribution to the development of Canada. He was a member emeritus of the Moles, a construction Society, and a life member of the American Society of Civil Engineers.

Mr. Fraser was the Honorary President of the McGill Society of New York, a Director of Friends of McGill Inc., and an honorary life member of the Graduates' Society.

Very sincerely,

"A Friend"

WHAT HEARS the MARTLET

Cover Graduates

One of our many active graduates from Ardmore, Pennsylvania, a very busy gentleman who nevertheless keeps an unfailing "ear to the ground" on behalf of McGill, has sent us interesting clippings about two of his colleagues in the United States whose professional prominence has won them "cover stories" in two publications. Our correspondent is D. Alan Sampson, M.D. '31, a Pennsylvania anaesthetist who has himself achieved wide recognition in his profession.

The December 15th issue of "Modern Medicine" pays fine tribute to Dr. C.N.H. Long, M.D. '28, Sterling Professor and Chairman of the Department of Physiology, Yale University School of Medicine. Originally an organic chemist from Manchester University, Dr. Long joined the Medical Clinic at McGill in 1925, where he interested himself in the metabolism of diabetes and heart diseases and continued his medical studies here. The article describes him as "pioneer investigator of metabolic activity of the endocrine glands."

Our other subject is Dr. Kenneth M. Earle, M.Sc. '51, Dean of the Medical Branch of the University of Texas. His story appears in the November 1959 issue of "The Messenger" of Theta Kappa Psi, a medical fraternity. Dr. Earle received his M.D. degree at the University of Texas, but came to the Montreal Neurological Institute as Fellow in Neuroanatomy and Neuropathology from 1949 until 1951, when he won his McGill degree. Dr. Earle was also a Fellow in General Pathology here from 1951 to 1952.

A First Bequest

It is also with appreciation that we are able to record that the Alma Mater Fund received its first bequest from the late Ernest M. Jelly, B.Sc. '12, providing for a perpetual annual contribution to the fund.

Mr. Jelly was born in Almonte, Ontario January 5, 1888. He entered the Civil Engineering course and followed the family tradition by continuing in railway work. He was first employed as a transit man on the Ottawa and Smiths Falls divisions of the Canadian Pacific Railway and in 1918, he was appointed Division Engineer at Schreiber. In 1929, he was moved to a similar post at Brownville Jct., Maine, where he remained until his retirement in 1951. He died March 26, 1959 and is survived by his brothers Calvin, B.Sc., '21, Toronto and Lloyd, Montreal.

In his will, Mr. Jelly left the sum of $1,000 "to the Alma Mater Fund at McGill University, Montreal, Quebec . . . the income only to be used for the general purposes of the University."

How Things Have Changed

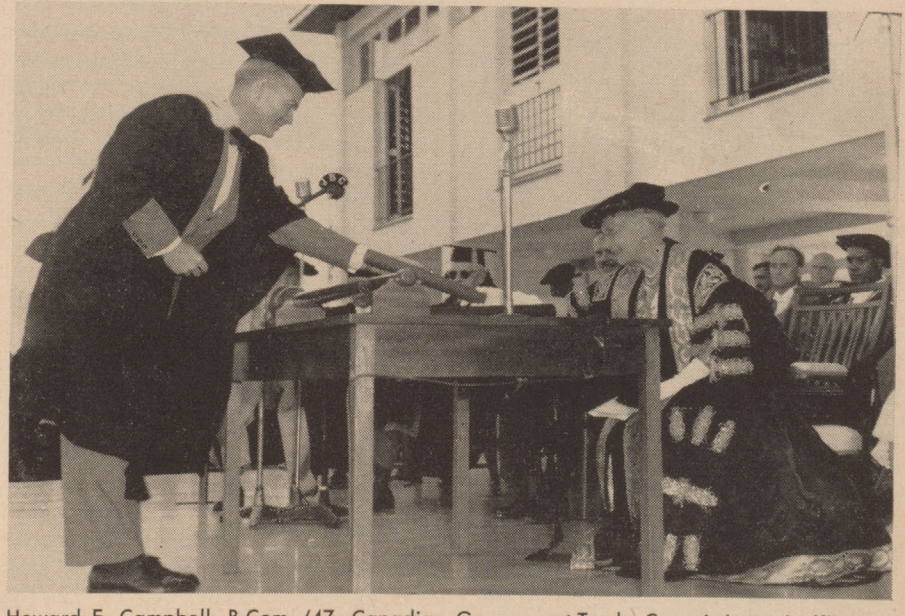

That the contemporary fashion of mail solicitation of all kinds — from magazines, encyclopaedias, seed houses, stamp firms, and so on — is merely a 20th century phenomenon can be appreciated in the following item, which will undoubtedly evoke the comment: "My, how things have changed!"

We have before us a faded newspaper clipping from the Montreal Gazette of May 25, 1857. The clipping is in the form of an advertisement on behalf of the "University of McGill College" and it bears the university seal. Here is the message, expressed in 19th century protocol:

"GENTLEMEN desirous of Subscribing to the UNIVERSITY FUND, are respectfully requested to call at the Exchange, St. Sacrament Street, or the McGill College Office, Burnside Hall, where Subscription Lists are left."

Bellairs and Fraser Labs

The University officially opened two new Research Laboratories in January. Early in the month, Dr. F. Cyril James, Principal and Vice-Chancellor, travelled to Barbados, W.I. to unveil a plaque at a new research centre for the University's Bellairs Research Institute. The plaque commemorated the generous benefaction of the late Cmdr. Carlyon Wilfroy Bellairs, R.N., in memory of his wife.

Howard E. Campbell, B.Com. '47, Canadian Government Trade Commissioner in Kingston, Jamaica, represented McGill University at a Convocation celebrating the tenth anniversary of the installation of Her Royal Highness Princess Alice as Chancellor of University College of the West Indies. Mr. Campbell was photographed above as he presented the scroll containing McGill's official greetings to Her Royal Highness. Canada's Minister of Finance, the Hon. Donald M. Fleming, one of the principal speakers at the ceremony, can just be seen behind Her Royal Highness.

For the second consecutive year, H. Harold Hemming, B.A. '14, president of the McGill Society of Great Britain, in conjunction with the Canadian Universities Society has entertained Canadian students at his home. The McGill group, pictured above, met on Saturday, October 24, 1959. They are: Front Row, left to right: Douglas Turner, B.A. '56, Saul Frankel, B.A. '50, M.A. '52, Ph.D. '58, Robert Denis, B.Eng. '59, Dr. Arthur Leith, B.Sc. '51, M.D. '55, Holly Higgins, B.A. '58, Sam Borenstein, B.Eng. '58, Blair Borden, B.Sc./Phy.Ed. '56, Judy Mason, B.Sc. '59. Second Row, left to right: Nancy Weston, B.A. '51, Nancy Philips, Dip. P.T. '57, Mrs. Freda Frankel, Mrs. Maryse Denis, Phyllis Smyth, B.A. '59, Daphne Castel, B.A. '59, Robert Shea, B.A. '59. Third Row, left to right: Edward Drew, Yves Fortier, B.C.L. '58, Mrs. Paul Byers, Dr. Paul Byers, BSc. '44, M.D. '45, Jennie Simpson, Myron Rusk, B.A. '53, John Jonas, B.Eng. '54, Judy Kaulbach, B.Sc. '58, Edward Cureton, B.A. '51, M.A. '57, John Jackson, B.Com. '56, Mr. Hemming, Helgi Ulk, B.Sc. '58, Derek Mather, B.Com. '54, Duncan McPhee, BSc. '56, John Olsburgh, B.Com. '48, Jack Chase, B.Eng. '58, Dr. John Caesar. Absent from photograph: Dr. Percy Backus, M.D. '19, Lionel Tiger, B.A. '57.

His bequest consisted of five acres of land, his residence "Sandacres" and other buildings on condition that McGill establish a research Institute for the study of special problems of the West Indies.

Bellairs has now been in operation since 1954. The new research facilities provide an aquarium, water tables and other equipment for studies embracing the whole field of marine biology, particularly flying fish, which comprise the bulk of all fresh fish consumed in the Barbados.

Late in January, Mrs. John R. Fraser officially opened the Fraser Research Laboratories in the Women's pavilion of the Royal Victoria Hospital, named in memory of her late husband, Dr. John R. Fraser, M.D. '10, Gynaecologist-in-Chief from 1929 to 1945, professor and chairman of the Department of Obstetrics and Gynaecology at McGill and Dean of Medicine from 1942 to 1944.

The new laboratories have been made possible through donations from private sources and from the proceeds of the Hellenic Festival, sponsored by the Greek Community in September, 1958. The equipment was provided mainly through research grants from the federal and provincial health departments.

Dr. George B. Maughan, M.D. '34, M.Sc. '38, Gynaecologist-in-Chief at the R.V.H. paid tribute to the work of Dr. Fraser at the opening. Dr. Fraser, it was pointed out, had always pleaded for more basic research to achieve an understanding of normal and abnormal birth processes. Under his leadership at the hospital, the clinical care of patients reached a peak second to none in Canada.

Mount McGill — At Last

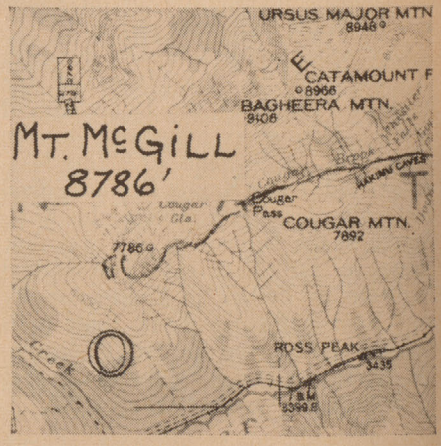

We now have our own private peak in the Hermit Range of the Selkirks in British Columbia. Early in February the Canadian Board on Geographical Names in Ottawa gave its approval to the name Mount McGill, 8,786 feet in height, towering above the Cougar Glacier, — some 53 years after it was first conquered by Dr. J. W. A. Hickson, later Professor of Philosophy at McGill and past president of the Alpine Club of Canada.

J. D. Cleghorn, the university's Student Aid Officer, an avid mountaineer, and a member of the Alpine Club who plans to make an assault on Mount McGill in the near future, has been working on the project of securing official recognition for the peak for some years. Let him tell the story:

"In the summer of 1907, Dr. Hickson was climbing in the Hermit Range with his friend and guide, Eduard Feuz, Jr., one of the original group of Swiss mountaineers brought out to Canada by the Canadian Pacific Railway.

"In the early days of Canadian mountaineering it was a simple matter to find many unnamed and unclimbed peaks within a reasonable distance from the railway. It was one of these, towering about the Cougar Glacier, that interested Dr. Hickson most. At once he and Mr. Feuz set out to conquer it.

"The climb was over snow and rock and it took them some seven hours to reach the summit, where, as the guidebook says: 'They had excellent views'. Before their descent, they built the traditional cairn, left a written record in a metal container, and declared the mountain to be named for McGill University.

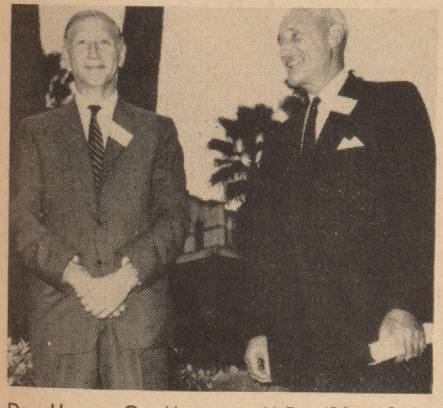

"Much of Dr. Hickson's fame as a mountaineer had been forgotten with the passing of time, until this story came to light after his death in 1956, when I was invited to prepare a news item on this event in his life, and to make formal application to the Canadian Board of Geographical Names for official recognition. We are delighted that such recognition has now been granted and that the peak will be appropriately identified on the map."

McGill Sports History

We've heard recently that the Canadian National Exhibition's Sports Hall of Fame and Hockey Hall of Fame are attempting to build up a record of the early days of sports activity in Canada. In fact, McGill has been approached directly for early photographs of our teams, books or documents relating to the early history of sports at McGill. R. H. Hewitson, retired sports editor of the Toronto Telegram, is looking after this matter for the C.N.E., and we have offered to canvass our graduates for any material which might be of assistance to him.

Mr. Hewitson was interested in a book on McGill's sports history; but no such volume has ever been compiled. Perhaps his request will prompt some thought toward such a project. But the Halls of Fame also need photographs, souvenirs and other items which might help illustrate McGill's sports role in the earlier days. We hope this request will encourage graduates to rummage through their memories and their trunks. Please send any suitable material to us here at Martlet House, 3618 University Street, Montreal 2, Que.

Canada's Sports Halls of Fame would be sadly deficient without reference to McGill's distinguished sports history.

Dr. Henry G. Morgan, M.D. '38, of Los Angeles, was kind enough to send us the photograph above, taken at the Mission Inn, Riverside, California, last November. The occasion was a Symposium on Clinical Medicine and Surgery, at which Dr. Bram Rose, M.D. '33, M.Sc. '37, Ph.D. '39, left, spoke on "Collagen Disease". With Dr. Rose is Dr. Gordon R. Dempsay, M.D. '25, who is Western representative of Lederle Laboratories, sponsor of the symposium.

Public Speaking

For the 12th successive year, the Alumnae Society of McGill University held its province-wide public speaking contest for high school girls. The finals were held late in February on the campus, under the chairmanship of Mrs. Hugh Hamilton, Society president.

First prize of a $50 Canada Savings Bond, a miniature cup and the silver rose bowl went to Miss Cathy Rattray, Hudson High School. Miss Trina Lutter, Westhill High School and Miss Sandra Featherstonhaugh, Lachine High School won second and third place respectively.

Out-of-town contestants, representing various McGill branches in the province were: Miss Shirley Dunn, Ormstown High School, District of Valleyfield; Miss Kay Ferguson, Arvida High School, Lake St. John-Saguenay District; Miss Joan Lee, Shawinigan Falls High School, St. Maurice Valley District; and Miss Alix Palk, King's Hall, Compton, St. Francis Valley District.

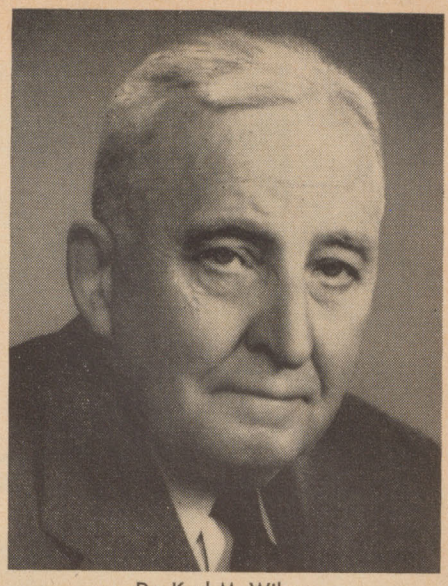

Miss Barbara Lax and Miss Francis Whiteley were in charge of the arrangements for the contest.

Gertrude Mudge Fund

Medical graduates who have contributed to the Gertrude Mudge Memorial Student Aid Fund, will be pleased to learn that over $32,000 has been subscribed to this worthy cause, and already the money is being put to good use to aid worthy students.

The fund, in memory of the late Gertrude Mudge, who was Assistant Secretary of the Faculty of Medicine for 30 years, was started in July, 1958 and returns of the first appeal totalled $12,143. Shortly thereafter, an anonymous McGill medical graduate offered to match, dollar for dollar up to a total of $10,000, all additional contributions. The result to date is a healthy $32,144 student aid fund.

During the course of the campaign, many fine tributes were paid Miss Mudge by contributors who remembered her kindly, sympathetic understanding of the problems encountered by the generations of medical students to whom she was both friend and counsellor. We know she would be proud of the manner in which her graduates have responded and no memorial could have pleased her more than a fund to extend financial assistance to the medical undergraduate.

Dr. Karl M. Wilson

Well Deserved Tribute

While on matters medical we must report, with pride, the establishment at the University of Rochester of the Karl M. Wilson Lectureship in obstetrics and gynaecology. It is named after Karl M. Wilson, M.D. '08, who went out from McGill to practise and later to become a member of the original faculty which opened the U. of R. Medical School in 1925. In addition to his important university work for 30 years, Dr. Wilson was obstetrician and Gynaecologist-in-Chief at the Strong Memorial Hospital until his retirement in 1952.

Alberta Pioneer

Every now and then, we hear a heartwarming story about McGill loyalty, and we'd like to share this one with you. It comes from Edmonton, Alberta in a letter written us by E. K. Cumming, B.Eng. '44. Mr. Cumming, an Alma Mater Fund worker during 1959, tells us of "a most delightful experience" which, he intimates, is quite different from normal fund-raising practice. But let us quote Mr. Cumming's letter:

"In October, I sent out a letter to the list of graduates assigned to me and asked each graduate to save me as much work as possible by sending in his or her donation to me. A few days later, my secretary told me that a Mrs. Walter Murray wished to see me regarding McGill. She had brought her donation to my office.

"Mrs. Murray, who was formerly Gertrude Stanton, grew up in Montreal, and graduated from Royal Victoria College in 1906. She had a most interesting story to tell . . .

"In 1908 she came to Edmonton and taught at the Alex Taylor School. The following year she went to Nanton, Alberta, and taught at the high school there. This, incidentally, was the same school that I attended some 30 years later. In 1909, she married Walter Murray, whom she had known in Montreal . . . they took up a homestead near McLaughlin, Alberta, which is some 25 miles from Lloydminster. Mrs. Murray had the most interesting stories to tell about life in those days when it took them two days to go to Lloydminster with a team of oxen.

"I thought you would be interested in this story of an old-time McGill graduate, a pioneer of the West, who thought enough of McGill to bring her generous donation to my office."

Reunion at Breakfast

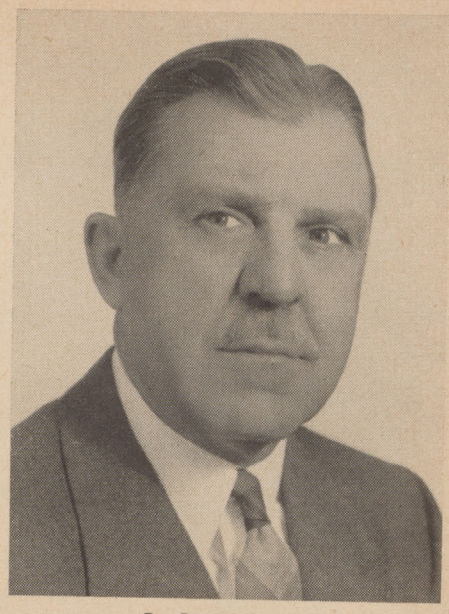

Graduates of the McGill School of Social Work will have breakfast together during the next Canadian Conference on Social Work in Halifax in June. The breakfast will be held on Tuesday, June 7 at the Nova Scotian Hotel. Dr. John J. O. Moore, Director, McGill School of Social Work, will address the reunion group.

Meets the Queen

From Los Angeles we learn of the thrilling experiences of Romeo Lajoie, M.D. '27, in Edinburgh, Scotland last November. Dr. Lajoie, a Fellow of the Royal College of Physicians, was chosen as one of 150 doctors to attend the inauguration of Her Majesty, Queen Elizabeth, Queen Mother, as a Fellow of the College on November 7th. Moreover, following the ceremony, Dr. Lajoie was the second of only 18 Fellows chosen to be presented to Her Majesty, and he was accorded a ten-minute audience.

During his audience, Dr. Lajoie tells us, "half of the conversation was in French. She complimented me for having graduated from McGill University. She expressed that McGill, in her opinion, was one of the great seats of learning in the Commonwealth".

Dr. Lajoie, by the way, had been officially appointed by the Governor of California to present greetings to Her Majesty on behalf of the people of that state and the Mayor of Los Angeles had entrusted him with a leather-bound book of aerial photographs of the city, appropriately autographed by the Mayor, as a gift to Her Majesty from its citizens.

Dr. Romeo Lajoie

To top off a memorable trip, Dr. Lajoie visited Madrid and Lisbon and in the latter city, he received an invitation to be guest lecturer at the University of Portugal Medical School next September. We understand Dr. Lajoie will accept this invitation and he plans to deliver lectures on the medico-legal aspects of cardiology.

The class of Medicine '24 was one of over 50 holding reunions at McGill last fall. Reunion chairman is Vance Ward, the centre figure in the doorway above. Other members of the class are, left to right, Norman M. Vines, W. J. McGinn, E. E. Bearisto, C. F. Maraldi, E. A. Amos (profile, foreground), A. R. Keddy, E. Richardson, H. G. Ross and H. E. Bagley (also in doorway). Group in rear to right of doorway: J. J. Ryan, E. J. S. Major, E. A. Blumerfeld, R. E. Elderkin, A. Elvidge, S. Mirsky, G. A. Sherman, C. L. Pope, R. Smallman. Group in front, right half of photo: C. A. McIntosh, A. M. McLellan, H. Boyle, J. C. Boyce, D. J. McGillivray, J. S. Henry, Rex H. Wiggins, J. J. Griffiths, C. J. Tidmarsh, L. MacDiarmid.

Good Design by McGill Architects

by Anne MacDermot

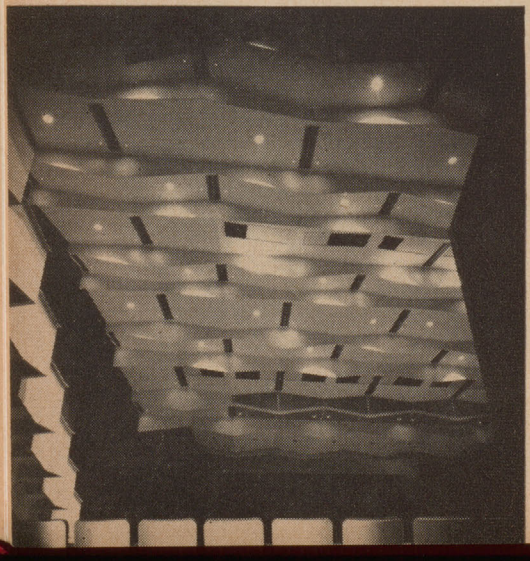

IF THOSE "architects in co-partnership", Affleck, Desbarats, Dimakopoulos, Lebensold, Michaud and Sise don't stop getting so famous, they'll have to make a name for themselves!

The pun is unfair of course because professional rules and regulations prohibit architects from using any name other than that of the senior partner or partners, and in this case all partners are senior. However, the exotic monicker is tripping up an admiring Canadian public which is becoming more and more aware of a strong team of architects, changing the skyline of cities in east and west in a fairly radical way.

Vancouverites, for example, point with justified pride to their year-old Auditorium and praise "those architects from Montreal". Back east, Montrealers are watching the steady rise of giant Ville Marie, and the start of work on the elegantly-conceived Place des Arts. They refer to "that firm with all those architects".

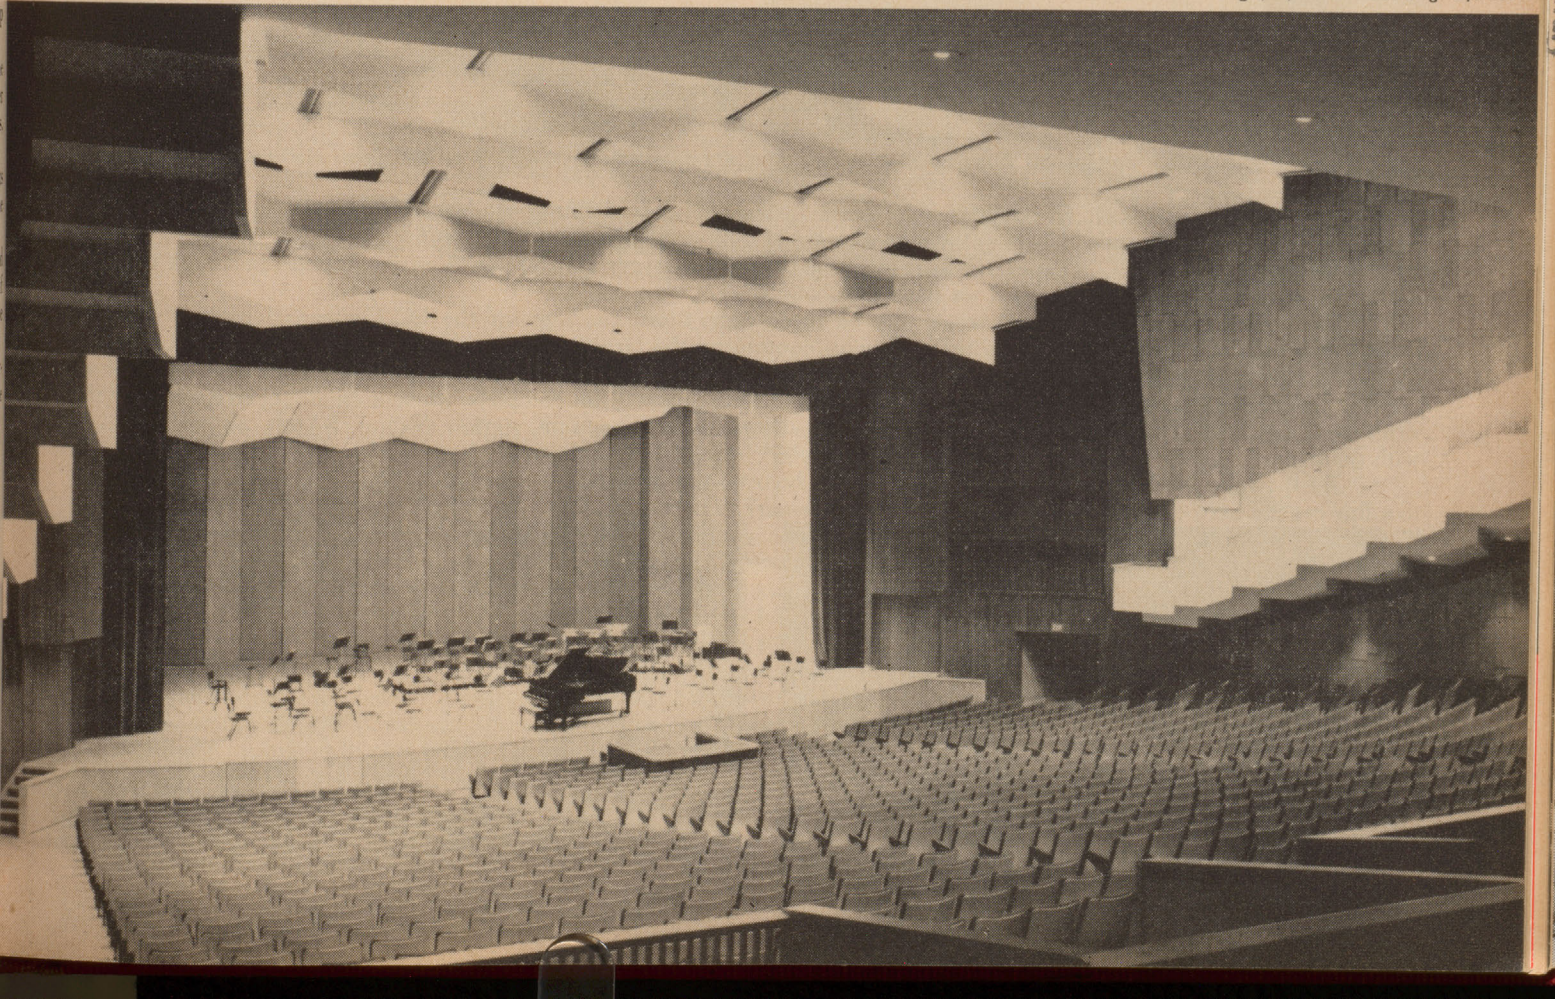

For our purpose, the brilliant partners do have a common denominator. At one time or other they have all had a close connection with McGill, as either student or lecturer, or both (and many of them would still be teaching here if not so busy) which makes them for us"the McGill group". Who knows — they may even be known some day as the founders of a "McGill school".

Speaking of the McGill School, its Director and practising architect, John Bland, hails the 5-year old co-partnership as "an extraordinary group to develop in Montreal". He was referring to the lack of architectural tradition here

Upper: Patio and outdoor restaurant. Below: the stage, 9,250 ft. Seating: 2,813.

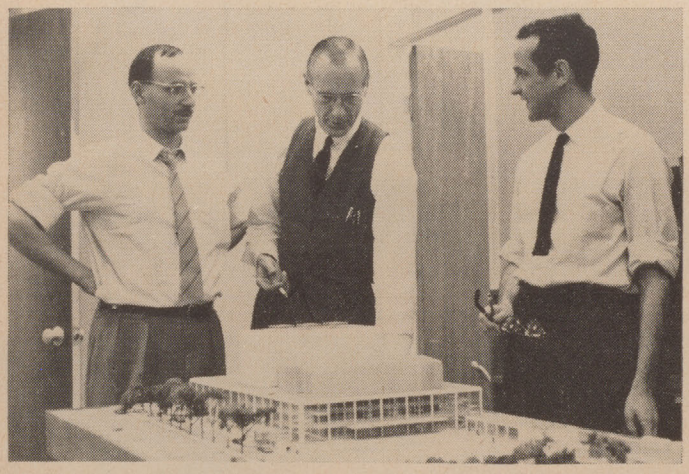

to inspire a progressive group. What the city lacks, however, may be compensated for by the highly stimulating and liberal atmosphere of the McGill School of Architecture. It is one of the most exciting hives of activity on campus (it stays open by day and night) where students are given the broadest possible scope for experiment.

Though registered at different periods (Raymond Affleck, 1947; Guy Desbarats, 1948; Dimitri Dimakopoulos, 1955; Jean Michaud, 1945; Hazen Sise, 1927-29 and Fred Lebensold as professor, 1951-57) all came under its influence and left it with a similar, original approach to architecture. While professor Bland disclaims all credit from the suggestion, this may be the link that drew and kept the individualistic partners together.

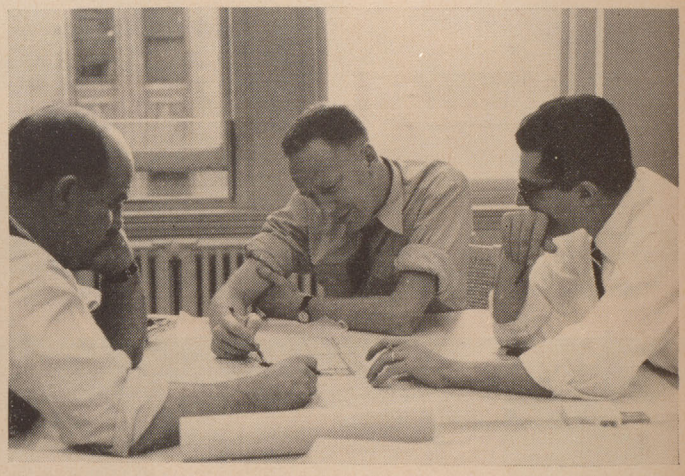

Their former director reminisced, alphabetically, on each of them . . . "Ray Affleck, very able, stubborn — a good quality when combined with ability, has proved to be an excellent teacher with a lot of patience, still drops in to the School to discuss progress on Ville Marie, or give a critique . . . Guy Desbarats, very clever, he designed the first McGill School of Architecture building construction lab to give architects a chance to work with the materials they would be using later, a very successful experiment. You should see Guy pack a trunk. He can take everything most people would jam into two trunks, get them in one and still have space left over . . . Dimitri Dimakopoulos — has a magnificent concept of design, grasps the unity of a thing, a rare talent, there is grandeur in his work . . . perhaps being born in Athens has something to do with it . . . Fred Lebensold, the expediter of the group, has great energy, tireless, terribly quick to think and act . . . Jean Michaud, a French Canadian with great charm and taste, polished manners, very Latin, perhaps the diplomat among them . . . Hazen Sise — wise, yes, and shrewd — he has been around, taught the history of architecture for a number of years here and taught it very well because he lived through the battle of the '30's for modern design".

These men have made their name in the successful practice of what they call cooperative architecture. How do they work? By a method of "brainstorming" all six go into a huddle over design ideas for the project in hand. By some undisclosed process of selection they emerge intact with a unanimous presentation.

Their venture started in the winter of 1955. Working individually out of a basement flat on Sherbrooke Street West, Ray Affleck, Jean Michaud, Guy Desbarats and Hazen Sise collaborated on an entry to the competition for the

Fred Lebensold, Ray Affleck and Dimitri Dimakopoulos at work.

Guy Desbarats, Hazen Sise and Jean Michaud in conference

Vancouver Civic Auditorium. Hearing of this, Fred Lebensold and a young student, Dimitri Dimakopoulos, asked to go in with them. As a result, the six entered as a unit and to their astonishment they won.

Having joined forces on paper, the next step was to move to larger quarters on Western Avenue and work together on the enormous plum that had landed on their laps.

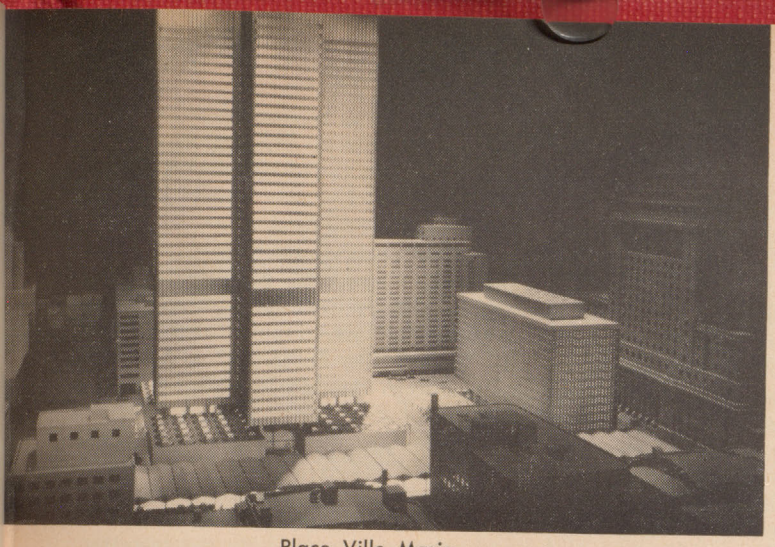

The beautiful Vancouver Auditorium opened three years later, too late for the BC Centennial but just in time for the Queen. It is a design on a grand scale. Besides containing the largest stage in North America, it is distinguished by the first patio-restaurant in Canada. The outdoor tables have already proved a popular lunch spot and on summer evenings add greatly to intermission enchantment. The undertaking will be complete when a small theatre, part of the original design, is finished next year. Architect on the site is McGill graduate, Arthur Nichol, BArch '52, an associate with the firm.

By the time the Vancouver project was off the boards, the Montreal — whoops — McGill group, had developed to a fine art the hard-core teamwork which is their trademark. Their manpower, as well as experience in complex centers like the Vancouver Auditorium put them in line for two more jobs. In quick succession they were named associate architects for the Ville Marie project and designing architects for Montreal's long-awaited Concert Hall, i.e. Place des Arts.

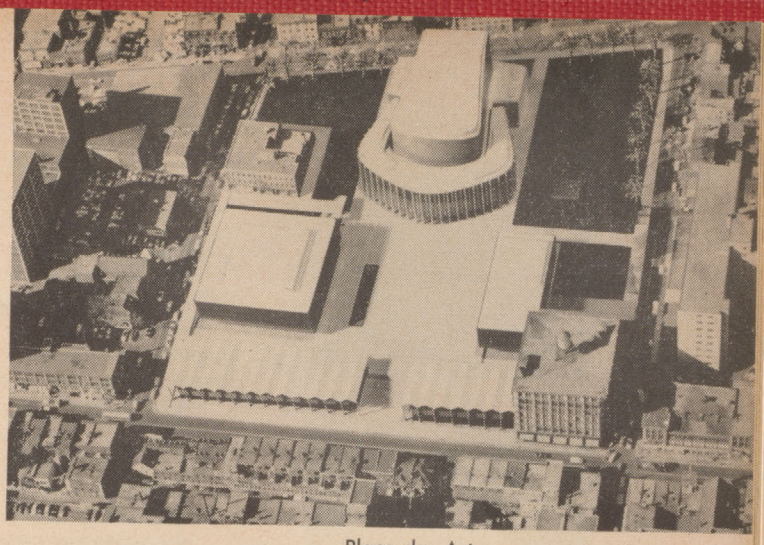

Concurrently with the spectacular jobs the partners have been busy with other work, some examples of which appear here. The buildings speak for themselves and reveal cleanness of line, artistry of outline and elegance of detail. Incidentally, at McGill itself, their work is represented in a minor way by some of the features of the Redpath Library wing (Hazen Sise) and a hand in the new Physical Sciences Center (Raymond Affleck).

By 1958 Western Avenue had become "cosy but cramped" and the co-partners moved into the center of town. The six who three years before were sharing office space and the assistance of one secretary today find themselves with a battalion of 43 draftsmen and office staff of 8. All of which has had no effect on the way they work. They still get together for major decisions and hammer out their consensus of opinion as a unit.

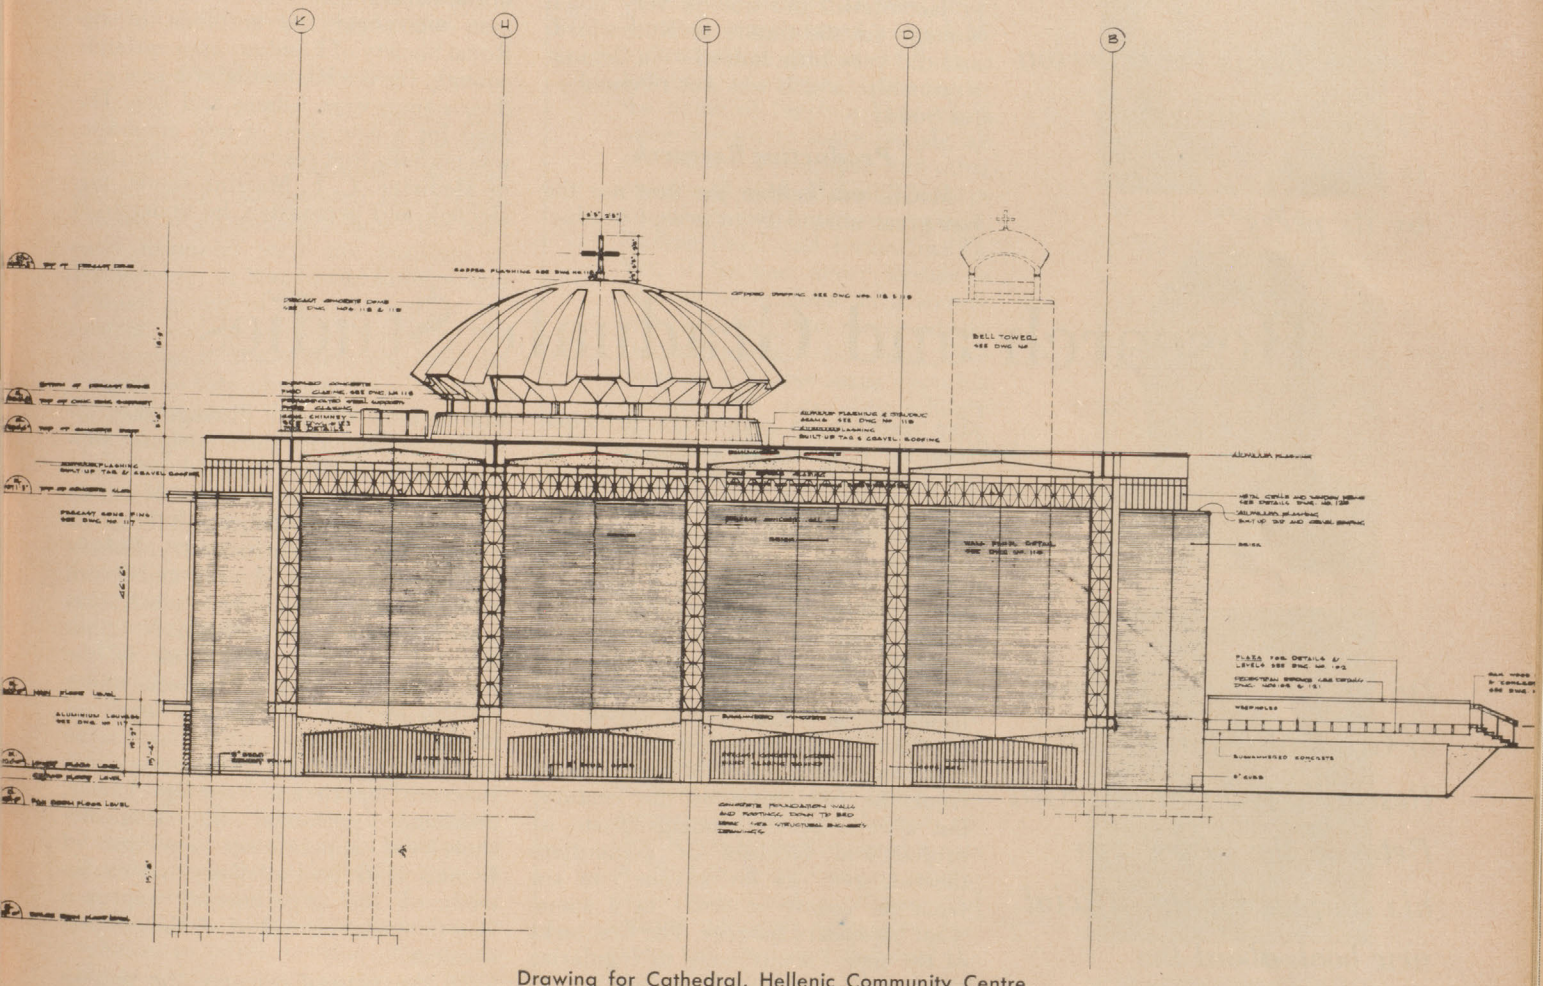

They are a lively and attractive group — one to watch if not pronounce.

The McGill Story

Research and Graduate Studies

Dr. D. L. Thomson, Dean of Graduate Studies and Research, looks at "McGill Between the Wars", in his chapter for the official new book about the University, "The McGill Story", due for release this Spring. His discussion for the development of research and graduate studies at McGill is extracted from his chapter:

"Today this is the criterion by which a university is judged by its peers."

AS I LOOK back over the years, including the decade before I came to McGill in 1928, it seems to me that the greatest change has been the increasing emphasis placed upon research and the training of graduate students. Today this is the criterion by which a university is judged by its peers, but it was not always so: Mendel, Darwin, Pasteur, Marie Curie, Freud, even Einstein, did not hold university positions during their greatest investigative years. It may seem strange to say this, since the most famous research ever carried out at McGill dates back to the beginning of the century; but this was the exception that proves the rule, and in fact McGill did not do very much homage (at the time!) to Rutherford, and did very little indeed — a demonstratorship, which was not renewed — for Soddy.

Productive Research

McGill was neither the first nor the last great university to accept productive research as one of its principal responsibilities to the community; the formation of the National Research Council of Canada in 1917 was a straw that showed which way the wind was blowing—and for many years (though not now!) little more than a straw, as far as direct aid to research in the universities was concerned. In our own campus, the establishment of the Faculty of Graduate Studies and Research, in 1923, was a milestone: true enough, Master's degrees and even occasional Doctorates had been granted from the beginning of the century, but always by the undergraduate or professional faculties or committees thereof, and (as far as one can see from the scanty records) in a somewhat haphazard manner. The first tasks of the new Faculty were to regularize these procedures and, especially, to draw up firmer rules and regulations for the degree, then still regarded in some quarters as new-fangled and Germanic, of Doctor of Philosophy. These revised regulations have changed but little through the years, save that more and more Departments have come under this umbrella; and it is interesting to note that even when the degree was thus firmly established, McGill was in no hurry to confer it. Several years separated the second from the first; today there are approximately a hundred per annum. In some subjects, such as Chemistry and Physics, a pattern soon became set. Toronto was, for very many years, the only other English-Canadian university to offer the Ph. D. and drew most of its candidates from Ontario; even now, despite the post-war growth and energy of many other graduate schools, in the natural sciences the McGill Ph. D. is still a powerful lodestone to the Maritimes and to the West.

Money and Men

It takes more than rules and regulations to build a graduate school: money and men are required. In the twenties, in the natural sciences, we had but two men who held the accolade of the Royal Society of London: appropriately enough, for the beginning of a new era, their names were Adams and Eve. The need for a new slant, a new emphasis, was perhaps first perceived by the Dean of Medicine, C. F. Martin: subtle, far-sighted, and persuasive, he understood that he must bring in distinguished investigators and give them adequate support. He brought in Penfield and Cone and fostered the growth of the Montreal Neurological Institute around them; he brought Collip in Biochemistry, Babkin in Physiology, and Murray and Smith in Bacteriology; he got generous Rockefeller help, not only for the M. N. I., but also for the University Clinic in the Royal Victoria Hospital, where, under the "mild and magnificent eye" of Meakins there grew up (to name some of our own present professors only) Browne, Christie and Venning. A later, brilliantly successful but tragically short-lived appointment was that of Lyman Duff in Pathology, which introduced the experimental approach into this most central of all the medical sciences.

In the natural sciences the pattern was different and developed more slowly; I have spoken of the 1930's, the years during which McGill perforce marked time, and for a variety of reasons it happened that very few appointments were made at senior levels by importing scholars from elsewhere. What did happen was that a few men, such as Maass in Chemistry and Foster in Physics, who had long been devoted investigators and won international recognition, began to rise in the hierarchy and eventually became Chairmen

of their Departments; and their enthusiasm and example infected others. On the Arts side the progress was slower still: thirty years ago there was not a single member of the teaching staff in Section II of the Royal Society of Canada; here the "breakthrough" took place towards the end of my period, when several senior vacancies in Economics and Political Science were filled by young and active men, vigorous in research. In Engineering, as I have implied, consultative work was rated far ahead of any laboratory work that could be undertaken on the campus. But even where progress was slow, it was steady; and there is today no sector of the University that does not have its active research programs.

Institutes Develop

It was not till after the Second War that these developments took the now popular form of "Institutes", devoted almost wholly to research and seldom entered by an undergraduate; the only early examples were the Institute of Parasitology at Macdonald College, and a small group of laboratories for Industrial and Cellulose Chemistry. But the change in atmosphere preceded the translation into physical form; it came to be recognized that there were members of the staff who could serve the University best by giving nearly all their time to research and their graduate students, and little or none to students in other Faculties. More important, creative productivity was given more and more weight in selecting candidates for appointment or promotion.

This evolution, necessary for any university that aspired to first-class standing, did not fail to create difficulties. The training of graduate students takes a great deal of time, and expansion of staff would have been necessary even if the other faculties had remained constant in enrolment. In laboratory subjects, graduate students also take up a great deal of space, and the older buildings, not designed with any such evolution in mind, became uncomfortably crowded — and remain so. Even where the direct costs of research (purchase of equipment and supplies, employment of research assistants and the like) are fully covered by grants from external bodies, its indirect costs (professors' salaries, provision and servicing of space, maintenance of library facilities, and so on) have to be met by the University, and it is probably fortunate that the task of realistically assessing the total is so formidably difficult that nobody attempts it. It is,

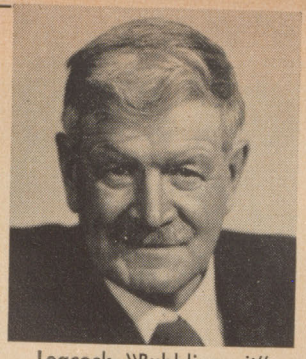

(*Continued on page 30*)

THEY SERVED WELL

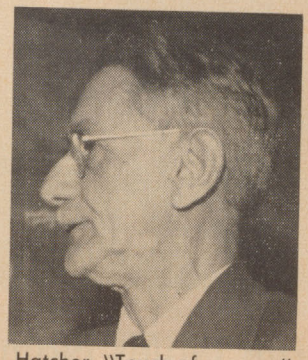

In his chapter for "The McGill Story", Dean Thomson recalls, with gentle humor and affection, several outstanding teachers well-remembered by a host of graduates. Dean Thomson's pungent comments about these personalities will evoke many memories:

Yet if I am to name names at all, I must certainly recall a few of those who were renowned chiefly as teachers and are affectionately remembered as such by thousands of graduates. Such a list must, of course, be headed by the name of Stephen Leacock, a name known to more people, all around the world, than any other associated with McGill (perhaps all others put together, even including Osler and Rutherford?). Yet, if he had never written a line, or never gone on a lecture tour, and had thus remained unknown elsewhere, he would have made an indelible mark upon his students; he was outstandingly one of "those regal Dons, with hearts of gold and lungs of bronze" and his bubbling wit and his own huge enjoyment of it are unforgettable.

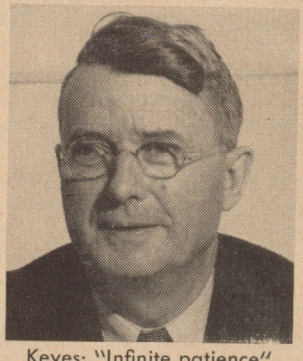

Witty, too, in a quieter vein, was Woodhead, who always struck one as a reincarnation of Charles Lamb; and both were "Blue-coat boys". Hatcher could etch the outlines of organic chemistry into his students' minds with the acid of a touch of sarcasm, yet take endless pains to help those who seemed to need and deserve advice. Keyes presented the elements of Physics to generations of students with lucid kindliness and infinite patience; Gillson, cadaverous and sardonic, despised the kind of mathematics that undergraduates require ("arithmetic", he called it), but taught it brilliantly; and, from the early thirties almost to the present day, one was always conscious of the presence in the background of T. H. Matthews, the Registrar, unweariedly prompting and advising, smoothing pathways and untying red tape. Every graduate will recall many more who served the University well: *vixere fortes ante Agamemnona.*

Leacock: "Bubbling wit"

Hatcher: "Touch of sarcasm"

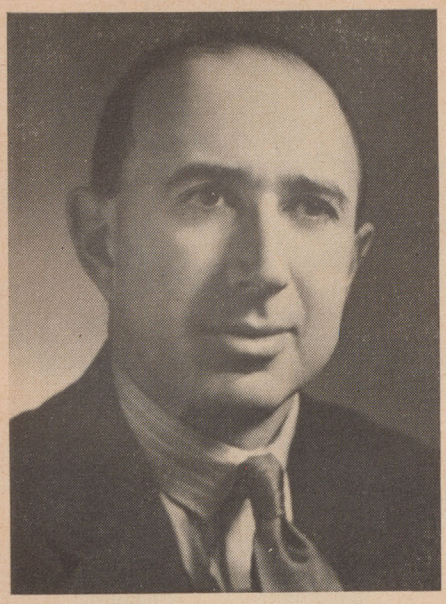

Keyes: "Infinite patience"

Gillson: "Sardonic"

Matthews: "Smoothing pathways"

Lorne Gales Named Development Officer

D. Lorne Gales, the Graduates' Society's well-known General Secretary, has taken on a new challenge and new responsibilities.

Late in February, Dr. F. Cyril James, Principal and Vice-Chancellor, and Stuart Finlayson, President of the Graduates' Society, jointly announced Lorne's appointment as the University's first Development Officer.

This new position at McGill, created by a resolution of the Board of Governors, carries with it "responsibility to plan and co-ordinate all fund-raising activities of the University, for the integration of the Alma Mater Fund, the McGill Associates, Gifts, Grants, and Bequests".

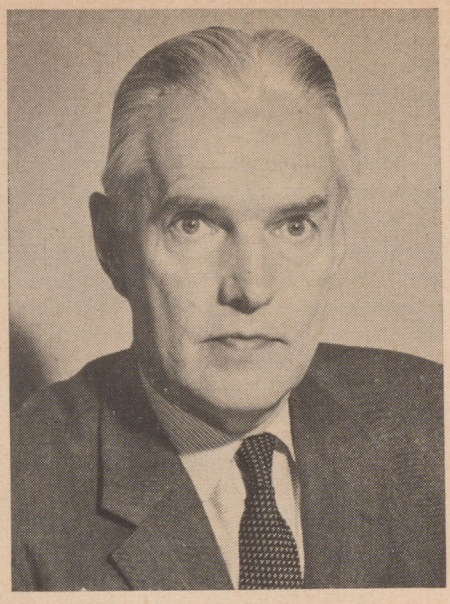

Lorne's new duties, however, will not remove him from the Graduates' Society. He will continue to supervise the activities at Martlet House, 3618 University Street, and in Mr. Finlayson's words, "will thus provide an additional important link between the Society and the University".

A native of Montreal, Lorne was educated at Lower Canada College and received his B.A. degree at McGill in 1932, following which he enrolled in the Law School and was awarded a B.C.L. degree in 1935. While an undergraduate, Lorne was president of the Students' Society, 1934-35, and was active with the University's rowing team which won the Dominion of Canada 150-pound championship in 1929 at the Canadian Henley.

After graduation, Lorne went out to practise law in Montreal until his legal career was cut short by the Second World War. He saw active service with the Canadian Armoured Corps as Captain at Headquarters staff until 1945.

After the war, Lorne joined the Graduates' Society as full-time Field Secretary. He was appointed General Secretary in 1949 and in 1952, he was named secretary of the Alma Mater Fund which had been organized in 1948 by E. P. Taylor, B.S. '22.

In 1939, Lorne married the former Isabel Graham Dawson, B.A. '33, B.C.L. '36, and he is the father of one daughter and three sons.

John Lafleur Gets Society Appointment

John T. Lafleur, B.A. '37, has been named Assistant General Secretary of the Graduates' Society by the Board of Directors. John will take over some of the responsibilities of Lorne Gales, whose appointment as the University's first Development Officer is reported elsewhere on this page.

John is a native of Montreal and he received his early education at Selwyn House and Ashbury College, Ottawa.

After graduation from McGill in 1937, he joined Canadian Industries Limited and served in a number of Staff positions until his retirement as Personnel Manager in 1956.

John is married to the former Margaret Byers and they have three children.

In taking over some of the duties of the General Secretary, John will free Lorne to concentrate on the Fund and Development aspects of McGill.

New Field Secretary

E. Dorrance (Ted) Taylor B.A. '49, has joined the staff of the Graduates' Society as Field Secretary and will assume responsibility for servicing the 54 branches of the Society throughout the world. Ted will also look after the organization of new branches and will supervise the annual fall reunions and the organization of graduating classes.

A native of Lachine, Que., Ted received his early education at Lower Canada College and served with the Royal Canadian Air Force during the Second World War. While at McGill, he was a member of the Scarlet Key Society; co-chairman of the student division of the War Memorial Campaign, 1946-47; and was active in the organization of the University's first Winter Carnival in 1948. He was a member of the University's senior water polo team which won the intercollegiate championship, 1948-49.

Since graduation, Ted has been associated with the Dominion Textile Company Ltd., and for the past five years has been working at the firm's Magog plant. He is married to the former Margaret Byles, Surrey, England, and they have one child.

In late May and early June, Ted will undertake his first extended tour of branches in western Canada. He will visit Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Trail, Vancouver and Victoria.

E. Dorrance (Ted) Taylor, B.A. '49

Dr. F. Cyril James

Brighter Prospects

The legislation that received the Royal Assent in the Red Chamber, at Quebec, on Thursday March 10, 1960, marks an historic step forward in the development of education in this Province at all levels. After the many comments that I have been compelled to make during recent years about the financial difficulties that faced McGill, it is a pleasure to report that the prospects for the 1960-61 session are much brighter.

Three Developments

Confining ourselves to those aspects of the new legislation that affect universities, there are three significant developments. In the first place, the Government of Quebec has reached agreement with the Government of Canada on the controversial subject of government grants to universities. Any province that wishes to do so may now impose its own taxes (deductible by the taxpayer from the amount he pays to the federal government) and out of these revenues pay operating grants to the universities within its borders. When a province so decides, the federal government will make no further grants to institutions in that Province, but will continue its policy of federal grants to universities in provinces that are satisfied with this policy.

It is not yet known whether other provinces will take advantage of the arrangement, but Quebec has taken its decision. An additional tax of one percent has been imposed on corporate profits, to raise about $8,500,000, and this fund will be divided among the

(*Continued on page 20*)

Fee Reductions

The scale of tuition fees, adopted for the 1960-61 session, as announced by Dr. James, is shown in comparison with present fees. They are inclusive of student fees and represent the total amount payable for the session:

Degree and Diploma Courses	Fees for Present Session	Fees Effective in 1960-61 Session
Agriculture — Degree	$300.	$275.
— Diploma (Non-Resident)	250.	250.
Arts	550.	425.
Commerce	550.	425.
Dentistry	600.	500.
Divinity	500.	400.
Education: 1st & 2nd years	225.	225.
3rd & 4th years	550.	425.
Diplomas	225.	225.
Engineering & Architecture	700.	525.
Graduate Studies: Full Time	500.	425.
Half Time	250.	250.
Additional Year	50.	25.
Non-Resident Year	10.	10.
International Air Law	500.	425.
Master of Library Science (Including Library Visits)	500.	425.
Handicrafts	375.	375.
Household Science	300.	275.
Law: 1st to 3rd Years	525.	425.
4th Year	425.	350.
Library Science (Including Library Visits)	500.	425.
Medicine: Degree — General Course	750.	600.
— Special Combined Course		
1st and 2nd Years	—	475.
3rd to 7th Years	—	600.
Diploma — Registration	10.	10.
— Laboratory Year	165.	165.
— Lectures & Colloquia	50.	50.
Music: Degree — Composition	500.	450.
— Performance	600.	550.
— School Music	500.	450.
Diploma — Associate	400.	400.
— Licentiate	450.	425.
Nursing	500.	400.
Physical & Occupational Therapy	500.	400.
Science	600.	475.
Social Work	500.	425.
Partial Courses		
Commerce (fee per full course)	115.	115.
Science (fee per full course)	125.	125.
Music	various	various
Engineering (fee per hour, per week, per term)	22.	22.
Arts & Other Faculties (fee per full course)	115.	115.

THE CAMPUS

New Union In Sight

A new Students' Union is getting closer to reality—that is—a site has been chosen and drawings for the eventual building approved.

The new headquarters will be at the corner of Milton and University Streets, on the site now occupied by the Arctic Institute.

A special committee under J. A. Fuller has been studying the problem of a new Union for the past two years. His committee has comprised students, graduates, staff and governors. It is recommending that the proposed union be a four-story structure, embracing 20,000 square feet of floor area. Among special features will be a sound proof rehearsal room and music, reading and sitting rooms.

Swimmer Pauline McCullagh, fourth-year Arts student, chats with Dr. Muriel V. Roscoe, Warden of Royal Victoria College, and Dr. F. Cyril James, Principal and Vice-Chancellor, who officially opened the new R.V.C. swimming pool at a ceremony on November 27th, 1959.

Social Worker In India

ASSOCIATE Professor J. B. Lightman of the School of Social Work, has been sent on an interesting assignment for the Indian Government.

Over the next year he will represent the Council of Social Work Education in the council's project "India Project". During this time he will be attached to the Madras School of Social Work.

Professor Lightman joined the McGill Faculty in 1954. He has devoted much time to developing a training program for foreign students here. Last summer he served for three months with the International Cooperation Administration of Costa Rica. On the present assignment he is one of four people named by the technical assistance program of the U.S. Government.

Appointments

THE following have been appointed full professors at McGill:—

Robert E. Bell, Physics Department,

F. Clarke Fraser, Department of Genetics,

J. Langman, Anatomy,

H. W. I. Schwerdtfeger, Mathematics,

Eleanor Hill-Venning, Experimental Medicine.

S.E.C., Daily Leaders

Stuart L. Smith, a second year medical student from Montreal, was chosen President of the Students' Society during campus-wide elections held early in March. With 45 per cent of the student body voting, Smith polled a total of 1,170 votes against the 643 votes gathered by his closest rival, Zafar Khan, third year commerce. Smith succeeds Bryce Weir, a fourth year medical student.

McGill Daily appointments for 1960-61 went to Morris Fish, first year law, Editor-in-Chief; Denis Coupland, second year Arts, Managing Editor; and David Angus, first year law, Editorial Board Chairman.

Placement Busy

ON January 4, 5, 6, the Placement Service held another concentrated recruiting programme on the campus involving the graduating classes and post-graduate students in Engineering, Chemistry, Physics, Mathematics and some in the Biological sciences.

This year 104 companies and government departments sent representatives to McGill, 20 more than last year. With the second running, this radical system of campus recruiting seems to be generally accepted as a solution to many of the difficulties which beset companies, faculty and students under the old system.

During the three-day period in January this year, 245 senior students had 1835 interviews with the participating organizations, or an average of between seven and eight interviews per student. For weeks they had been primed with literature placed in department libraries, and employers spoke highly of the students' state of preparedness. As there were no lectures on the dates in question, and few if any exams or class tests for the majority of students, employers found them in an "employment" frame of mind. In previous years, with lectures in full swing, there was a good deal of anxious clock watching by all parties concerned, not to mention some well-justified muttering by members of the teaching staff when confronted by empty seats at lectures.

In addition to concentrated recruiting, the Placement Service has arranged over 100 other visits for companies unable to come to McGill during the three days in January. All this adds up to a record year insofar as visits are concerned. Whether it will be a record year in the number of jobs available, and placements made, remains to be seen.

WINTER REVIEW

by Roger Phillips

In the fall issue of the News we suggested that extra-curricular life at McGill was heading towards one of its most active seasons in years. Our expectations were well-founded and we are now faced with giving a resumé of a myriad of events, literally from the sublime to the ridiculous. These range from serious things such as a new constitution for the Students' Society, cultural activities such as the Red and White Revue and the Players' Club Experimentals, social events such as the Winter Carnival Weekend, and under the ridiculous topic, a 48 hour fast by seven McGill students striving for "world brotherhood".

A new Students' Society constitution was approved by an overwhelming majority (only one vote against) at a meeting of the student body in early February. Main points were the admission of graduate students as full Students' Society members and a new financial deal for the Women's Union. A subamendment introduced by the McGill Daily, giving that paper freedom of expression in its editorial columns, was approved by 202 to 63 votes. The constitution is presently under consideration by the University Senate, the latter having referred it to committee. One snag in the proceedings seems to be an objection by the Post-Graduates' Society regarding the inclusion of graduate students as full members.

In other news of student import, four representatives of McGill, accompanied by students from seven other Quebec universities, met the Premier of the province in late February. The students presented a four point brief, thanking the government for its "new look" toward university education, requesting a royal commission to study educational problems, requesting the sole criterion for university entrance should be talent, not financial means, and requesting that government "aide à la jeunesse" bursaries be put on a full scholarship basis, with no part refundable.

On the lighter side, McGill's annual Winter Carnival was once again the social highlight of the season, with Vivienne Lee, second year arts student from Hong Kong, elected Queen. The Red and White Revue, this year called "Got It Made", was a smashing success which made many people recall "My Fur Lady". Essentially a satire on sex in modern advertising, the show may well have another Montreal run, and possibly go "on the road" this summer. In late February the Player's Club was scheduled to present three experimental plays, one a free translation from Aristophanes' The Frogs. The Frogs was translated by McGill students, and the other two experimentals were written by students as well.

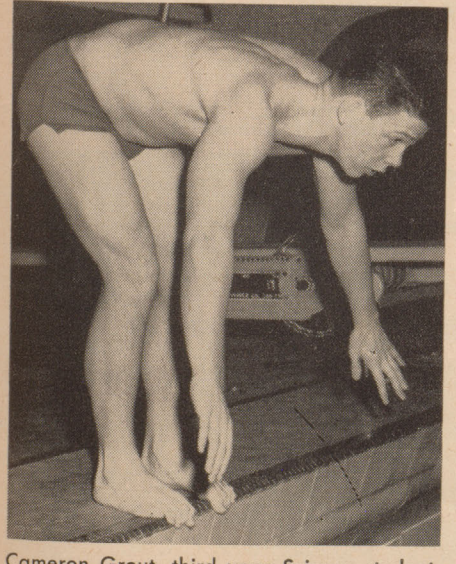

Sportswise, McGill picked up several minor intercollegiate crowns such as wrestling and squash, but fell flat in basketball, not winning one league game. Presently tied for last place in the Intercollegiate Hockey League, the Redmen should be able to pull out and finish in second-to-last spot.

A shadow fell over the McGill Debating Union when, after winning the Eastern Canada debating championships, it was learned that the finals would be re-run because of a protest, on a technical point, from the losing team. However, the debaters are still confident of representing McGill in the all-Canada finals at Edmonton in March.

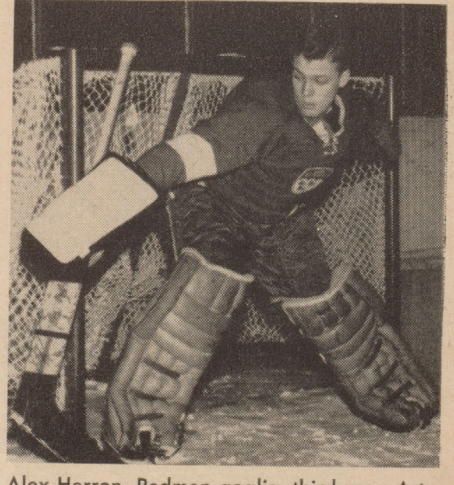

In the realm of conferences, McGill once again participated in the organizing of the University Model United Nations, a joint project of Montreal's four universities. This year the chairmanship was given to the University of Montreal on the basis of a plan which alternates the job between McGill and the U. of M. Nevertheless, many events of the four day conference took place at McGill, with some 200 students from all over North America attending.

The five finalists for the Carnival Queen contest make a lovely picture. Vivienne Lee, second year Arts student from Hong Kong, top left, was later chosen Queen. Beside her is Renata Pennacchiotti, second year Science student of Caracas, Venezuela. In the second row are, left, Sandra Sherman, second year Arts and Joan Van Boven, second year Science, both of Montreal. Front centre is Janet Martin, second year Arts, Montreal.

Cameron Grout, third year Science student, Montreal, winner this year of the Forbes Trophy, who holds many Canadian Men's Swimming Records.

Alex Herron, Redmen goalie, third year Arts, Montreal, who won most valuable player recognition and the Dr. R. B. Bell Memorial Trophy. He had a good year with McGill's hockey team.

(Continued from page 17)

universities, in the form of statutory operating grants, in proportion to their respective enrolment of full-time students. The wording of the new Quebec legislation is not identical with that of the federal statute, but the intent is the same and the only significant difference between the new Quebec grants and the previous federal grants lies in the fact that the former are slightly larger — both per capita and in total amount. Statutory grants are also provided, under another act of the legislature, for classical colleges and normal schools — important as evidence of governmental policy but of no direct financial interest to McGill University.

The second major development is that the Government of the Province of Quebec recognises the need for substantial capital expenditures to enlarge the facilities of the universities within the Province, and has provided by legislation for the issue of bonds to finance such expenditures. No precise statement has been made as to the extent to which each university will be aided, nor has the over-all total been fixed, but the statements of government leaders indicate a great change of philosophy and a willingness to do everything possible to assist the universities and colleges in their developmental programme, although the legislation clearly indicates in its wording that universities are expected to find a part of their money from other than government sources.

In the third place, the government has appropriated in the Estimates for 1960-61 an amount almost twice as large as that made available during the previous session for grants to colleges and universities.

In a single sentence, these developments mean that McGill in 1960-61 will be in a financial position at least equal to that of universities in other parts of Canada. The total amount that the University expects to receive from the Provincial Government will exceed by more than three millions the grants that have been received during the present session, and after deducting our present operating deficit of $550,000 there will be more than $2,500,000 of additional revenue.

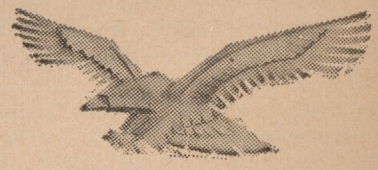

Reduced Fees

The first charge against this will be the reduction of student fees which two years ago were raised to a level higher than those of any other university in Canada in order to provide revenues to meet the financial emergency. The sum of $630,000 has been earmarked by the Provincial Government specifically for this purpose, since both the late Paul Sauvé and the present Premier were deeply concerned at the fact that education for young people from homes in Quebec should be more expensive than that available to other young Canadians. Needless to say, the reduced fees that were announced on March 17th received warm approval from the students as well as from parents — but the announcement was greeted with something less than enthusiasm by one or two other universities which may have to increase tuition fees next September.

The second — and equally important — charge against the revenues is for the increase of the salaries and wages of all those members of the staff, teaching and non-teaching, who have stood by the University during these long, difficult years of controversy in spite of the fact that their incomes were lower than those offered by other institutions. Apart from some necessary renewal of scientific equipment and urgent building maintenances — both postponed because the University could not afford them — the bulk of the new money that is now available will be used for wage and salary increases and, as I write, the Comptroller and the Deans are working out new salary schedules. Until that is done, prediction is dangerous but it seems likely that McGill will once again be in a position to compete for staff against the lure of other Canadian and American Universities.

These new financial prospects will not, of course, enable McGill to do all the things that it would like to do. There are always unsatisfied dreams in a lively and living university. What has happened is that the University has been put in a position to march forward with confidence, to lift its eyes to the horizon in the sure knowledge that greater resources will give greater strength. The period of disquieting uncertainty and poverty has come to an end and I, for one, devoutly hope that it will not recur in the future.

Behind "GOT IT MADE"

Photos by Don Shaw

Allan Shiach — "Benedict"

Linda Randal — "Vicki"

The photographs on this page were taken backstage during one of the performances of this year's Red and White Revue, "Got It Made". Described as a "method musical", the revue ran in Moyse Hall from February 4 to 13. It was originally scheduled for just one week, but so overwhelming was the positive critical reaction, that it played to packed houses for several extra performances.

From the point of view of the producers, cast and staff, the name of the show "Got It Made" was peculiarly prophetic. It folded only because of the spectre of final examinations, not for fear of declining public demand. Nor is this splendid satire confined to the dust. It is now certain that "Got It Made" will be revived, to the advantage of all those who have not had an opportunity to see it. The first performance of the new run will take place May 19, in Moyse Hall.

"Got It Made" has the smooth professional touch. It bursts across the footlights with that energy, vivacity and youthful exuberance that has characterized the "new look" in Red and White Revues ever since "My Fur Lady" blazed its tuneful trail across Canada. Brian MacDonald, who will be remembered for his contribution to the success of the latter production, has once again imparted his imaginative directorial talents and has introduced smooth, original dances.

The cast available to Mr. MacDonald evoked the following comment from critic Harold Whitehead of The Gazette: "This year's Red and White Revue . . . contains some of the brightest talent of any of the shows we have seen the students do at McGill . . ." These enthusiastic words were prompted by such stars as Ian Binnie, fourth-year Arts student who co-produced the show along with Judy Tarlo, another senior Arts student; Allan Shiach, third year Artsman; Marilyn Lightstone, third year Arts; Bill Lyon, fourth year Arts; and Linda Randal, third year Arts. The whole cast actually deserves hearty recognition.

Their Finest Hour

"Skiing's Standout Moment!"

By W. L. (Bill) Ball

You will recall a series of advertisements run by Brading's Brewery under the title THEIR FINEST HOUR. A few years back, while I was hanging from the strap in an Ottawa street car, a poster with the figure of a skier and that heading caught my eye. I moved closer and read

"Skiing's Standout Moment!

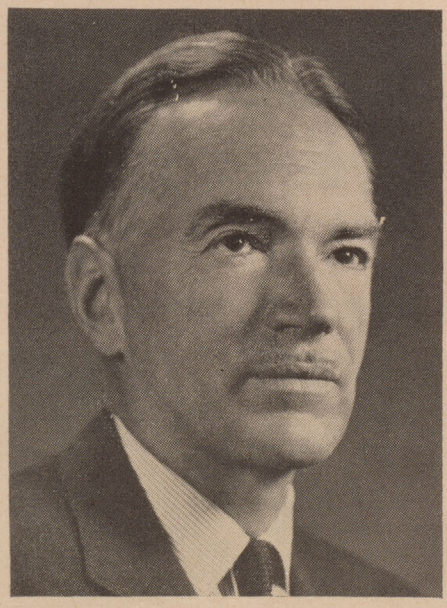

"Gusts of snow swirled around the mountains at St. Moritz, Switzerland. It was the day of the relay race in the International University Ski Championships. And for the first time Canada was competing — racing against many of Western Europe's finest skiers."

I was one of five McGill skiers who shivered in those "gusts of snow" that January day in 1933. Here is the story of what Brading's called our "finest hour".

In the depression which preceded the Second World War, Oxford and Cambridge Universities, influenced by the "Buy British" policy, had come to Canada for their annual Christmas ski meet in 1932. They were amazed at the calibre of McGill skiing and invited us to a return meet in Switzerland. A number of wealthy McGill graduates put up the money and on December 15, 1932, a team of five with four managers boarded the Duchess of Athol at Halifax. The old girl lived up to the tradition of the "drunken duchesses". In the winter gales which lashed our crossing, she rolled as much as 40° from the vertical. Only manager Stirling Maxwell and second assistant manager Harry Pangman weathered the whole trip with no mishaps. First assistant manager Fred Taylor, a six-foot-two, two hundred and twenty pound intercollegiate boxer and footballer scarcely rose from his bed of pain the whole trip.

To add to our misery that ever-smiling sea-dog Maxwell, who, when war came, was to serve with distinction as a commander in the navy, devised what he called a "bird chart". This deplorable record listed names down one side and provided columns headed "meals missed" and "birds shot", i.e. meals lost. He conscientiously tallied the scores and at the end of the trip announced a winner — himself. I, for one, am not interested in having the complete results published. Besides I would be writing from memory, because Fred subsequently found and destroyed the record.

The further trials and tribulations of the trip, the banquets, the midnight training (?) tables, Frank Campbell's phenomenal wins in the British Langlauf, Oxford-Cambridge-McGill cross country and slalom races and George Jost's great victory in the Kandahar can be saved for another day. You will want to get on to the event which the advertisement portrayed as "Skiing's Standout Moment!"

W. L. Ball, BSc Arts '31, PhD '35

Gruelling relay race

The main event of the International Intercollegiate Ski Championships which were held in St. Moritz in January 1933 was a five-man, uphill-downhill relay race. Besides McGill, this contest drew teams from Cambridge, Turin and Milan in Italy, Norway, Switzerland, Australia, Germany and Yugoslavia, all competing for the University Championship of Europe. The rules of the meet allowed us to enter a team for McGill which included graduates. As you will see, the inclusion of Jost and Pangman who were Red Birds, the McGill Graduate Ski Club, was a fortunate decision.

Nine men lined up for a "geschmozzle" or simultaneous start outside the Alpine Ski Hut at the top of the Corviglia Funicular Railway on the 8,000 foot level. Last minute adjustments were made to the old Huitfeldt bindings, long hickory cross-country skis were stamped and, at the starting gun, the racers pushed over the brow and slithered 800 feet down the valley on the first leg of the race. A circling 1,000 foot climb brought them back above the Corviglia Station again and the final descent to the finish. In half an hour the first Italian shot across the finish line closely followed by the Austrian, Norwegian, second Italian,

Swiss, Englishman, Canadian, German and Yugoslavian. McGill's captain, Jack Houghton, kept McGill in the running by clinging tenaciously to England's captain, Roger Bushell, the South African who ten years later gave his life engineering the daring prison break from the infamous Stalag Luft III during the war.

I took over the flag from Jack and set out after the main pack. I quickly overtook Dunn of England and the Switzer and had begun to think that this might be Canada's day when, on a sharp right turn around the Alp Laret, I shot off the trail in the blinding snow and lost many valuable minutes climbing back. Dunn recorded the best time for that lap and although I was three minutes behind him I picked up one place in the standing by passing Switzerland again.

Campbell took the flag from me and climbed to the Alpine Hut and then due west along Plateau Nair, around the control post and back by the same route to Corviglia. Course No. 3 was mostly level and much to his liking. Once again the McGill ace showed his championship form. He fairly ate up the distance to register the best time for this leg. Canada was now in 4th place as Norway and England were forced behind.

Pangman Prepares

A biting north wind had sprung up and Pangman, in the familiar brown camel hair sweater which he wore over his bare back only when it snowed, was to be seen warming up at the control post. His course had a vertical rise of 2,000 feet with almost no relief. A stiff hill at the beginning, a mile of comparatively easy upgrade and then a gruelling plodding drive for the summit in the clouds, as far above as the peak of Tremblant but, in the rarified atmosphere of 10,000 feet, comparable to the slopes of Everest in the toll it took on heart and lungs.

Pergham of Italy held a commanding lead of three minutes and thirty-five seconds, Gallina the other Italian was a minute and a half ahead and Reinl of Austria had thirty-four seconds to spare when Campbell romped into the enclosure and handed over the flag. We saw Pangman trail them over the brow of the first rise and began to hope that the old maestro, who even then was almost thirty years old, might give us a third place. A few days previously against a field of 105 he had beaten all but Sakshaug of Norway, Hollzner of Italy and Reinl of Austria in the 18 kilometer cross-country. Perhaps he could overtake the closer of the Italians, but Perghem had over three and a half minutes of lead and the redoubtable Reinl was out in front also.

McGill Relay Team, St. Moritz, 1933, left to right: Harry Pangman, Walter Houghton, Frank Campbell, Bill Ball and George Jost.

Half an hour passed. We nervously sipped the warm sugary gluweins for which St. Moritz was famous. Alternately we pressed our faces against the frosted windows of the hut or stepped out in the snow to stare expectantly up the mountainside to the point where peak and clouds met. Forty minutes and still no sign of the first racer. Minutes dragged like hours. Finally after forty-five minutes, as dusk was beginning to fall on the mountain, a dark speck appeared at the cloud line. It grew rapidly larger and became a ball of red, trailing a great plume of snow. The first runner was coming down the home stretch and a roar went up from the crowd, "Oesterreich! Osterreich!" It could have been the red jacket of Austria and the famous Arlberg Crouch but it wasn't. It was the red shirt of McGill and the crouch was Jost's own "tobogganing" position which was to precipitate an international incident when he won the Kandahar at Murren a week later.

Where is the flag?

Pandemonium broke loose — spectators and photographers swarmed around. We had started to raise Jost on our shoulders when there was a shout from the judges. Where was the flag? In the excitement Jost had forgotten to hand it over and now hurried back just before Barassi of Italy came into view and flashed over the finish line.

Jost was the hero of the moment but it turned out that he had to share the honour with Pangman. The latter's epic climb should go down in the history of skiing. Like a hound on the trail, he reduced the advantage of the men ahead, passed Reinl of Austria and reached the top after 40 minutes and 34 seconds of bone-wearying, lung-bursting climb, only 25 seconds behind the leading Italian and 15 behind the second.

Jost took over the pennant and plunged in pursuit of the fleeing Italians. The course was a straight descent, the reverse of Pangman's climb. The first "schuss" was a terrifying slope, resembling three jump landings piled one above the other. The leading Italian took it straight. The second tacked and Jost gained second place by running flat out. They roared into the next drop at blinding speed. Italian No. 1 shot over the brow and down the hill where he crumpled in a cloud of snow at the bottom. The cunning Jost, profiting by his experience, took an intentional fall at the top of the hill and was passed by Italian No. 2 who also crashed at the bottom. Up in a moment, the Canadian gained momentum, passed between his struggling opponents and swept into the lead never to be headed again.

(*Continued on page 30*)

The Story of Music at McGill

by Marvin Duchow
Dean, Faculty of Music

Recent announcement of the Martlet Concert and Ball, which aims at setting up a scholarship fund for music students at McGill, renders timely the following account — however sketchy — of the history of the Faculty and Conservatorium of Music, and of the naturally stimulating inter-relations between these institutions and the wider musical community.

The McGill University Conservatorium of Music was established in 1904 upon the initiative of Principal Peterson, and of Lord Strathcona and Mount Royal, then Chancellor of the University. B. K. Sandwell — in a set of yearbooks covering the period 1896-1906— has recorded the history of musical life in Montreal at the turn of the century. Those familiar with this valuable set of publications will recall the ferment which characterized that colourful phase of our city's musical history — a ferment that embraced a lively interest in opera, a flourishing condition in the spheres of sacred music, concert music, and particularly of choral singing, and even some tenuous preoccupation with chamber music, and — interestingly enough — with native composition.

More Public Interest

The establishment of the Conservatorium itself reflects the heightened public interest in music of this period, and the lists of prizes awarded in these early years stand as evidence of a strong sense of public responsibility in fostering the development of native talent. That such attitudes were justified and that public trust was not misplaced is apparent from the lists of scholarship awards which contain such names as those of Ellen Ballon, George Brewer, and others whose subsequent careers were to lend distinction to their Alma Mater. Noteworthy, too, as regards the relationship between Conservatorium and wider musical community, was the initiative of the first Director, Dr. Charles Harriss, in founding various choral societies, and in organizing important festivals across the Dominion, as well as a Canadian Music Festival in London.

Among other highly qualified musicians in the Conservatorium staff at that time was Clara Lichtenstein, who served as Vice-Director. That the Conservatorium also enjoyed the close, though unofficial, association of such native artists as Lynnwood Farnam — one of the foremost organists of his generation — and the celebrated Madame Albani, is again indicative of the warm rapport that existed between the school and the wider musical community which it served.

Prof. Marvin Duchow

Higher Standards

The need to elevate standards of elementary musical education throughout the Dominion, was the concern of Dr. Harriss's successor, Dr. H. C. Perrin, organist of Canterbury Cathedral. In 1910, Dr. Perrin inaugurated the system of Local Centre Examinations. This system, although of reduced importance in recent years as a result of the growth of many fine regional schools and faculties of music, continues to perform a valuable function in the service of music education at the national level. In 1920, the University created a Faculty of Music with curricular courses leading to the degree of Bachelor of Music. Dr. Perrin was appointed Dean in that year.

A serious musical recession blighted the decades of the twenties and thirties in Montreal, no less than in the nation as a whole. This musical decline was the inevitable consequence of war, of economic depression, and of the crises induced by technological advances in the media of broadcasting and phonograph recording. Symptomatic of this decline were the prevalence of consistently low standards of musical taste, and— despite some exceptional instances of public support and generosity — of a general disinterest in the cultivation of the art and in the encouragement of its practitioners.

It was during these inauspicious years that Douglas Clarke, succeeding Dr. Perrin, was appointed Director of the Conservatorium, and subsequently Dean of the Faculty of Music. With exemplary leadership and extraordinary singlemindedness of purpose, Professor Clarke addressed himself to the task of cultivating anew the soil for the further musical growth in this city. The role of this dedicated and formidably equipped musician in building the original

Montreal Orchestra is too widely known to require elaboration here.

It will be recalled, too, that in response to a further educational need, special Children's Concerts were initiated in the Ball Room of the Mount Royal Hotel with explanatory comments by Professor Clarke. No less meritorious were the lecture-recitals at McGill which brought such musicians of eminence as Prokofiev, Holst, Enesco, Medtner, Professor C. S. Terry, Dr. Edmund Fellowes and others before the Montreal public. Halted by World War II, this notable series is still remembered as a beacon in the dark years of the thirties. It has recently been most successfully revived through the kind offices of Dr. Ellen Ballon.

Recording Sessions

Of the many projects launched by the former dean, few are recalled with as much affection, however, as are the record-listening sessions in the old Conservatorium building at the corner of Sherbrooke and University Streets. For many a McGill graduate the exhilarating experience of his first encounter with, perhaps, the Debussy *Quartet*, Beethoven's "An die Ferne Geliebte", Josquin's "Ave verum", or with some other now familiar masterpiece, is surely coloured in his memory by the congenial atmosphere, and by the warmth and intimacy of the old "Carnegie Room". It was to be expected, in consequence of the physical separation of the Conservatorium from the campus during the past decade, that the popularity of the listening sessions would wane. Our recent move to McTavish Street has again made them a practical possibility, and plans are at the moment being laid for the revival of this cherished institution.

The evidence is everywhere about us that the years since World War II have brought an explosive musical development in this city, as they obviously have elsewhere in Canada as well. Many reasons for this important change can be adduced. One need but mention here such contributory factors as the new attitudes of unpretentious self-sufficiency and of artistic maturity increasingly evident among native performers and composers of this generation, no less than the welcome presence in our midst of many talented and excellently trained foreign-born musicians. In the light of these altered conditions, it became the urgent task of Faculty — following the retirement of Dean Clarke in 1955 — to achieve a new integration of the Conservatorium and the Faculty of Music within the wider life of the University and the community.

A substantial expansion of the teaching staff drawn from among the leading musicians of the community, in addition to a major revision of the extra-curricular programme, has made it possible for Faculty, within the past few years, to offer a wide range of musical events of interest both to McGill staff and students, as well as to the larger musical public. These include the aforementioned public

(*Continued on page 31*)

MARTLET CONCERT AND BALL

Ellen Ballon, D. Mus. '54, who has had an international career as a celebrated concert pianist, returned to McGill in February to launch one of the most ambitious and imaginative projects in her career.

The project: The Martlet Concert and Ball, at the Ritz Carlton Hotel, Montreal, April 28, 1960.

Her objective: to encourage establishment of a $100,000 scholarship fund for the McGill Faculty and Conservatorium of Music.

For the concert aspect of this fabulous evening, Dr. Ballon has called upon her distinguished friends and colleagues in the world of music, each of whom has donated his services for the event.

Under the baton of Sir Ernest MacMillan, the following prominent pianists will perform: Morton Gould, Frank Glazer, William Masselos, Grant Johannesen, Abram Chasins, Oliver Daniels, Prof. Helmut Blume, and Dr. Ballon.

To top off the music, Dr. Ballon has secured the well-known international concert comedienne, Miss Anna Russell. Then, in the magnificently-decorated Ballroom of the Ritz Carlton Hotel, the guests will assemble for dining and dancing. An exceptional amount of thought and preparation has gone into the planning of the program and decor for the evening, which promises to be without equal.

The inspiration and driving force behind the project is herself an important Canadian artist whose career began at the age of four at McGill's Conservatorium. A native of Montreal, she studied here under Clara Lichtenstein, then went on to New York to study with Rafael Jossefy. She made her New York debut at the age of 10 with the New York Symphony under Walter Damrosch.

Her concert career has seen her playing with such conductors as Ansermet, Beecham, Dorati, Mengelberg, MacMillan, Stranski, Wiessmann, Lange, Solomon, Papst, Miles, Defauw and Howard Mitchell in such countries as The Netherlands, Norway, Sweden, Denmark, Finland, Germany, Austria, Brazil, England, Ireland, Scotland, as well as Canada and the United States.

Dr. Ellen Ballon

Heitor Villa-Lobos wrote his first Piano Concerto for her and dedicated it to her. It had its world premiere in Rio de Janeiro October 11, 1946 with Dr. Ballon as soloist and the composer as conductor.

She established the Ellen Ballon Scholarship for outstanding piano students at the McGill Conservatorium some 30 years ago.

In 1954, McGill honoured Dr. Ballon with the award of an Honorary Doctor of Music degree. — A.A.T.

Graduates' Society Annual Meeting

February 25th, 1960

Dr. F. Cyril James was honoured at the Annual Meeting on the occasion of his 20th anniversary as Principal and Vice-Chancellor. Stuart M. Finlayson, B.Sc. '24, right, retiring president of the Society, presented Dr. James with an engraved silver tray in tribute to his "20 years of devoted service to McGill University".

Heading the list of new officers of the Society are Alan D. McCall, B.Sc. '24, President, centre, flanked by Mr. Justice G. Miller Hyde, B.A. '26, B.C.L. '29, first vice-president, left, and Charles H. Peters, B.A. '28, right, second vice-president. Mrs. Gavin Graham, B.A. '32, was elected Alumnae vice-president, Robert F. Shaw, B.Eng. '33, was named honorary secretary, John F. Close, B.Com. '33, honorary treasurer and new directors, Monty Berger, B.A. '39, Thomas R. Durley, B.Sc. '28, Ralph M. Johnson, B.Eng. '49, Paul S. Smith, Q.C., B.A. '26, B.C.L. '29, and Dr. J. Gilbert Turner, M.D. '32.

Also honoured during the Annual Meeting were retiring Alma Mater Fund chairman J. Geoffrey Notman, B.Sc. '22, left, and Percy R. Hilborn, B.Sc. '09, Preston, Ont., right, both made Honorary Life Members of the Society. Outstanding achievement awards were presented to Timothy Porteous, B.A. '54, B.C.L. '57, second from left, who wrote book for McGill's famous musical comedy "My Fur Lady" and Jamie Plant, senior student in law, third from left, co-chairman of the McGill Open House, 1959.

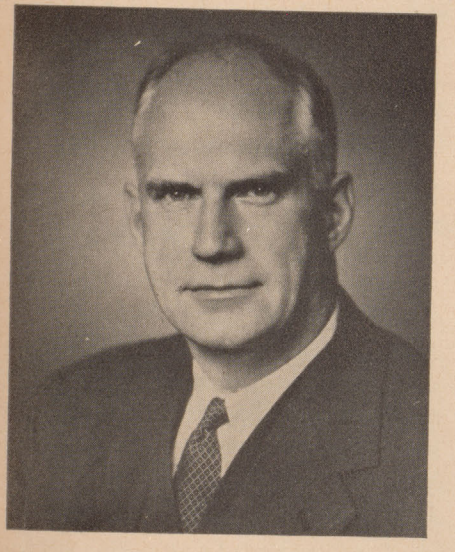

A Rising Record

By J. G. Notman,
Chairman, 1957-59

$297,047 from 12,210 graduates is the Alma Mater Fund record for 1959. This represents an increase of $22,000 over 1958.

Each year has its highlights, and in 1959 I feel that we have made decided progress in certain major areas.

A new development was the magnificent plan of the Class of Medicine 1960. This class, which will graduate from McGill this Spring, conceived

J. G. Notman

the idea of starting in their junior year to plan their 25th Anniversary gift to McGill. They set as their goal, $100,000 in 1985. In a word, the members of this Class will contribute yearly to their 25-year Class Gift, and at the same time make their usual contribution to the Alma Mater Fund.

On November 13th, the Class held a Medicine '60 Day, and presented their first bond to Principal James. A class committee consisting of Robert Fortuine, R. D. Midgley, George Cantlie, Robert Becker and Bryce Weir, was appointed, and will be responsible for the yearly contributions to the 25-year Class gift.

This plan, if adopted by other classes, could have tremendous possibilities in the future for McGill.

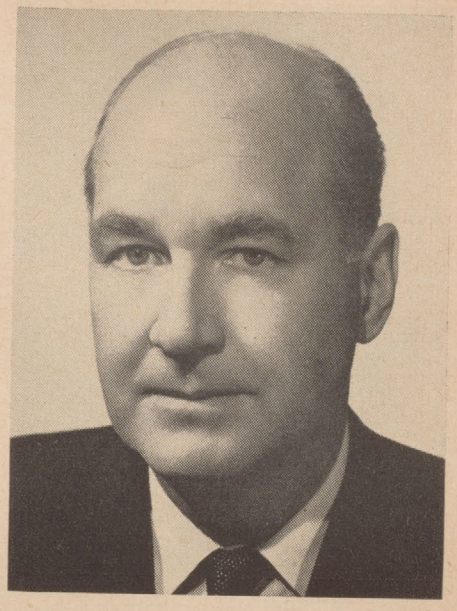

I would like to congratulate the 1934 Class Chairmen: Mrs. J. S. Nixon, (Betty Hurry), R.V.C. '34: Stephen Wallace, Eng. '34: Wm. Eakin, Jr., Law '34: John Dinan, Med. '34: Laird Watt, Commerce '34: Dr. Joseph Reitman (of Brookline, Mass.), Dentistry '34: Alan Bernstein, Architecture '34: and Henry Joseph, Arts & Science '34: and their classmates for achieving the largest overall 25-year class gift to date. All Faculties either gave or pledged $49,070, over a five-year period, with 62.2% participating.

A special tribute to Steve Wallace, for the record Engineering '34 gift of $18,175, Mrs. J. S. Nixon for the new R.V.C. record of $4,655, and William Eakin for the Law record of $4,215. These are notable achievements.

A further new development this past year is the Alma Mater Fund Honour Roll of all those who contributed $100.00 or more. In 1958 we had 415 graduates who contributed $92,380. These constituted the first Honour Roll. Very shortly the second Honour Roll will be published and I am pleased to be able to report that it will contain 630 names of graduates who contrib-

(*Continued on page 31*)

New Fund Chairman

A. Deane Nesbitt, B.Eng. '33, has accepted the chairmanship of the Alma Mater Fund, succeeding J. Geoffrey Notman, B.Sc. '22, who has held the position for the last three years.

President of Nesbitt, Thomson and Co. Ltd., and a former director of the Graduates' Society, Mr. Nesbitt is well-known throughout the country for his record of public service.

During his undergraduate years at McGill, he served as president of the Students' Society. He had a distinguished career with the Royal Canadian Air Force during the Second World War and in addition to other awards, he holds the Order of the British Empire and the Distinguished Flying Cross.

In 1946, Mr. Nesbitt was chairman of the University's 125th anniversary reunion.

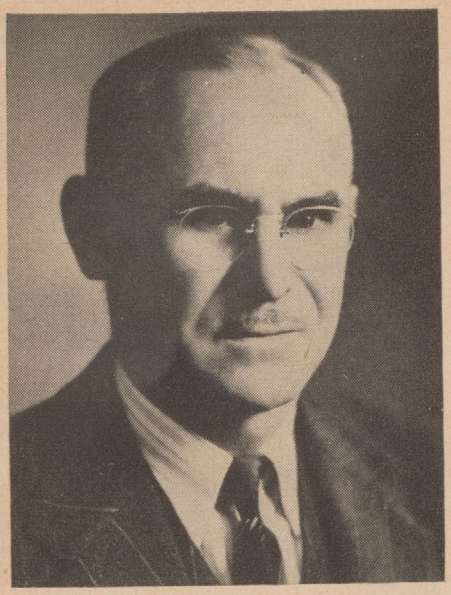

Elizabeth B. McNab

Fund Director

Full-time Director of the Alma Mater Fund is Elizabeth B. McNab, B.A. '41, who supervises the Fund staff from Graduates' Society headquarters at Martlet House.

Miss McNab first joined the Graduates' Society staff during the War Memorial Campaign, 1946. She was appointed Alumnae Secretary in 1949 and Assistant General Secretary in 1952. She has served the Society in many capacities including alumnae work, class organization and reunions, and the McGill News. More recently her time has been almost exclusively devoted to the Alma Mater Fund.

Dr. Charles A. H. Wright

Dr. Charles A. H. Wright

Dr. Charles Alfred Holstead Wright, Ph.D '21, a past president of the McGill Society of Trail and one of Canada's most highly-regarded scientists, died suddenly in Trail on Friday, January 8. His death at the age of 63 occurred just one week before he was to be named Trail's Citizen of the Year at a public ceremony, an honour of which he had been unaware.

Dr. Wright graduated from the University of British Columbia in 1917 as one of its first Chemical Engineers and he was later to serve that university as a member of Senate for many years. After service in the First World War with the Canadian Expeditionary Force he returned to UBC and later transferred to McGill where he received his doctorate in physical chemistry.

Dr. Wright joined the Consolidated Mining & Smelting Company in 1925 and at the time of his death was a Consulting Chemical Engineer with that company. He was due to retire next year.

His work as chairman of the Kootenay Boundary committee on Doukhobor affairs was acknowledged by both police and Doukhobor spokesmen as an influential factor in the easing of tension following a series of explosions on and near railway tracks two years ago.

Active in more than 20 community and national organizations, Dr. Wright was a Fellow of the Chemical Institute and its past president; a member of the Canadian Institute of Mining and Metallurgy, American Electro-Chemical Society, American Institute of Chemical Engineers and the Association of Professional Engineers of B.C. He also served as president of the Trail Chamber of Commerce, the Associated Boards of Trade of Eastern B.C. and he helped organize and headed the B.C. Chamber of Commerce.

Dr. Wright served for several years as president of the McGill Society of Trail and was instrumental in the reorganization of that Society.

John V. Galley

John V. Galley

John Vessot Galley, B.A. Sc. '20, a former president of the McGill Society of New York and several times a regional vice-president of the Graduates' Society, died suddenly in New York December 23, 1959. From 1957 until his death, he served as a member of the university's Board of Governors.

A native of Qu'Appelle, Saskatchewan, Mr. Galley moved to Montreal at an early age and received his education at Stanstead College and McGill, where he received his Bachelor of Science degree in chemistry in 1920.

Early in his career, Mr. Galley went to New York and in co-operation with the Bakelite Corporation, a predecessor of Union Carbide Corporation, he pioneered research and development in the use of plastics as denture base material. At the time of his death, he was president and chairman of the board of directors of Luxene, Inc., a company which he had originally organized in 1932 as Bakelite Dental Products. The formal association with Bakelite continued until 1940, at which time the company became known as Luxene, Inc.

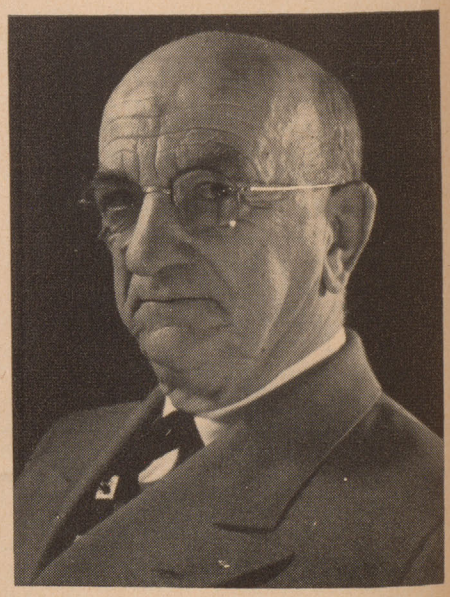

As an undergraduate at McGill, Mr. Galley was a member of the McGill University hockey team and he maintained an avid interest in sports throughout his lifetime.

In addition to his deep interest in the McGill Graduates' Society in the New York region, Mr. Galley was a member of the Canadian Club of New York and served as vice-president and director of that organization.

Murphy & Sons Ltd., CFQC-TV and CFQC Radio.

Adelbert A. Murphy

Adelbert A. Murphy, B.Sc. '09, president of the McGill Society of North Saskatchewan (Saskatoon), died suddenly December 2, 1959 in Saskatoon, at the age of 75. Widely known as the pioneer of broadcasting in Saskatoon, Mr. Murphy was the founder and managing director of A.A.

A. A. Murphy

A native of Portland, Ontario, Mr. Murphy went to western Canada in 1911 as an electrical superintendent, holding science degrees from both McGill and Queens University. He established the first radio station in Saskatoon and commenced operations from the present site of the company in 1929, along with a retail and wholesale electrical and radio business. In 1954, CFQC-TV telecast for the first time on Channel 8, under Mr. Murphy's guiding hand.

Mr. Murphy was a past president of the Western Association of Broadcasters, a vice-president of the Canadian Association of Broadcasters, and a member of the Engineering Institute of Canada. He also played a leading role and held various posts on boards, service fraternities and sporting clubs in Saskatoon.

John Howard Layhew

John Howard Layhew, B.A. '24, M.A. '26, past president of the McGill Society of New York, died on November 27, 1959, in Greenwich, Connecticut. After obtaining his degrees from McGill, Mr. Layhew went on to Columbia University where he passed his general orals for the Ph.D. degree in 1928.

Mr. Layhew retained a vital interest in McGill and worked for many years on the university's behalf in New York. He was a member of the executive of the McGill Society of New York for several years, and was president for the year 1958. In addition he was chairman of the Alma Mater Fund for the Connecticut area.

At the time of his death he was with the investment banking firm of Kidder, Peabody & Company in New York City.

In his untimely death, McGill lost one of its most devoted and tireless workers in New York. For the past few years he made it his responsibility to see that each person at branch meetings was made welcome and McGill graduates in New York will always remember his warm personality and friendly smile.

Murray G. Brooks

Murray G. Brooks

Murray Gordon Brooks, B.A. '08, who devoted his life to the work of the Y.M.C.A. and the Student Christian Movement, died January 18, at his home in Barrie, Ontario. He was born March 11, 1885.

As a student at McGill, Mr. Brooks helped to organize the Students' Council and as an active member of the glee club, he also helped to write "Hail Alma Mater", which became the McGill hymn after its first performance by the glee club.

A native of Indian Head, Saskatchewan, Mr. Brooks came east to Stanstead College to prepare for entrance to McGill. While at the former College he attended his first summer student conference at Northfield, Massachusetts and there met Dr. John R. Mott of the World Y.M.C.A. Later, at McGill, Mr. Brooks was offered a Rhodes Scholarship, but the impression left upon him by Dr. Mott prompted him to take up his life work with the International Y.

Mr. Brooks served in Ceylon until 1925 and the Y.M.C.A. building which was erected in Colombo under his leadership is one of the finest in the foreign field. He returned to Canada and continued his work with the Y and the Student Christian movement, except for two years with the Y in Rangoon, Burma, from 1938 to 1940. The hymn books he compiled are in the pews of many college chapels all over the continent.

Among his survivors are two daughters: Mrs. J. Ralph Whitehead, Cornwall, Ont., and Mrs. John E. Gilbert, (Barbara Brooks, M.D. '43) of Easthampton, Mass.

James E. Le Rossignol

Dr. James Edward Le Rossignol, B.A. '88, Dean Emeritus of the College of Business Administration, University of Nebraska, died in Lincoln, Nebraska in December at the age of 93.

After receiving his degree at McGill, Dr. Le Rossignol earned a Doctorate in Philosophy, magna cum laude, at the University of Leipzig, Germany, in 1892. He later taught for 67 years and in his distinguished teaching career, he covered the fields of Economics, Ethics, Psychology and Political Science.

Dr. Le Rossignol organized the School of Commerce at the University of Nebraska in 1913 and he founded the university's present College of Business Administration. He retired in 1941 with the title of Dean Emeritus.

In 1921, Dr. Le Rossignol was awarded an Honorary Degree at McGill University at the Centennial Convocation.

Mrs. G. S. H. Barton

MRS. G. S. H. Barton, the former Mabel Pauline Loveridge, who was Instructor in Domestic Art in the School of Household Science, Macdonald College, from 1910 to 1912, died February 15 in Ottawa after a lengthy illness. She was the wife of Dr. G. S. H. Barton, C.M.G., retired Deputy Minister of Agriculture for Canada and a former Dean of Macdonald College.

Born at Batavia, N.Y., Mrs. Barton was a graduate of Brockport Teachers' College and of Rochester Institute of Technology. She met her husband while they were both on the teaching staff at Macdonald College.

In 1932, when her husband was named federal Deputy Minister of Agriculture, Mrs. Barton entered upon a busy and dedicated phase of her life in Ottawa, serving on the Board of the Y.M.C.A., and taking an active part in the Monday Club, the Art Club, the Morning Music Club, the Ottawa Branch of the Canadian Authors' Association and the Women's Canadian Club.

Dean Thomson . . .

(*Continued from page 15*)

indeed, difficult enough for the University to keep accounts for all the scores of special research funds which it must administer!

It is almost certainly wrong and unfair to single out for special mention a few of the burgeoning research activities of the thirties, yet how can one fail to recall the work of Maass on the "critical state", of Steacie in photochemistry, of Hibbert on cellulose and lignin; Foster's transition from spectrometry to nuclear physics; the unravelling of the anterior pituitary hormones by Collip; Babkin's studies of the digestive glands; Penfield on Jacksonian epilepsy; and—but I really dare not go further!

"Skiing's . . ." (*Continued from page 23*)

In these days of packed slopes it is hard to appreciate the merit of an intentional fall. Back in those of sloppy bindings and loose boots it was an exhibition of brains and nerve amply justified by its result.

The enthusiasm which greeted our win was tumultuous, the more gratifying because we had been conceded little chance. We were feted like princes by people who until then had thought that Canada's only winter achievement was hockey. "Tall Broad-Shouldered Canadians Sweep Relay Race" was the headline in a Swiss paper. Campbell was in fact 6 feet 3 inches.

Stories such as this often have comical sidelights, and mine is no exception. As the result of a last minute conference between our managers, it was decided that Pangman and I should exchange places because it was felt that his leathery old lungs would be more efficient in the rare mountain air. Reporters were not, however, made aware of the change and newspapers all over Europe acclaimed my performance. Wherever we were recognized, people asked which one was Ball. They admired my broad shoulders and powerful legs. In the words of one German paper, I was "Wirklich ein baumiger kerl!" Translated literally this means "Truly a tree-like fellow!" At first I attempted to explain the mistake but my protestations were taken for false modesty and soon I began to think that I was the one who was mistaken. I even began to enjoy my fraudulent position. After all it is not given to many of us to be "tree-like fellows".

Summer Employment For McGill Students

Just a reminder that hundreds of students are again seeking remunerative summer work to help pay their way through University.

They come from all parts of Canada (perhaps from your home town), and many are from foreign countries to which they cannot afford to return.

They belong to all faculties, are skilled and unskilled, but all are willing to do a worthwhile job in return for some help in meeting high fees and living expenses.

Please remember that, for a variety of reasons, a favourable situation in permanent employment does not necessarily mean a similar one in summer work, so, if you know of any good summer jobs, write, wire or come to:

The McGill Placement Service
3574 University Street,
Montreal 2.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

NESBITT, THOMSON
AND COMPANY LIMITED
355 St. James Street West, Montreal

The Story of Music . . .

(*Continued from page 25*)

lectures for the organization of which Faculty is indebted to Dr. Ellen Ballon. These lectures have, within recent years, brought to the University many eminent musicians including: Sir Thomas Beecham, Gian-Carlo Menotti, Ernest Ansermet, Olin Downes, Rudolph Bing, Aaron Copland, Virgil Thomson, Morton Gould, Norman Dello Joio, Lotte Lehmann, Sir Ernest MacMillan, Oliver Daniel, Suzanne Bloch, Dmitri Mitropoulos, Thomas Schippers, William Schuman, Samuel Chotzinoff, Abram Chasins, Ian Hunter, Deems Taylor.

A regular series of Faculty Recitals was instituted in 1957. These recitals have featured members of the teaching staff, whether individually in the capacity of solo recitalist, or in ensemble as members of non-affiliated organizations such as The Baroque Trio of The McGill Chamber Music Society. The year 1957 also witnessed the inauguration of annual operatic productions which have concentrated on the delightful, though rarely performed, eighteenth century repertory, and which have received a fair measure of critical acclaim.

Events of an extremely high musical order took place during the present session in the form of four memorable recitals by renowned artists such as Joseph Szigeti, Lili Kraus, and others. Of considerable historical importance, too, was the first concert of electronic music on this continent held in the early part of the present session under the auspices of the Faculty of Music.

More closely linked with curricular activities are the popular noonday Campus Concerts which, while providing advanced students with an opportunity for public appearance, seem to have won a faithful audience from among neighbouring Faculties, as well as the general public. A further interesting experiment was begun during the current session in the form of a presentation of operatic scenes at various local high schools. These scenes, given in costume and with benefit of narrator, have been received with an enthusiasm beyond all expectations.

Returning for a final glance at the wider perspective, I think it is justifiable to say that Canadian music and, by implication, music in Montreal have at last broken through former parochial limitations, and have now entered upon a significant new phase of international recognition and acceptance. This development calls for a tightening of the traditional bonds of mutual respect and enrichment that have so often in the past linked the academic and non-academic groups of our musical community.

It calls, too, for a strengthened sense of duty and responsibility in providing deserving talent with the means for engaging in serious and uninterrupted music study, whether at the advanced level, or in the vitally important early stages of training. This is an imperative pre-condition for meeting the challenge of the present phase of our civic and national musical development. And this is the important objective underlying Dr. Ellen Ballon's project: The Martlet Concert and Ball.

A Rising Record . . .

(*Continued from page 27*)

uted $119,330, a very satisfactory increase indeed. It is hoped that the Honour Roll will eventually contain 1500 to 2000 names.

In the Branches and Regions, the work of Elden Spencer and his Toronto Committee was surely outstanding: 57.6% participation with 549 contributions for $20,127, and an average gift of $36.66 is quite a record.

The work of the Faculty Fund Chairmen and Class Agents in Montreal, led by Dr. George M. Dundass, increased the Montreal total from $103,822 in '58 to $119,628 in '59, a splendid record.

Once again, Windsor, with Cam McDowell as Chairman, led all Branches in participation, with 91.9%; followed by Trail, 82.7%, G. S. Hood, Chairman; Noranda, 78.1%, Leonard A. Mills, Chairman; Quebec, 69.5%, T. H. Dunn, Chairman; Cape Breton, 67.5%, Mrs. Irving Schwartz, Chairman.

I realize now more than ever the vast potential which the Alma Mater Fund holds for McGill in the years ahead, and to you who have helped me so much during my term of office — a heartfelt "thank-you" and good luck.

Last autumn, the McGill Society of Montreal held its first Degustation de Vins in Redpath Hall. David C. Tennant, B.Eng. '38, right, president of the branch, is shown above chatting with two of his guests, Dr. F. Cyril James, centre, and Simon L'Anglais, left, representing the University of Montreal alumni.

"Got It Made" . . .

(*Continued from page 21*)

"Got It Made" can best be described as a satirical musical comedy — the principal object of the satire being to explore and explode the "advertising" complex of contemporary life on this continent. The book and lyrics, by Dave Mayerovitch, Ian Binnie, Bill Lyon and Allan Shiach, are cleverly done and contain some brilliant barbs and shafts. Stephen Coplan's music provides a most suitable vehicle for the lyrics and gyrations of the dance numbers.

Finally, credit must be paid some of the other principals: Aviva Slessin, Angela De-Vreeze, Shirley Harrison, Liane Marshall, Dan Baran, Randy Davies, Pierre Perron.

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'01 **Cluny MacPherson,** MD '01, of St. John's, Nfld. has been elected a Fellow of the Royal College of Surgeons, England.

'08 **R. O. McMurtry,** BA '05, BCL '08, of Montreal, has been re-elected chairman of the Quebec Committee, Canadian Save the Children Fund.

'11 **Lyon W. Jacobs,** Q.C., BCL '11, was presented with the long service insignia jewel by the Montreal Ex-Naval Men's Association, for distinguished service to the association as honorary legal advisor for the past 20 years, at Montreal.

'13 **Henry W. Morgan,** BA '13, has been appointed vice-chairman of the annual Cancer Aid League campaign in Montreal.

'14 **C. MacLeod Pitts,** BSc '14, of Ottawa, has been appointed director of British Oxygen Canada Ltd.

L. D. Wilgress, BA '14, of Ottawa, was special adviser of the Canadian delegation to the 15th session of the contracting parties to the General Agreement on Tariffs and Trade (GATT).

'19 **C. A. Buchanan,** BSc '19, has been appointed manager (marketing) of Canadian Comstock Company Limited, at Montreal.

'22 **Eric H. Wait,** BSc '22, has retired from Government service after 36 years with the present department of Mines and Technical Surveys.

23 **H. C. M. Gordon,** BSc '23, of Sydney, N.S., has been appointed vice-president in charge of Dominion Steel and Coal Corporation's mining operations.

H. Ross Wiggs, Arch '23 has been elected associate member to council of the Royal Canadian Academy of Arts.

'25 **Clement Matthew Anson,** BSc '25, is the new vice-president and general manager of steel operations for Dominion Steel and Coal Corporation Limited.

J. Grant Glassco, BCom '25, of Toronto, has been appointed vice-president, Canadian Bank of Commerce.

Otto Klineberg, BA '19, MD '25, was recently honoured by the University of Brazil with the Degree of Doctor Honoris Causa.

Gordon McGregor, Eng '25, will serve as honorary chairman of the Canadian Cancer Society's Quebec campaign for funds.

'26 **J. D. Converse,** BSc '26, of Montreal, has been elected vice-president of Canadian Industries Limited.

Abbey Litovsky, BA '26 has been appointed a Q.C.

'27 **Miss M. M. Hutcheson,** MA '27, has retired from the Department of External Affairs.

Ethlyn Trapp, BA '13, MD '27, of Vancouver, is a member of the advisory committee for the Federal Government on cancer.

'30 **F. Ryland Daniels,** BCom '30, has been elected a director of Consumers Glass Company Ltd.

Robert Japp, MA '30, has been appointed director of education and secretary-treasurer of the Protestant School Board of Greater Montreal.

J. Paul Laplante, MD '30 has been appointed director general of St. Luke Hospital, Montreal.

'31 **L. R. Richardson,** BSc/Arts '31, MSc '33, PhD '35, of Wellington, N.Z., has been elected a Fellow of the Royal Society of New Zealand and has been awarded the Hutton Medal of the Royal Society of New Zealand for his research in the zoology of Cook Strait. This is the first occasion in the history of the Society that two senior honours have been given to one person at the same time.

D. Alan Sampson, MD '31, of Ardmore, Pennsylvania, has completed his second term as chairman of the Councillors of the American College of Radiology. He is also chairman of the College committee on medical care insurance plans and president of the Pennsylvania Radiological Society.

'33 **John Bland,** BArch '33, has been elected associate member, architect, of the Royal Canadian Academy of Arts.

F. W. Fitzgerald, MD' 33, of Lachute, immediate past president of the Quebec Division of the Canadian Medical Association was one of many doctors from Canada and the U.S. attending the 10th annual refresher course for general practitioners held at the Royal Victoria Hospital recently.

'34 **Max S. Kaufmann,** BA '31, BCL '34, has been appointed Q.C. in December '59.

T. D. Robertson, BA '30, BCL '34, has resigned from the Montreal Transportation Commission to accept the appointment of Secretary of the Imperial Trust Company, Montreal.

J. N. Swartz, BEng '34, PhD '37, technical director of Bowaters Southern Paper Corporation, Calhoun, Tenn., was joint author of a technical paper presented during the 13th Alkaline Pulping Conference sponsored by the Technical Association of the Pulp and Paper Industry.

William R. Wilson, BEng '34, has been appointed technical adviser to the Board of Broadcast Governors.

'35 **George W. McCormick,** MD '35, has been elected president of the Richmond County (N.Y.) Medical Society.

'36 **Jonathan F. Meakins,** MD '36, of Montreal, has been appointed a member of the Silicosis Board of the Quebec Workmen's Compensation Commission.

'37 **Roger Deserres,** BCom '37, has been elected president of the Chamber of Commerce of the district of Montreal.

George W. Hall, BCL '37, has been appointed a Q.C. He is a member of the firm of O'Brien, Home, Hall and Nolan, Montreal.

'38 **William J. Hulbig,** BA '35, BCL '38, is now associate secretary in the Sun Life Assurance Company of Canada, Montreal.

Donald C. MacCallum, BEng '38, of Montreal, has been named director and executive vice-president of Canengco Limited, and director of Beaco, Montreal.

Anything Goes with MOLSON CANADIAN lager beer

Its brilliant new taste makes good food even better!

MOLSON
CANADIAN LAGER BEER
The livelier lager for the life you like to live!

The meter that measures our standard of living

It measures kilowatt-hours ... and as the kilowatt-hours grow, it indicates the ever-greater role of electricity in making our lives easier and more enjoyable.

Abundant low-cost electricity probably contributes more to our standard of living than any other factor. It creates opportunity for industry and business ... it speeds the production of goods ... it opens the way to hundreds of thousands of better-paying jobs for Canadians.

Kilowatt-hours cost so little—but think of what they can do. In the home, low-cost electricity can bring a world of convenience, comfort and service. Planned lighting brings glare-free new pleasure and charm to every room—at the flick of a finger. In the kitchen and laundry electrical appliances save time and toil. Television and many other products contribute to our leisure and entertainment.

Are *you* making full use of inexpensive electricity?

LIVE BETTER ELECTRICALLY

To make full use of modern electrical equipment—in home, office or factory—an adequate wiring system is essential. Your local power company, provincial Electric Service League or any qualified electrical contractor will assist you in planning to "Live Better ... Electrically."

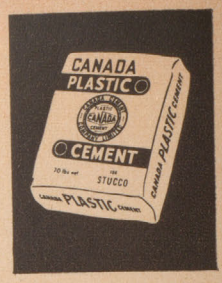

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity ... and the wide variety of products that put it to work in home and industry

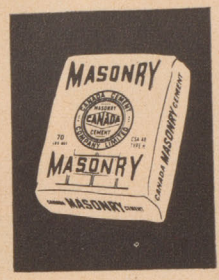

CANADA BUILDS
WITH

CANADA CEMENT

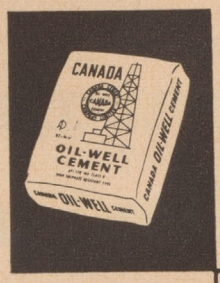

Canada Cement, a Canadian-owned and Canadian-operated Company, has an established reputation for leadership in the manufacture of quality products for every construction purpose.

A distinguished year...

1883

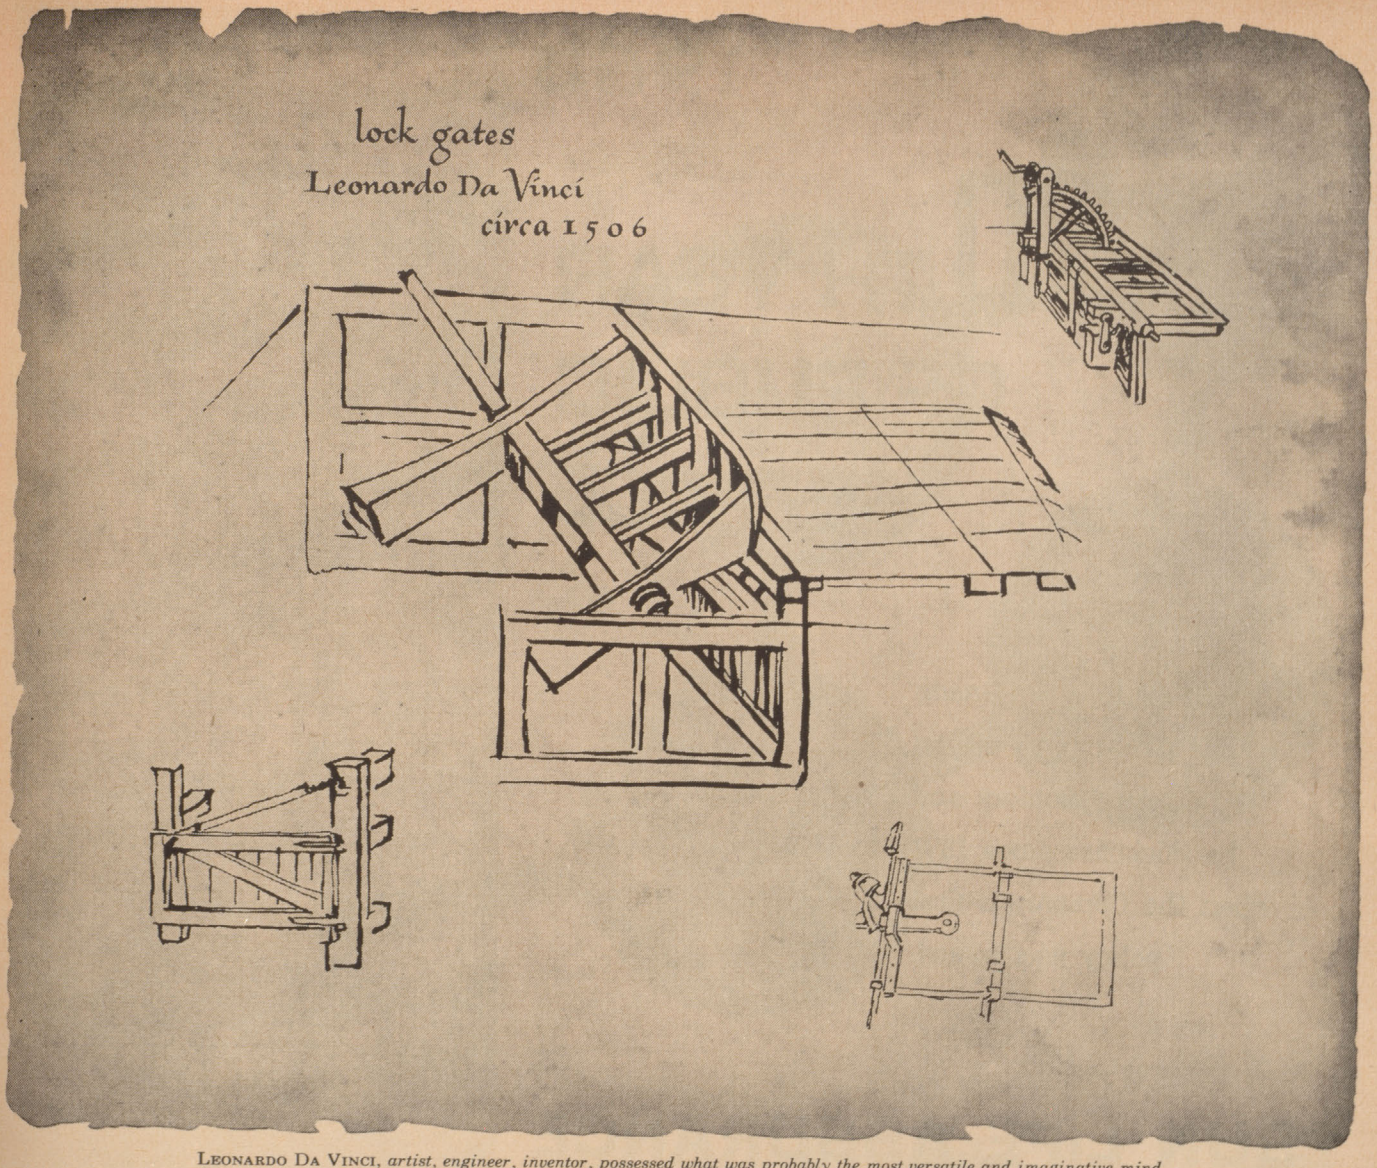

DISCOVERED IN 1883, Lake Louise, in the Canadian Rockies, is one of the loveliest spots in the world.

A distinguished whisky

Another notable achievement in 1883 was the creation by Joseph E. Seagram, master distiller, of the distinguished Canadian rye whisky, Seagram's "83". Generations of Canadians since 1883 have enjoyed the distinctive flavour and bouquet of this fine whisky.

Seagram's "83"

CANADIAN WHISKY

LEONARDO DA VINCI, *artist, engineer, inventor, possessed what was probably the most versatile and imaginative mind the world has ever known. Reproduced here are original sketches of various types of Lock Gates designed by Da Vinci.*

VERSATILITY

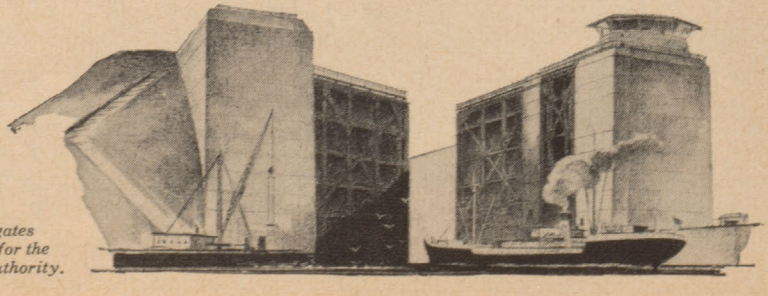

In manufacturing machinery and equipment for all types of water control, like the lock gates shown below, Canadian Vickers again demonstrates the range and versatility of its operations. Machines, both large and small, and equipment for every imaginable industrial need, are designed and manufactured in Canadian Vickers' shops, thus fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

Ships • Special Machinery & Equipment • Marine Equipment • Mining Equipment
Industrial Boilers • Chemical Process Equipment • Hydraulic Machinery • Pulp & Paper Equipment

Head Office Montreal

. . . *linked to almost every phase of Canadian life*

Chemicals produced in the six modern plants of Cyanamid of Canada Limited form important links in many chains of industrial development . . . development that benefits almost every phase of Canadian life.

The larger and more complex Cyanamid grows, the greater is its need of well-educated Canadians with vision and vitality . . . promising young people who can play significant roles in the spheres of Canadian mining, paper-making, plastics, textiles, pharmaceuticals, general industry and agriculture.

Cyanamid's confidence in this country's growing economy is reflected in its substantial investment and plans for expansion. The Cyanamid pattern of development is one that continually creates opportunities for individual advancement and accomplishment.

HALIFAX
President — Mr. Allan F. Duffus, (B.Arch. '38), 69 Birmingham St., Halifax, N.S.
Secretary — Mr. J. W. Ritchie, (B.Sc./Agr. '51), Eastern Securities Ltd., Halifax, N.S.

EAST NOVA SCOTIA
Vice-President — Dr. Thomas W. Gorman, (M.D. '44, M.Sc. '49), P.O. Box 460, Antigonish, N.S.

CAPE BRETON
President — Mr. C. M. Anson, (B.Sc. '25), Gen. Manager, Dominion Steel & Coal Corp. Ltd., Sydney, N.S.
Secretary — Mr. J. R. Wallace, (B.Eng. '40), Dir. of Research, Dominion Iron & Steel Ltd., Sydney, N.S.

NEW BRUNSWICK
President — Dr. Cecil H. Turner, (M.D. '32), 230 York St., Fredericton, N.B.
Secretary — Mr. Melvin B. Moore, (B.S.A. '34), 790 Brunswick St., Fredericton, N.B.

QUEBEC CITY
President — Mr. T. H. Dunn, (B.Com. '40), 1010 St. Louis Rd., Quebec, Que.
Secretary — Mr. Pierre Leduc, (B.Eng. '50), 2510 Des Hospitaliers, Quebec, Que.

ST. MAURICE VALLEY
Vice-President — Mr. W. Nelson Crutchfield, (B.Com. '34), 1102 Maple Avenue, Shawinigan Falls, Que.

DISTRICT OF BEDFORD
President — Mr. Robert Millinchamp, (B.S.A. '30), P.O. Box 11, Waterloo, Que.
Secretary — Mr. G. E. Cotter, (B.Eng. '51), 43 Elgin St., Granby, Que.

ST. FRANCIS DISTRICT
President — Dr. Guy Lapierre, (B.Sc. '42, M.D. '45), Beebe, Que.
Secretary — Mr. Jacques E. Brisson, (B.Eng. '50), 211 Brewster Ave., Sherbrooke, Que.

MACDONALD COLLEGE
President — Mr. D. Grant Ross, (B.Sc./Agr. '56), 592 Hubert St., Greenfield Park, Cite Jacques Cartier, Que.
Secretary — Miss Pauline A. Corby, (B.Sc./H.Ec. '57), 4750 De Courtrai Ave., Apt. 21, Montreal, Que.

MONTREAL
President — Mr. Peter Turcot, (B.Com. '47), Turcot, Wood, Power & Cundill Ltd., 360 St. James St. W., Montreal, Que.
Secretary — Mr. Thomas J. McKenna, (B.C.L. '46), Stewart, Crepault & McKenna, 507 Place d'Armes, Montreal, Que.

ALUMNAE SOCIETY, MONTREAL
President — Mrs. Hugh Hamilton, (B.Sc. '48), 5550 Place d'Aiguillon, Montreal 9, Que.
Secretary — Mrs. Richard Gilbert, (B.A. '54), 1270 Regent Rd., Apt. 18, Montreal 16, Que.

NORANDA
Vice-President — Mr. Clayton E. Anderson, (B.Sc. '19, M.Sc. '20), Noranda Mines, Noranda, Que.

OTTAWA VALLEY
President — Mr. Robert L. McKenna (B. Com. '48), Seeley Systems Corp. Ltd., 279 Laurier Ave. W., Ottawa, Ont.
Secretary — Mr. Denis A. Ross, (B.Com. '47), 216 Metcalfe St., Ottawa, Ont.

UPPER ST. LAWRENCE
Vice-President, Canada — Mr. Thomas D. Dailey, (B.Com. '42), 107 King Street West, Brockville, Ont.
Vice-President, U.S.A. — Dr. Munroe M. Kissane, (M.D. '40), 24 Terrace Street, Malone, N.Y.
Secretary — Mr. Alan H. Hall, (B.Arch. '50), R. R. No. 3, Collins Bay, Ont.

LONDON, ONT.
President — Mr. G. M. Hobart, (B.C.L. '52), 281 Base Line Road, London, Ont.
Secretary — Mr. Edward G. Blake, (B. Com. '49), 450 Sherene Terrace, London, Ont.

HAMILTON
Secretary — Mrs. Basil G. Southam, (B.A. '41), 454 Queen St. S., Hamilton, Ont.

SARNIA
President — Mr. George E. Bawden, (B.Eng. '50), 634 Beach Lane, Sarnia, Ont.
Secretary — Mrs. Kenneth J. Radcliffe, (Physio. '48), 742 Grove St., Sarnia, Ont.

WINDSOR — DETROIT
President — Mr. W. W. Stuart, (B.Com. '40), 315 Rosedale Ave., Windsor, Ont.
Secretary — Mr. Herbert Gray, (B.Com. '52), 1510 Ouellette Ave., Windsor, Ont.

PORCUPINE
President — Mr. Wendell B. Brewer, (B.Com. '23), 217 Way Ave., Timmins, Ont.
Secretary — Mr. J. W. Thomson, (B.Eng. '38), 162 Tamarack St., Timmins, Ont.

KIRKLAND LAKE
President — Mr. Gerald V. Kearns, (B.Com. '24), P.O. Box 428, Kirkland Lake, Ont.
Secretary — Mr. J. Murphy Cambie, (B.Com. '29), Caswell Construction Co. Ltd., Kirkland Lake, Ont.

SUDBURY
Secretary —Mrs. Eric G. Swaine, (B.Sc./H.Ec. '50), 452 Westview Drive, Sudbury, Ont.

NIAGARA FRONTIER
President — Mr. Donald O. D. Ramsdale, (B.Eng. '33), 157 Highland Ave., St. Catharines, Ont.
Secretary — Mr. J. K. Abel, (B.Eng. '47), 117 Glenwood Ave., St. Catharines, Ont.

TORONTO
President — Mr. A. H. Wait, (B.Com. '33), Clarkson Gordon & Co., 15 Wellington St. W., Toronto, Ont.
Secretary — Mr. C. F. Gross, (B.Eng. '51), 50 Maitland St., Toronto, Ont.

TORONTO ALUMNAE
President — Mrs. Edgar Brodie, (B.A. '36), 104 Glendora Ave., Willowdale, Ont.
Secretary — Mrs. John B. Wheelwright, (B.A. '50), 52 Caribou Road, Toronto, Ont.

GRAND RIVER VALLEY
Secretary — Mr. Peter H. Sims, (B.Com. '55), 130 Aberdeen Rd., Kitchener, Ont.

WINNIPEG
President — Mr. G. S. A. Bacon, (B.A. '30), Great-West Life Assurance Co., 177 Lombard Ave., Winnipeg, Man.
Secretary — Mr. Christopher Flintoft, (B.Com. '49), 72 Kingsway Ave., Winnipeg 9, Man.

NORTHERN SASKATCHEWAN
Secretary — Miss Margaret B. MacMillan, (B.Sc./Phy.Ed. '29), 119 Saskatoon Crescent W., Saskatoon, Sask.

SOUTHERN SASKATCHEWAN
President — Mr. G. Bertram McGillivray, (B.Com. '31), 2701 Regina Ave., Regina, Sask.
Secretary — Mrs. Florence Blair, Suite 2, 2700 McCallum Ave., Regina, Sask.

NORTHERN ALBERTA
President — Mr. Anthony F. Salvatore, (B.Eng. '49), 11647—72nd Ave., Edmonton, Alta.
Secretary — Mr. G. K. Greaves, (B.A. '42), Upper 12208—102nd Ave., Edmonton, Alta.

SOUTHERN ALBERTA
President — Mr. Fred G. Wilmot, (B.Com. '54), 61 Medford Place, Mayfair, Calgary, Alta.
Secretary — Mrs. J. A. Duncan, (B.A. '45), 318 - 38th Ave., S.W., Calgary, Alta.

TRAIL AND DISTRICT
President — Dr. F. L. Wilson, (M.D. '33), 24 Hazelwood Drive, Trail, B.C.
Secretary — Mr. G. J. Hood, (B.Sc. '48, B.Eng. '52), 2262 Thompson Ave., Rossland, B.C.

VANCOUVER
President — Dr. Frank L. Skinner (M.D. '36), 923 Birks Bldg., Vancouver, B.C.
Secretary — Mr. Christopher C. Hart, (B.Eng. '56), 903 Wentworth Rd., North Vancouver, B.C.

VICTORIA AND DISTRICT
President — Dr. M. J. T. Dohan, (D.D.S. '40), 1207 Douglas St., Victoria, B.C.
Secretary — Dr. C. Hugh Borsman, (B.Sc. '41, M.D. '48), 2975 McAnally Rd., Victoria, B.C.

UNITED STATES

BOSTON
President — Cmdr. Eric Parnell, USN (Ret.), (B.Sc. '21), 62 Hume Ave., Medford 55, Mass.
Secretary — Dr. Ruby G. Jackson, (M.D. '50), 1101 Beacon St., Boston, Mass.

NEW YORK CITY
President — Mr. Lew Schwartz, (B.A. '27), 12 Park Rd., Scarsdale, N.Y.
Secretary — Mr. Robert Currie, (B.A. '37, M.A. '39), New York Telephone Co., 140 West St., New York 7, N.Y.

ABOUT OUR COVER

The "mobile" on the cover, which hangs in the office of Dr. C. P. Leblond, Chairman of the Department of Anatomy, represents, in simplified artistic form, the successive stages of spermatogenesis, the development of the sperm. It was designed by Dr. Yves Clermont, Assistant Professor of Anatomy. In the background, the entire south wall of the office is covered with a mural on the subject of Endocrinology by the well-known Canadian painter Marian Scott, wife of Prof. F. R. Scott, Faculty of Law. The great spiral and the lines that converge and radiate from the grasp of the central figure symbolize man, the seeker, and the evolving pattern of his scientific knowledge. The photograph by Tony Graham, Department of Anatomy, shows the central portion of the mural.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

LET'S FACE THE ISSUE

To our knowledge, the 38-page section in this issue, devoted to "Medicine at McGill" sets a precedent in several important respects. On the purely materialistic level, it has meant a 64-page magazine: a relatively rare specimen in recent McGILL NEWS publishing history. But more to the point, it's probably the most complete and comprehensive treatment of a faculty or department ever seen in the pages of the NEWS. We are confident that readers will find "Medicine at McGill" a most stimulating and interesting piece of work.

* * *

We are most indebted to one man for the concept, organization and execution of this unique section. He is Dr. Lloyd G. Stevenson, Dean of Medicine. An engaging, vital person, Dean Stevenson has transmitted to his material not only his knowledge of the structure of medicine at McGill, but a warm, sincere feeling for the tradition and personality of this vital faculty. This is amply evidenced in his prose section on "Osler and Modern McGill" (Page 15). It was our pleasure to work with Dean Stevenson on this project and we must express our admiration for his magnificent contribution to this issue. We hope that our readers will share our delight.

Dr. Lloyd G. Stevenson

* * *

In the preparation of this special section, Dean Stevenson had a wide range of excellent photographic material to call on. The selection of photographs was an extremely difficult problem, but we feel that the decisions he made — hard as they were — are amply justified. Special mention must be made of some of the men behind the cameras:

Tony Graham of the Department of Anatomy did the cover picture and the anatomy groups. Mr. Graham came to McGill in 1958, having worked at an earlier time in the photographic department of the British Postgraduate Medical School, Hammersmith.

Haigaz Artinian of the Montreal General Hospital did most of the interiors there.

John Gunn of the Montreal Children's Hospital provided the photographs of that institution.

John S. Ilitch did most of pictures from the Royal Victoria Hospital.

Dr. Joseph Hanaway, Short Hills, N.J., who graduated at the Spring Convocation, and George Pickett, Morgantown, West Virginia, third year Medicine, also provided photographs.

Faculty members who contributed are: Dr. David V. Bates, Associate Professor of Medicine and Clinical Medicine; Dr. Alexander C. Ritchie, Associate Professor of Pathology; and Dr. Thomas Primrose, Assistant Professor of Obstetrics and Gynaecology.

To all these contributors, we express our thanks.

— THE EDITOR

Letters

Dear Sir:

. . . Since our daughter, class of '62, has been sharing her picture of campus activities with us, I have been increasingly impressed with the broad range of studies and other pursuits available for our young people, helping to prepare them for their future responsibilities — and (I have been) increasingly distressed at the lack of public awareness of what is going on...

I find myself planning a television program — McGill on Parade! — a showcase for what McGill is and does. A Sunday afternoon half-hour, perhaps; it is hard to know what to mention first of the many outstanding subjects for such a program. Of course, the students themselves should display what they are doing: aren't there young physicists who would be proud to show off McGill's cyclotron? The biology laboratory is fascinating; the Redpath Library; the School of Social Work!

A tour of the Students' Union would open many eyes to the skills these young people are developing along with their academics: music, writing, photography, publishing, poster printing, drama production with all its associated arts. There is more, I know, than is familiar to me . . . The Choral Society, the Red & White Revue, the Jazz Society and the Players' Club offer ready-made programs. There is a program just in someone reading an issue of the McGill Daily, and dramatising and interviewing to illustrate the items. McGill's famous debating team could show a fresh young viewpoint on some controversial ideas. Let's see what they consider important, and what they think about it.

Let us hear from some of McGill's famous professors. Dr. Jacobsen will be able to provide a horizon-stretching program when he and his colleagues return from their Arctic expedition, along with Dr. Muller-Battle, leader of the expedition and of the Swiss Mount Everest Expedition in 1956. Let us hear from Hugh MacLennan, Dr. Ellen Ballon, Dr. Purves, recent winner of the C.I.C. award for his contributions to industrial chemistry, Professor Maxwell Cohen, recently assigned a NATO fellowship — and many others not known to me.

(*Continued on page 12*)

WHAT HEARS the MARTLET

The Belle of Personelle

The April 1960 issue of Industrial Canada, in an article entitled "She Spells it 'Personelle' ", rivets our attention onto Mrs. Bonnar Smith (M. Elizabeth Weatherill, BA '44), founder and director of a Toronto organization which goes under the name of Personnelle Placement Service, "one of the pioneers in the female placement field".

Betty Smith, a native of Manitoba, whose arts course was "heavily loaded with economics", started her placement service in May of 1954, upon the unwitting suggestion of a dinner guest in her home. The suggestion fell upon

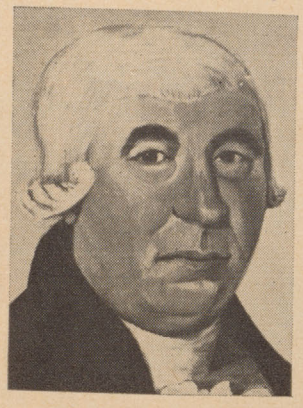

M. Elizabeth Smith

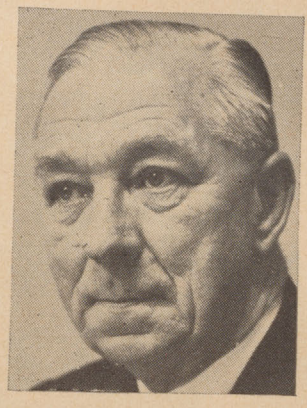

fertile ground, for Betty Smith had been preparing herself for just such a role since graduation from McGill in 1944.

She worked for two years after leaving McGill as a service representative for the Bell Telephone Company and then continued her education at Radcliffe College where she took graduate studies in personnel administration. While earning her Radcliffe diploma, Mrs. Smith found herself working at various jobs in business as a factory hand making men's rubbers, an employee of the U.S. Department of Labor and an assistant to the vice-president of Industrial Relations of a large organization in New York City.

Mrs. Smith returned to Canada in 1947 and served for 2½ years as Assistant Personnel Manager of Willards Chocolate Company Limited, Toronto and then went to the Ontario Research Foundation, where she set up and managed the personnel department. She retired from this post in 1953, as the result of an agreement made upon her marriage in 1951, that she would stop working after two years and become a home-maker.

But her restlessness could not keep her inactive too long and the next year saw her engaged on a new, interesting and unique career as the head of the firm which now employs a permanent staff of seven and which occupies an entire floor of a building at 1168 Bay Street, Toronto.

McGill: Past and Present

The two gentlemen pictured above have a great deal in common.

On the left is the face of James McGill, the founder of the University, as depicted in a painting from the original attributed to De Longpres. James McGill died in 1813.

On the right is John Micheal McGill, presently living at 22 Canaan Lane, Morningside, Edinburgh, Scotland. He is descended from a younger brother of our Founder's father.

For some time now, John McGill, whose hobbies are ancient history and genealogy, has been conducting a lively correspondence with William Bentley, Assistant to the Principal, on the subject of the history of the McGills and the history of the McGill tartan.

The combined efforts of these two gentlemen has resulted in the production of a most attractive authentic McGill tartan, which we hope to reproduce in full colour in a future issue of The McGill News. We have before us now several samples of the tartan in the form of ties and scarves.

But for the present, we would draw our readers' attention to the remarkable facial resemblance of the two McGills — a resemblance which John McGill tells us he fails to see. He does recall, however, that when in April, 1956, Dr. F. Cyril James, Principal and Vice-Chancellor, presented a copy of the James McGill painting at a Civic luncheon in Glasgow, Scotland, several guests and relatives immediately drew his attention to the likeness.

At the present time, John McGill is hard at work on the history of the McGills. In recent correspondence with Mr. Bentley, he said that he receives letters addressed to him as James McGill.

"It must be because of my writings on the founder," he says.

Gifts with the McGill crest

The tumblers are in full crystal by Val St. Lambert, with engraved crest—12 oz. size, $3.25 each; 15 oz. $3.75. The tea cup and saucer is of English Bone China, with the crest in raised enamel —$1.95. There are also breakfast cups and saucers, $2.95 each; Sugar and Creams, $2.95 the pair; Cigarette Boxes oblong, $3.75; Ash Trays, $1.50 each; Salt and Pepper Shakers, $2.75 the pair; and Bon Bon Dishes, $1.25 each.

at Mappin's

JEWELLERS & SILVERSMITHS

1000 ST. CATHERINE ST. W., MONTREAL

It is a genuine pleasure for this mere male to record the fact that Mrs. Smith has had the help of her husband from the beginning, and, in truth, it was he who suggested the tricky name "Personelle". Another example of the pen being mightier than the sword.

Paris in the Spring

Effective trans-Atlantic negotiations and the energetic initiative of Georges Sahovaler, BA '48, have resulted in the organization of the 56th branch of The Graduates' Society: the McGill Society of Paris.

Early in May, through Mr. Sahovaler's efforts, an initial meeting was held at La Maison Canadienne, and there were 21 persons in attendance. The gathering enjoyed a cocktail party provided by Mr. Charles A. Lussier, director of La Maison Canadienne.

As special guest at the meeting, the graduates entertained Canada's Ambassador to Belgium, the Hon. Sydney Pierce, BA '22, BCL '25, and Mrs. Pierce, BA '24, who journeyed from Brussels to Paris to speak on behalf of the Graduates' Society. In appreciation, the meeting named Mr. Pierce honorary president of the new branch.

Other officers elected were: Mr. Sahovaler, president; Mr. Claude Lussier, BCL '45, MCL '46, vice-president; and Mr. Lawrence R. Reusing, BCom '49, secretary-treasurer. The executive committee planned to hold its first meeting in June to discuss further activities of the Branch.

Radiapology

It must have been the anaesthetic effect of Spring that did it. But excuses aside, we must apologize to D. Alan Sampson, MD '31, of Ardmore, Pennsylvania.

In the Spring issue of The McGill News, the lead item in this section treated of information supplied to us by Dr. Sampson—one of our unfailing correspondents who keeps us informed of interesting items about McGill graduates in the medical profession generally. We referred to him at that time as "a Pennsylvania anaesthetist who has himself achieved wide recognition in his profession".

Everything in the latter statement is patently true save for the fact that Dr. Sampson is a leading radiologist and not — repeat not — an anaesthetist. This is no reflection on the ether experts, but justice must be done to Dr. Sampson, whose professional achievements in his chosen field we respect and admire.

Familiar Memories and New Faces

By F. Cyril James

When, at the Annual Meeting of the Montreal Neurological Institute, Dr. Wilder Penfield announced his intention to retire from the Directorship, and also to lay down the scalpel in order to take up the pen, there was a stunned moment of silence in the amphitheatre. Only a few months earlier, on May 4, 1959, Dr. William Cone had died and there flashed through the minds of all of us the realization that after June 1st, 1960, neither of the great pioneers who created it would be active members of the Montreal Neurological Institute. A glorious chapter in the history of McGill was ending.

A New Chapter

Yet, in that same moment, another chapter was beginning. In his valedictory remarks Dr. Penfield emphasized the fact that he had no qualms about the members of the team in whose hands he was leaving the Institute. Dr. Theodore Rasmussen, the new Director of the Institute, is a disciple of Dr. Penfield, who came to the M.N.I. as a research fellow twenty years ago. Before that, he had acquired from his father, professor of neuroanatomy at Minnesota, a lasting interest in the central nervous system. During the years that have elapsed since he left Montreal he has won distinction first at the Mayo Clinic and then as Professor of Neurological Surgery at the University of Chicago, from which post McGill invited him to return to the M.N.I. on the recommendation of a selection committee that included in its membership three distinguished scientists from other universities. His personality matches his scientific attainments. Even-tempered, energetically athletic, meticulous in his command of detail, he has many of the outstanding qualities of his predecessor. But there is one difference: Dr. Rasmussen plays the saxophone!

Dr. William Feindel, first William Cone Professor of Neurosurgery, also inherits much of the mantle of that much-loved surgeon whose name adorns his chair. Nova Scotian by birth, he studied at Acadia and Dalhousie before going to Oxford as a Rhodes scholar. He then came to the Neurological Institute as Reford fellow, to work under both Dr. Penfield and Dr. Cone. His post-graduate discipleship completed he went to the University of Saskatchewan to become the first Director of the Division of Neurosurgery, and the affection in which his colleagues held him was evident in the sadness with which they received the news of his invitation to return to McGill. It might have been unconscious preparation for the future that led him, in 1945, to marry Faith Lyman, Dr. Cone's special operating room nurse, but their happy family rests on much more than a shared interest in surgery. A man of quick wit, Dr. Feindel is apt to have his visitor laughing in very few minutes and his wide ranging mind can keep a conversation dancing around the company for hours. He, too, is musical, but the organ at Christ Church Cathedral is his favourite instrument.

Continuity at McGill

Dr. Rasmussen and Dr. Feindel are not Dr. Penfield and Dr. Cone. Familiar memories of those two are a precious part of our heritage. Yet there is continuity in the life of McGill. The new men have absorbed from these masters the knowledge and traditions of the past while to the forging of the future they bring their own great personal qualities.

This aspect of the growth of McGill, a living and lively organism, from its roots in the past, is not confined to the Faculty of Medicine. In the Department of Mining Engineering, the outstanding career of John Bonsall Porter (whose students still hold important positions in many corners of the world) has been followed with equal distinction by Wilbert G. McBride, Lee Bladon, and R. G. K. Morrison, who were his successors in the Macdonald Chair — each adding something of his own personality to the life of the Faculty of Engineering. This year, as a result of the generous endowment of a second Chair of Mining Engineering by Mr. George Boyd Webster, a McGill graduate of 1904, it has been possible to bring back another McGill graduate with rich experience. Dr. L. P. Geldart, who is also a Nova Scotian, received his early education at Mount Allison and, after receiving his Ph.D. at McGill, returned to Acadia as Professor of Physics and head of the department. He then went to the California Institute of Technology to study at a more advanced level the intricate field of geophysics, and for some years past, as geophysicist for the California Exploration Company, has guided the Standard Oil Company in its search for new oil reservoirs outside the continental limits of the United States.

Dr. Robert E. Bell, who succeeds John Stuart Foster as Director of the Radiation Laboratories and the Cyclotron, is in the long tradition that stretches back through Barnes and Eve to Rutherford himself. Born in England, Dr. Bell pursued his studies and, later, his research at the University of British Columbia, the National Research Council, and the Atomic Energy Project at Chalk River. Eight years ago he was chosen by Professor J. S. Foster as his successor, and the wisdom of that choice has been confirmed by Professor Niels Bohr, who received an honorary degree from McGill on Oct. 25, 1946, when the Cyclotron was

(*Continued on page 12*)

THE CAMPUS

(McGill makes news in the Montreal press. The following selection of news events about the University is culled from the Montreal Gazette and The Star:)

McGill Sets up Press

Establishment of the McGill University Press was announced May 2 by Dean D. L. Thomson, Vice-Principal, following approval of the project by the Board of Governors.

The new campus facility will be set up along the lines of the famous university presses at Oxford and Cambridge in England, and at Harvard, Princeton and Yale in the United States.

It will be designed to stimulate the potential author not only on the McGill campus, but at universities throughout the world.

National Bilingualism Urged

A McGill University professor of political science believes true national bilingualism can be achieved in Canada without treading on provincial autonomy.

Prof. Michael Oliver, an expert on French-Canadian politics, told the Richelieu-Maisonneuve Club May 17 that French-Canadians have a historic and moral right to full participation in the nation's public life without loss of their French character.

But leadership would have to be federal, he said, since the provinces govern their own education systems on the basis of electors' needs and wishes.

New Aircraft Experiments

Experimental work under way at McGill University could lead to ultimate production of an airplane capable of speeds up to 4,000 miles an hour powered by hydrogen, but flying within the atmosphere to avoid the necessity of carrying oxygen-containing fuels.

Prof. Donald Mordell, Dean of McGill's Faculty of Engineering told a combined meeting of the Society of Automotive Engineers and the Canadian Aeronautical Institute that construction of the airplane would be far beyond Canada's resources.

"There is for us a job to prove the principles of such a plane," he explained. "We are engaged in work with an important new scientific device at McGill called a hot hypersonic tunnel.

These experiments, small though they may be, could give our country a big say at an international bargaining table. I think this way is the path to the stars."

To celebrate her 20th year as warden of the Royal Victoria College, Dr. Muriel V. Roscoe was presented with a portrait of herself by students of the College in March. Photographed shortly after the unveiling of the portrait, which was painted by Robin Watt, R.C.A., well-known Canadian portraitist, were, left to right: Derry Allen, President of the R.V.C. Students' Association; Dr. Roscoe; and Patricia Holt, last year's President of the Association, under whose leadership the portrait project was initiated.

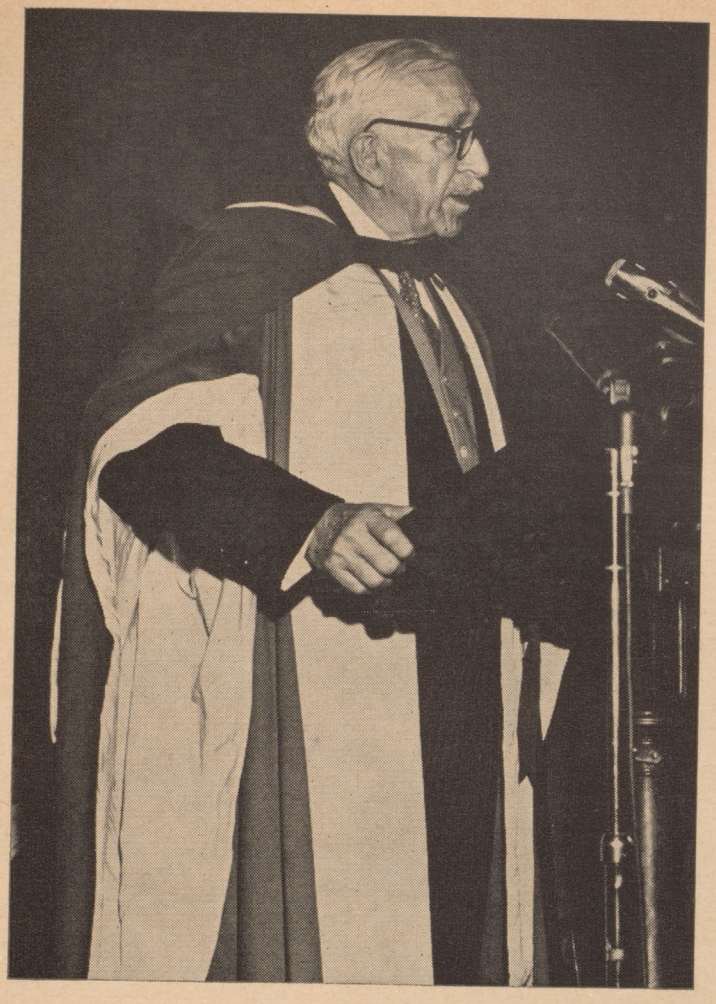

Polymer Institute Needed

The chairman of the Department of Chemistry at McGill University yesterday (April 5) urged the establishment at the university of a $200,000 "High Polymer Research Institute" to aid Canadian scientific progress in the fields of man-made textiles, plastics and synthetic rubber.

Speaking at the 4th annual meeting and 9th scientific session of the Institute of Textile Science here, Dr. Carl A. Winkler said that Canada has a "large and rapidly expanding industrial development" in these fields and needs an institute of polymer science to train research students to carry on fundamental research and to provide a group of well-trained, competent scientists available for discussion and consultation in and outside the university.

Resolution to Ottawa

A resolution urging the Federal Government to press for an immediate and permanent end to testing and production of nuclear weapons has been forwarded to Ottawa by 400 staff members of McGill and the University of Montreal.

Personally, I believe that many of today's currents of anger are sparked by the materialism present in our society. We are told that man shall not live by bread alone. Perhaps some of the present rebels are searching through the mists and fog for the dignity of man . . . Speaking for the older generations, I think I can say that we are not at all happy with the sort of world we have produced. Our material progress may have been great, but what of the Spiritual? . . . We are able to probe the outer reaches of space, while we remain unable to see into the inner recesses of man's mind.

But even if my generation is to blame for many present evils, I am not a pessimist and . . . perhaps I may be allowed to make some suggestions. To the angry young men and even to you normal, well-adjusted graduates, I say: If you want a better world you must work for it. Let your anger be positive and constructive . . . take an interest in the affairs of your city or province, even if it means taking time off from your business or career . . . I look to you to teach the children of today that self-sacrifice can be more rewarding than self-indulgence . . .

—Extracted from the Convocation Address by His Excellency Georges P. Vanier, Governor-General of Canada, McGill University, May, 1960.

Spring Convocation was held Monday, May 30, in the Montreal Forum. In traditional ceremony, 1,225 students were graduated and the Convocation Address was delivered by His Excellency Georges P. Vanier, Governor-General of Canada and Visitor to the University, top left.

A distinguished roster of Canadians received honorary degrees. They were photographed above with the Chancellor and Principal just before the ceremony got under way. From left to right, they are, F. Cleveland Morgan, B.A., M.A. '04, honorary president of the Montreal Museum of Fine Arts; Dr. Jules Leger, Canada's Permanent representative to the North Atlantic Council; the Hon. Antonio Barrette, Premier of Quebec; R. E. Powell, Chancellor; the Governor-General; Paul-Emile Cardinal Leger, Archbishop of Montreal; Dr. F. Cyril James, Principal; A. Gordon Murphy B.Sc. '22, chief engineer of the St. Lawrence Seaway Authority; and Dr. W. P. Thompson, former president of the University of Saskatchewan.

THE FACULTY

Prof. Hare

DR. CLIFFORD B. PURVES, Eddy Professor of Industrial Cellulose Chemistry, is to be awarded the Chemical Institute of Canada medal for outstanding contributions to chemistry at the Institute's 43rd annual meeting in Ottawa June 13-15. Dr. Purves' research in lignin has won him an international reputation.

The first William Cone Professor of Neurosurgery is DR. WILLIAM H. FEINDEL (M.D. '45). Dr. Feindel occupies the chair which was held by the late Dr. William V. Cone, and which was named in the latter's honour by the Board of Governors recently.

PROF. DAVID McCORD WRIGHT will be one of the speakers at the second annual institute of the Public Relations Society of America at the University of Wisconsin in July.

Recipient of a NATO Fellowship for the sessional year 1960-61 is PROF. MAXWELL COHEN, Faculty of Law. His assignment under the fellowship, which will not interfere with his teaching duties, will be to assess the power and influence of the secretary-general of NATO and the functions he performs in the process of integrating the national interests of NATO members.

Well-known Canadian philosopher PROF. RAYMOND KLIBANSKY has been named Fellow of the International Academy for the History of Science, Paris. Prof. Klibansky, a member of the Department of Philosophy, is founder-president of the Canadian Society for the Philosophy and History of Science.

DR. F. CLARKE FRASER (M.D. '50), has been promoted to the rank of full professor of genetics. Dr. Fraser, who is director of medical genetics at the Montreal Children's Hospital, has achieved an international reputation in his field and has published more than 50 scientific papers.

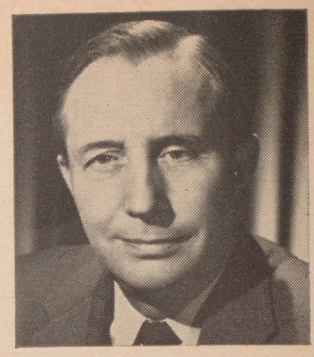

PROF. FRANK SCOTT (B.C.L. '27), Faculty of Law, was one of five distinguished Canadian scholars to receive special senior awards from the Canada Council. Prof. Scott will continue his studies of constitutional law with particular reference to comparative constitutional law and the protection of human rights.

DR. DONALD H. WOODHOUSE, Faculty of Medicine, appointed medical director of the Sun Life Assurance Company of Canada.

Elected president of the Institute of Textile Science at its fourth annual meeting in Montreal early in April was DR. ROBERT V. V. NICHOLS, associate professor of chemistry.

Staff members of the Department of Psychiatry, Allan Memorial Institute, making important contributions to various scientific meetings, symposia and conferences: DR. H. AZIMA at the Society of Biological Psychiatry in Miami in June . . . DR. T. BOAG, at the Boston Research Conference in March . . . DR. R. B. MALMO at a meeting of the Mid-Western Psychological Association, St. Louis, Missouri, April 28-30 . . . DR. J. GRAHAM TAYLOR spoke at the annual meeting of the Industrial Medical Association, Rochester, N.Y., in April . . . DR. D. EWEN CAMERON, Chairman of the Department, DR. L. LEVY and DR. T. BAN presented a paper at the Symposium on the Psychophysiological Aspects of Space Flights, San Antonio, Texas, May 26-27 . . . At the annual meeting of the American Psychiatric Association in Atlantic City, May 9-13, the Department was represented by Dr. Cameron, DR. E. D. WITTKOWER, Dr. Levy and DR. R. A. CLEGHORN . . . Dr. Wittkower and DR. J. FRIED, Department of Sociology and Anthropology, are jointly contributing a chapter for a new book on "Modern Concepts in Psychoanalysis", while Dr. Cameron has been asked to be co-editor of a series of articles entitled "Topical Problems of Psychotherapy".

At Macdonald College, ARTHUR M. HENRY, (M.A. '38), member of the faculty of the School for Teachers since 1949 has been appointed full professor in the Institute of Education

Prof. Scott

. . . Another professor appointed at the Institute is REGINALD EDWARDS, lecturer in educational psychology at the University of Sheffield, England.

An assistant professor in the graduate school of business administration at Harvard University, BARRY E. SUPPLE, has been appointed associate professor of economic history at McGill.

PROF. F. KENNETH HARE, chairman of the Geography Department, is in London England, where he will carry out special research in Arctic meteorology at Imperial College. Late in July, Prof. Hare goes to Helsinki, Finland to deliver a paper before the Congress of the International Union of Geodesy and Geophysics. In August, he proceeds to Stockholm, Sweden, where he will participate in proceedings of the International Geographical Congress, along with colleagues Profs. TREVOR LLOYD, J. B. BIRD, T. L. HILLS and J. B. IVES. During the Congress, Prof. Hare will preside at a one-day symposium on the Arctic with Academician Gerasimov, at Moscow. Profs. Lloyd, Bird and Hills will do field work in Arctic Lapland, and the latter will also take part in a symposium on agricultural geography in Denmark.

McGill scholars awarded grants by the Nuffield Foundation, London, England: Travelling Fellowships in Natural Sciences: Dr. B. A. RATTRAY, associate professor, mathematics; DR. G. W. FARNELL, associate professor, electrical engineering. Travel Grant in the Natural Sciences: DR. R. D. GIBBS, professor, botany.

DR. D. L. THOMSON, Dean of Graduate Studies and Research, was awarded the honorary degree of Doctor of Science at the University of Manitoba Convocation May 27. He delivered the Convocation Address to the graduating medical class.

Nesbitt Announces Objective

Towards Increased Participation

Early in May, ***A. DEANE NESBITT,*** *B. Eng. '33, new Chairman of the Alma Mater Fund, made his first public statement at a press conference held in the University Club of Montreal. By coincidence, another press conference was held later the same afternoon on the other side of Mount Royal, at the University of Montreal, when the rector, Msgr. Irenee Lussier, announced that the U. of M. was launching its own alma mater fund "modelled after the successful fund operated for the past 12 years by its sister university, McGill". Msgr. Lussier and Mr. Nesbitt both stressed the fact that a university "must not be dependent on any one source of revenue" if it was to retain its freedom. Mr. Nesbitt's statement follows:*

> *"To the McGill man and woman . . . the concept of the Alma Mater Fund is now a tradition . . . and like all traditions, it has a continuity and significance not only for McGill, but for the graduates themselves, individually and as members of the McGill family". — A. Deane Nesbitt.*

The enlightened solution to the federal university grants situation, as worked out by the late Premier Paul Sauve and his successor Premier Antonio Barrette, has been enthusiastically received by the general public, the press, and not least, by Quebec universities. For the first time in a decade McGill finds itself in a competitive position financially with other Canadian universities.

University Must Be Free

We must never lose sight of the fact, however, that McGill is first and foremost a privately endowed university, and, as Dr. F. Cyril James, Principal and Vice-Chancellor, said recently, "A university, if it is going to be great, must be free. It cannot be dependent on any one source of revenue".

To forge ahead, McGill must mobilize every possible source of revenue. We must, in short, follow the pattern set by the great privately endowed universities in the United States, where no possible source of revenue is overlooked. Their development programmes embrace corporations and foundation gifts and grants, gifts by non-alumni parents of undergraduates and other friends, as well as bequest programmes.

But in each instance, the cornerstone upon which such programmes are built is the Alumni annual giving programme. To Princeton this year more than 20,000 of its alumni gave over $1,400,000. You can readily realize that the interest of graduates in their university also extends into and affects all other sources of financial support.

AMF Is A Tradition

Since the year 1948, when the Alma Mater Fund was established, more and more McGill graduates have joined together each year to swell their collective contribution to their University. As has already been announced, 12,210 graduates gave close to $300,000 to McGill through the Fund in 1959, and since 1948 they have given more than $2,000,000. To the McGill man and woman, then, the concept of the Alma Mater Fund is now a tradition; graduate financial assistance to the university has taken deep roots, and like all traditions, it has a continuity and significance not only for McGill, but for the graduates themselves individually and as members of the McGill family. Other Canadian universities cast envious eyes on this McGill tradition. As Dr. Claude Bissell, President of the University of Toronto, said recently:

> "McGill's Alma Mater Fund is always pointed to in Canada as the model to which others should aspire. If our own graduates had been organized in anything like a similar way, the University of Toronto, with the largest alumni body of any Canadian university, might well have been receiving in alumni support at least half a million dollars a year.

Up to the year 1959, the Alma Mater Fund was most important in increasing the operating revenues of the University during a period when student fees had to be raised, much-needed salary increases for faculty had to be postponed, and endowments reduced to cover deficits.

Today, however, McGill is back in a challenging position. The University has found it possible to reduce the cost of education to the student and to set in motion a scale of faculty salaries that creates a more favourable comparison with other universities of the same size. This, as you know, has come about as a result of the new provincial grant programme.

It must be remembered that during the University's "depressed years" McGill graduates established a position of leadership in alumni support of higher education in Canada. What a wonderful opportunity now awaits the Fund to encourage McGill on to the greatest heights it has ever known. The University is looking to McGill graduates to continue the increasing financial assistance that will enable the University to forge ahead and assume its role as the leader in Canadian higher education. This is the new philosphy behind the McGill Alma Mater Fund

Increased Participation

My objective, therefore is to greatly increase the number of contributors to the Alma Mater Fund, as I think this is the first step in meeting the University's request.

Three years ago my predecessor, Mr. J. G. Notman, suggested as a long term goal for the Fund, the attainment of 20,000 contributions averaging $50.00 for a total of $1,000,000 per year. Bearing in mind the successes of recent years, this goal should be attainable.

I feel very strongly that the new role of the Alma Mater Fund, of helping McGill to forge ahead and maintain its prestige as Canada's leading university, will have wide appeal to all McGill graduates.

They Don't Miss A Trick

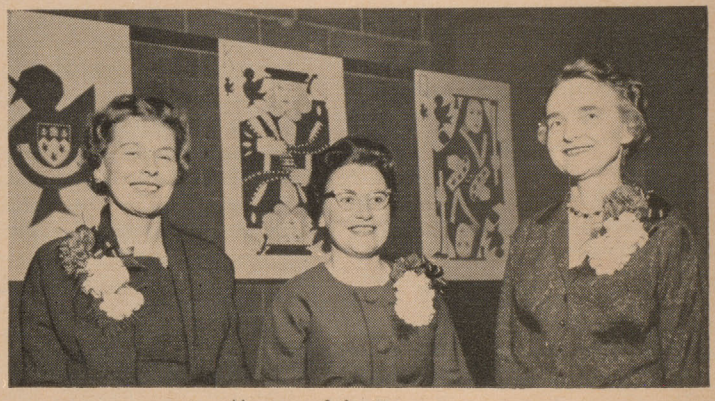

When it comes to raising money for its Scholarship Fund, the McGill Alumnae Society has an ace up its sleeve: the annual Scholarship Bridge, which each year attracts over 850 alumnae and their friends.

The 1960 version of this event was held Wednesday, April 6, in the Sir Arthur Currie Memorial Gymnasium and close to $1,400 was realized, boosting the total of the Scholarship Fund to almost $40,000. The photograph above shows the more than 200 foursomes engaged in their mental gymnastics. Note particularly the outnumbered, but not unwilling, males.

The Masters of the Tournament, depicted in the centre photograph are, Mrs. Russell Merifield, left, Chairman of the Bridge Committee; Mrs. Hugh Hamilton, centre, recently re-elected President of the McGill Alumnae Society; and Miss Shirley Bradford, right, Scholarship Chairman.

Keen supporters of the Fund and the Alumnae Society were caught, lower right, in the midst of a rubber. They are, from the left, Mrs. R. S. Eadie; Mrs. A. S. Bruneau, for many years Scholarship Chairman; Mrs. Eric Leslie; and Mrs. A. Turner-Bone, Honorary Life Member of the Society.

Masters of the Tournament

"I told you it was a no-trump game".

Obituaries

James A. Eccles

James A. Eccles, a governor of McGill University and a foremost figure in Canadian finance and industry, died in Montreal March 3 at the age of 72 years.

Born in Cambridge, Mass., Mr. Eccles graduated from Harvard University with a B.A. degree (cum laude) in 1910. He joined the board of governors of McGill University in 1947 and became chairman of the investment committee. Prior to that, he had been associated with the management of McGill's investment portfolio for nearly 25 years.

Mr. Eccles was president and chairman of Imperial Industries of Canada and a director of a number of other firms. He was a life governor of the Montreal General Hospital and a governor of the Royal Edward Laurentian Sanitorium. On February 25, 1948, he was elected the 10th president of the Royal Victoria Hospital.

James A. Eccles

In other community activities, Mr. Eccles played a prominent role as director and a past vice-president of the Boys' Farm and Training School, Shawbridge; member of the advisory board, Weredale House for Boys; past chairman of the board of directors, Welfare Federation of Montreal; member of the board, Ladies Benevolent Society; member of the council, Art Association of Montreal.

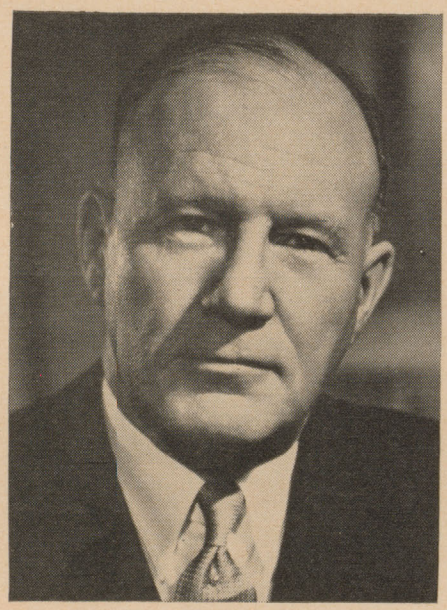

In May of 1956, Mr. Eccles received the degree of Doctor of Laws, honoris causa, from McGill University.

James Muir

James Muir, chairman and president of the Royal Bank of Canada and a governor of McGill University, died April 10, while on a visit to his native Peebles, Scotland. He was 68 years old.

Mr. Muir started his banking career in 1907 with the Peebles agency of the Commercial Bank of Scotland and later worked in London with the head office of the Chartered Bank of India, Australia and China.

Emigrating to Canada in 1912, Mr. Muir joined the Royal Bank of Canada as a junior clerk in Moose Jaw, Sask. He began a 10-year term as assistant general manager in 1935 and became president in 1949. As head of Canada's largest chartered bank, Mr. Muir became the most talked about banker in the country as he lucidly expressed views on inflation, taxes and other matters.

James Muir

He was an officer or director of 13 other corporations as well as the bank, governor of four hospitals, two universities and one college. He held honorary university degrees, was a life member of the National Trust for Scotland and Honorary Chief Eagle Ribs of the Blood Indian tribe of the Blackfoot Confederacy in Alberta.

In his tribute, Dr. F. Cyril James, Principal and Vice-Chancellor said:

"James Muir was without doubt one of the most dynamic leaders in the Canadian community at the present time. His interest in all aspects of Canadian life and especially in education was active and continuous. His insatiable curiosity, which made him travel throughout the world, always brought back new and stimulating ideas . . ."

Dr. William Oliver

Dr. William Oliver, B.A. '91, M.D. '95, one of the oldest graduates of the university at the time of his death, died March 19 in Montreal at the age of 89 years.

Born in Rockburn in 1870, Dr. Oliver received his early education at Huntingdon Academy. His professional life started in Ormstown, Que., where he took up general practice. In 1912 he moved to Saskatoon, Saskatchewan where he was active in the profession until retirement in 1949, after 54 years of medical practice. From 1939-49 he served as Coroner in the Saskatchewan city.

Married to the former Miss Hatfield Kee, he is survived by his wife, two sons prominent in the dental profession in Montreal, Dr. Austen W., D.D.S. '31, and Dr. Howard T., D.D.S. '38, and one daughter, Mrs. R. W. Herzer.

R. M. Macauley

Rupert Malcolm Macauley, 75, who received his B.Sc. degree at McGill in 1907, died in Montreal April 7. He was a native of Lake Megantic, Que.

Until his retirement a few years ago, Mr. Macauley was active in Canadian and American mining interests, most notably with Consolidated Mining and Smelting Co. of Canada, both in British Columbia and at head office in Montreal. For a time he served as general manager of Pamour-Porcupine Mines Ltd.

Mr. Macauley was a life member of the American Institute of Mining and Metallurgical Engineers and the Canadian Institute of Mining and Metallurgy.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

NESBITT, THOMSON
AND COMPANY LIMITED
355 St. James Street West, Montreal

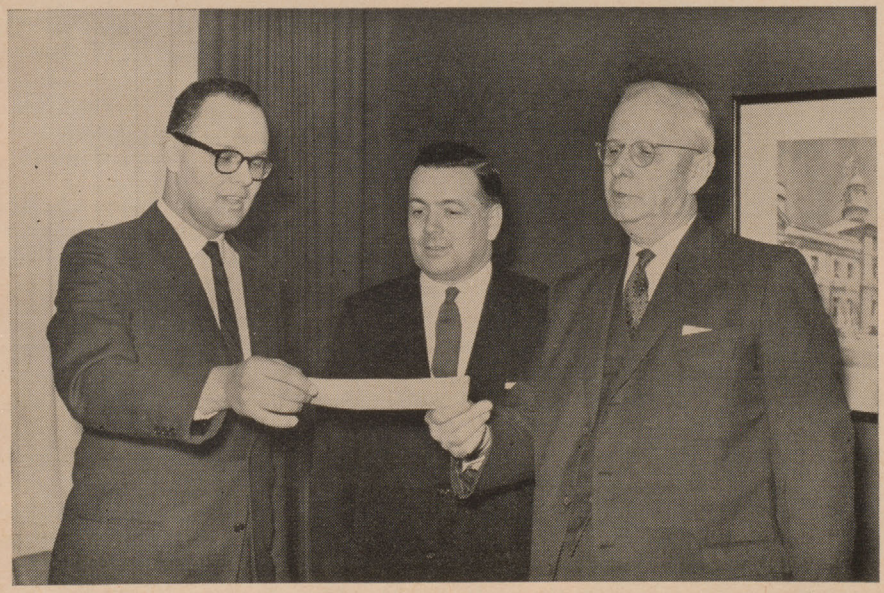

Letters . . .

(*Continued from page 2*)

Not known to me — but they should be! As a parent, as a Canadian, as an interested party, I want to know these people — their ideas — the courses they teach — their concept of education for tomorrow's world! Surely many others feel the same? And wouldn't people, watching the program "because it's there," welcome the opportunity to broaden their interests provided by McGill's extension courses and other offerings to the public? Others would surely learn how best to implement their plans for their children's education, or for contributing effectively themselves to world objectives they care about, through the many-sided agency for ideas that McGill is.

Perhaps I should apologize for my presumption in advancing these ideas, which can scarcely be novel to your group. My excuse is my great interest in the objectives I have mentioned, and in the many auxiliary benefits belonging to such a program. I hope it may be of some value to you just to know that this degree of interest and support exists among parents of students.

Mrs. R. J. Allen

Presentation of a cheque for $7,500, representing the final instalment of a $30,000 gift to McGill University by Carling's Breweries Limited took place early this year. Pierre Jasmin, B.C.L. '58, left, acting on behalf of Carling's, hands the cheque to C.T. Medlar, assistant treasurer, The McGill Fund, right. Looking on, centre, is John E. Heeney, eastern region sales manager for Carling's.

The Principal's Page . . .

(*Continued from page 5*)

officially opened. Bohr's praise is not offered lightly, and his description of Dr. Bell as "one of the foremost physicists in his generation" indicates that the great work of the Radiation Laboratories, developed by Professor Foster, will continue into a splendid second chapter.

Macdonald College

One more example may indicate a slightly different form of growth. At Macdonald College during its first half century outstanding work has been done in the separate departments of Animal Husbandry, Animal Pathology, Nutrition and Poultry Husbandry. The research of Professor Crampton has won wide renown, and many generations of students will remember the names and personalities of Barton, Conklin, Maw, and Ness — to cite but a few from the galaxy of teachers who were once members of these departments. Changing patterns of scientific thought, and the steadily growing body of knowledge, have weakened the divisions that once existed between these various fields. The overlap and interpenetration is such today that the Senate, after careful consideration, decided to combine all four fields into a single Department of Animal Science, and Dr. Ernest Mercier has been appointed as the first Chairman of the new Department. A graduate of Laval, and of Cornell, Dr. Mercier has demonstrated in his work as Superintendent of the Experimental Farm at Lennoxville his understanding of the agricultural problems of that region and his vigorous enthusiasm for research. He has also demonstrated his powers of leadership and his judgment of men, so that the new department should add to the laurels that each of its four predecessors has won.

The list could be extended, but each reader can pick out other names in his own field of interest. Familiar memories of the past cluster around those who have inherited the responsibility for forging the future. Growth involves change, but the change is an organic process rooted in the past. All our yesterdays, and the men who made them memorable, are still a part of McGill as we march confidently toward tomorrow. Familiar memories blend with new faces.

MEDICINE AT McGILL

The doorway of the Strathcona Medical Building, as seen from a window of Martlet House, headquarters of the Graduates' Society.

A Doorway to the Future,

to medicine's shining future, which the hard work and the vision, the day-to-day routine and the groping imagination of many men in many places will one day win. A future in which the neoplastic and degenerative diseases, even the congenital diseases, will give ground to medicine's advance as infectious diseases have given ground already; in which mental and emotional health will match physical well-being; and in which man will go armoured and secure through the terrors of the outer void, if only he can learn what medicine alone will never teach — how to furnish his inner vacuity. Even that central problem may yield a little to a solution which is characteristic of medicine, to a combination of intellectual endeavour and a high ideal of service...

There are other doorways, many others, but this is one. It is one through which glimpses of that resplendent future are plain to see.

A Doorway to the Present,

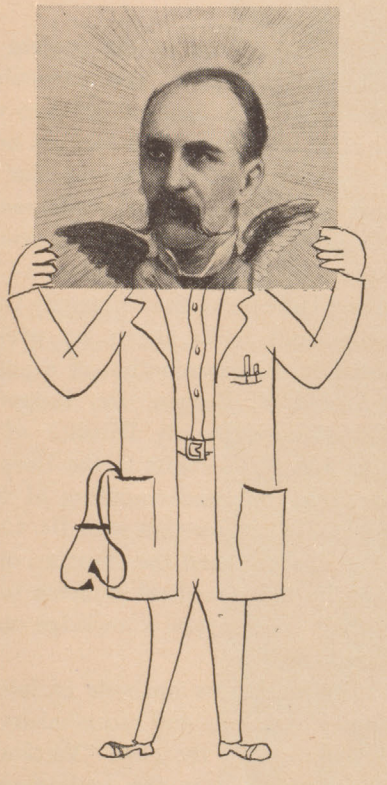

to medicine's already glorious achievement, and to the realization, often sad and sometimes invigorating, of how much remains to be done. A doorway to work and worry and accomplishment, a doorway to intellectual stimulus and moral challenge.

A Doorway to the Past,

to a sense of history, to an appreciation of the continuity of mankind's age-long effort, to a sharing of great tradition and splendid dedication.

There are other doorways, many others, but this is one. It is one through which great doctors and good doctors, run-of-the-mill doctors too, have passed on their way for more than one hundred and thirty years, their heads buzzing with projects, their hands brimming with work. McGill has never made a good doctor from a poor specimen of a man, and never will; but so long as good men continue to enter through this doorway, good doctors will continue to come out of it, to a world that needs them all.

OSLER *and* MODERN McGILL

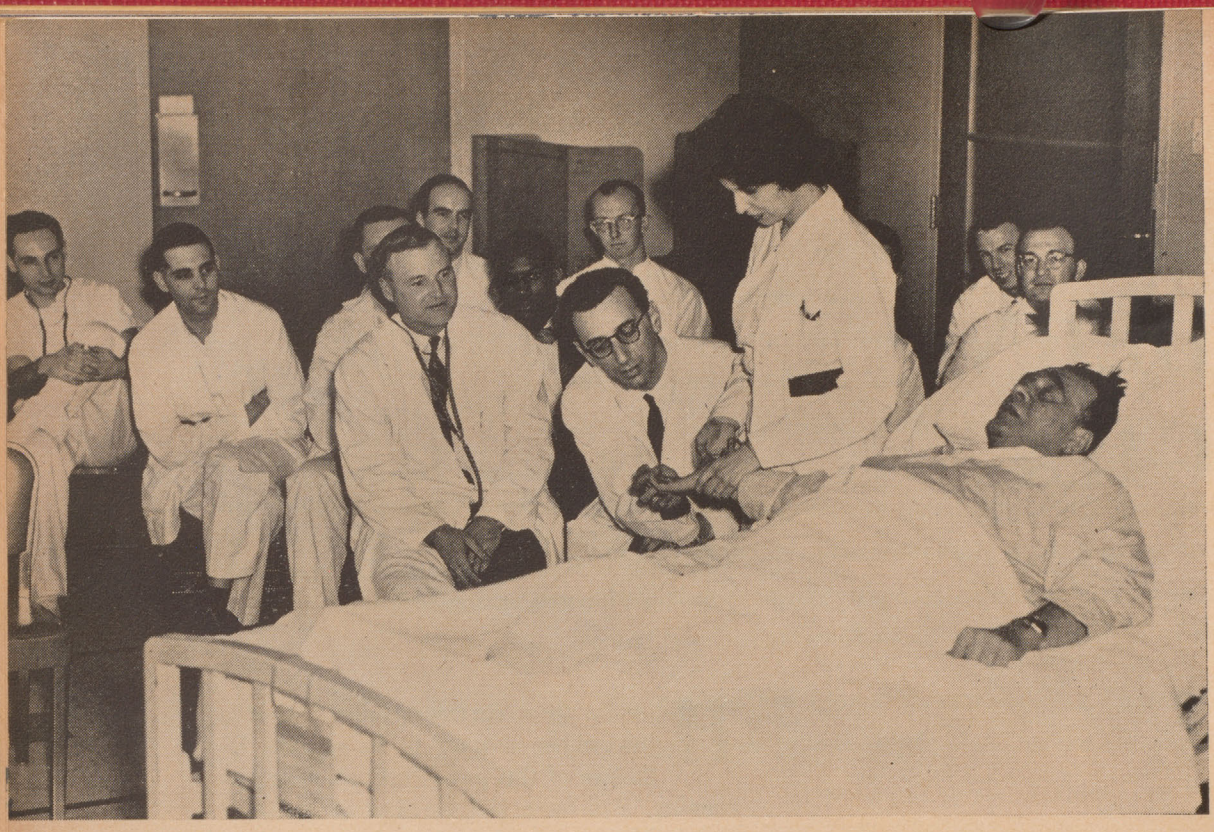

"There was a most engaging lightness and aliveness about him," wrote one of Osler's McGill students. His very walk was "light-hearted, spring-heeled."

He walks these corridors today, for it is impossible to trace to its end the influence of this gay, open, winning personality. But there is little sign of an Osler Cult in Montreal; and the Osler Library, which he bequeathed to his Alma Mater, is less a Shrine than a common room for book-lovers, a growing collection of seminal works both old and new, used as he used them himself, for the knowledge, wisdom and virtue that is in them.

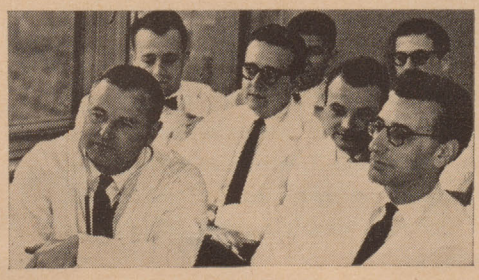

Osler, the great clinician, was a dedicated student of pathology; he had small patience with the physician "who without physiology and chemistry flounders along in an aimless fashion, never able to gain any accurate conception of disease, practising a sort of pop-gun pharmacy, hitting now the malady and again the patient." Physiology, chemistry, pathology — all three were given fresh impetus at McGill by the man who was always at his best as a clinical teacher. It is in the mixture and integration of the basic medical sciences and the clinical disciplines that the spirit of Osler most cogently persists, in spite of all the enormous broadening of knowledge and all the many shifts of emphasis.

As an echoing, noble theme, a reverberation of mind and personality, Osler is even yet at McGill, where as student and teacher he spent so many happy years. That engaging lightness and aliveness have never vanished.

INTEGRATION in the new Curriculum

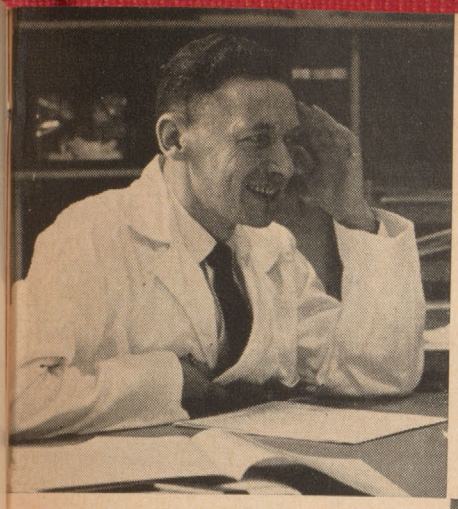

To tie together in the mind of the student the many divisions of medicine, and particularly to associate each of the basic medical sciences with the work of the clinic, all sorts of devices are being tried. Pictured above is one of the most popular and effective of these, a combined clinical conference at the Montreal General Hospital. In the foreground, Professor Douglas G. Cameron, Physician-in-Chief of the Hospital and Director of the University Clinic (left, with stethescope) looks alertly on while a student is assisted in the examination of a patient by Professor Arnold V. Burgen. Dr. Burgen is Professor of Physiology, Deputy Director of the University Clinic and Physiologist to the Hospital. He brings physiology, the understanding of function, to the bedside. In conjunction with Dr. Cameron, Professor of Medicine and the clinician of the conference team, he helps medical students to see the bearing of their fundamental knowledge on the cases before them.

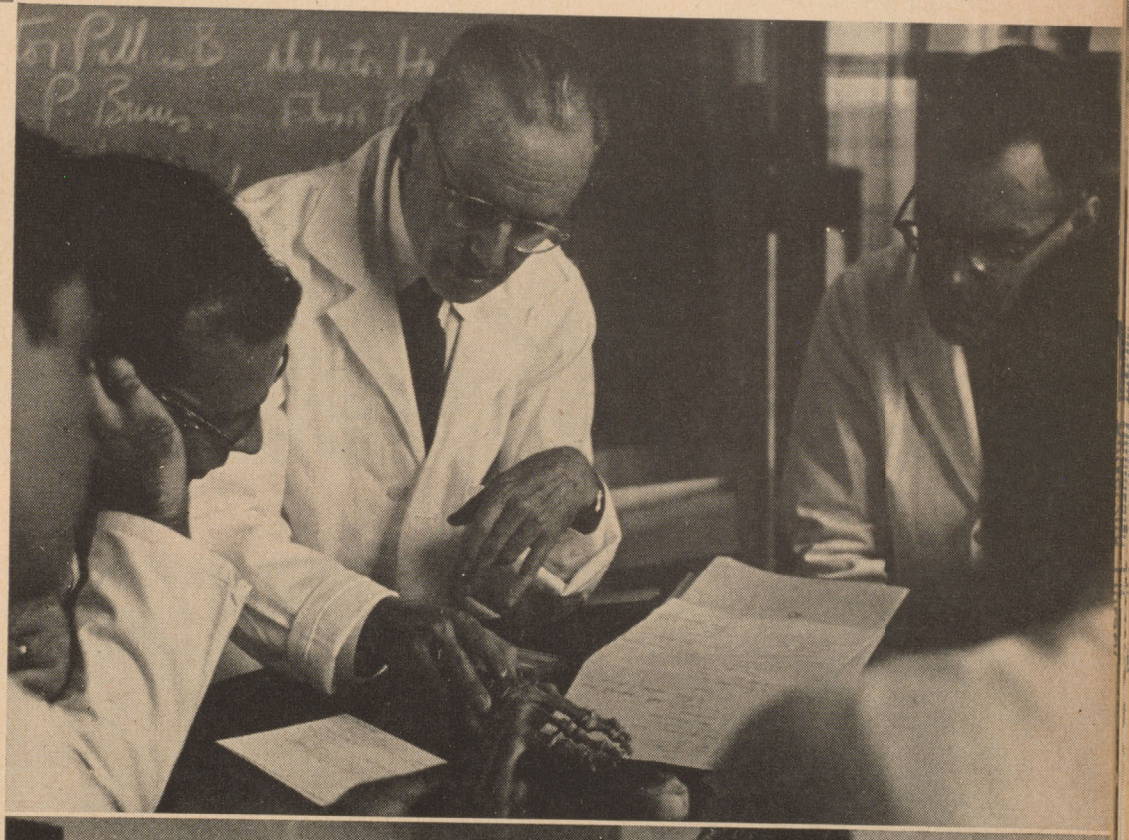

At basic science level, new methods of integration are evolving. Physiology and biochemistry are more firmly linked than in the past. "Vertical integration" is seen not only in the conferences at the General but in many other new developments. For example, a new second-year course on the Central Nervous System moves from gross anatomy through neuroanatomy and neurophysiology (with a concomitant "Introduction to Neurology" at the M.N.I.) to conclude in the third trimester with the teaching of psychology by Professor Donald Hebb.

Surrounded by numbers is one whose talents cannot be numbered. Professor David L. Thomson, Dean of the Faculty of Graduate Studies and Research, and Vice-Principal of the University, is a popular and effective lecturer on Biochemistry.

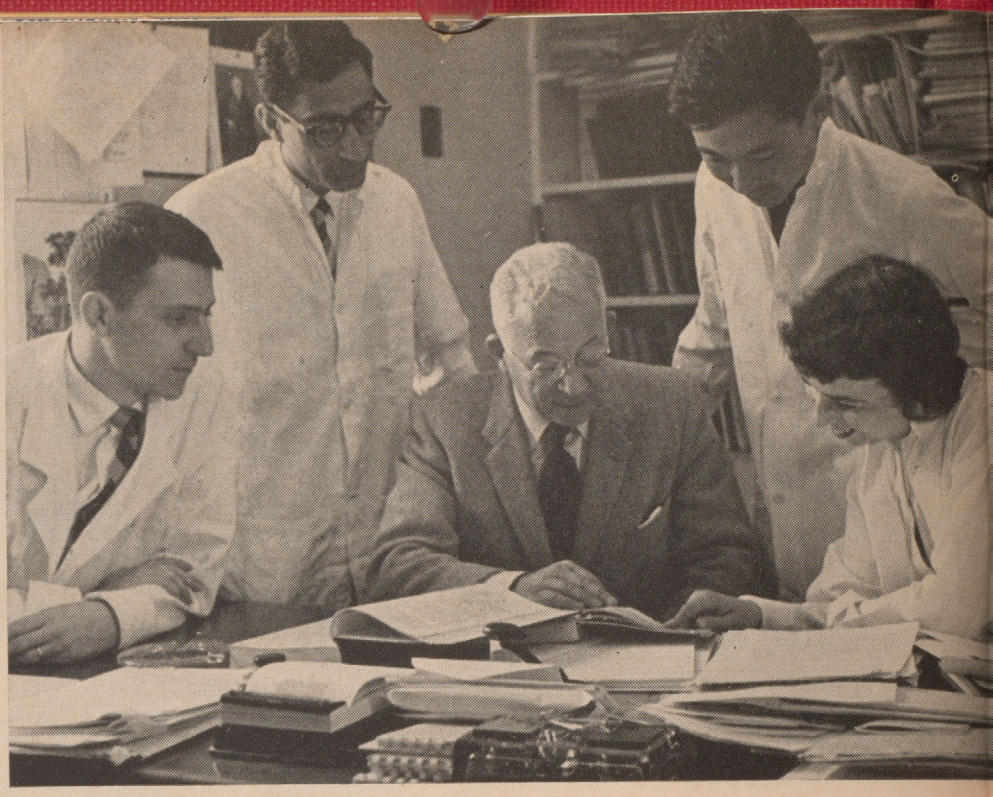

cceeded in inspiring an interest irror. Here a group of students

nder the watchful eye of Dr. ictoria Hospital, a student learns naesthetic.

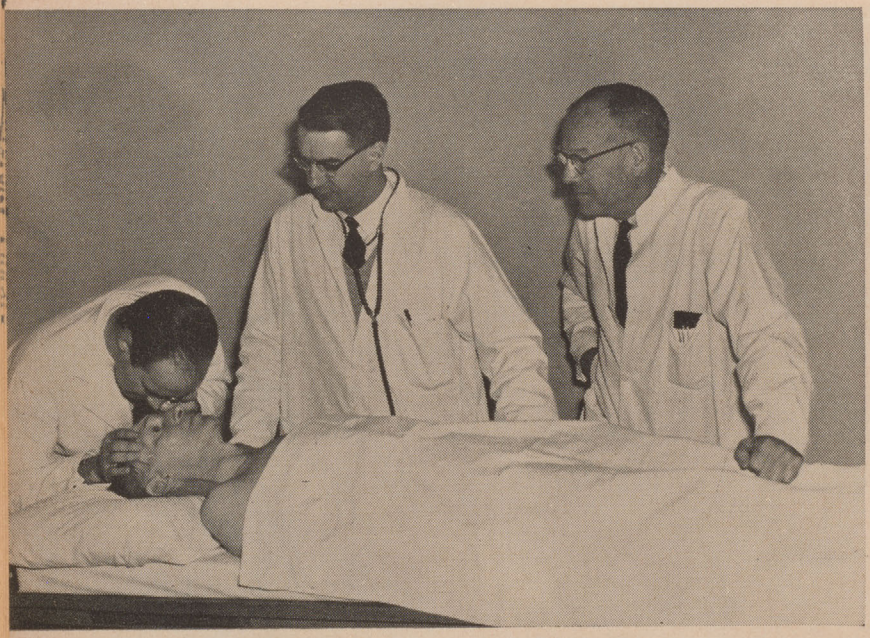

4. Back at the bedside. Professor Donald R. Webster, Surgeon-in-Chief of the Royal Victoria Hospital, with a group of students.

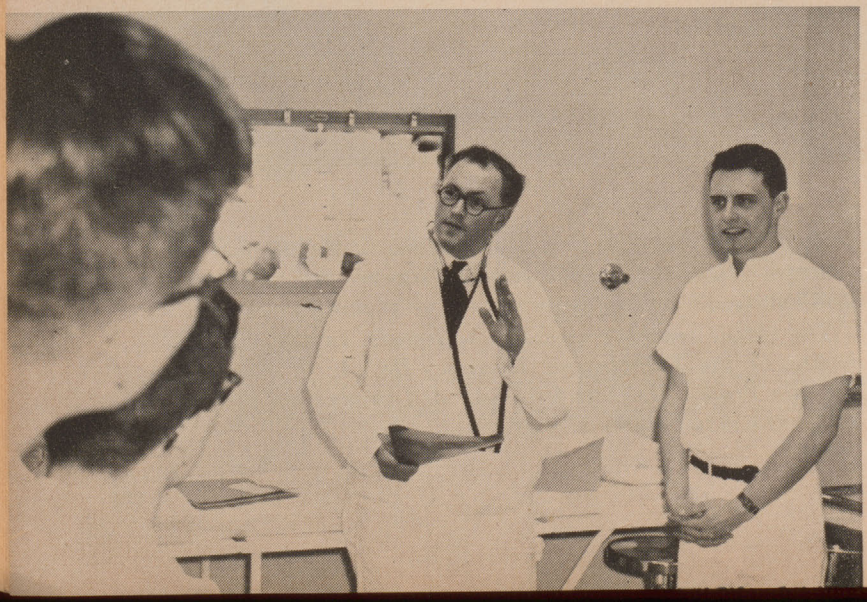

5. The classic teaching method, the lecture. In the amphitheatre of the Pathological Institute, Dr. A. C. Ritchie, Miranda Fraser Associate Professor of Comparative Pathology, lectures to the second year class.

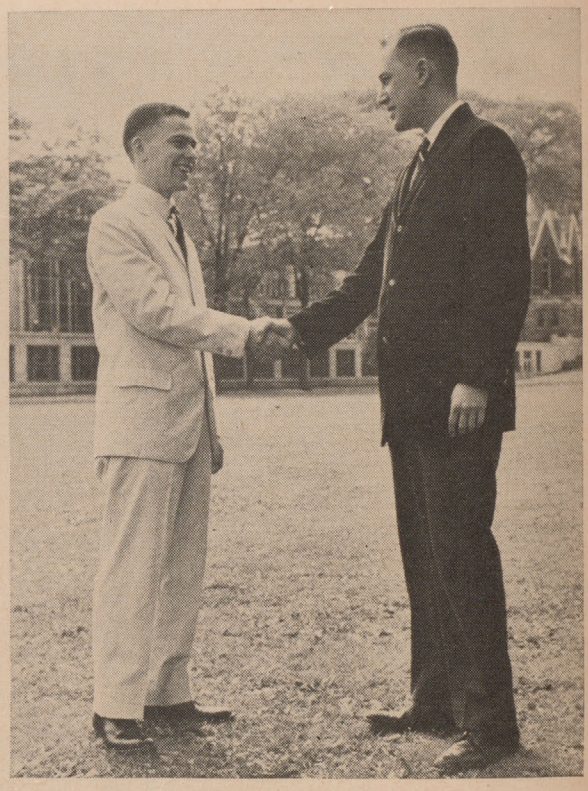

TALKING IT OVER

Another distinguished biochemist, Professor J. H. Quastel, Director of the McGill-Montreal General Hospital Research Institute, discusses a research project with staff and students. At the left is the Assistant Director of the Institute, Dr. Peter Scholefield.

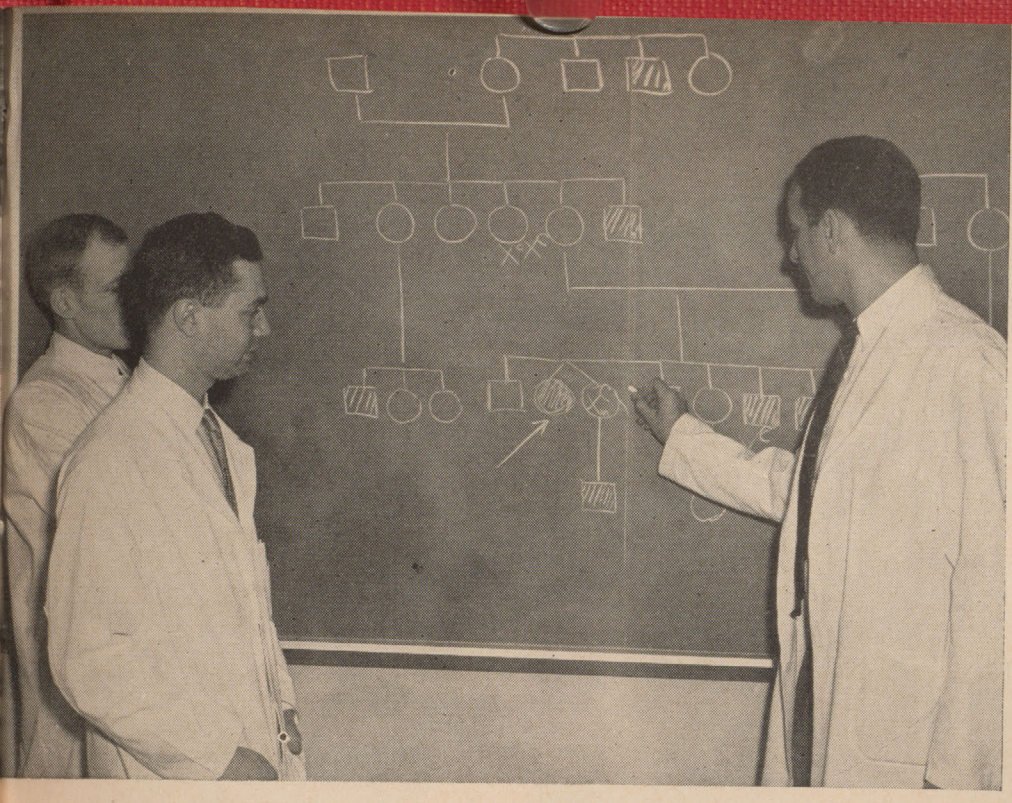

Above: Dr. Bryce K. A. Weir, first in the Class of 1960 and winner of the Wood Gold Medal, exchanges congratulations with Mr. Stuart Smith, Med. 62, his successor as President of the Student Executive Council, the highest post in the student government in the University. Both are from Montreal.

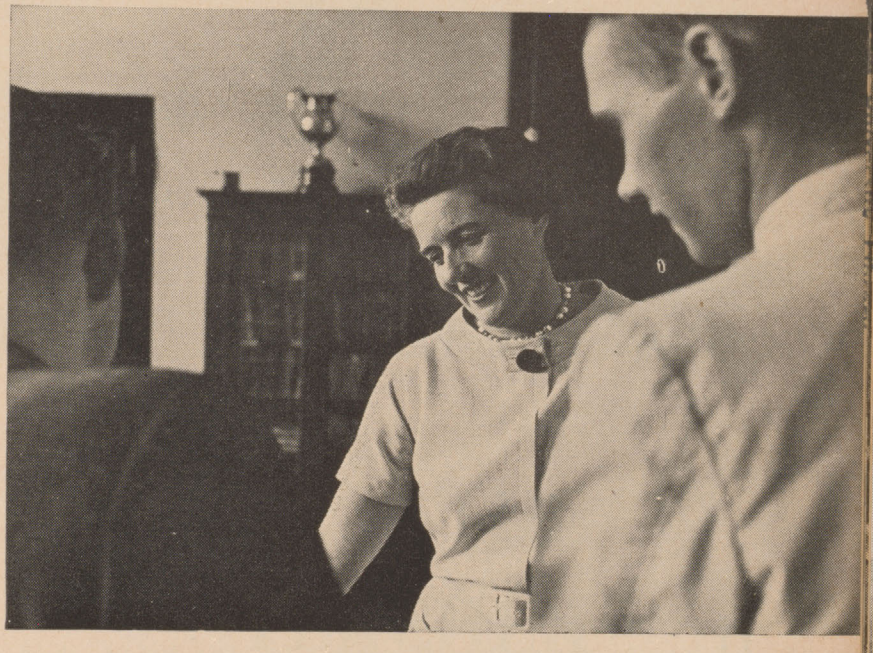

Left, above: Dr. Gordon A. Copping, Associate Professor of Medicine, instructs students in the use of the ophthalmoscope in the Outpatient Department of the Montreal General Hospital.

Left, below: Dr. David V. Bates, Associate Professor of Medicine, discusses a case with students at the Royal Victoria Hospital.

TALKING IT OVER

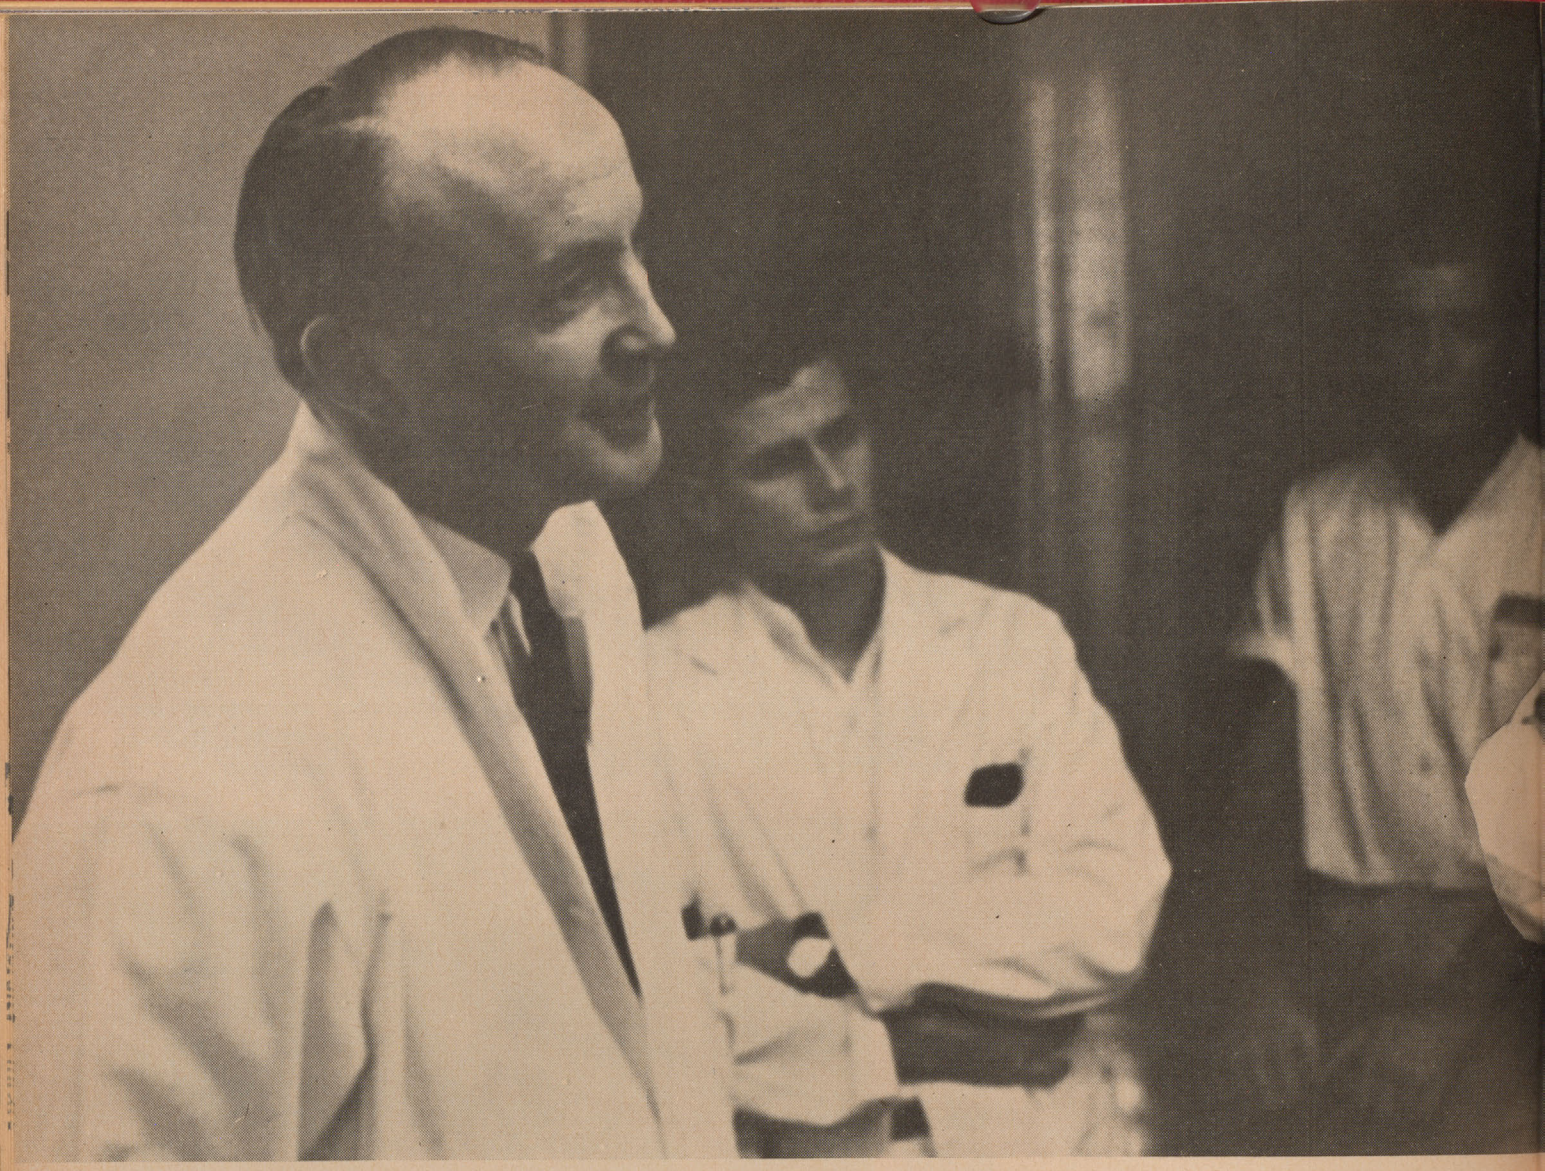

Dr. F. Clarke Fraser, Professor of Genetics, gives a chalk talk to students during a session of Genetic Counselling at the Montreal Children's Hospital.

Students discuss their problems with Miss Merle Peden, Assistant Secretary of the Faculty of Medicine, in the General Office.

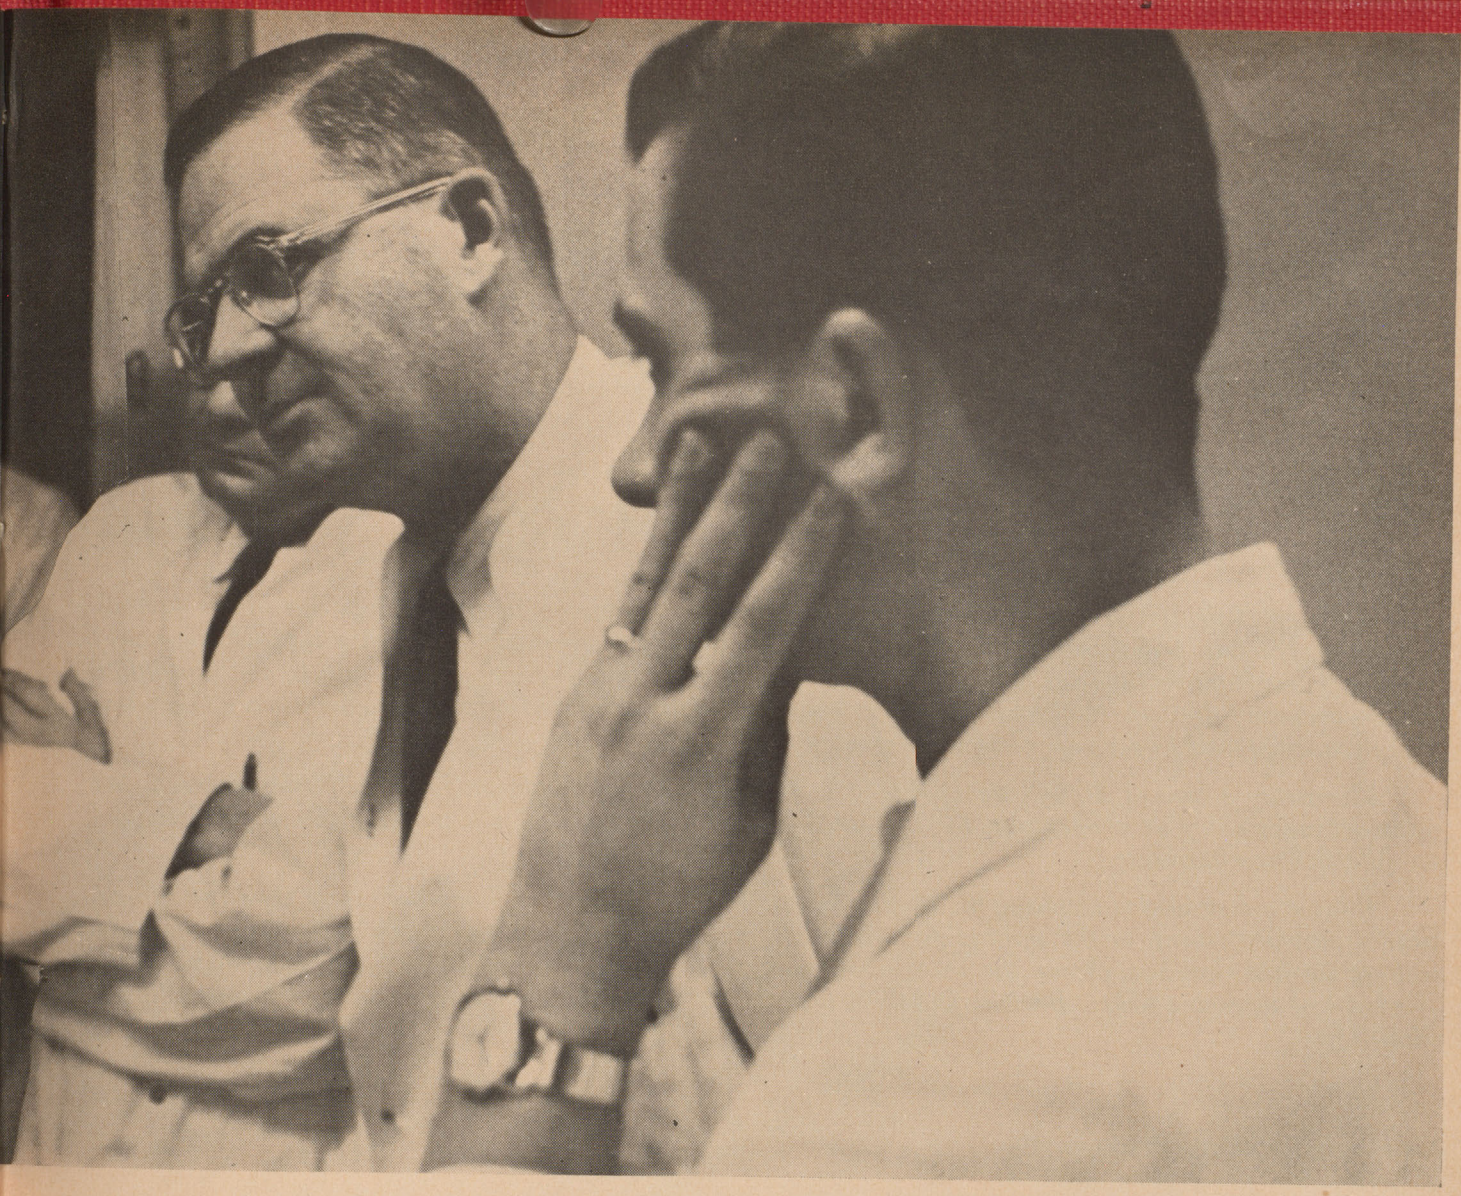

A little hustle helps. Not stopping to talk it over, this young man is moving fast. The scene is the Emergency Ambulance Entrance, Royal Victoria Hospital.

HERE is a glimpse of that sharing of interest, that meeting of minds, which marks the best teaching. An intent group is caught by the camera in animated discussion of a problem in surgery. On the left is Dr. H. Rocke Robertson, Professor of Surgery, Chairman of the Department, Surgeon-in-Chief of the Montreal General Hospital and Director of its University Surgical Clinic. Facing him, on the right, is Dr. Fraser N. Gurd, Associate Professor of Surgery, and Senior Surgeon in the Hospital. Partly hidden behind Dr. Gurd is Dr. Donald W. Ruddick, Lecturer in Surgery. At the far right, hand to cheek, is a member of the house staff of the Montreal General, Dr. William Pochereva. In the centre of the group are two medical students, Peter Hayden, left, of Ste. Anne de Bellevue, Quebec, and Thomas C. Hall, of Traverse City, Michigan.

Dr. Robertson and Dr. Gurd are full-time members of the surgical staff. Dr. Ruddick, who conducts a busy surgical practice in Montreal, is a part-time teacher and is also taking part in a research project.

What are they talking about? Whatever it is, it is occupying the full attention of the group. Only in the burning glass of first-rate teaching is interest fully engaged and focussed. Only in this way is professional ardour ignited, to burn for years, so that active learning proceeds when "school is out". The best atmosphere for learning to learn, in the clinical disciplines, is a great teaching institute or hospital, where undergraduate and graduate work, service and research, go on from day to day together.

THE TEACHER AND THE TEAM

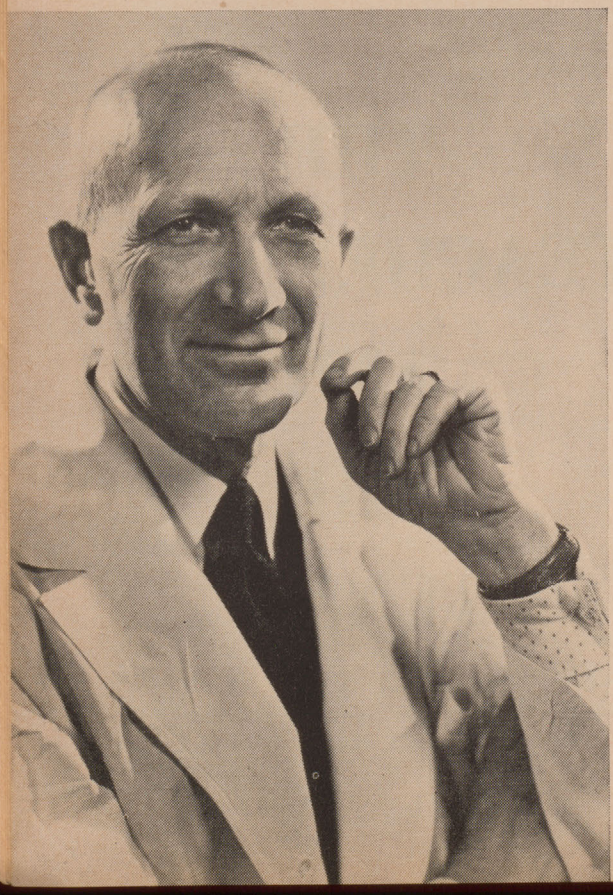

On Choosing a Medical School

By Wilder Penfield

I came to McGill, Dr. Wilder Penfield wrote recently to the Dean, *not because it was one of her famous sons, Sir William Osler, who first introduced bedside teaching and laboratory science through the newly founded Johns Hopkins Medical School. No, I came to this great city of cosmopolitan culture and hospitable citizens because I saw here the best balanced opportunity for practical and scientific medical work. That was thirty years ago, and I have never known a day of regret.*

The same is true of McGill today. There is still the excellent balance between basic research and practical medicine. For undergraduates it is much improved because of the modernized curriculum and the splendid new hospitals.

But for a man who is choosing his medical school there is something more important than the reputation of past professors, or the shining equipment of new laboratories, or the many patients who may be waiting for him. Let him choose the school where he can meet vigorous young teachers who stand in the forefront of medicine today. He will find them here now. If I had to choose over again, I would still put McGill first.

Karsh

At the annual meeting of the Montreal Neurological Institute, May 1960, Wilder Graves Penfield, O.M., C.M.G., Litt.B., M.A., M.D., D.Sc., D.C.L., LL.D., F.R.C.S. (Eng.), F.R.C.S. (C.), F.R.S.C., F.R.S., co-founder of the Institute, announced his retirement as Director and as Chairman of the Department of Neurology and Neurosurgery.

BUILDINGS

Service to the Sick and the Teaching of Medicine

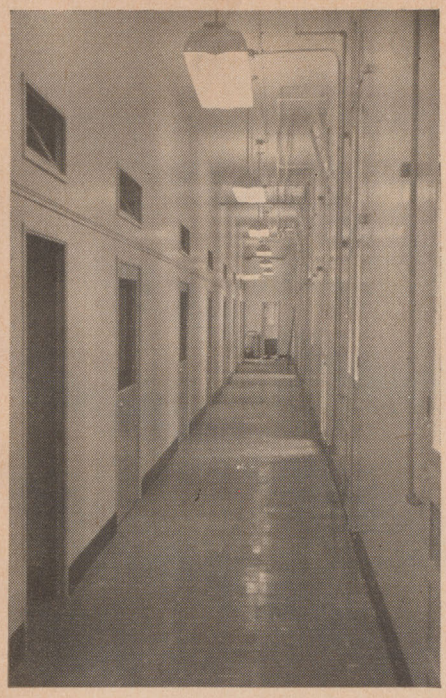

George Pickett

Photographed from the Cedar Avenue level (sixth floor) and looking up toward its summit at the twentieth, the Montreal General Hospital is the largest building associated with McGill to be constructed in recent years. Founded in 1821 on Dorchester Street West, it has brought to its new site on Mount Royal, as an incription in the lobby declares, "its precious heritage, service to the sick and the teaching of medicine". It was in 1823 that medical instruction began in the wards of the old General, and the school which was known as the Montreal Medical Institution was "engrafted" to McGill five years later to form the Faculty of Medicine.

Two floors have been added to one of the wings in recent months and were occupied in April and May, 1960. Both are devoted to research, one for Medicine, the other for Surgery. They

Unmatched Facilities for Patient Care, Research, Teaching

New Surgical Research Laboratories, Royal Victoria Hospital.

are superbly equipped and have magnificent sound-proofed and air-conditioned animal quarters, which are shared by the two departments.

A few blocks east along Pine Avenue, and directly opposite the Strathcona Medical Building, is a constellation of hospital units, including the Montreal Maternity Hospital or Women's Pavilion and the Allan Memorial Institute of Psychiatry, which are administratively one and are known as the Royal Victoria Hospital. Closely connected with these are McGill's Pathological Institute and Montreal Neurological Institute. The core of the R.V.H., a great general hospital, was erected by Lord Strathcona and Lord Mountstephen in 1893. Like the Montreal General, the "Vic" has been a teaching hospital from the very beginning.

Since the Second World War two new wings have been constructed, the first for Surgery and the second, opened in October, 1959, for Medicine. This splendid new Medical Wing, its ten floors carefully designed for patient care, research and teaching, has unmatched facilities for all three.

The third teaching hospital, the Montreal Children's Hospital, having sold its old building on Cedar Avenue, moved to the Western Division of the Montreal General on Tupper Street, where a new and completely modern hospital had been built, adjoining the reconstructed Western. So thoroughly was the job done that it is hard to tell at what point in any of the corridors one passes from new to old.

Since the last World War, therefore, all, or nearly all, of the McGill hospitals have acquired superior new facilities. Most of this building has taken place in the last five to ten years. The Royal Edward Laurentian Hospital, for tuberculosis and diseases of the chest, situated a few blocks east of the Royal Victoria, also has a fine modern building. In addition to the hospitals already named, McGill students have available to them the resources of the Alexandria Hospital, where infectious diseases are studied, and the services of the Queen Mary Veterans' Hospital staffed by McGill appointees.

McIntyre Hall

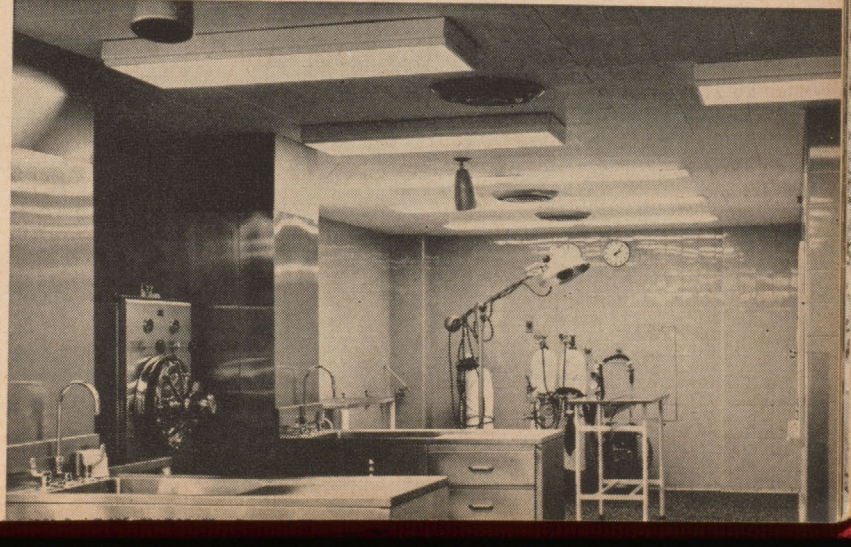

The Strathcona Medical Building, with its spacious corridors and tremendous stair wells, houses the Department of Investigative Medicine and the Department of Anatomy and will continue to do so. The anatomical dissecting room, one of the finest on the continent, is probably the only tile-lined room of its kind in which noise is not a problem, for its lofty studio ceiling gives it remarkable acoustic properties. The Medical and Osler Libraries, also located in this building, have insufficient room for their growing collections and they, together with the administrative offices, are to be moved to new locations in the projected medical sciences centre, to be known as McIntyre Hall.

This new building will be situated on Pine Avenue, about midway between the Royal Victoria and the Montreal General, on a 12-acre tract called McIntyre Park, extending down the slope of Mount Royal toward the McGregor throughway. It will open on "hospital level" at the top and on "campus level" at the bottom. Its chief purpose will be to provide more and better space for the Departments of Physiology, Biochemistry, Pharmacology and Research Anaesthesia (now housed in the Biology Building) together with an Aviation Medicine Laboratory and research units of Otolaryngology, Ophthalmology and Dermatology. This happy vision has now taken shape on the architects' drawing boards. According to Plan 10, which may yet undergo further revision, it will be a double corridor building of twelve stories and a penthouse, with a semi-detached wing containing three amphitheatres.

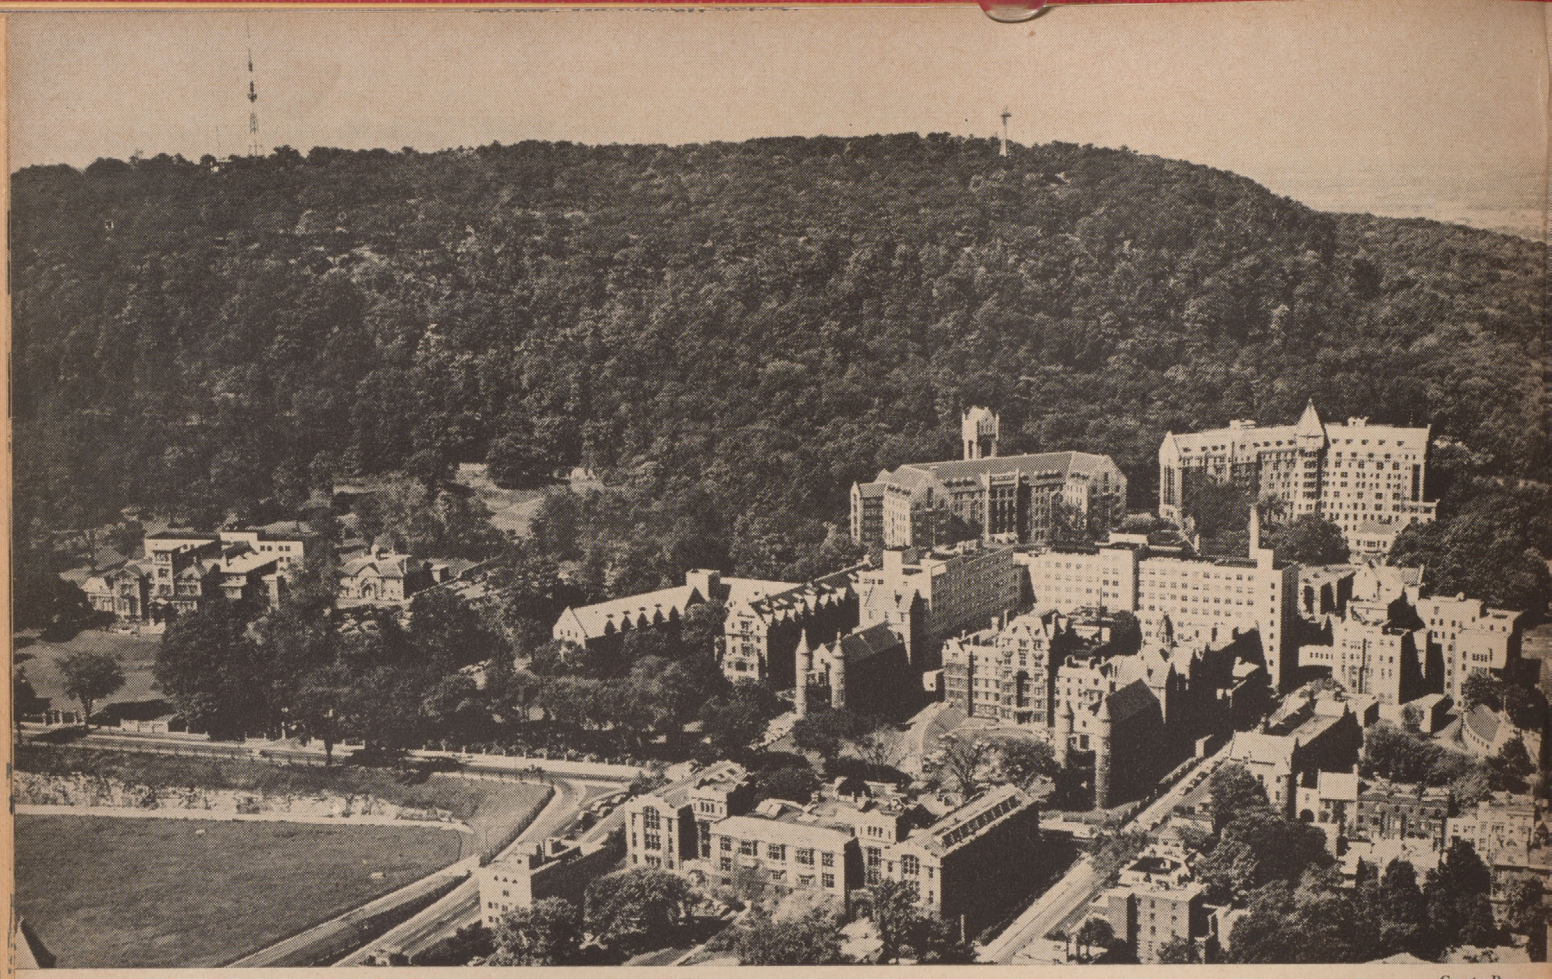

With the opening of the New Medical Wing at the Royal Victoria, rearrangement and re-construction of some of the older parts of the Hospital became necessary. At the top of the page, left, is a view of the new Surgical Research Laboratories, just completed on the third floor. The new Surgical Laboratories of the Montreal General, part of a new floor recently constructed, are shown on the opposite page. All three teaching hospitals take part in the work of the Experimental Surgical Laboratories in the Donner Building on the campus, adjoining the Strathcona Medical Building.

Viewed from the air, the Montreal General looms against the backdrop of Mount Royal.

The Montreal General Hospital

Seen at right is the research operating room of the new Surgical Research Laboratories. Both the University Surgical Clinic and the University Medical Clinic have been provided with new space and new facilities in 1960.

CONFERENCE ROOM, *New Medical Wing, R.V.H., wired for sound so that heart sounds, normal and abnormal, may be heard throughout the room. In addition to blackboards, there are lighted view boxes for X-ray films and a projection screen. Similar rooms have been provided in the other teaching hospitals for instruction in cardiology.*

D. V. Bates

John Ilitch

TEACHING ROOM, *of the kind provided on every floor of the New Medical Wing, R.V.H. This gives privacy to the patient and the clinic group, freedom from the noise of ward traffic to those who are learning the use of the stethescope, and a serene atmosphere for discussion. Here a Teaching Fellow carries on the great tradition of bedside teaching.*

METABOLIC DAY CENTRE, *patients' lounge, New Medical Wing, R.V.H. In this Centre patients with such metabolic diseases as diabetes are investigated, taught and treated, without the necessity of being admitted to hospital for bed occupancy. Students may share in the "team" study of these ambulatory patients, with house staff, dietitians and others, under the direction of Dr. John C. Beck, Associate Professor of Medicine.*

Allan Memorial Institute

A Doorway to Understanding. The Allan Memorial Institute of Psychiatry, housed in the hilltop mansion of Ravenscrag, with a large new clinical wing attached, is the centre of a great eclectic Department of Psychiatry, teaching in eight institutions of various kinds and carrying on a wide range of research — clinical, psychological, physiological, biochemical, social and cultural. It is one of the most comprehensive departments of its kind in North America. Its Diploma Course in Psychiatry is widely recognized.

Montreal Star, P. Taillefer

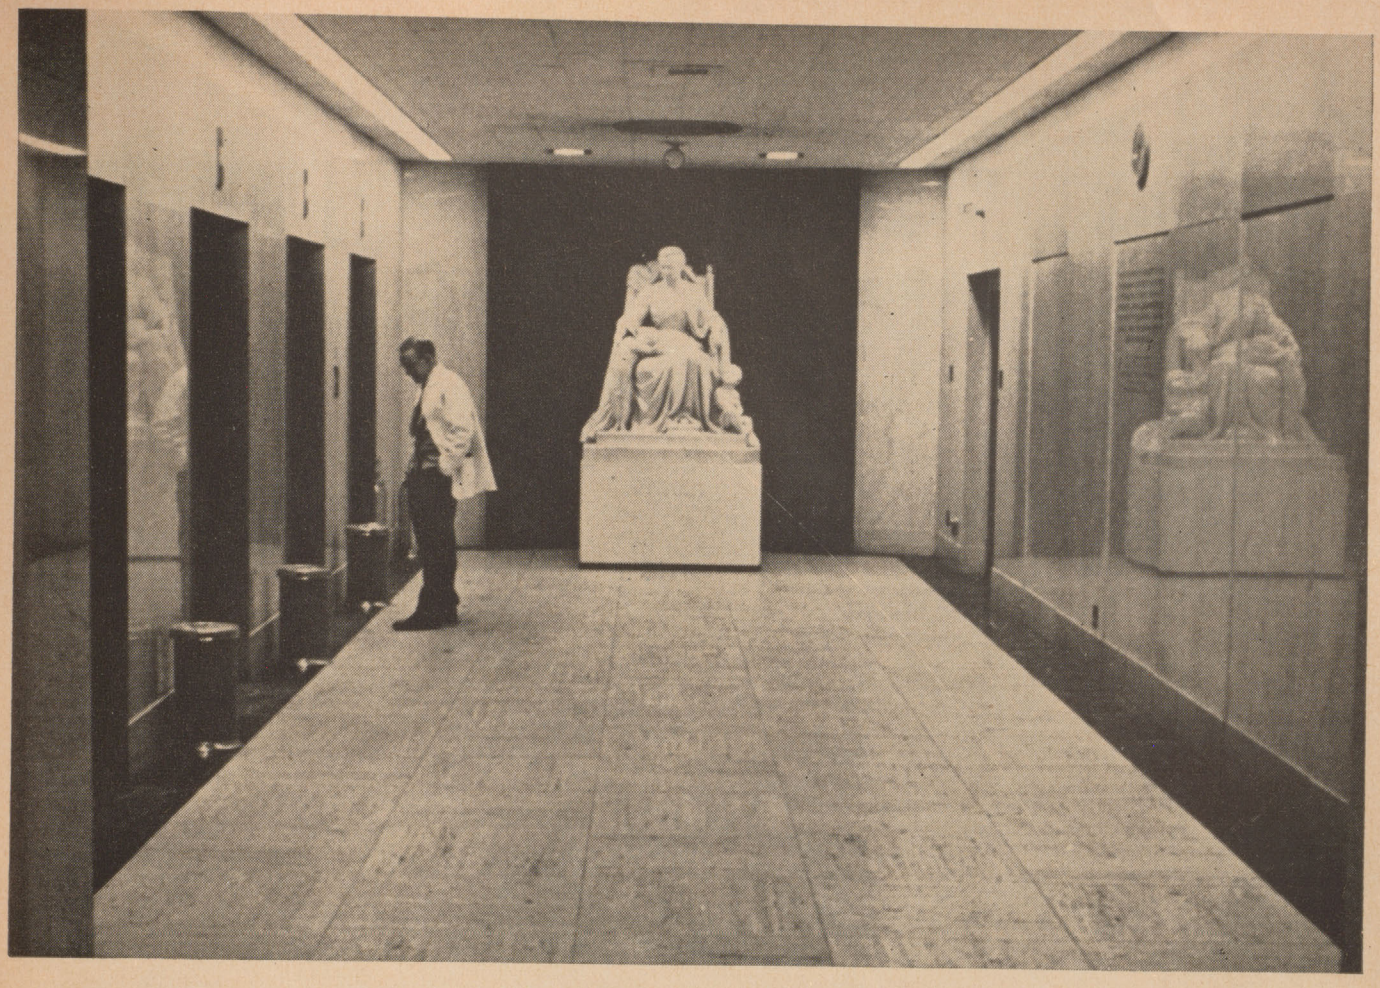

Dr. D. Ewen Cameron, Professor of Psychiatry, Chairman of the Department, Director, Allan Memorial Institute.

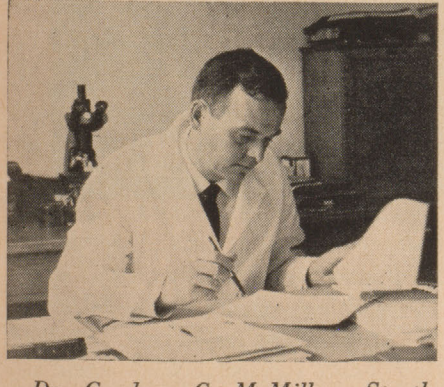

Canada Wide

A scene in the Psychology Laboratory at the Allan Memorial Institute. The Hardy-Wolff Thermal Stimulator, which is designed to assist in the determination of an individual's sensitivity to pain, is used exclusively for research. Dr. T. J. Boag, who watches the patient's reactions, was an interne when this photograph was taken. He is now assistant to the Director of the Institute. Dr. R. B. Malmo is Director of the Laboratory.

Caught by the eye of Queen Victoria herself, as well as by the eye of the camera, "Friday" Lane waits unconcernedly for an elevator in the New Surgical Wing of the R.V.H. Mr. Lane, whose home is in Marietta, Ohio, has just been elected President of the Medical Undergraduate Society. This photograph was taken by another medical student, Mr. George Pickett, of Morgantown, West Virginia.

Dr. Gardner C. McMillan, Strathcona Professor of Pathology and Chairman of the Department.

Pathological Institute

The McGill Pathological Institute, one of the finest of the University's buildings, has undergone extensive alteration within doors. A new Virus Laboratory came first, then a new Electron Microscope Laboratory. At the same time the Library of Pathology was re-located, and the teaching area extended and divided, so that in place of one large teaching laboratory there are now eight, specially lighted, ventilated and wired for P.A.

The new curriculum has shifted Pathology from second and third years to first and second, but it finds a place in the clinical years through joint teaching sessions and clinical pathological conferences. Every issue of the *McGill Medical Journal*, published and edited by students, contains a c.p.c. report.

Parasitology has been merged with Bacteriology, Immunology, Virology and Mycology in the second-year Microbiology course.

The Montreal Children's Hospital

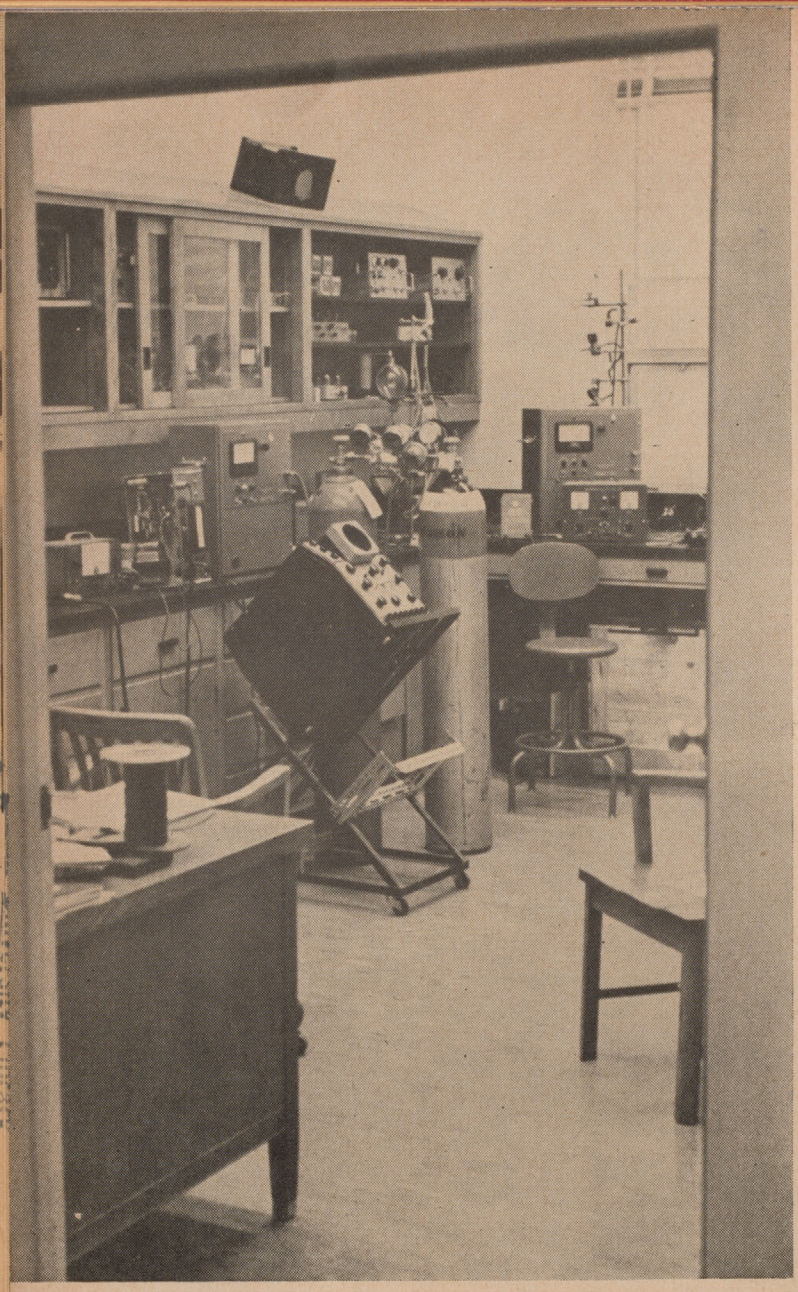

A portion of the large new wing can be seen to the left of the main entrance of the original building, centre.

McGill Men

This is Dr. Frank L. Horsfall, Jr., recently appointed Director of the Sloan-Kettering Institute. Seattle born and McGill educated, Dr. Horsfall, famous bacteriologist, immunologist, virologist, physician and administrator, was formerly Physician-in-Chief for the Hospital of the Rockefeller Institute and Vice-President for Clinical Studies of the Institute itself. His remarkable career in medicine began with the award of the Holmes Gold Medal at McGill in 1932.

In New York alone, some 25 McGill graduates hold the rank of Professor in various universities and medical colleges. Elsewhere in Canada and the United States there is a similar story to be told. At Yale, the Chairs of Physiology, Pathology and Medicine, at the University of Pennsylvania those of Pathology, Medicine and Research Medicine are all occupied by McGill graduates. Saskatchewan's Dean Wendell Macleod, Colorado's Professor Gordon Meiklejohn, Minnesota's Professor Gerald T. Evans, Tufts' Professor Edwin B. Astwood are among the outstanding physicians who hold the McGill degree. Other Professors of Pathology who started at McGill are found at the New York Medical College, Jefferson, Illinois, Wisconsin, Oklahoma, U.C.L.A. and several other universities. Surgeons, neurosurgeons, anaesthetists, obstetricians, paediatricians, radiologists, psychiatrists and neurologists, public health men and medical administrators, anatomists, physiologists, biochemists and pharmacologists, all holding McGill degrees, are faculty members of many Canadian and American universities. The great service of McGill men in every branch of practice is acknowledged all over the continent. Besides those who took their original qualification here, there are thousands for whom McGill provided graduate training in a great variety of basic sciences and clinical specialties. They are known in every Canadian province, in a large region of the U.S.A., and farther afield in remote parts of the Commonwealth and in Europe.

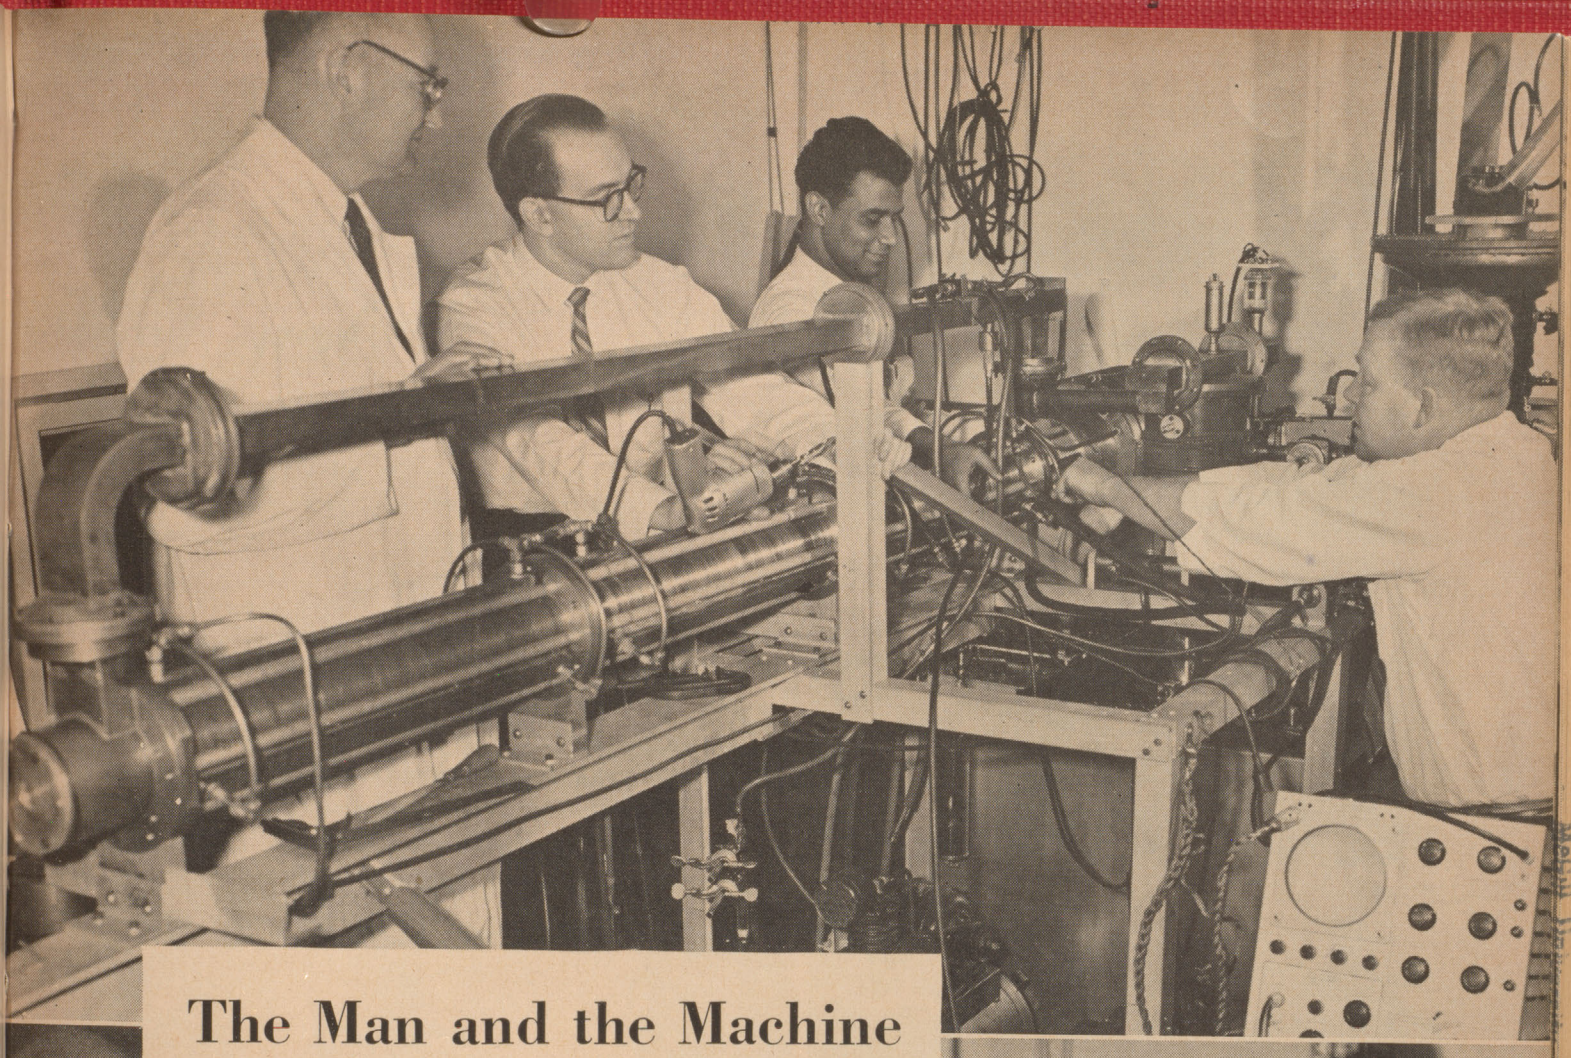

The Tools of a New Age

Here is a Doorway to To-morrow. Actually it leads to the electronic engineers' workshop, Cardiorespiratory Laboratory, Royal Victoria Hospital, but to the eye of the imagination it opens a broad vista on the shape of things to come. Some of the wonderful new machines, recently installed or now being assembled, which will mean so much to medical research at McGill, are shown on these pages. Elsewhere on the campus the new Computing Centre, the Radiation Laboratory and Cyclotron, the Eaton Electronics Laboratory, and other laboratories too, are arming McGill with the tools that a new age demands.

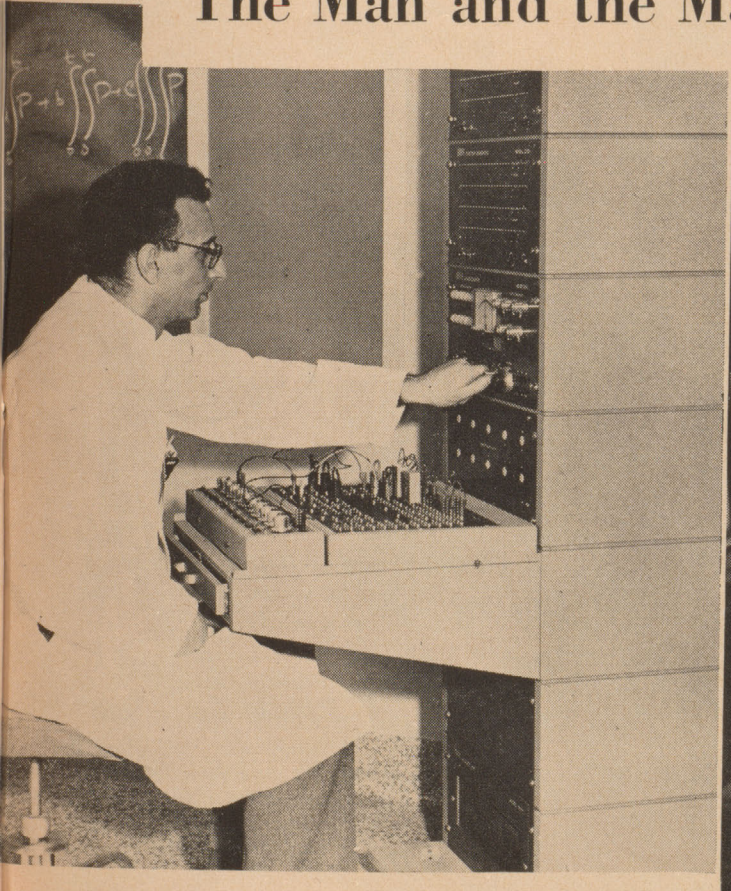

Opposite: Top: This Linear Accelerator, designed at the McGill Radiation Laboratory by Dr. W. M. Telford, is situated in the Radiology Laboratory of the Royal Victoria Hospital and is used to produce high-energy X-Rays for cancer treatment.

Lower Left: Prof. Arnold Burgen, Professor of Physiology and Deputy Director of the University Clinic, Montreal General Hospital, with the analogue computer in the recently opened laboratories of the Clinic.

Lower Right: Dr. Roger W. Reed, Professor of Bacteriology and Chairman of the Department, operates the Lyophilizer in the Pathological Building. The Lyophilizer, or "freezer-dryer" is used to preserve cultures of bacteria so that they will retain all of their normal characteristics for long periods of time.

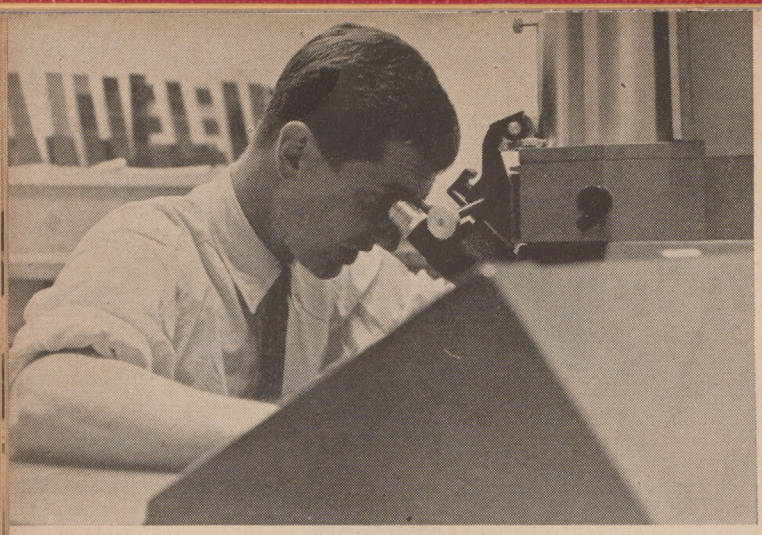

The Man and the Machine

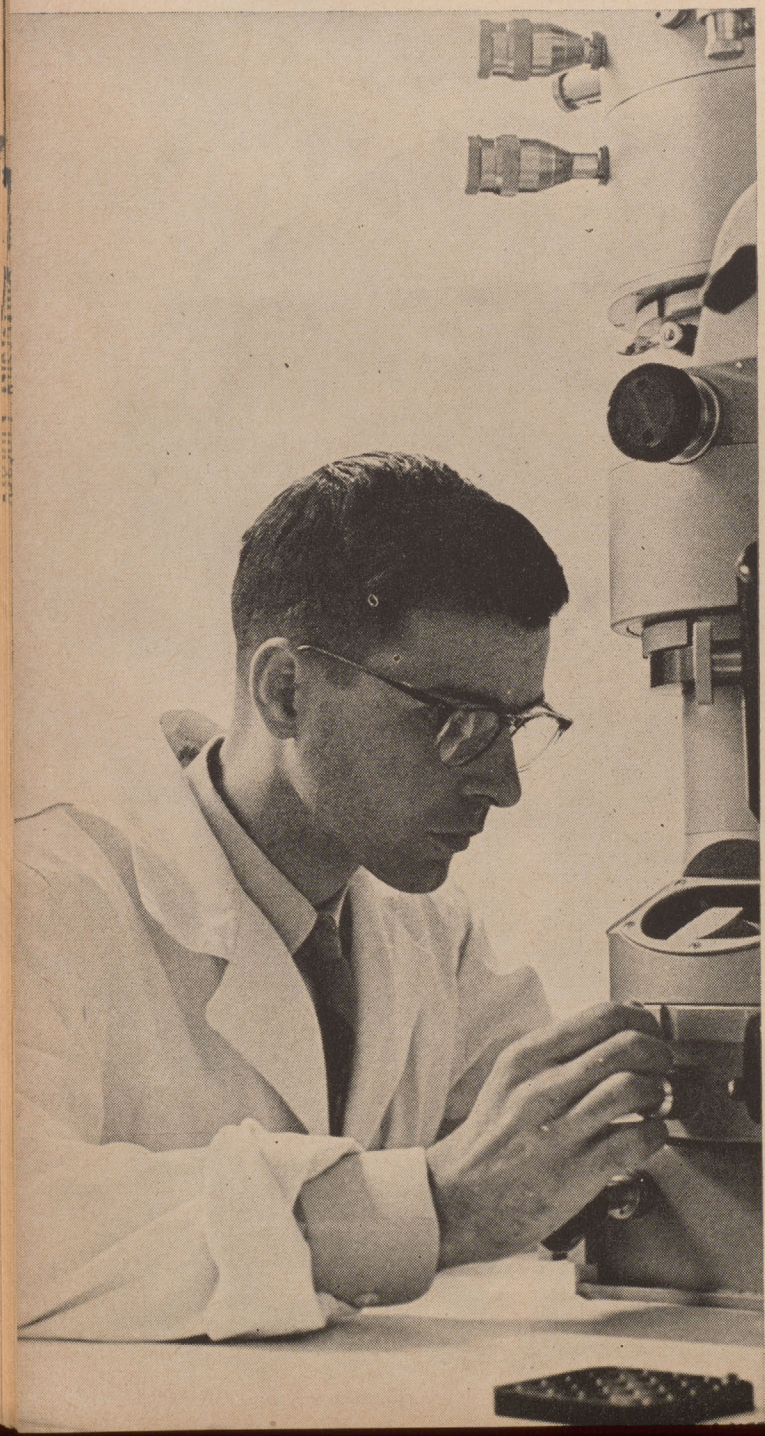

The Tools of a New Age

A. C. Ritchie

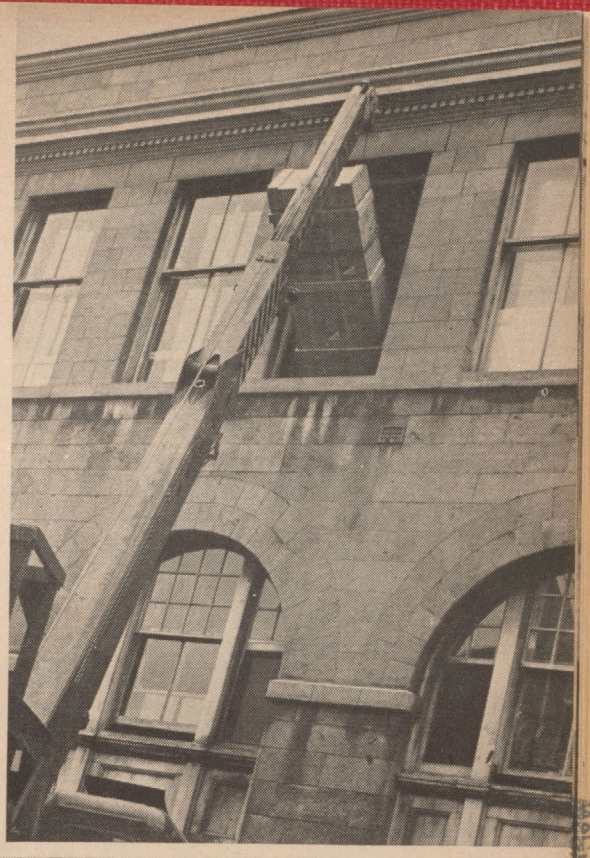

Tony Graham

The tools of a new age can serve great ends, but only in extending the senses, conserving the time and widening the effective range of effort of competent scientists. The electron microscopist, who is bound to the electron microscope, is enormously more important than his machine. The mind of man remains the most precious commodity.

Top Left: Dr. Huntington Sheldon works at the electron microscope in his new laboratory in the Pathological Institute.

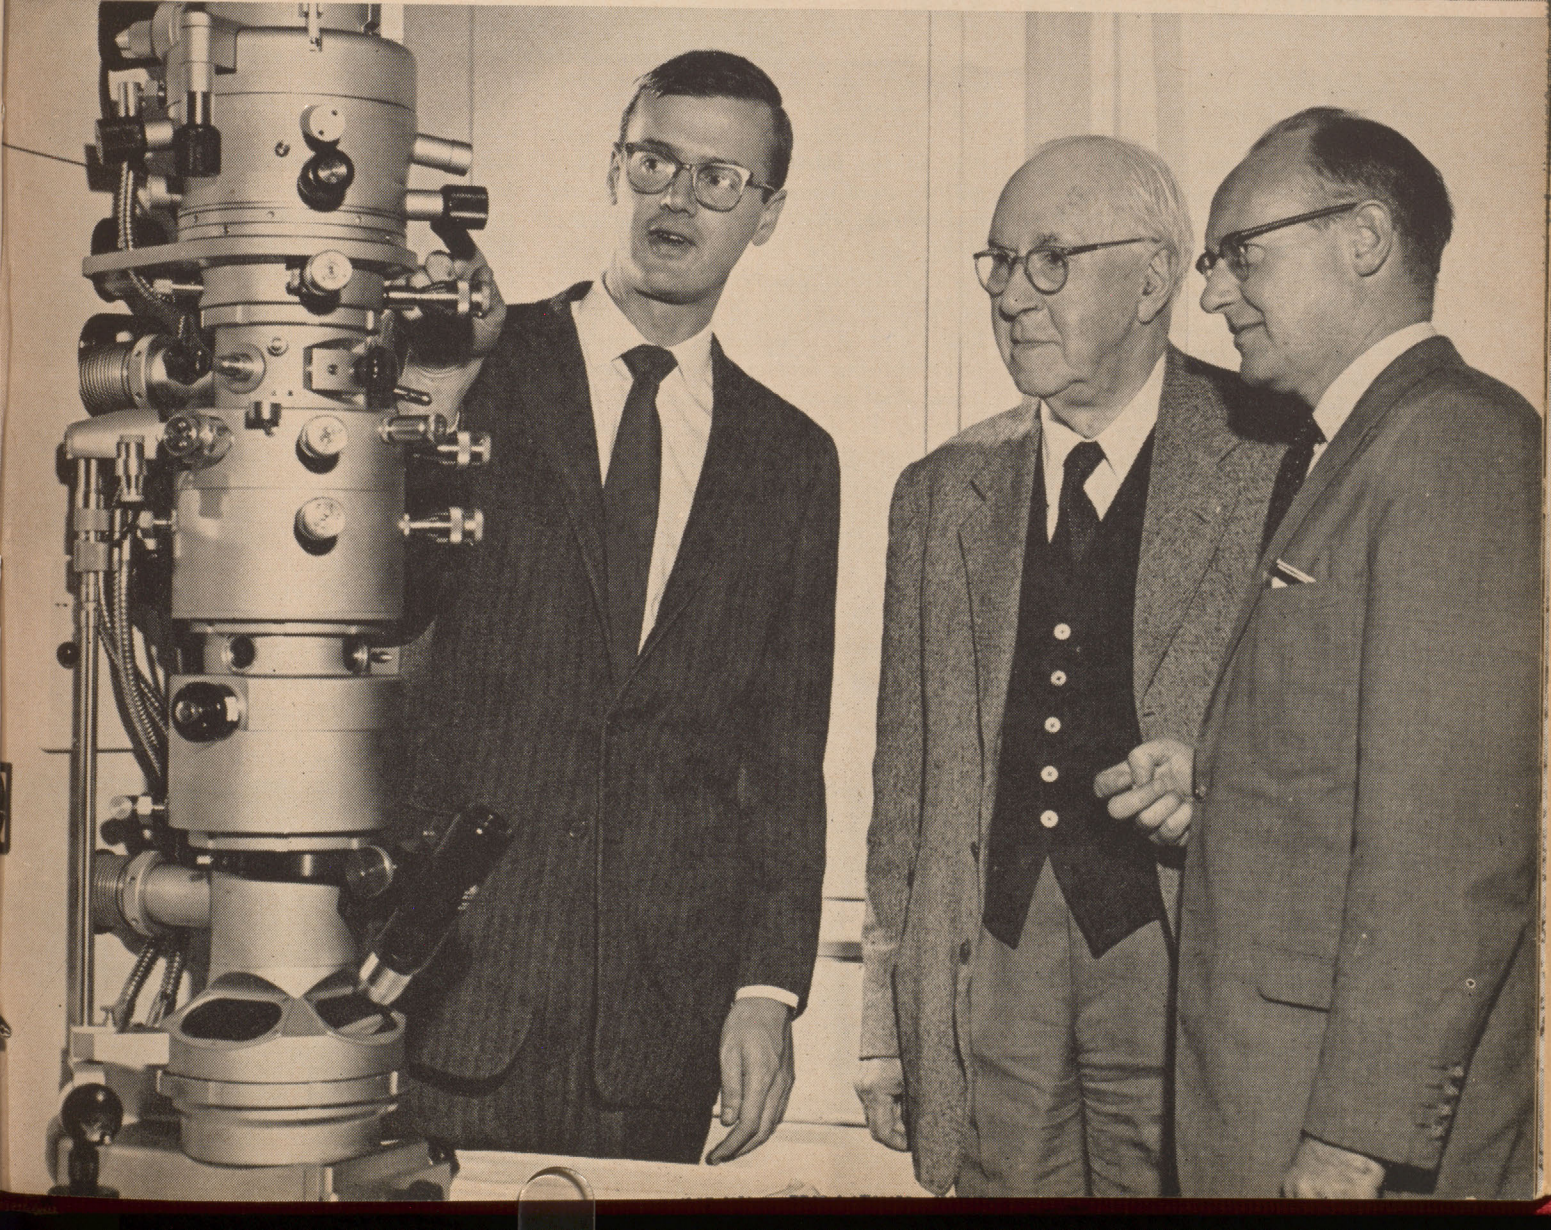

Lower Left: Adding to the facilities of the Department of Anatomy for electron microscopy, a new laboratory has been opened in the Strathcona Medical Building. Dr. Yves Clermont is pictured with his new machine.

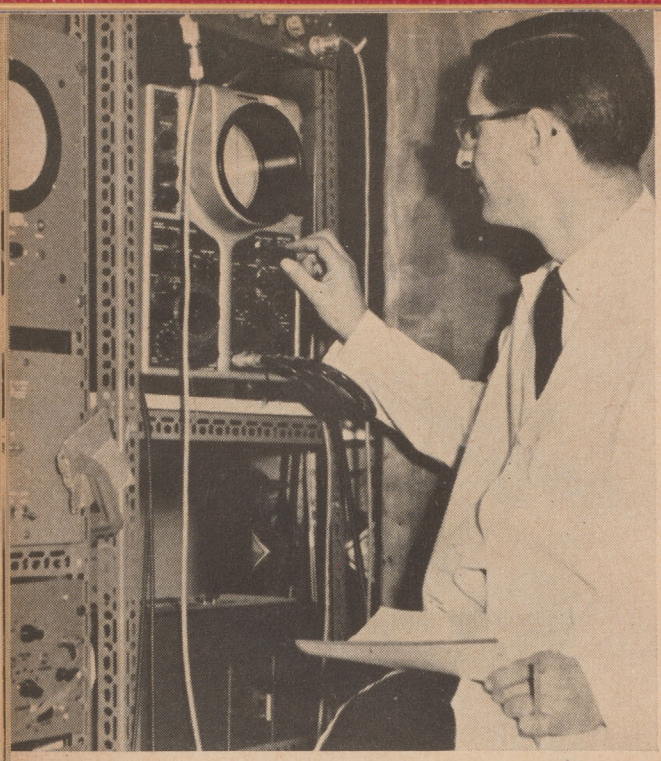

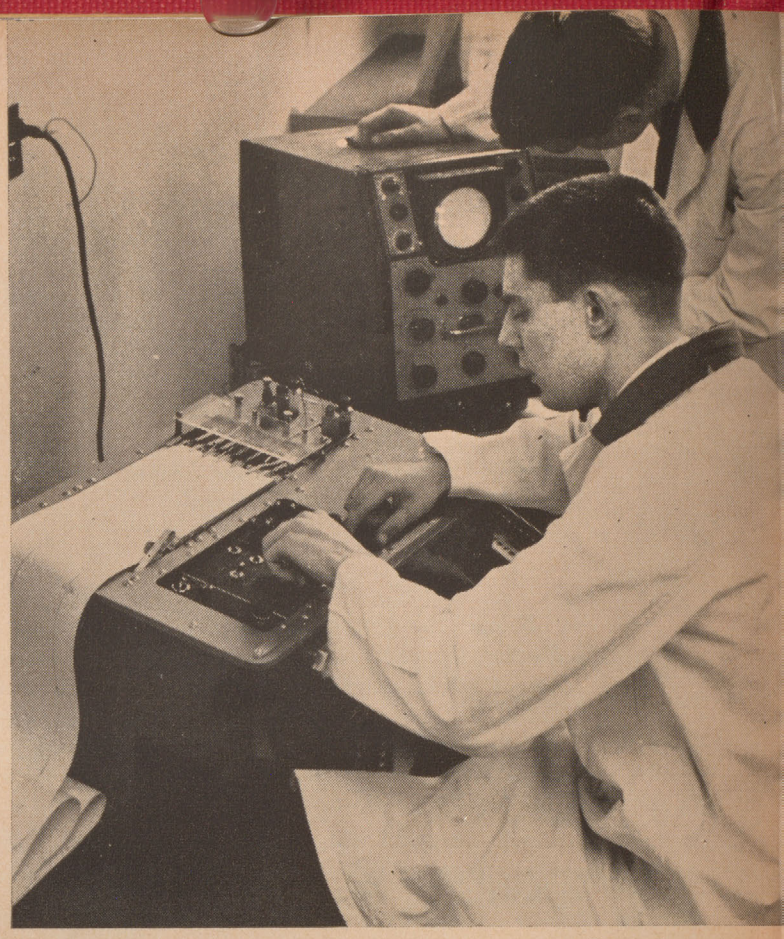

Right: Up she goes! A crane heaves a crated electron microscope into an open window.

Below: Sir Henry Dale, centre, and Professor F. C. MacIntosh, right, look on as Dr. Richard I. Birks shows how to adjust the new instrument. Sir Henry Dale, Nobel Prize Laureate, is Chairman of the Wellcome Trust, from which the Department of Physiology obtained this "giant eye" for Dr. Birks and his co-workers, in 1959.

Duncan Cameron

The Tools of a New Age

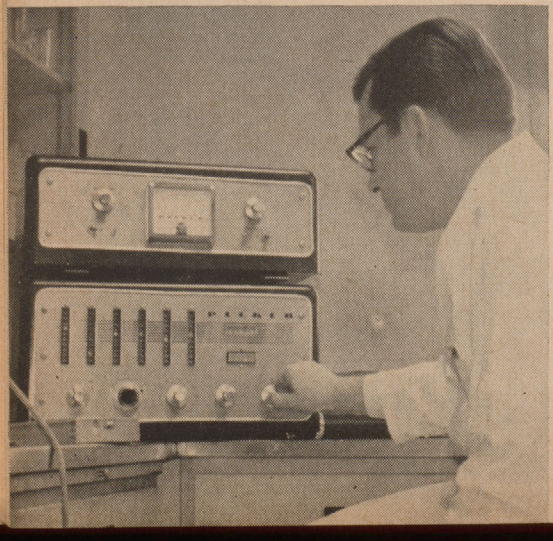

Duncan Cameron

Above, on the left, is Dr. J. G. Robson, Wellcome Research Professor of Anaesthesia, working with a cathode ray oscilloscope and associated equipment for recording action potentials from single respiratory neurones in the medulla — single cells in the so-called "respiratory centre" of the brain.

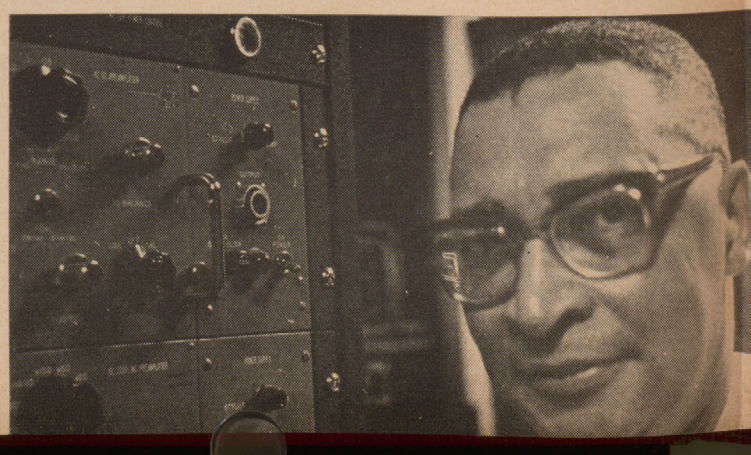

Like much of the equipment pictured on preceding pages, this apparatus is used for research. The linear accelerator in the Department of Radiology will be used, however, for treatment; and above, right, is some new electronic gadgetry for use in teaching. Two students, Lawrence B. McNally, of Noranda, Quebec, in the foreground, and Peter A. MacKay, of Montreal, test recording devices which are undergoing trial in the Department of Physiology. To keep students abreast of the rapidly changing world we live in, to carry them into the age of electronics, it is necessary to employ, at least in part, the latest methods, even although many of these students will spend their lives almost entirely with patients; others, of course, will find their life work in laboratories. Simpler apparatus still remains satisfactory for much elementary teaching.

Below left: Dr. Pierre Tremblay is pictured at work in the newly opened Fraser Laboratories, Women's Pavilion, Royal Victoria Hospital.

Primrose

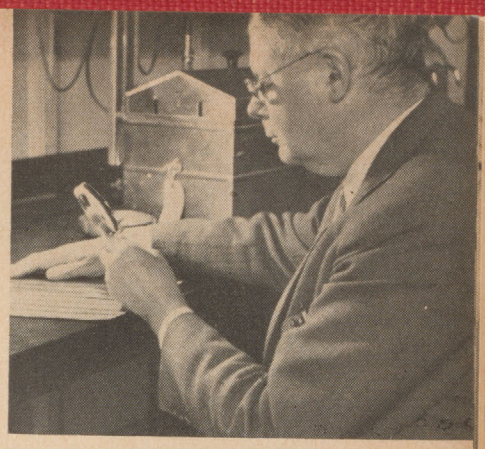

Below: Dr. K. I. Melville, Chairman of the Department of Pharmacology, stands beside a Multiple Channel Recorder, which is used to obtain information on changes in the cardiovascular system in connection with researches on coronary circulation.

HORMONES

Dr. Eleanor Venning, Professor of Experimental Medicine.

Dr. J. S. L. Browne, Professor of Investigative Medicine and Chairman of the Department.

THE presence of J. B. Collip at McGill gave an impetus to the discovery and study of the action of hormones, both in the laboratory and in the clinic, which has been continued and expanded by many others. J. S. L. Browne and Eleanor H. Venning working with J. S. Henry in the thirties were able to find a method for measuring the output of progesterone by the ovary and placenta and used these to carry out many studies in the field of disorders of the menstrual cycle and pregnancy. Venning and Browne later turned their attention to the adrenal cortex and with Paul Weil showed that injury and illness caused this gland to increase its function in human beings. The era of cortisone and its many applications in treatment found them with Bram Rose and with others in the forefront of this development.

The field of the chemistry and metabolism of steroid hormones was worked in vigorously by the late Donald Heard and has been carried on by his students, Murray Saffran (who first separated the corticotropin releasing factor), by the late W. S. Bauld and by R. Hobkirk, the latter particularly in the field of estrogens. Where and how the adrenal cortex makes its hormones is being studied by C. J. P. Giroud, J. Stachenko and their group and by Marion Birmingham. The study of the regulation and action of aldosterone, the salt retaining hormone of the adrenal cortex, has been the favourite occupation of several of the McGill groups of recent years.

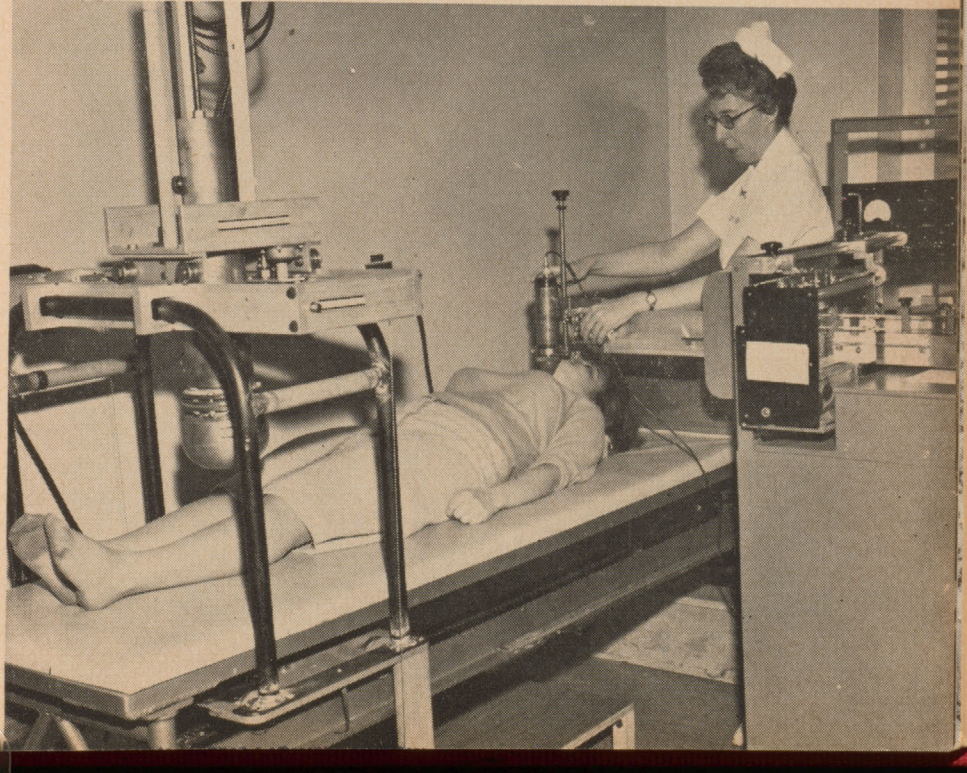

The anterior pituitary was called "the master gland" in Collip's time but for long its growth hormone was inactive when tried on human dwarfs; recently John Beck and his group have been able to show that human growth hormone does act in man to produce growth and many other changes. He and Eleanor McGarry with J. Fishman and A. Leznoff have elaborated immunological tests for growth hormone in human serum and cells.

The adrenal medulla and the measurement of catecholamines has interested Melville and his group and Sourkes and his co-workers.

C. P. Leblond and his group have done brilliant work on the way in which the thyroid gland works and on the details of development of spermatozoa. A recent addition to McGill whose interest is in the interplay between the anterior pituitary and the thyroid is Max Mackenzie from Scotland. Incidentally one of the most useful tools in finding out whether the thyroid is making too much or too little of its hormone is the use of radioactive iodine which is caught up by the gland and can be measured from the outside as seen in the picture below, without discomfort or danger to the patient.

N. Kalant and his group are studying many aspects of carbohydrate and fat metabolism and of the secretion, transport and mode of action of insulin.

There are always new faces appearing and among them in this field of work are Samuel Solomon who is coming back from Columbia University as an expert in steroid hormones and Charles Hollenberg who is returning from Boston.

BRAIN: Neurology and Neurosurgery

Founded 25 years ago by Dr. Wilder Penfield and the late Dr. William Cone, the Montreal Neurological Institute is a world-famous centre for the advanced training of physicians and surgeons in the medical and surgical management of diseases of the brain and nervous system, a centre in which the exemplary care of patients is combined with a wide range of research. Theodore Brown Rasmussen, a distinguished Minnesota graduate, trained in neurosurgery at the M.N.I., gave up the Chair of Neurosurgery at the University of Chicago (where he was succeeded by another former Fellow of the M.N.I.) to return to Montreal. That was five years ago. Now he adds to the Professorship of Neurology and Neurosurgery two new appointments, as Chairman of the Department and Director of the Institute. A recent camera portrait of the new Director appears at the top of this page.

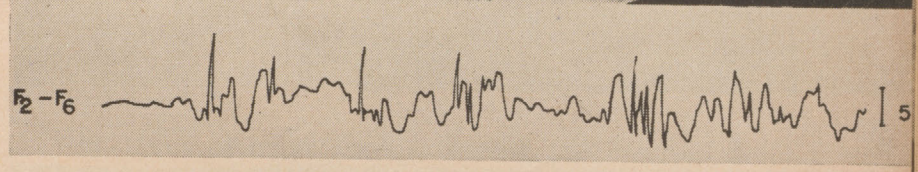

Below, at the left, Professor Rasmussen listens to Dr. Arthur Elvidge, Associate Professor of Neurosurgery and Neurosurgeon-in-Chief of the Royal Victoria Hospital, with Dr. Francis L. McNaughton, Professor of Neurology, in a white coat at the far left. In the second row Dr. Donald Lloyd-Smith, left, talks with Dr. William Feindel, newly appointed William Cone Professor of Neurosurgery.

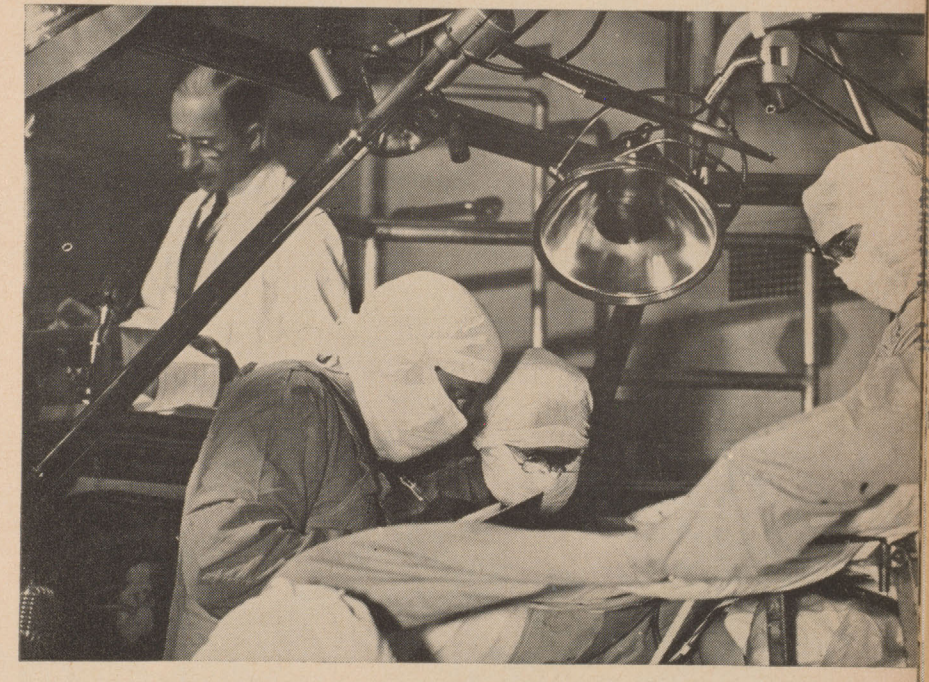

It is impossible to indicate in a narrow compass the great variety of the work carried on at the M.N.I., both clinical and investigative. The neurochemical studies of Dr. K. A. C. Elliott, recently appointed Professor of Biochemistry and Chairman of the University Department, seem certain to have long-term importance. Dr. Gordon Mathieson is re-organizing the work in neuropathology. At the right, above, Dr. Herbert Jasper, Professor of Experimental Neurology and Physician-in-charge of the Neurophysiology and the Electroencephalography (EEG) Laboratories, conducts his daily session in the interpretation of electroencephalograms. A sample EEG tracing from a patient who had focal epileptic seizures following injury to his brain is shown below.

In the second picture, Dr. Jasper, left, is shown behind a glass partition, in the gallery above the operating room, running an EEG connected to electrodes which the surgeons have placed on the surface of the brain. The brain-waves will outline more exactly the extent of excision required.

In the third picture Dr. Donald L. McRae demonstrates the findings in a series of X-rays. Dr. McRae is Associate Professor in the University Department of Radiology, which is chaired by Professor Carleton B. Peirce, Radiologist-in-Chief of the Royal Victoria Hospital. Dr. R. G. B. Gilbert, Anaesthetist-in-Chief of the M.N.I., is Chairman of the University Department of Anaesthesia.

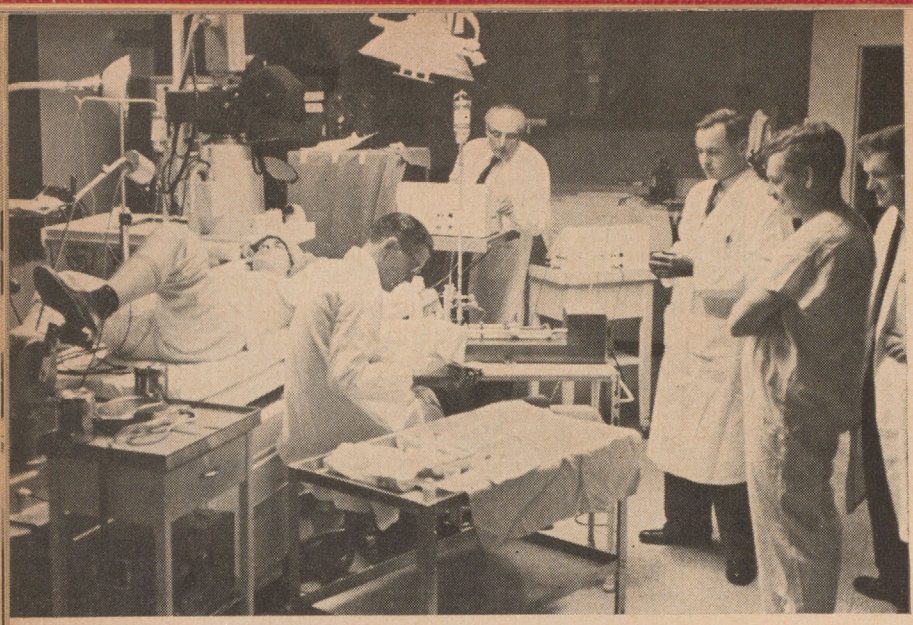

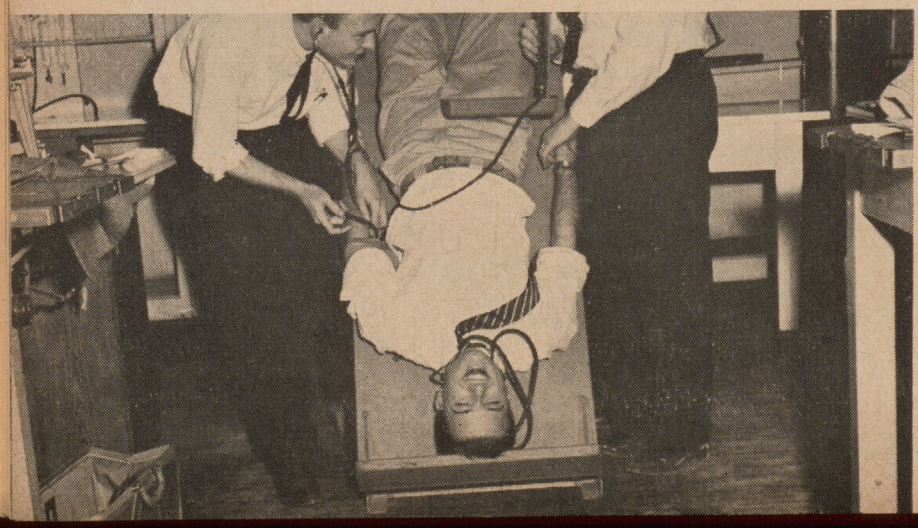

Charles Hodge

Heart and Lung

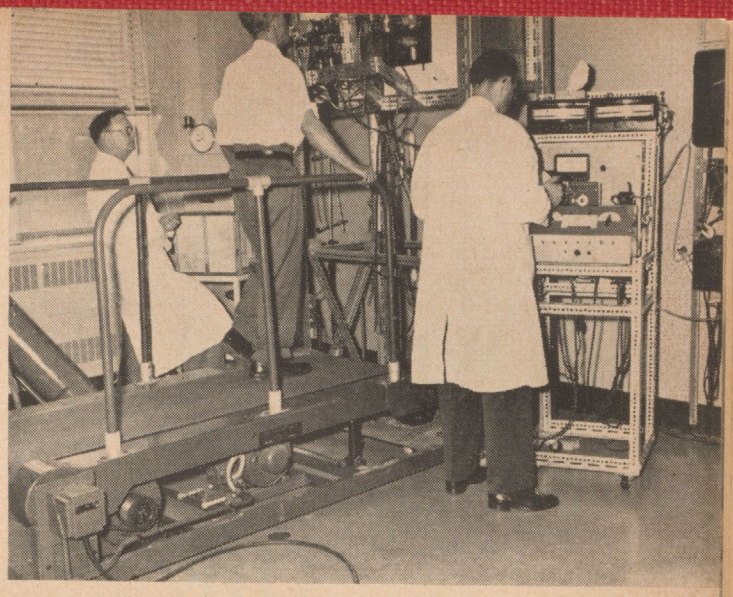

The recent establishment of the Joint Cardiorespiratory Unit of the Royal Victoria Hospital and the Montreal Children's Hospital, under Dr. Arnold C. Johnson, Associate Professor of Medicine and Associate Professor of Paediatrics (Heart) and Dr. V. Bates, likewise Associate Professor in both Departments (Respiration), was arranged by Professor Ronald Christie, who has overall direction of its activities.

In the first picture above, Dr. Maurice McGregor, Associate Professor of Medicine, Research Associate of the National Research Council (seated) and Dr. Paul Sekelj, Assistant Professor of Physiology (standing, centre) determine cardiac output on exercise while Research Fellows look on. The second picture shows an open heart operation at the Royal Victoria, repair of a mitral insufficiency using a heart-lung machine. The surgeon is Dr. Arthur M. Vineberg. In the lowermost picture, medical students in the Department of Physiology (Professor F. C. MacIntosh, Chairman) study blood pressure in one of their own number with the aid of a tilt table.

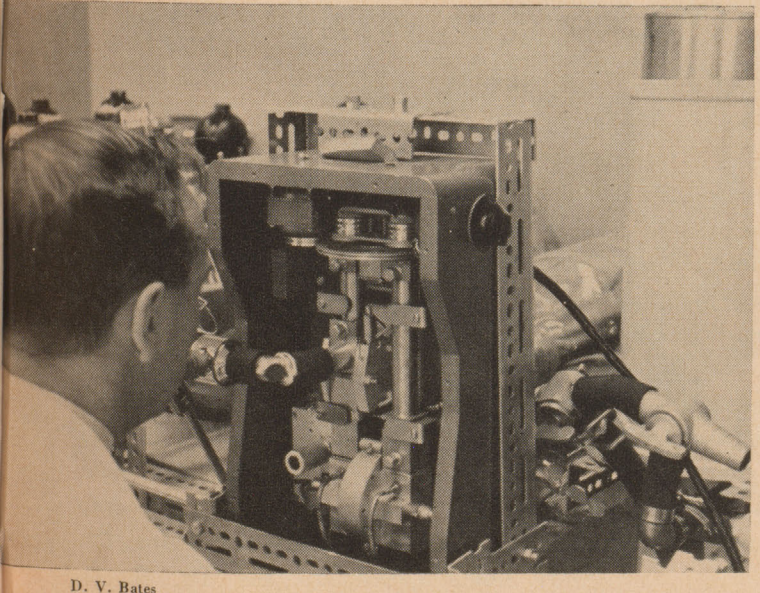

Right: Research Fellows conduct a test on respiration during exercise. A patient walks on a treadmill at 2 m.p.h. Instruments at the right continuously measure the concentration of oxygen and carbon dioxide being breathed by the patient. Centre: Medical students in the Department of Physiology testing respiratory function. Lower right: Lung compliance is tested by Research Fellows, Cardiorespiratory Laboratories, New Medical Wing, R.V.H. Lower left: In the same Laboratories, Dr. W. A. Young studies the pattern of expiration following a breath of carbon monoxide. The apparatus he is using will record the carbon monoxide concentration continuously, with a time delay of less than one tenth of a second.

Research for the Joint Unit is carried on in both of the participating hospitals. Cardiac Surgery is conducted in all three of the Teaching Hospitals by Dr. Vineberg, Dr. A. R. Dobell and Dr. David R. Murphy, Associate Professor of Surgery and Surgeon-in-Chief of the Montreal Children's Hospital.

A WINDOW ON THE WORLD

A window of the McGill Medical Library, Strathcona Medical Building.

A cosmopolitan centre, where the ancient international tradition of universities is cherished, McGill is proud to claim a place in the broad domain of medicine, a part of the world-wide republic of scholarship and science.

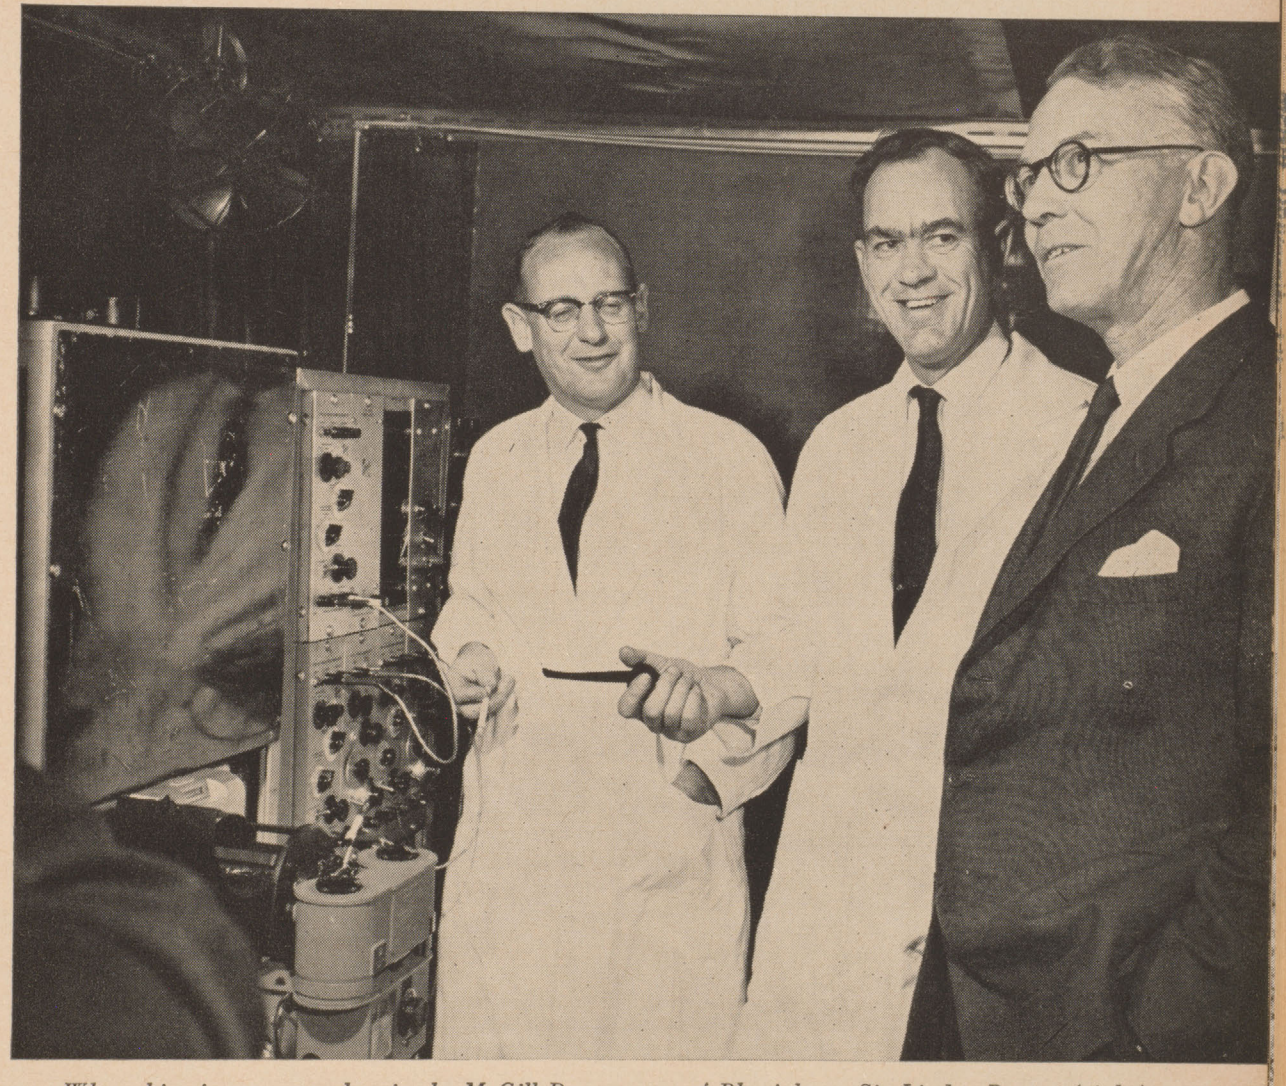

McGill medical students come from all ten provinces of Canada. They come, too, from thirty or forty states of the U.S.A., north and south, east and west.

In the seventeenth and eighteenth centuries, Montrealers penetrated the continent, exploring and trading up the stately St. Lawrence, through the Great Lakes and down the Mississippi to the Gulf. For more than a century students have followed these paths in the opposite direction. They have come to Montreal from far afield, from California, Washington and British Columbia, as well as from the Atlantic states. Today they continue to come. Almost every class has in addition representatives of five or six other countries.

The teachers, scientists and practitioners of the Medical Faculty form an even more cosmopolitan group. It is not many years since a distinguished German was Professor of Pathology and a distinguished Russian Professor of Physiology. At the present time a high proportion of Canadians, many of them natives of the province of Quebec, have been joined by colleagues from a dozen lands. Dr. Theodore Rasmussen, Dr. Carleton B. Peirce, Dr. Louis Lowenstein and Dr. R. O.

Morgen, for example, look back on American origins. Dr. D. L. Thomson and Dr. D. E. Cameron were born in Scotland, Dr. K.A.C. Elliott and Dr. Maurice McGregor in South Africa. Dr. C. P. Leblond is from Lille, Dr. Jan Langman from Amsterdam. The Canadian-born teachers, like the Canadian-born students, represent all provinces.

Nearly half a million English-speaking citizens live in or near Montreal with more than twice as many of French descent, in the second largest French-speaking city in the world. A great seaport and a great air terminal, in recent years Montreal has become more than ever a convention city, where scientific congresses of national, continental and international scope assemble every year. International congresses for Genetics, Obstetrics and Paediatrics have met in Montreal in the last year or two, those for Psychiatry, Bacteriology and Radiology are coming soon, with more to follow. In smaller groups, and individually, the leaders of medicine in other lands are among our frequent visitors. One of them is pictured below with his hosts.

When this picture was taken in the McGill Department of Physiology, Sir Lindor Brown (right) was Professor of Physiology at University College Hospital Medical School, London. He has since been appointed to the Oxford Chair. His hosts are Prof. F. C. MacIntosh, Chairman of the McGill Department (left) and Prof. B. D. Burns.

MEDICINE AT McGILL: NO MYSTIQUE

Elliott and Fry

Dr. Ronald V. Christie, Professor of Medicine, Chairman of the Department, Physician-in-Chief of the Royal Victoria Hospital, was educated in Edinburgh, New York and Montreal. Before returning to McGill, he was Professor of Medicine at St. Bartholomew's Hospital Medical School, London. What follows is an abstract of his remarks to the Graduating Class, 30 May, 1960.

FELLOW Graduates: It is my duty and privilege to address you for a few minutes before you go on your various ways.

You have finally defeated your examiners and I hope you all realize how greatly you are to be congratulated on your choice of a profession. Whatever you are, and whatever you wish to be, the profession of medicine has a niche for you. There are opportunities for every talent and every temperament. And what other profession has this to offer?

These then are your prospects and your next task is to discover the kind of work you enjoy most, because it is a merciful dispensation of providence that the work we enjoy most is usually the work we are best fitted to do. But work must also have a purpose. You must have an inner conviction that what you are doing is important if you are to get full satisfaction out of it. If you are to enjoy life to the full you must have sufficient ambition to be intolerant of what is second rate in yourselves. Whether we come eventually to a state medical service, or move forward in our present paths, satisfaction from your own work will only come if you keep up with progress. Science is forging ahead, often to the embarrassment of practice, and too often the busy practitioner allows the pharmaceutical houses to take over his post-graduate education. In looking back over the past four years, I hope you will agree that at least one of the obligations your teachers have fulfilled is that we have impressed upon you how little we know.

The old dictum that man survives all illnesses except his last, sometimes because of treatment, sometimes without treatment, and sometimes in spite of treatment, was in my student days looked upon with great distaste by my clinical teachers, which was not surprising since at that time there were very few diseases that we could cure. The potency of the prescriptions we used was enhanced by writing them in Latin, since the Mystique of Medicine was in those days one of our principal assets. For better or for worse, the Mystique of Medicine is quickly disappearing and the prestige of our profession is coming to depend more and more on up-to-date methods of diagnosis and treatment. I hope that during the past four years we have encouraged your curiosity and initiative and have provided you with the background that will enable you to keep abreast of the mounting stream of medical knowledge. In spite of all our shortcomings as a profession, a great medical tradition of service has been built up by good men throughout the ages, many of them nurtured in this place.

As you pursue your various careers you will develop new loyalties, but I hope they will only strengthen your feelings for McGill, which has entrusted you with part of her great reputation.

A corner of the Osler Library, Strathcona Medical Building ▶

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'95 **Robert O. King,** BSc '95, MSc '98, of Ottawa, has retired after 65 years of full-time scientific investigation with the Defence Research Board's Combustion Research Section.

'08 **Mme. Jules Puech,** (nee Marie-Louise Milhau, MA '08), of Par Castres Tarn, France, has been awarded Chevalier de la Légion d'Honneur, for her indefatigable activity in international relations and social and cultural activities.

Broome: To John, BCom' 54, and Sheila (MacMillan, BA '53), a son.

Brown: To Janet (Farmer, BA '39), and Ronald Brown, a son.

Burrows: To Lorne, BSc '49, and Mrs. Burrows, a daughter.

Busby: To Brian, BEng '56, and Mrs. Busby, a daughter.

Caldwell: To Peter, BEng '56, and Judith (Wallace, DipPT '56, BSc/P&OT '58), a son.

Campbell: To Alan, BEng '51, and Mrs. Campbell, a son.

Campbell: To Clive, BCom '47, and Mrs. Campbell, a daughter.

Campbell: To Colin, BA '45, BCL '49, and Helen (Smiley, BA '46, BSW '47, MSW '51), a son.

Caron: To John, MD '52, and Mrs. Caron, a son.

Carr: To Richard, DDS '59, and Maureen (McCauley, BA '56), a daughter.

Chamberlain: To Donald, BEng '54, and Ruth (Johns, MacTeach '54), a son.

Charlap: To Carl, BArch '56, and Joan (Hyman, MacTeach '53), a son.

Chun: To Rowland, BCom '52, and Miriam (Robitaille, BA '51), a daughter.

Clark: To Ian, BA '53, MA '58, and Nancy (Blachford, BA '56), a son.

Clark: To Shiela (Fox, BA '51), and John Clark, a son.

Clark: To Sam, BSc '54, MD '58, and Mrs. Clark, a daughter.

Clarke: To Brock, BCL '42, and Mrs. Clarke, a daughter.

Cohen: To Lawrence, BA '54, DDS '56, and Thelma (Levitt, BA '56), a daughter.

Cohen: To Mortimer, BCom '49, and Vivian (Singer, BSc '48), a daughter.

Cohen: To Seymour, BSc '49, and Mrs. Cohen, a daughter.

Colford: To George, BSc '44, BEng '49, and Ruth (Austin, BN '47), a son.

Coll: To David, BEng '55, MEng '56, and Mrs. Coll, a daughter.

Collier: To Martin, BEng '54, and Barbara (Holden, DipP&OT '53), a son.

Collinge: To James, BCom '57, and Mrs. Collinge, a son.

Connery: To Gerald, BEng '56, and Mrs. Connery, a daughter.

Costanzo: To Edmond, BEng '53, and Mrs. Costanzo, a son.

Coupland: To Douglas, BSc '47, and Mrs. Coupland, a son.

Courey: To Emile, BSc '48, BCom '50, and Mrs. Courey, a daughter.

Currie: To George, BEng '51, and Mrs. Currie, a daughter.

Cuthbertson: To Louise (Ferrier, BA '49) and David Cuthbertson, a daughter.

d'Artois: To Barbara (Bond, BA '53), and Gyles d'Artois, a son.

Davis: To Norman, BCom '52, and Caroline (Clements, BSc '52), a son.

Dawson: To William, BEng '49, DipMBA '57, and Mrs. Dawson, a daughter.

Dermer: To Hershey, BA '56, BCL '59, and Alta (Abramowitz, BA '59), a son.

Desjardins: To Georges, Eng '59, and Mrs. Desjardins, a son.

Diplock: To Donald, BA '42, and Mrs. Diplock, a son.

Doheny: To Daniel, BA '39, BCL '47, and Mrs. Doheny, a daughter.

Doheny: To Hugh, BA '37, BCL '40, and Mrs. Doheny, a daughter.

Drazner: To Mike, BCL '51, and Mrs. Drazner, a daughter.

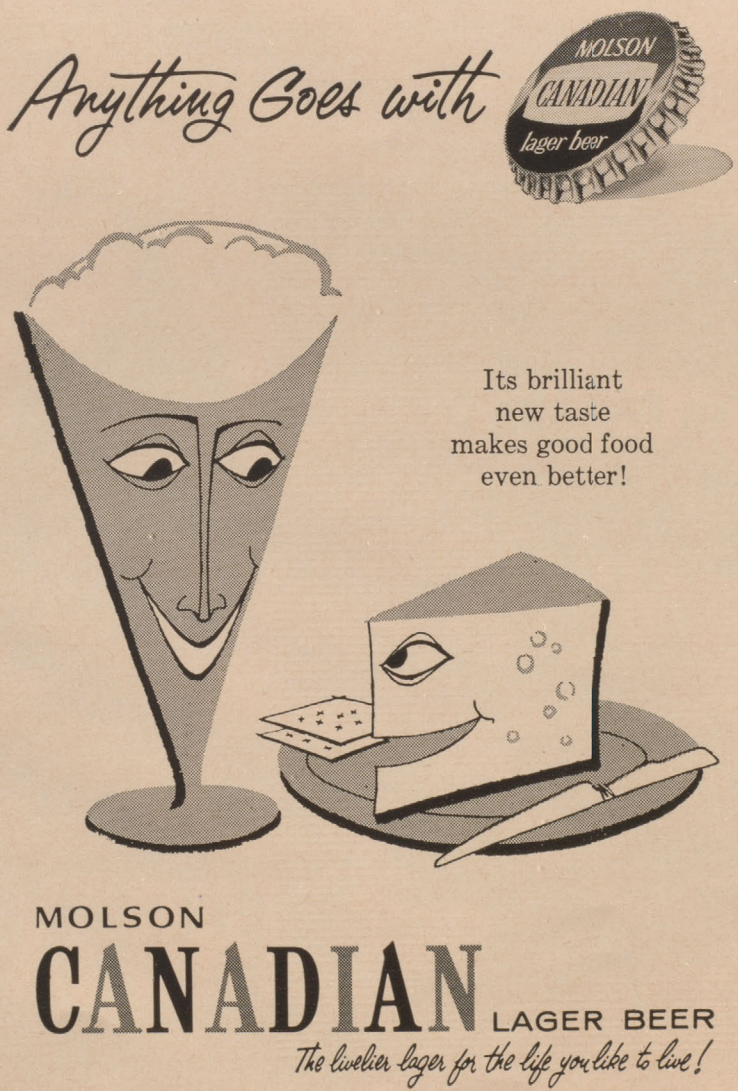

Dreimanis: To Betty, (Tarlton, BSc/HEc '47), and Serge Dreimanis, a daughter.

Drennan: To Robert, BCom '48, and Mrs. Drennan, a son.

Durnford: To John, BA '49, BCL '52, and Elizabeth (Stairs, BA '53), a daughter.

Edge: To William, BA '48, and Mairi (MacKinnon, BSc '51), a son.

Egan: To Thomas, MD '52, and Mrs. Egan, a daughter.

Emond: To Lionel, BCom '53, DipMBA '57, and Mrs. Emond, a son.

Empey: To Gordon, BA '51, BCL '54, and Mrs. Empey, a daughter.

Fainbloom: To Saul, BEng '56, and Mrs. Fainbloom, a son.

Fetter To Judith (Spence, BA '58) and Rev. Lawrence Fetter, a son.

Finch: To Cliff, BEng '47, and Mrs. Finch, a daughter.

Finley: To Gault, BCom '48, and Rae (Hunter, BA '47), a son.

Firth: To Ross, BSc/PhyEd '51, and Mrs. Firth, a daughter.

Fisher: To Glen, BEng '57, and Mrs. Fisher, a daughter.

Foster: To Eileen (Faughnan, BLS '56), and John Foster, a daughter.

Frank: To Esther (Kisilevsky, DipPT '56), and Dr. Harold Frank, a daughter.

Freedman: To Arthur, BA '51, MD '55, MSc '58, and Jacqueline (Smith, BSc 54, MSW '56), a son.

Frewin: To Robert, BCom '53, and Mrs. Frewin, a daughter.

Garbuz: To Asher, BCom '53, and Mrs. Garbuz, a son.

Garfinkle: To Krayna (Golfman, BA '57), and Mitchell Garfinkle, a son.

Gibson: To Merritt, PhD '57, and Mrs. Gibson a son.

Gleason: To Clarence, BSc '44, PhD '47, and Shirley (Apple, MacTeach '48), a son.

Glos: To Carl, BEng '56, and Mrs. Glos a son.

Godel: To Elliot, BCom '50, and Mrs. Godel, a daughter.

Goldberg: To Norman, BSc '55, MD '59, and Barbara (Usher, BA '57, MA '59), a son.

Goldstein: To Maurice, BSc '45, MD '47, and Mrs. Goldstein, a daughter.

Goodman: To Rae (Huberman, BSc '53), and Allan Goodman, a daughter.

Goodwin: To Jim, BEng '54, and Mrs. Goodwin, a son.

Gottfried: To Kurt, BEng '51, MSc '53, and and Sorel (Dickstein, BA '55), a daughter.

Goulet: To Paul, BEng '58, and Mrs. Goulet, a daughter.

Graham: To Malcolm, BSc '55, MD '57, and Mrs. Graham, a son.

Graydon: To Philip, BEng '55, and Mrs. Graydon, a daughter.

Greenbaum: To Isidore, BCL '51, and Sarah (Ginsburg, BA '49), a son.

Greenberg: To Arthur, BCom '55, and Mrs. Greenberg, a son.

Greenblatt: To Gerald, MSW '57, and Mrs. Greenblatt, a son.

Greenfield: To Saul, BCom '48, and Mrs. Greenfield, a son.

Greenwood: To Donald, BEng '55, and Efa (Heward, BA '55), a son.

Grier: To William, BCom '55, and Mrs. Grier, a son.

Gross: To Charles, BEng '51, and Mrs. Gross, a son.

Grover: To Norman, BSc '55, and Mrs. Grover, a daughter.

Gunstone: To Lewis, BCom '54, and Lorna (Graham, DipP&OT '55), a daughter.

Hackett: To David, Arts '50, and Mrs. Hackett, a daughter.

Hackett: To Sheila (McEachran, BA '54), and John Hackett, a son.

Haley: To Marion (Neil, MacTeach '53, BA '57), and Tom Haley, a son.

Hall: To Jack, BArch '57, and Jennie (Housden, BA '53), a daughter.

Hamilton: To George, BEng '57, and Mrs. Hamilton, a daughter.

Hammond: To Frances (McOuat, BSc/HEc '53), and Allan Hammond, a son.

Hanley: To Allen, BEng '51, and Mrs. Hanley, a daughter.

Harvey: To Alexander, BA '50, and Monica (Harrison, BA '49), a son.

Hayward: To Charles, BEng '51, and Mrs. Hayward, a daughter.

Hemmings: To Lyle, MD '56, and Mrs. Hemmings, a daughter.

Hendler: To Mortimer, BEng '49, and Mrs. Hendler, a daughter.

Heney: To John, BCom '49 and Elizabeth (Brown, BA '50), a son.

Herscovitch: To Kayla (Gross, MacTeach '54) and Donny Herscovitch, a son.

Heyman: To Myra (Mendelsohn, BSc '49, MPS '51), and Paul Heyman, a daughter.

Heywood: To Barbara (Jackson, BA '48), and James Heywood, a son.

Higgins: To Robert, BEng '53, and Anne (Stott, BFA '54), a daughter.

Hiltz: To John, BSc/PhyEd '55, and Mrs. Hiltz, a daughter.

Hirst: To Tom, BEng '44, and Mrs. Hirst, a daughter.

Hoffer: To Sorryl (Cohen, BA '49, MPS '51), and Frank Hoffer, a daughter.

Hopper: To Peter, BCom '53, and Frances (Lawley, BA '52), a son.

Horn: To Samuel, BCom '35, and Mrs. Horn, a daughter.

Hubley: To Gordon, BSc '50, and Mrs. Hubley, a daughter.

Hubscher: To Frank, BCL '51, ML '53, and Mrs. Hubscher, a son.

Hyde: To Ann (Cutler, BSc/HEc '53) and David Hyde, a daughter.

Hyland: To Joan (Wilson, BCom '55), and John Hyland, a son.

Inglis: To Frederic, MSc '57, and Mrs. Inglis, a daughter.

Jackalin: To Eric, BEng '50, and Mrs. Jackalin, a son.

Jackson: To Lawrence, BEng '53, and Mrs. Jackson, a son.

Jackson: To Ray, PhD '50, and Mrs. Jackson, a son.

James: To Bruce, BSc '57, and Mrs. James, a daughter.

Jarrett: To James, BA '47, and Eleanor (Lindsay, Physio '51), a daughter.

Jonassohn: To Kurt, MA '55, and Mrs. Jonassohn, a son.

Jones: To Hugh, BCom '51, and Wendy (Child, BA '54), a daughter.

Judge: To Patrick, BD '55, and Mrs. Judge, a daughter.

Kage: To Joseph, DipSocWk '42, and Miriam (Weiner, BSW '47, MSW '50), a son.

Kalfas: To Arthur, DDS '42, and Mrs. Kalfas, a daughter.

Kasirer: To Paul, BA '54, and Mrs. Kasirer, a son.

Kennedy: To Keith, BEng '43, and Mrs. Kennedy, a son.

Kenney: To Elizabeth (Patterson, BSc/HEc '55), and James Kenney, a daughter.

Kierans: To Emmet, BCL '48, and Mrs. Kierans, a daughter.

King: To Gerry (MacKnnon, BSc '48), and Alan King, a son.

Kingston: To George, BEng '52, and Mrs. Kingston, a daughter.

Kopin: To Irwin, BSc '51, MD '55, and Rita (Brownstein, BSc '51), a daughter.

Kotansky: To William, BArch '59, and Mrs. Kotansky, a daughter.

Kraut: To Bonnie (Niles, DipOT '56), and Dana Kraut, a son.

Kremer: To Carol (Usher, BA '56), and Herman Kremer, a daughter.

Tidman: To Patrick, BSc '51, MD '52, and Mrs. Tidman, a daughter.

Tissenbaum: To Ben, BA '52, and Mrs. Tissenbaum, a son.

Tomkins: To George, MA '52, and Mrs. Tomkins, a daughter.

Tonks: To Ronald, BA '55, and Mrs. Tonks, a son.

Toporowski: To Bernard, BEng '58, and Mrs. Toporowski, a daughter.

Trim: To Joyce, (Hamill, BSc/PhyEd '51), and John Trim, a daughter.

Troup: To Beverly (Bartram, BA '57), and Dr. Wallace Troup, a son.

Turcot: To Peter, BCom '47, and Anne (Dean, BA '49), a son.

Tyler: To William, BEng '48, and Mrs. Tyler, a son.

Van Gigch: To Juan, MEng '56, and Mrs. Van Gigch, a son.

Van Wagner: To Charles, BEng '46, and Mrs. Van Wagner, a daughter.

Veillon: To Pierre, Agr '39, and Mrs. Veillon, a son.

Vessot: To Robert, BA '51, MSc '54, PhD '57, and Mrs. Vessot, a daughter.

Vitou: To Constantine, BSc '48, MD '50, and Suzanne (Voisard, BA '51), a daughter.

Wallace: To Alan, BCom '47, and Mrs. Wallace, a son.

Warder: To Lilla (Palmer, BA '52), and Donald Warder, a son.

Webster: To Alan, DipAgr '55, and Mrs. Webster, a son.

Weeks: To William, BCom '55, and Deane (Brown, BSc/HEc '54), a son.

Welch: To Warren, BEng '49, and Mrs. Welch, a son.

Wemp: To Ross, BCom '52, and Elizabeth (Stewart, BA '51), a daughter.

Wickham: To Patrick, BCL '49, and Mrs. Wickham, a daughter.

Williams: To Jack, BSc '44, and Amy (Fowler, BA '49), a daughter.

Wilmot: To Fred, BCom '54, and Carolyn (Giles, BA '52), a son.

Wilson: To Ian, BSc '47, and Mrs. Wilson, a son.

Winston: To Milton, BA '51, BCL '54, and Mrs. Winston, a son.

Winter: To Sam, BCom '48, and Mrs. Winter, a son.

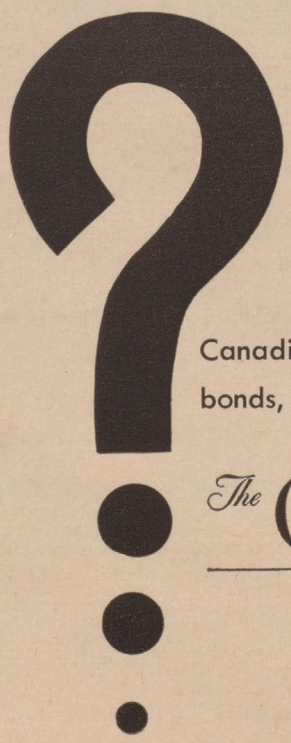

Wise: To Ralph, BA '57, and Mrs. Wise, a daughter.

Wojcik: To Henry, BCom '53, and Mrs. Wojcik, a son.

Wolvin: To Donald, BCom '48, and Mrs. Wolvin, a son.

Xistris: To George, BEng '59, and Mrs. Xistris, a son.

Yoffe: To Barbara (Harris, BA '55), and Moe Yoffe, a son.

DID YOU KNOW—

— that in both good and bad times life insurance is one of the main ways of saving for most Canadians? Today more Canadian families own life insurance than own bonds, stocks, or savings deposits.

The CANADA LIFE Assurance Company

Deaths

Rev. Chauncey A. Adams, BA '02, in California, on Sept. 9, 1959.

Walter J. Ahern, Science '08, internationally known in the safe and vault business, at Montreal, on Apr. 29, 1960.

John F. Argue, MD '37, at Ottawa, on Mar. 21, 1960.

G. Guelph Armitage, DDS '46, prominent Montreal dentist, at Ottawa, on May 1, 1960.

George E. Backer, BEng '43, at Three Rivers, Que., on Feb. 19, 1960.

Samuel L. Baird, BEng '46, on Feb. 13, 1960.

Alice M. Bissett, BA '25, MA '27, at Montreal, on Jan. 15, 1960.

James H. Boulter, BA '02, MD '03, on Jan. 21, 1959.

Rev. D. K. Burns, MA '25, at Brockville, Ont., on Feb. 7, 1960.

John Andrew Burns, BASc '93, at Montreal, on Mar. 27, 1960.

Colin Campbell, Science '11, on July 23, 1958.

John de L. Campbell, MD '08, one of Kingston's best-known general practitioners, at Kingston, Ont., on Dec. 22, 1959.

Harry R. Chipman, PhD '25, at Halifax, N.S., on Feb. 7, 1960.

Robert H. Coats, LLD '34, founder of the Dominion Bureau of Statistics, at Ottawa, on Feb. 7, 1960.

Stanton S. Cunha, BSc '05, mathematics and engineering expert, who served 50 years with the Quebec Hydro-Electric Commission, at Montreal, on Mar. 22, 1960.

Arthur B. Darling, BSc '24, President of Darling Bros. Co. Ltd., at Montreal, on Apr. 25, 1960.

Harry A. Dover, MD '14, at Clearwater, Fla., on Feb. 18, 1960.

Henry A. Drummond, MD '24, at Toronto, on Nov. 1, 1959.

James A. Eccles, LLD '56, a foremost figure in Canadian finance, and a Governor of McGill, at Montreal, on Mar. 3, 1960.

William L. Fraser, BSc '17, Director of the Ontario Hydro-Electric Power Commission's St. Lawrence power project, at Cornwall, Ont., on Feb. 18, 1960.

John A. Gilbey, MSc '42 (Mac), at Montreal, on Feb. 1, 1960.

T. Ernest Gilchrist, BSc '10, on Sept. 26, 1958.

George A. Gillies, BSc '05, BSc '10, MSc '11, on Apr. 6, 1959.

Douglas W. Graham, MD '07, at Victoria, B.C., on Feb. 6, 1960.

Hugh George Henry, Sr., MD '29, well-known Germantown, N.Y., physician and devoted worker for the community health and welfare, at Hudson, N.Y., on Apr. 23, 1960.

A. E. Hyndman, BSA '16, at Montreal, on Jan. 31, 1960.

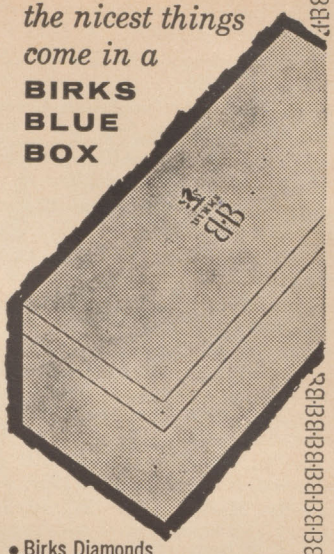

Lawrence W. Jackson, BSc '23, on Mar. 13, 1960.

Walter L. Johnston, BCom '25, at Montreal, on Apr. 15, 1960.

Ralph N. Jones, MD '31, at Whitefield, N.H., on Aug. 6, 1959.

Corlis C. Keyes, Science '04, sportsman and vice-president of the Board of Governors of the Seigniory Club, in Scotland, on Feb. 3, 1960.

Business Review
JUNE 24, 1959

WAY TO THE SEA

THE prospect of linking the shipping lanes of the world's oceans with the world's largest chain of fresh-water lakes in the industrial heartland of North America has offered an obvious challenge to the joint ingenuity of Canada and United States for more than half a century. The meeting of the Queen and the President on June 26 formally to open the St. Lawrence Seaway marks the achievement of a venture in international co-operation with few historical parallels.

Sixty-four years have elapsed since the idea of a Seaway was first mooted. It was in 1895 that a Deep Waterways Commission was created by the governments of the two countries to report on the feasibility of a deep channel from the Great Lakes to the Atlantic. By the early years of this century the scheme was clearly conceived on the broad lines along which it now stands accomplished — as a joint undertaking of the two countries and with the joint purposes of a ship channel and a hydro-electric power source. These essential aspects have never been lost to sight despite the legislative and technical difficulties that have beset their fulfilment. Even the basic engineering facts of today's St. Lawrence navigation and power project were specified as long ago as 1926 and 1927. In those years a joint board of engineers confirmed the feasibility of developing 2.2 million horsepower of electric energy in the International Rapids section and a Canadian advisory committee proposed a 27-foot channel from Montreal to Lake Ontario.

For some years thereafter the history of the project was punctuated by a succession of plans and proposals and of chronic delays in reaching firm decisions. While the Seaway scheme found many enthusiastic supporters it also met a large body of no less determined opponents and one of the strongest lobbies in American congressional history succeeded in defeating the enabling legislation under six Presidents, all of whom favoured it.

The Canadian position was, throughout, rather more clear-cut. The project must have seemed a daring and premature idea when first proposed. It was certainly a bold conception, providing as it did for transportation and power requirements far in excess of reasonable expectations at the time. Yet, despite her relatively smaller needs and resources, Canada was usually the prime mover.

As time passed, economic growth on both sides of the border brought the facilities offered by the project more within range of the reasonable and indeed within the realm of the necessary. If anything, the Canadian case for pressing forward with construction gained momentum more rapidly than the American to the point where Canada eventually decided to "go it alone" if U.S. co-operation should not be forthcoming. Action was finally initiated by Canadian legislation in the form of the St. Lawrence Seaway Authority Act of December 1951 and United States later joined in by passing the Wiley-Dondero Act through Congress in 1954. Construction of the Seaway began late that year, moved forward on a joint basis in 1955.

The task, which was accomplished on schedule in a little more than four years, was immense and complex and met with some unforeseen difficulties. That more than 50 million cubic yards of earth would have to be excavated and 2 million cubic yards of concrete poured was known in advance to more than fifty firms which held major contracts for the Canadian sections alone. But some problems that were not foreseen caused engineering difficulties after construction began. At the Beauharnois lock, contractors met hard underlying sandstone which held up all progress until a new drill had been devised to complete boring. Ice jams, high winds and flood waters hampered construction of cofferdams at the Montreal entrance and at the Cornwall power project, while dredging was complicated by unexpected physical obstacles.

Considerable expense was also incurred in relocating more than 6,500 people as well as towns, railways and roads on the north shore of the St. Lawrence between Cornwall and Prescott which was scheduled for flooding on completion of the Cornwall and Iroquois

THE BANK OF MONTREAL BUSINESS REVIEW is an analysis of Canadian business trends and a summary of information received by the Bank from its branches throughout Canada and from its offices in United Kingdom and United States. Published monthly at the Head Office in Montreal, the Business Review is freely available upon request.

Informed businessmen wishing to stay informed read the Bank of Montreal Business Review regularly.

Here, in black and white, is a concise monthly spotlight on the Canadian business scene that's invaluable in keeping you abreast of economic affairs. And it's read by businessmen all over the world!

INGENUITY

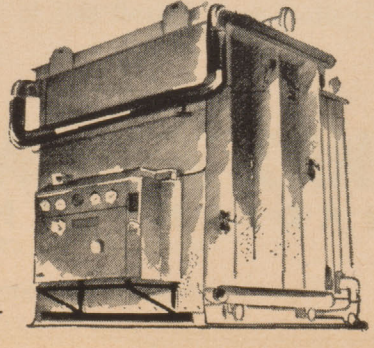

From blueprint to the final product—during casting, machining, fitting and assembling—Canadian Vickers demonstrates its ingenuity and many-sided skills. In manufacturing boilers of various types, like the high temperature water generator illustrated below, Canadian Vickers employs the same meticulous attention to detail, the same painstaking care which distinguishes all machinery and equipment bearing the Canadian Vickers name. It is only in this way that Canadian Vickers can fulfill its pledge: "If Industry Needs It, Canadian Vickers Builds It . . . Better."

"That's why you should study maths, son"

A close look at Canada today will quickly convince any young man that mathematics will play an important part in his future. Everywhere about him he will see the handiwork of the professional engineer whose training, based on mathematics, is contributing to this country's vast expansion. For wherever big things are going on, there you will find the engineer . . . whose vision and initiative make him a key man in Canada's progress.

In the coming years, Canada's continuing development will offer the challenge and reward of engineering careers to thousands of young men. For them there will be the satisfaction of participating in an important and skilful profession and the deeper satisfaction of contributing to the strength and prosperity of our nation.

For over 65 years, Canadian General Electric has engineered and manufactured much of the electrical equipment that has played such a vital role in making this country one of the most highly electrified in the world.

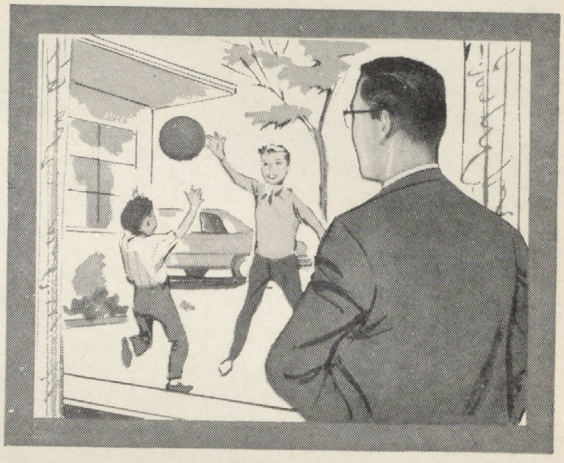

Progress Is Our Most Important Product

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity

In 5 years

...what?

Five years may see a big change in your responsibilities. Five years may see a big change in your life insurance needs. For these very reasons, Sun Life of Canada offers its *new* ***ADJUSTABLE POLICY***, the policy that gives you four options at the end of five years so that you can decide what type of life insurance coverage best suits you *at that time.*

For example, will you still be insurable? One of the options offers you increased coverage with no further medical evidence . . or . . **Will you want a larger income for your retirement years?** Another option allows you to change your policy to an endowment at age 65 . . or . . **Will you want to reduce your premium outlay without reducing your protection?** Then you can change your policy to a lower premium, whole life policy . . . Or you also have the option of keeping your original policy — which will be fully paid for at age 65 — in effect. This plan may meet your personal and family insurance needs for a lifetime.

With its four valuable options, Sun Life's **Adjustable Policy** looks to your future and considers

- **your financial circumstances**
- **your family's protection**
- **your retirement income**
- **your insurability**

Let the Sun Life agent in your neighborhood put you and your family on the right road to security. **Why not ask him today for full details of this flexible new policy?**

ABOUT OUR COVER

The "montage" combines three paintings of various campus buildings by Campbell Tinning, R.C.A., commissioned by the Graduates' Society last year. The originals hang in the Martlet Room at Society headquarters, 3618 University Street. Graduates will recognize the Arts Building, top, the Macdonald Engineering Building, left, and the Strathcona Medical Building, right.

The McGill News is published quarterly by the Graduates' Society of McGill University and distributed to its members. The copyright of all contents is registered. Authorized as second class mail, Post Office Department, Ottawa. Please address all communications to: *The McGill News*, 3618 University Street, Montreal 2. Tel. VI. 4-6311.

Letters

Medicine at McGill

This note is to congratulate you and Dean Stevenson on your wonderful issue concerning medicine at McGill University. It was one of the best write-ups that I have seen for a long time. The choice of illustrations and explanations showed excellent judgment.

Now my first request is to order ten copies if available, so that I can enlighten some of my friends around Boston concerning such a great school. Secondly, why not put the issue in booklet form and send it to all colleges with pre-medical departments in the U.S.A. and Canada? Last of all, why not submit this interesting article to a popular magazine?

After reading it three times I decided to try and practice better medicine, bearing always in mind that I am also a McGill graduate.

Will appreciate hearing from you about the copies I have requested.

Henry M. Gahan, MD '35

Medford, Mass.

(Editor's Note: A personal reply has gone off to Dr. Gahan, but it might also be of interest to readers to know that Dean Stevenson has ordered a large quantity of reprints of the special report on medicine and is planning to distribute them in booklet form along the lines suggested by Dr. Gahan.)

I thoroughly enjoyed the Summer issue of The McGill News featuring Medicine at McGill. It is an example of excellent public relations making wonderful reading for many of my friends who never even saw McGill.

A local physician who graduated from the University of Toronto had to admit it was a good job.

Congratulations!

J. K. T. Ormrod, MD '43

Hartford, Conn.

(Extract of a letter from a former Holmes Gold Medallist).

I have glanced at the latest McGill News and think it is a wonderful issue and want to read all about the Medical School. There is a lot of equipment now that I don't understand and a lot of subject matter, too. Wonder if the course leaves out anything that we used to learn. I should think it would have to.

Med. '31

I am so delighted with the new number of The McGill News which came in yesterday I just *have* to write and tell you so, especially because I was the Editor of the McGill Outlook in 1898-99, and can look back over the years and "rejoice greatly"!

. . . "I think this issue is the finest you have ever sent out. I am a pretty good judge of such things. In a way, I am *still* editing the McGill Outlook.

Lucy Eleanor Jewett, BA '99

San Marino, Calif.

I should like to congratulate you on the extremely interesting number of The McGill News devoted to the McGill Medical Faculty.

The article was of particular interest to doctors but was most interesting to all graduates.

May I suggest that special numbers should be published in the future about some of the other faculties such as the Faculty of Engineering and the Faculty of Law?

(The Honourable Mr. Justice)
George S. Challies, BCL '35, MCL '47

Judges Chambers,
Superior Court,
Montreal.

McGill BSc, Toronto MD

Four years after graduation from McGill . . . my modest yearly contribution . . . demands a brief word of explanation. I have just this year graduated from medical school at the University of Toronto and hence my expenses until now have been considerably higher than they were in my undergraduate days at McGill.

However, I do very much enjoy the quarterly McGill News and the few graduate affairs I have had a chance to attend in Toronto, and will continue gladly to contribute what I can to the Alma Mater Fund.

Jonathan Feinberg, BSc '56

Toronto, Ont.

The McGill Story

I received my Spring edition of the McGill News a day or two ago and enjoyed it immensely. I always look forward to receiving it, as it keeps me abreast of the happenings at McGill and the activities of its graduates.

I read with great interest that an official book about McGill entitled 'The McGill Story' is due for release this Spring. I very much would like to obtain a copy of it and I would appreciate knowing when and where this book will be available.

Harry Smith, BSc/Agr '54

Guelph, Ont.

(Editor's Note: We do appreciate your remarks about the McGill News. The new book to which you refer, entitled "McGill: The Story of a University" will be available at the McGill University Bookstore in September. The cost per book is $5.00 and cheques or money orders are to be made out to the McGill University Bookstore. The address: 3416 McTavish Street, Mtl.)

Happy Memories

Very many thanks are due to (Mr. Alan D. McCall) as President of the Graduates' Society of McGill for including my niece and myself among the guests asked to the "Old Grads" Reunion May 29.

To me as an old-timer it brought back many memories; more than half a century has passed since I graduated and yet the same sense of belonging to Old McGill stays with me. Many, many thanks for the happy time you gave us.

(Mrs. Allan L.) Isabel Smith, BSc '05

Westmount, Que.

Tribute from Home Ec

I enjoy the McGill News and would not want to be without it. I may have told you before I am not a graduate of McGill — my Household Science training was at Lillian Massey School of Household Science, Toronto, but for 13 years I was Director of Extension Service, School of Household Science, Macdonald College, and carried on my work directly under the Extension Service Committee, McGill University, of which the late Colonel Wilfred Bovey was my immediate Chief.

I was interested in reading the note signed by Mr. A. Deane Nesbitt, BEng '33, Chairman of the Alma Mater Fund. Mr. Nesbitt is a classmate of my nephew, Hugh J. Gordon.

Best wishes for continued success in all your endeavours for McGill.

Hazel B. McCain (Miss)

Florenceville, N.B.

WHAT HEARS the MARTLET

The Darling of the Fairways

It didn't take too long for Judy Darling, BA '60, of Hudson Heights, Que., to distinguish herself. On Saturday, August 13, the 22-year-old golfing graduate came through to win the Canadian Women's Open golf championship at the Riverside Golf and Country Club, Saint John, N.B.

In defeating Mrs. Frank Stranahan of Toledo, Ohio in a narrow 1-up victory, Miss Darling became the first daughter of a former Open champion to win the six-day event. Judy's mother, Mrs. A. B. Darling, won the championship in 1936.

Newspaper reports describe Judy's winning six-foot putt as having "touched off a roar from the gallery of 2,000 spectators, the largest crowd ever to watch a golfing event in the Maritimes. Some of the fans wept at the finish."

Judy won the Duchess of Connaught trophy, which was held five of the last six years by Marlene Stewart Streit of Fonthill, Ont. Mrs. Streit did not participate this year.

McGill in the Congo

Recent events in the Belgian Congo, which have been making headlines everywhere, have affected the careers of at least two McGill medical graduates.

Dr. Philip Edwards, MD '36, Dip. Trop. Med. '45, of Dorion, Que., and Dr. John A. Davidson, BSc '28, MD '33, Ormstown, Que., are two of four doctors named to medical teams organized by the Canadian Red Cross on the request of the World Health Organization of the United Nations.

The teams will spend a minimum of three months in Africa to help combat an "acute and alarming shortage" of medical aid in the Congo as a result of the exodus of Belgian medical men during the independence riots.

Dr. Edwards, a tropical disease specialist, will be remembered as one of Canada's all-time greats in track and field. He won Olympic honours for Canada in 1936. While at McGill he also helped the University to capture five Intercollegiate track championships. He entered the Canadian Amateur Athletic Hall of Fame in 1950.

The 52-year-old Dr. Edwards, a native of British Guiana, now is on the attending staff and is the clinical parasitologist at the Royal Victoria Hospital. He lectures in medicine and clinical medicine at McGill and has offices at Queen Mary Veterans' Hospital as well as a post with the Department of Veterans' Affairs.

A Generous Donation

A recent announcement by Dr. F. Cyril James, Principal and Vice-Chancellor, emphasizes the value to McGill of the establishment of the George Boyd Webster Chair of Mining Engineering at the University.

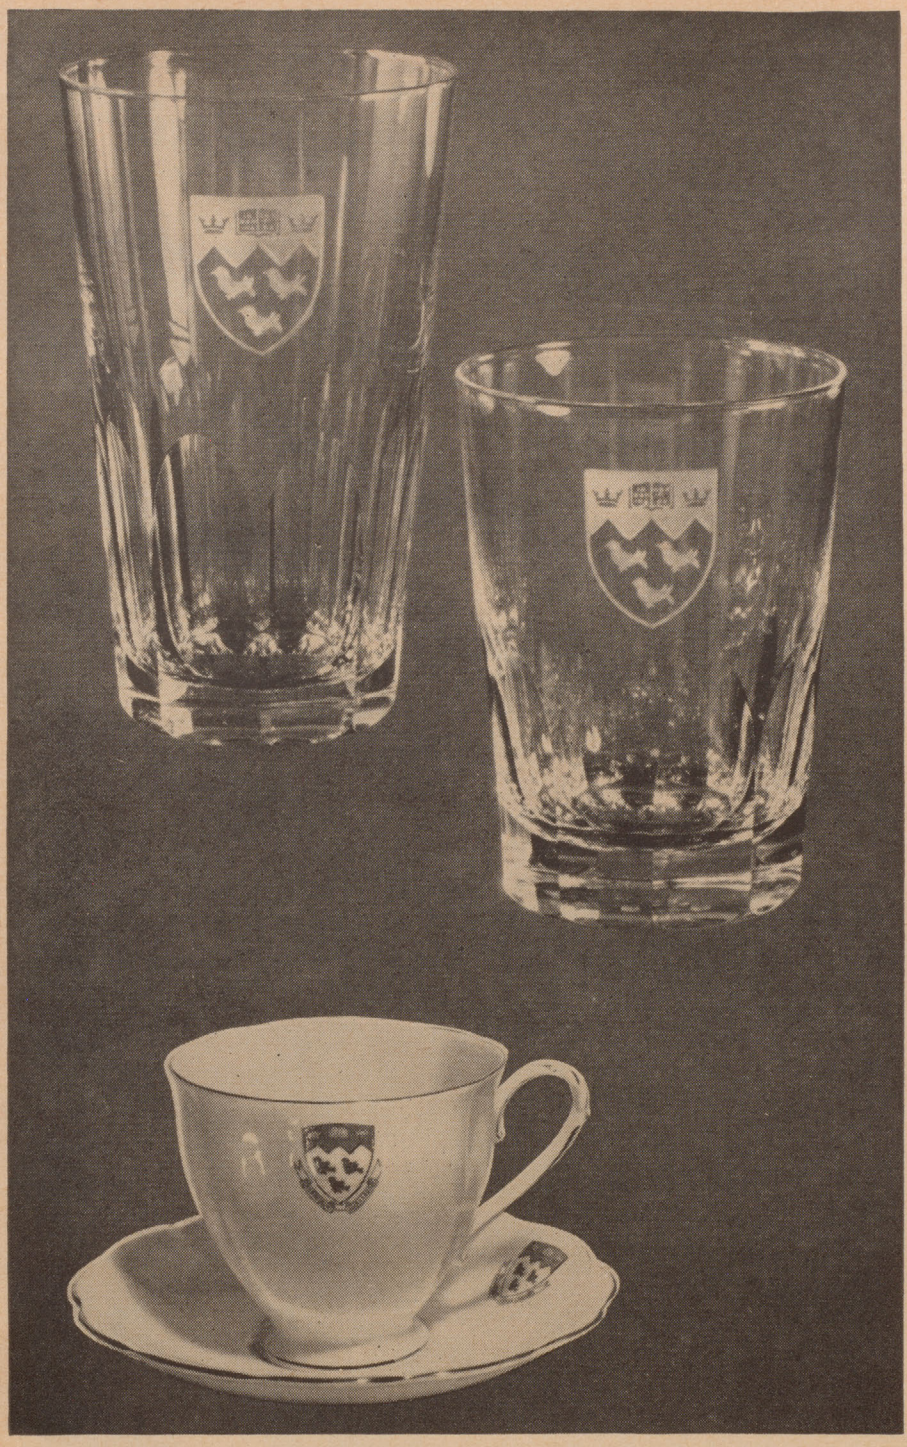

The man behind the scene in this case — the one who provided the donation of $350,000 to endow the Chair — George Boyd Webster, BSc '04, is a Toronto mining engineer and financier, who was born in Brockville, Ont., and who came to take Mining Engineering at McGill in 1900, after receiving his early education at Brockville and Ottawa Collegiate Institutes.

After graduation, he went to the western states and worked in many mining camps there, in British Columbia and Alaska. He returned to eastern Canada in 1909, and worked in Cobalt and the Northern Ontario mining camps until 1914. On the outbreak of war, he enlisted in the 1st Company Canadian Engineers. He was severely wounded at Ypres.

At the conclusion of the war, Mr. Webster was engaged in the mahogany business in West Africa and returned

A. Gordon Murphy, BSc '22, Chief Engineer for the St. Lawrence Seaway Authority, who received an honorary LLD degree at McGill last May, was the recipient of another honour earlier last Spring. As representative of one of the four entities involved in the St. Lawrence Seaway project, Mr. Murphy was presented with a metal plaque citing the project as the outstanding civil engineering achievement of the year 1960. The awards are made by the American Society of Civil Engineers. Mr. Murphy is seen above at the lectern acknowledging the honour at a ceremony held at Massena, N.Y. Others in the photograph are, left to right: A. A. Kennedy, Commissioner, the Hydro-Electric Power Commission of Ontario; Robert Moses, Chairman of the Power Authority of the State of New York; Frank Marston, President of the ASCE, who made the awards; Charles Molineaux, ASCE vice-president; and M. W. Oettershagen, Deputy Administrator of the St. Lawrence Seaway Development Corporation.

Gifts with the McGill crest

The tumblers are in full crystal by Val St. Lambert, with engraved crest—12 oz. size, $3.25 each; 15 oz. $3.75. The tea cup and saucer is of English Bone China, with the crest in raised enamel —$1.95. There are also breakfast cups and saucers, $2.95 each; Sugar and Creams, $2.95 the pair; Cigarette Boxes oblong, $3.75; Ash Trays, $1.50 each; Salt and Pepper Shakers, $2.75 the pair; and Bon Bon Dishes, $1.25 each.

at Mappin's

1000 ST. CATHERINE ST. W., MONTREAL

JEWELLERS & SILVERSMITHS

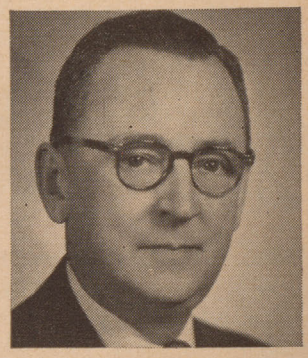

to Canada in 1932. Back home, he was associated with T. A. Richardson in mining finance in such companies as Central Patricia, Broulon, Omega and Kerr Addison, of which he was the first president. During the Second World War, he was Assistant Oil Controller and subsequently became engaged in the oil industry in Alberta, in which he is still active.

Mr. Webster's generous donation will make it possible for McGill to extend the University's scientific work and teaching in an area which has become of increasing importance to Canada through the widespread search for oil and mineral deposits, and their economic extraction and processing.

Graduate Heads E.I.C.

This year's president of the 20,000-member Engineering Institute of Canada is George McKinstry Dick, BSc '24, of Sherbrooke, Que., Chief Engineer of the Canadian Ingersoll-Rand Co. Ltd.

A native of Scotland, Mr. Dick came to Canada as a youth and five years

George McK. Dick

later, in 1915, he joined the Ingersoll-Rand organization at Sherbrooke as an apprentice. In 1920 he obtained leave of absence to study at Bishop's College, Lennoxville, Que., and at McGill University, where he graduated with honours. He was a British Association Medallist, and a holder of the Babcock Wilcox Scholarship.

On his return to Ingersoll-Rand he served as Chief Hoist Engineer and pioneered the design of many mine hoists used in Canada today. During the First World War he was a designer of special war-time manufacturing equipment and in the Second World War served as Chief Engineer of Sherbrooke Pneumatic Tool Company — an Ingersoll-Rand subsidiary — and as Technical Assistant to the Works Manager of the parent company. He has been Chief Engineer since 1952.

Mr. Dick is a founder and Charter Member of the Eastern Townships Branch of the Institute and was its first Chairman. He has served as a National Councillor and Vice-President of the Institute. His other professional affiliations include membership in: The Corporation of Professional Engineers of Quebec; the Canadian Institute of Mining and Metallurgy; Canadian Pulp & Paper Association and the British Association for the Advancement of Science.

He is a member of the St. George's Club, Sherbrooke, past-president and member of the Sherbrooke Y.M.C.A., and a Governor of the Sherbrooke Hospital. Keenly interested in education, Mr. Dick is a member of the Advisory Committee of the Faculty of Science of the University of Sherbrooke. He is married and has one son, James, BEng '56 who, like his father, attended both Bishop's and McGill University.

Citation for a Graduate

It has been brought to our attention that a McGill graduate was among seven women distinguished in the fields of education, law, foreign affairs and population problems, honored by Smith College, Northampton, Mass., at its June convocation.

She is Dr. Vera Lee Brown (Mrs. John H. A. Holmes) BA '12, MA '13, Professor Emeritus at Smith and authority on the history of the Western Hemisphere, who received an Honorary Doctor of Literature degree. A native of Fredericton, N.B., Dr. Holmes is married to a former Dean of Christ Church Cathedral in that city.

After graduation from McGill, Dr. Holmes was a sessional lecturer here for four years, but her main contribution was made at Smith, as her Honorary Degree citation testifies:

"By birth a Canadian, by interest a student of the Americas, and by instinct a citizen of the world, you have ever sought to expand the horizons of your colleagues and students. In an age of still-virulent nationalism, your scholarship has eloquently defined the larger elements of unity in the history of the Western Hemisphere. For 34 years you taught history at Smith College where your firm independent judgment, ever-widening range of historical interests, and infectious but never partisan enthusiasm for the teaching program of your department were a source of inspiration and delight to your colleagues. As a graduate of McGill and Bryn Mawr, you gave much to this College; it is high time that we claimed you for our own."

Oil Executive Retires

Pennsylvania's loss is Vermont's gain. When David G. Proudfoot, BSc '20, vice-president, South Penn Oil Co., officially retired recently, he announced that after a six month's tour of Europe, he and his wife would return to their summer home in Vermont, where they plan to settle down.

Mr. Proudfoot, who is a member of DKE Fraternity, played a leading role in the organization of the McGill Society of Pittsburgh.

His retirement brought to a close a 22-year association with the South Penn Oil Co., which he had joined in 1938 as a Lubrication Engineer. He became Industrial Sales Manager in 1942 and in 1954 Manager of the Branded Marketing Department. In 1955 he was elected a vice-president of the company.

Dental Dynasty

McGill, Harvard and Buffalo are represented in one family containing three generations of dentists. Recently, the Hartford (Conn.) Dental Society honored the three men who have made dentistry their "family business" and they were photographed together as Picture of the Month in the magazine Oral Hygiene, May 1960.

Our own representative in the group is William G. Downes III, D.D.S. '57, who is practising in West Hartford, Conn. His father, William G. Downes, Jr., Harvard, '30 and grandfather, William G. Downes, Sr., Buffalo '01, practice together in Hartford.

Close to 40 members of the class of Law, 1950, attended their annual reunion in Montreal Saturday, May 14. Three of the four permanent members of the Faculty of Law who taught the class were also present at the dinner. In the photo above, taken just before the proceedings got under way are, front row, left to right: J. B. Crepeau; His Honor Judge Raphael Beaudette; Prof. Louis Baudouin; Prof. Stuart LeMesurier, former Dean of Law; Mrs. Robert Therriault (Betty O'Toole); E. E. Saunders; Mrs. Philippe Casgrain (Marie Claire Kirkland); Prof. F. R. Scott; Harry Blank; Maurice Garmaise. Back row, left to right: Paul Brown; Leon Payette; Howard Farley; Hunter Wilson; Gerald Ryan; John Ewasew; Paul J. Lebrooy; J. B. Campbell; Ross McAllister; Jean Langelier; Paul F. McDonald; Albert L. Bissonnette; John Fetherstonhaugh; Matthew S. Hannon; John Bryson; Neil Phillips; Ralph A. Cohen; W. Desmond Thomas; Bernard Rubenstein; John Claxton. Also present but not in the photo: John Piper; Joseph Porteous; K. C. Mackay; Mrs. K. C. Mackay (Louise Boucher); James A. Soden.

After 40 years

The city of Sault Ste. Marie bade a fond farewell recently to one of its doctors who had practiced there for 40 years. Dr. John McDonald, M.D. '17, received warm tribute from his colleagues and friends upon his retirement and departure to Montreal, where he has chosen to live.

Mr. Williams S. Wilson, 210 McGregor Ave., the Sault, was kind enough to send us several clippings about Dr. McDonald from The Sault Daily Star.

At a farewell banquet sponsored by the local Medical Society, Dr. McDonald was presented with an inscribed silver tray. Appropriately enough, the presentation was made by the 11-year-old Hargraves quadruplets — all girls — four of the hundreds of babies he had delivered during his practice.

In paying tribute to Dr. McDonald just before the presentation, Dr. W. E. Sullivan, president of the Sault Society had this to say:

"Dr. McDonald came to Sault Ste. Marie in January 1920 and he had engaged in general practice since that time.

"He has been very active in sports during his stay in the Sault. He had been an active member of the Country Club, a curler, one of the senior members of the Algoma Rod and Gun Club, an enthusiastic skier and an ardent photographer. Dr. McDonald was very prominent in sports fields, reaching the Dominion Intercollegiate finals in wrestling in one year.

"Although Dr. McDonald made many contributions to the practice of medicine in the Sault, one of his most individual and rare achievements was the delivery of the Hargraves quadruplets. It is only fitting in recognition of this accomplishment, which comes to a medical doctor once in 705,000 deliveries, that these wonderful children present the farewell gift of the Sault Ste. Marie Medical Society to their family doctor."

Hackett for Kennedy

For the next few months, David Hackett, Arts '50, will be busy, to put it mildly. Boston-born Dave, who starred in football and hockey while attending McGill, is a member of the public relations staff of United States Democratic Presidential Candidate Senator John F. Kennedy. He was with the Kennedy organization in Los Angeles when the senator took the Democratic convention by storm to win the nomination.

WHERE ARE THEY NOW?

(In an attempt to bring its records up-to-date, the Graduates' Society is trying to locate the whereabouts of the following graduates of the Faculty of Commerce. The dates refer to the year of graduation. Anyone having information which may help to trace these lost graduates is invited to fill out the form below and return it to Records Department, The Graduates' Society of McGill University, 3618 University Street, Montreal 2, Que. Your help and co-operation will be appreciated.)

1922: Stanley G. Dustan, L. W. Mullen, Cyril Boyd Smith, Donald G. Wilson.

1923: Jacob Louis Magid, Arthur Hoyt Pepin, J. Ross Simpson.

1924: Henry William Hart.

"A Bringer of New Things"

By F. Cyril James

As a result of the Liberal victory at the polls last June, the Honourable Jean Lesage came into office as Premier Ministre de la Province de Québec — and to the best of my knowledge Quebec has thereby established a Commonwealth record. I know of no other case in which four premiers have succeeded one another in office during a period of less than twelve months.

In previous issues of the *McGill News* I have touched upon the kaleidoscopic changes in the relationship between the universities and the Provincial Government which have resulted from this succession of leadership. The Honourable Paul Sauvé, whose untimely death the whole Province lamented last Christmastide, had indicated his intention to develop policies of university support much more generous than those enacted by his predecessor, the Honourable Maurice Duplessis. After the death of M. Sauvé, his successor, the Honourable Antonio Barrette, set out to implement those promises and, during the early weeks of 1960, representatives of the universities worked in close collaboration with representatives of the Provincial Government to hammer out the details of a series of bills that were subsequently enacted. I pointed out at that time that this new legislation, taken as a whole, constituted a foundation on which universities of Quebec could confidently plan to build their future development.

Moment of Uncertainty

The change of government last June created a moment of uncertainty during which it seemed possible that the work of last winter would have to be tackled anew but, on July 22, the new Prime Minister called together the representatives of all the universities and classical colleges in the Province to assure them that his government intended to implement during the present fiscal year all of the undertakings of the earlier legislation in regard to grants for current operating expenses. In regard to financial aid for the construction of new buildings, he expressed in regard to Bill 3 criticisms which paralleled those of many people familiar with fiscal policy and the sensitivity of the money market. Separate bond issues to be floated by individual universities for particular projects, with the overall guarantee of the Provincial Government, constitute an expensive pattern of financing: the same results could be achieved more economically by other means so that this part of the legislative programme is to be amended at the next session of the legislature.

During the course of his discussion with the representatives of the universities, M. Lesage underlined the intention of his government to provide as generously, if not more generously, for university development than had his predecessors in office. He also indicated his desire to remove, as far as is possible in the modern world, the problems of education from the realm of political controversy. To that end, he asked Monseigneur Lussier, the Rector of the University of Montreal, to serve as Chairman of an *ad hoc* committee, of which I am a member, to draw up plans for the establishment of a non-political universities commission which shall, from time to time, make recommendations to the Government regarding the financial needs of institutions of higher education throughout the Province.

All of these plans and projects must be crystallised in legislation, but there is every prospect that McGill University — with reasonable support from the Provincial Government, from the Alma Mater Fund, from the McGill

(*Continued on page 25*)

Early in February Dr. F. Cyril James, Principal and Vice-Chancellor, visited Jamaica at the invitation of the island government to sit on the Triennial Advisory Committee of the University College of the West Indies. While there, Dr. James was guest of honour at a cocktail party given by the McGill Society of Jamaica. The photo above, taken during the event, shows the Principal with the Branch executive, left to right: Hugh C. Miller, BSc (Agr) '46; Dr. W. S. Robinson, DDS '50; Dr. L. E. Arnold, MD '30; Dr. James; Dr. Ivan E. R. Parris, MD '28; H. Clinton Douglas, BSc (Agr) '55; R. A. Foreman, BSc (Agr) '47.

THE CAMPUS

Summer Schools

The Summer School of Education at Macdonald College attracted over 300 teachers from five provinces in eastern Canada, and many parts of the United States, when it opened on July 4. They came to improve their teaching qualifications and, in some cases, to work towards degrees and diplomas in education. All courses in the Summer School, which was under the direction of Prof. C. W. Hall, were sponsored jointly by the Institute of Education of McGill and the Department of Education of the Province of Quebec. They were divided into four main groups: profession instruction, designed to raise the qualifications of teachers with only one year of training; courses for special class teachers, directed to the problems of the slow learner and the mentally handicapped child; a workshop for teachers of science, to develop new ideas and techniques in school science teaching; and the academic school, which grants diplomas in academic work as well as the degree of MA in education.

At the same time Macdonald College operated a French Summer School, whose courses aimed at qualifying Quebec Protestant teachers as French specialists, but which accepts all teachers wishing to improve their command of the language. More advanced students had to use French at all times.

On McGill Campus

The same held true of students at the French Summer School held on the McGill Campus itself. Men and women came from Canada and the United States to study and speak French at the University from the end of June until August 10. During that time, they lived at Douglas Hall, speaking only their adopted tongue. Most of these students were university sophomores and high school teachers, who came to perfect their fluency in the language. Prof. Jean L. Launay, chairman of McGill's department of Romance Languages and Humanities Group, was the director, with a staff of 14 university professors.

The McGill School of Social Work Alumni Association held a reunion breakfast during the Canadian Conference on Social Work in Halifax in early June. There were 30 graduates at the breakfast. The cheerful group above includes, left to right: Prof. L. T. Hancock, Director of the Maritime School of Social Work; Dr. John J. O. Moore, Director, McGill School of Social Work; Prof. Guy Rocher, Laval University School of Social Work and now Director of the University of Montreal's Department of Sociology; Prof. C. Hendry, Dean of the University of Toronto School of Social Work; Miss Joan Smith, Assistant Professor, Maritime School of Social Work; and Miss Helen Tuck, Professor, McGill School of Social Work.

Scholars for McGill

McGill University will receive 27 scholars from various parts of the Commonwealth this fall, as her share of the first students to win Canadian Commonwealth Scholarships. The majority of the scholarships, which are for two years, are given to students taking post-graduate work. The grants cover transportation costs, tuition fees and living expenses while the student is in this country. Altogether 104 Commonwealth Scholarship winners will be coming to universities across Canada, the largest number of these to study the physical sciences, and the others to continue their work in the humanities, and the social and biological sciences.

Research in Barbados

Part of the $2 millions bequest left to McGill by Major James H. Brace will be spent in research in Barbados on methods of purifying saline water so it can be used in agriculture, and related problems. Prof. R. E. Jamieson, formerly dean of engineering and now director of the Bequest, and Dr. H. G. Dion, dean of the faculty of agriculture, hope to have a new experimental station in Barbados in operation by the end of the year. Researchers will join McGill scientists already at the marine biological laboratory of the Bellairs Research Institute in Barbados and the tropical climatological station at Waterford, which is investigating controlled production of sugar cane.

Woodrow Wilson Fellows

Seven McGill graduates of 1960 from the Faculty of Arts and Sciences have been awarded Woodrow Wilson National Foundation Fellowships. These awards are for students who

plan to go into university teaching, and cover the first year of their graduate work. The winners, and their special fields, are Dorothy Blake, BA '60, of Jamaica (English), Kwok-Hung Chan, BSc '60, of Hong Kong (Physics), John H. Galloway, BA '60, of Montreal, (Geography), Lorna Green, BSc '60, of Sillery, Que. (Chemistry), Lawrence H. Officer, BA '60, of Montreal (Economics), Howard Roiter, BA '60, of Montreal (English), and Rajmund Somorjai, BSc '60, of Ottawa (Physics).

These students will spend the next year working for their graduate degrees at universities in Canada and the United States.

Bryce Weir in USSR

Bryce Weir, MD '60, of Montreal, who led his class in medicine at McGill this year, was chosen by a special committee of University officials under the chairmanship of Dr. Cyril James, to be the Canadian delegate at a two week student seminar held in the Soviet Union June 30-July 16, at Gursuf in the Crimea. The Seminar, on "Science, Education, Culture and Student Government", was sponsored by the USSR Student Council, and McGill was the only Canadian University to accept the Russian invitation. Dr. Weir, a past president of the Students' Society, also gathered information about a Canadian visit by five Russian students this fall, and met with student leaders in Amsterdam, Copenhagen, and West and East Berlin.

Farmers at MacDonald

"Better Farming Day", held at Macdonald College July 6 by the College's Faculty of Agriculture, attracted a crowd of 1,250 farmers and their families, who came to watch demonstrations of new scientific research and its effects on farming. They were treated to a barbecue lunch and some short talks outlining the advantages available to the farmer through research. The demonstrations covered a variety of subjects, from the control of potato blight to winter wheat farming methods, and the women had a program designed especially for them, which highlighted kitchen planning and cultural growth of different types of berries.

Top Architecture Award

Sarina Altman, BArch '60, won 2nd prize in the Pilkington Travelling Scholarship, the top Canadian award in architecture, with her design for a music centre for Montreal, it was announced at the Royal Architectural Institute of Canada meeting in Winnipeg, June 1. A new Canadian, Miss Altman was born in Romania, and emigrated to Israel in 1951, where she attended the School of Architecture at Haifa. She came to Canada in 1957 and entered the fourth year at the McGill School of Architecture in 1959.

November	**5**	**McGill at Queen's**

Entrance Scholarships

McGill University has awarded a record 195 entrance scholarships for the 1960-61 season. Of the total, 140 went to students from Montreal and district. The major awards, for students outside Montreal district with financial need, extend to the full amount of tuition, board and residence.

In announcing the awards, Prof. J. R. Mallory, chairman of the University scholarships committee said:

"We are especially pleased that so many outstanding scholars from every part of Canada have selected McGill as the University of their choice and that they will be enabled to attend the University by means of these scholarships."

Unique Fellowships

McGill and Princeton University are sharing in a unique Fellowship program for pre-doctoral study which has been established in honor of Harold H. Helm, Chairman of the Board, Chemical Bank New York Trust Company and Chairman of the Executive Committee of the Princeton Board of Trustees.

Funds for the Harold H. Helm Fellowships have been provided by an anonymous Canadian donor and may be awarded a McGill graduate for study at the Princeton Graduate School or a Princeton graduate for study at McGill's School of Graduate Studies or in one of the professional schools. As the plan gets under way it is expected that several fellowships will be awarded each fall providing for tuition and a further stipend ranging from $1400 to $1800. They are for one year but may be renewed.

The awards will be made by a joint committee consisting of Dr. David L. Thomson, Dean of the Faculty of Graduate Studies and Research at McGill and Dr. Donald R. Hamilton, Dean of the Princeton Graduate School.

For the year 1960-61, one award has been made to John Gordon Cragg, BA '58, (BA Cambridge, '60), in Economics. For purposes of the Fellowships, the term 'McGill graduate' means the holder of a McGill Bachelor's degree; McGill graduates who took their B.A. elsewhere are not eligible.

THE FACULTY

DR. JOHN STEWART MARSHALL, Macdonald Professor of Physics, and director of the Meteorological Laboratory, has been appointed chairman of the newly established Department of Meteorology. Dr. Marshall, born in Welland, Ont., studied at Queen's University and then went on to Cambridge, where he obtained his PhD. He is a member of the Royal Society.

DR. JAMES WILKINSON MILLER, Macdonald Professor Philosophy, has been awarded the chairmanship of the Philosophy Department. A Phi Beta Kappa, Prof. Miller received his BA degree at the University of Michigan and his MA and PhD at Harvard. He served as chairman of the philosophy department at William and Mary College, in Virginia, and in 1951 was named its acting president. He came to McGill in 1955, after representing the United States at the first Pakistan Philosophy Congress in 1954.

PROF. F. KENNETH HARE, present chairman of the Geography Department, has been named Professor of Geography and Meteorology in the new Department of Meteorology. He remains also as director of the Arctic Meteorology Research Group and of the Knob Lake Station of McGill.

Appointed assistant director of the Institute of Islamic Studies is DR. CHARLES JOSEPH ADAMS, who taught at Princeton before coming to McGill in 1957.

A director has been appointed for the university's Computer Centre. He is DR. GLEN BACH, formerly with the University of Birmingham.

DR. PETER BRIANT, from 1957 until this year a lecturer and research associate at the University of Michigan becomes assistant professor of accounting.

In the School of Commerce, DR. W. H. PUGSLEY has been promoted from assistant professor to associate professor.

Three new assistant professors are: DR. LLOYD CLARK (geological sciences); DR. IRVING MASSEY (English); and DR. WILLIAM MALCOLM WILLIAMS (metallurgical engineering).

DR. WALDEMAR ESI JACKSON takes up the post of Professor of Plant Pathology at Macdonald College and MR. ARCHIBALD R. C. JONES becomes assistant professor of woodlot management at the Morgan Arboretum.

PROF. C. WAYNE HALL, Institute of Education, Macdonald College, has accepted an assignment abroad under a Canadian foreign aid program. He has been posted to Teachers' College at Lagos, Nigeria under the program, through which Canada offers assistance to Commonwealth countries in the training of teachers.

DR. IRVING BRECHER (BA '43), associate professor of economics, left Montreal early in July to take up the position of joint director of the Institute of Development Economics in Karachi, Pakistan, for a 12-month period. He is the first Canadian to be chosen for this job in the brief three-year history of the institute, a project financed by the Ford Foundation in

Dr. Irving Brecher

co-operation with the Government of Pakistan. The institute engages in research on the economy of Pakistan with a view to aiding in the promotion of the country's economic development and carries out a training program for promising young Pakistani economists who wish to follow either a university or government career.

A former assistant professor of biochemistry at Columbia University, DR. SAMUEL SOLOMON (BSc '47, MSc '51, PhD '53), has been appointed director of endocrine research in the McGill clinic of the Royal Victoria Hospital, associate professor of experimental medicine and associate professor of biochemistry.

DR. WILLIAM STANFORD REID, associate professor of history and Warden of Douglas Hall, was one of six distinguished Canadians elected as "fellow" of the British Royal Society of Arts.

DEAN JAMES MCCUTCHEON, Faculty of Dentistry, has been promoted from the rank of associate professor to professor of prosthetic dentistry.

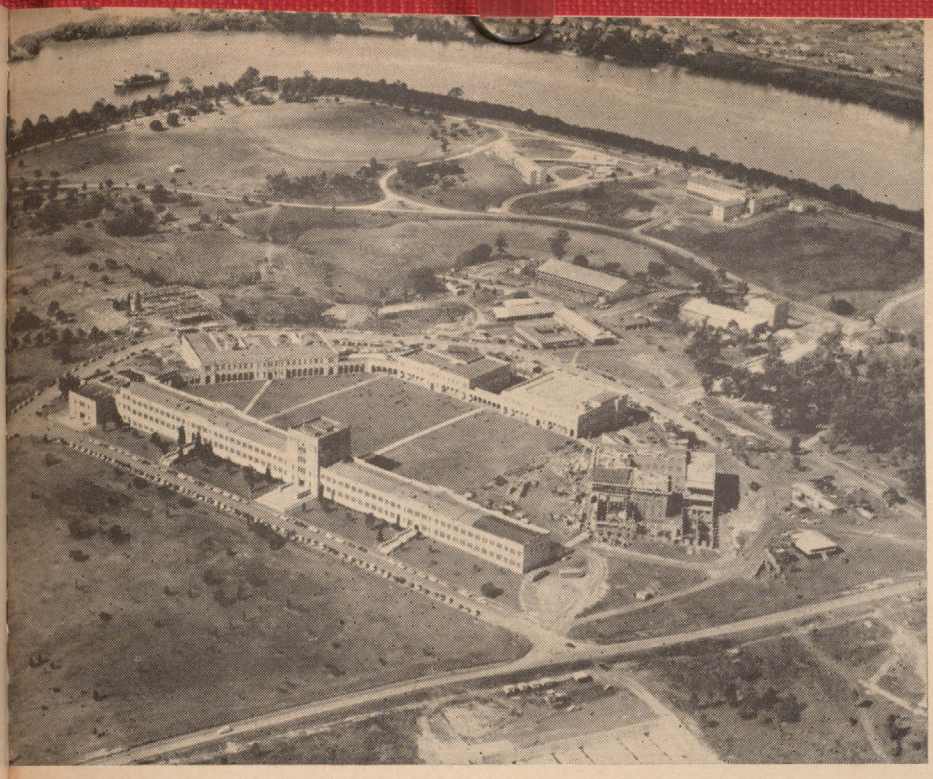

The director of McGill University Museums, MRS. ALICE J. TURNHAM, BSc '34 was re-elected president of the Canadian Museums Association at its annual meeting in Montreal.

PROF. COLIN W. STEARN, Department of Geology, has been appointed assistant dean of the Faculty of Graduate Studies and Research. Prof. Stearn, who joined the McGill staff in 1952, was educated at Hillfield School, Hamilton, Ont., McMaster University and Yale University.

PROF. EDWARD ROSENTHAL (BSc '37, MSc '38), who joined the McGill staff as lecturer in 1940, has been named chairman of the Department of Mathematics, succeeding PROF. HERBERT TATE, who retires. Prof. Tate came to McGill in 1920, has served as chairman of the department since 1948, and he will continue his teaching at McGill on a post-retirement basis. Prof. Rosenthal was named assistant professor in 1945, associate professor in 1948 and professor in 1954. In addition to his McGill degrees, he holds the PhD degree at the California Institute of Technology. Prof. Rosenthal spent a year at the Princeton University Institute for Advanced Study in 1947-48. He has published 14 scientific papers on various aspects of number theory, his specialty.

DR. L. P. GELDART, PhD '41, has been appointed the first incumbent of the new George Boyd Webster Chair of Mining Engineering (see What Hears the Martlet). A Canadian by birth, Dr. Geldart has been chief geophysicist of the foreign department of California Exploration Company. He received his early education at Mount Allison University and after post-graduate work at McGill, he studied meteorology at the University of Toronto and later obtained his professional engineering degree in geophysics at the California Institute of Technology. From 1942 to 1947, Dr. Geldart was head of the physics department at Acadia University.

An aerial view of Queensland's beautiful new campus beside the Brisbane River.

The Hon. T. W. L. MacDermot, BA '17,

Canada's High Commissioner in Australia,

records his impressions

as McGill University's

delegate to

QUEENSLAND'S FIFTIETH BIRTHDAY

During three days last May, the 25th, 26th and 27th, the University of Queensland celebrated its Jubilee or fiftieth birthday. It was a remarkable three days in a number of ways. At registration, there were gathered a large and obviously excited and anticipative crowd of many of the most famous names in the academic world of Australia; Vice Chancellors (or Principals or Presidents as we would call them) from the universities; Chancellors, members of the judiciary, scientists, scholars in every field. In addition, there were delegates of 68 universities from all parts of the world.

Informality and Friendliness

If there were any strangers in this "mob", and there was a sprinkling, they very soon lost that status. For one of the many unusual and most attractive features of the celebrations was the blend of formality and dignity with informality, friendliness and warmth that marked the series of organized receptions and exercises that were to follow. The Lord Mayor, Alderman T. R. Groom, the Premier, Hon. S. F. R. Nicklin, and the University, led by the Vice-Chancellor, Professor F. J. Schonell and the Governor of the State, Sir Henry A. Smith, gave receptions or garden parties. There was an official welcome with an Oration by one of the distinguished graduates of the University, Sir Robert Lowe Hall, Economic Adviser to Her Majesty's Government in the United Kingdom; a University banquet; a buffet luncheon with the Senate and the Professional Board; and, what was perhaps the most splendid ceremony of all, a Conferring of Degrees.

In some mysterious way, which those who know Queensland would probably attribute to the peculiar genius that State has for making its visitors welcome, each of those occasions was stamped with its own particular quality. But they all had something in common: it was the feeling — and it grew in strength as the Jubilee progressed — that everyone was both enjoying him and herself and at the same time rejoicing in the fortunes of the University as well.

At the Conferring of Degrees, six Doctorates of Law, and three of Science, were conferred, the list including the Governor, the Premier and a former Prime Minister of Australia. All the rest were those whose names represented the real leadership of higher education in Australia.

This was followed by the presentation to the Chancellor, Sir Albert Axon, of delegates from 68 universities, in order of the date of their foundation and covering nine hundred years, from the founding of Bologna in 1088 to that of Monash University in Victoria last year, and coming from points as far apart as Yugoslavia and the Philippines, the United States and New Zealand, the United Kingdom and Pakistan, South Africa and Malaya. Five Canadian universities — those of British Columbia, Saskatchewan, Queen's, Laval and McGill — were amongst them.

Unusual History

The University whose fiftieth birthday called together and evoked the admiration of such a brilliant company, has had quite an unusual history. I suppose all universities worthy of the name have been tried in the fires of adversity at some stage in their story, but since 1910 Queensland seems to have survived more than its fair share. Beginning with about 60 students and four professors in 1911, it almost immediately ran into World War I in which 154 of its staff and student body served; of these 32 gave their lives. Briefly recovering from this ordeal, the infant institution was next caught up in the Depression. This reduced its income and cut its staff to about 40. But it struggled on. Housed in handsome, but inadequate quarters in the middle of the city of Brisbane, it acquired the magnificent property on which it is now solidly installed, through the generosity of Dr. J. O'N. Mayne and his sister, and building operations were instituted when the State Government guaranteed a sum for that purpose.

Then there came the Second World War. By this time the university had grown to over 1500 students and while it took this war as seriously as the first, it emerged ready, if not fully equipped, to start on its next phase of development. This was not easy. The new buildings were halted in 1942, and the students and staff, now risen to between 3,000 - 4,000, had to be accommodated in scattered and inadequate quarters. The hungry forties, however, were followed by the fifties when the needs and achievements of the university, the rapid growth of the economy and population of Queensland itself, and the growing awareness on the part of the State and Federal Governments of the necessities of the case, combined to bring about a momentous change in the financial and academic fortunes of the institution. Following the report of the Murray Commission in 1957 — a turning point in the history of all Australian universities — and the opening up of new sources of income, the St. Lucia buildings were pushed on, and the university marked its Jubilee with "heightened prestige and a re-born unity". It even survived what its historian discreetly describes as "a public controversy in which its academic independence appeared to be threatened", and to survive that threat perhaps is the hall-mark of a real university.

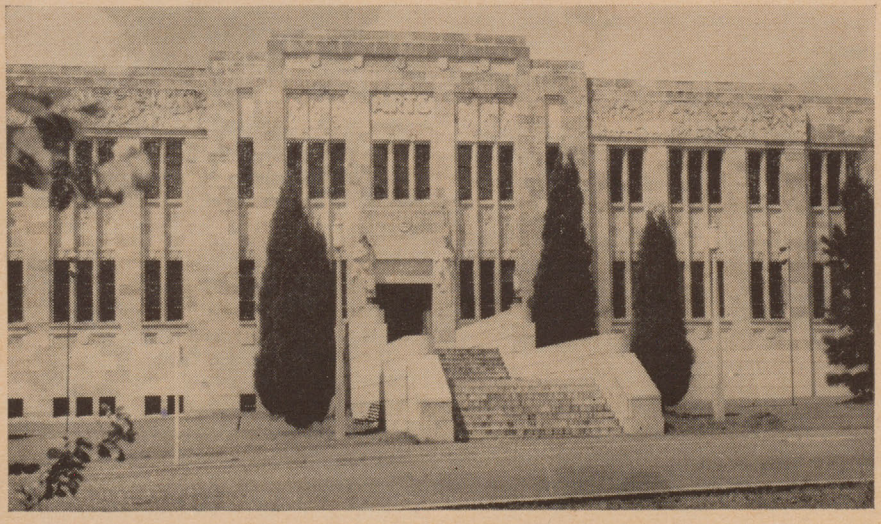

Much to Celebrate

The University of Queensland, then, had much to celebrate last May: not only the tributes brought to it by its fellow universities in Australia in particular, and from the wide world as well, but the sense of having met and vanquished long years of straitened circumstances; the pride in its graduates; the belief or hope that it has now established itself firmly enough to command the financial and moral support of its State and those individuals who can afford to be benefactors; and finally the practical and aesthetic satisfaction of the buildings of St. Lucia, all almost entirely constructed from the handsome natural granite, sandstone and marble, and the distinctive hardwoods of Queensland. These are not yet finished, but the sweeping skyline of the main building, the long colonnades or cloisters that surround the Great Court and the supporting halls and colleges that are springing up in all directions over a campus of 250 acres, made a spectacular backdrop to the scarlet, crimson, orange, emerald, silver, black and many other coloured hoods and gowns that were assembled.

Everywhere throughout this rising edifice of learning there are recorded by the chisel of a master workman, John Muller, the signatures of learning, thought and wisdom over the ages: statues of writers from Homer to Chaucer and Browning, lawmakers from Justinian to Blackstone, philosophers like Plato and Aristotle, texts from the great masters of literature, grotesques marking the types and individuals who have made Australia. On the capitals of the innumerable columns surrounding the courtyard are carved the coats of arms of the universities of the world (McGill, of course, among them), a perpetual and intriguing challenge to specialists in heraldry and sciolists in university lore.

Since 1948 the Faculties, beginning with Arts, Commerce and Law, together with supporting Departments like the Library, External Studies and Physical Education, have been moving out to St. Lucia, and today practically all students come there for some subjects of their courses. The residential colleges are also being transferred to the same area, and housed in buildings of attractive variety of design.

It was a great pleasure, as well as honour, to represent McGill on this occasion and to join with scores of others in wishing the University of Queensland many more Jubilees as it marches on in the world parade of the great institutions of higher learning.

A portion of the main building showing entrance to Arts Faculty

"INTEREST AT ALL TIME HIGH"

says TED TAYLOR, BA '49, Graduates' Society Field Secretary, following recent branch visits.

Activities in the branches and interest in McGil are at an all time high point. Ths was forcibly brought home on my recent trip to the west coast and on the few branch visits I have made closer to Montreal. There are as many different types of program as there are branches and the more graduates who show an interest, the more varied the activities.

There are several districts where there are now a sufficient number of graduates to form a new branch and this is being done as quickly as is feasible. On May the seventh a new branch was organized in Paris, France, and they have already started on a program which will get under way in the early Autumn. There are two or three other areas where the local graduates have already started forming branches so that it will not be long before our total rises far above the present fifty-six.

This spring has been an exceptionally active one with meetings from Newfoundland to Victoria British Columbia, as well as overseas and throughout the United States. While the Field Secretary was by no means present at all these meetings, the following will be of interest to those living in the districts which he has visited. At most branches he gave an outline of happenings at McGill and in the Graduates' Society this past year and plans for the future. He also showed three films: "Education is Everybody's Business", "McGill Convocation 1959", and "Winter Carnival 1960".

Toronto, April 7, 1960

This meeting was at a stag dinner held at the Albany Club. There was a large turnout of about 90 graduates of all vintages and faculties. The very short business meeting was followed by the presentation of an award of merit to Eldon Spencer by E. P. Taylor, for the magnificent results he obtained as local chairman of the Alma Mater Fund in 1959. The highlight of the evening was an address by Dr. Claude Bissell, President of the University of Toronto. Of particular interest to McGill graduates was Dr. Bissell's statement that U. of T. are instituting a program of annual giving which is completely based on McGill's Alma Mater Fund.

London, Ont., April 8, 1960

The annual meeting and reception of this branch was held in the Labatt's Employees Lounge. About forty-five persons were present for a most enjoyable gathering and an excellent buffet. After the annual meeting the Field Secretary said a few words concerning the status of the Quebec Universities relative to the Federal grants and showed three short films including the two now very popular "Convocation 1959" and "Winter Carnival 1960".

Pittsburgh, May 10, 1960

This was a small but most enjoyable dinner meeting at the University Club. The formal part of the meeting was confined to a very few minutes with brief remarks by Alan McCall, the President of the Graduates' Society, D. Lorne Gales the Development Officer and the Field Secretary. From the keen interest of this group it is not difficult to envisage great things next year.

Windsor, Ont., May 18, 1960

This spring meeting was a stag reception and dinner at which there was a very good turnout. The Field Secretary spoke for a few minutes on recent happenings at McGill and showed the films on Convocation 1959, and Winter Carnival 1960.

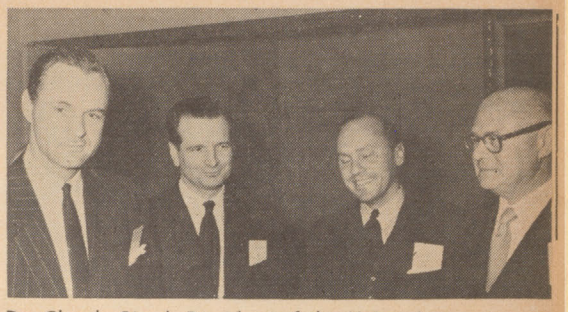

Winnipeg, May 25, 1960

Unfortunately, the annual meeting of this branch coincided with the Engineering Institute of Canada Conference. In spite of this there was a very enthusiastic turnout and the new executive has great plans for the future. After the dinner and a short meeting, the Field Secretary spoke and showed the films.

Regina, May 26, 1960

This evening reception and buffet was held at the home of Mr. Hugo Holland, the acting president. There was a keen group present ranging through the years from the class of 1902 to the class of 1959. Mr. Donald Black was elected president and his plans for the coming season will certainly set a high target standard for other clubs.

Toronto Branch

Dr. Claude Bissel, President of the University of Toronto, second from left, was guest of honour at the Toronto meeting April 7. With him are, left to right, Murray Fitzpatrick, BCom '43, John Kemp, BEng '48, immediate past president of the Branch, and E. P. Taylor, BSc '22, Honorary President.

Three members of the Toronto executive, left to right: John Kemp, Arthur H. Wait, BCom '33, president, and Elden E. Spencer, BCom '41, first vice-president.

London Branch

At its meeting April 8, the London branch elected its new executive, photographed above, left to right: Bruce McCuaig, BSc '50, vice-president, John Shields, BSc/PhysEd '49, treasurer, Lynn Hampson, BSc/PhysEd '42, vice-president, Ted Blake, BCom '49, secretary, George Hobart, BCL '52, president, and George Piper, BEng '51, assistant secretary.

Also active in branch activities are London graduates Alex Graydon, BA '37, BCL '49, John R. Houghton, BEng '35, Mrs. Houghton, Mrs. Lamb, Warden Hugh Lamb, BEng '40.

Ottawa Branch

One of the most successful functions of the Ottawa branch this year was a "Degustation de Vins" held April 22. At this function a special presentation of an Honorary Life Membership in the Graduates' Society was made to G. Gordon Gale, BSc '03, BSc '04, MSc '05, Honorary President of the Branch, seen above at the microphone. The presentation was made by The Hon. Mr. Justice G. Miller Hyde, BA '26, BCL '29, first vice-president of the Society, right. On the left is Robert L. McKenna, BCom '48, president of the branch, while Ralph M. Johnson, BEng, '49, first vice-president, can be seen between Mr. Gale and Mr. Justice Hyde.

Saskatoon, May 27, 1960

Dr. and Mrs. David Baltzan were hosts to the McGill graduates in Saskatoon and a very large number took advantage of the opportunity to renew old friendships. Unfortunately a large political meeting was called for the same night and this prevented an even larger gathering. This group has become rejuvenated recently and with the new executive swinging into action there are great things in store.

Edmonton, May 28, 1960

This branch held a reception and meeting at the Garrison Officers Club at which there was a very good turnout including Mr. Justice Hugh C. Farthing, the regional vice-president. Following the Field Secretary's remarks and the films there was an excellent buffet and everyone had a thoroughly enjoyable time.

Calgary, May 30, 1960

The reception and annual meeting of this branch was held at The Petroleum Club. After a brief meeting and the election of officers, the Field Secretary said a few words and showed the films. The program in the Calgary

(*Continued on page 23*)

Newfoundland

Graduates attending the dinner meeting of the Newfoundland branch (date) witnessed the presentation of an Honorary Life Membership in the Graduates' Society to Dr. Cluny Macpherson, MD '01, Honorary President of the Branch, right, by Cyril F. Horwood, BCom '23, Maritime Regional Vice-President of the Society, left.

Books

REFLECTIONS, Books I and II. By R. A. Parsons. Illustrated by Reginald Shepherd, A.O.C.A. The Ryerson Press: 1958. Pp. vii -117. $3.00.

As a Newfoundlander writing of his native province, Mr. Parsons is more than at home with his subject; he is in love with it. Whether he writes of a favourite cat, an old friend, a ship captain, or the countryside of North River, he leaves the impression that all mean much to him personally because they are part of the life of Newfoundland, related somehow to its stories of long ago, to its "livyers" in their little houses, to its ships riding the seas, to its surf pounding on the sombre coasts. As a result of this, and Mr. Parson's direct method of presenting his material, *Reflections*, his recently published and attractively- illustrated book of poetry, has an intimacy and warmth of feeling rare in contemporary verse.

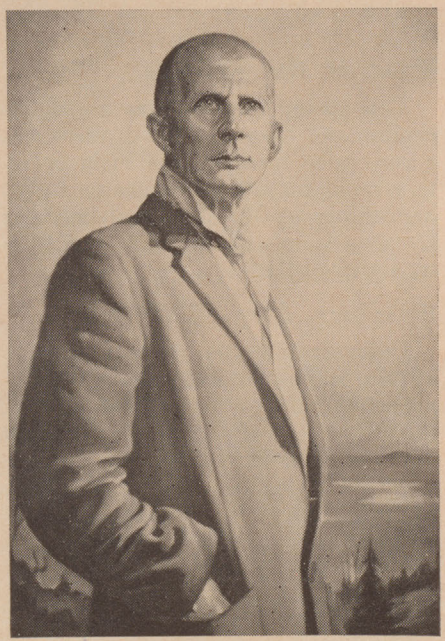

When Mr. Parsons turns from his long, local-colour poems to lyrics and "sonnets," he is generally less successful, and only "Tryst," "Renunciation," and "The Cry of the Loon" belong with his best work, although several others have lines as good as these from "Tryst":

> This spot well favoured, had a little stream
> Close by, that rubbed and scrubbed itself so clean
> Upon its pebbled bed, it wore a sheen
> to lift the heart.

Unfortunately in these shorter poems — and especially in the numerous religious poems — there is much statement and didacticism, but little of the imaginative overtone and reminiscent mood that makes the narrative and descriptive verse attractive. Besides, Mr. Parsons writes almost everything in couplet form. In the longer poems, except for sentences contorted for the sake of rhyme (and some bad punctuation), it stands him in good stead; in the shorter, however, the couplet tends frequently to emphasize his finger-shaking or to make them chappy and brusque.

Yet whatever the strengths or weaknesses of *Reflections*, it is commendable poetry of a tradition that runs back to Cowper and beyond. The reader who comes to it expecting to have to puzzle his way through another book of modern esoteric and psychologically symbolic verse will receive a pleasant surprise.

Alec Lucas,
Associate Professor of English,
McGill University.

Richard A. Parsons, Q.C., who lives and practices law in St. John's, Newfoundland, received his B.C.L. degree at McGill in 1921. The photograph above is from a portrait by his daughter, Helen Parsons Shepherd, an accomplished artist in her own right and the wife of Reginal Shepherd, A.O.C.A., the illustrator of the book under review here.

Outer Space and the Legal Profession

By A. B. Rosevear, Q. C.

Montreal is the logical place for the establishment of a centre devoted to the teaching of and research work in the laws relating to civil aviation. The headquarters of the International Civil Aviation Organization (ICAO) and of the International Air Transport Association (IATA) are located in Montreal. The members of ICAO are contracting states and those of IATA are the principal international air carriers of the world. As a result, Montreal posses unique facilities for the study of civil aviation in all its phases.

In the comparatively brief period of 40 years, a large body of law has come into being relative to civil aviation. This is the multilateral air agreement which establishes ICAO. ICAO has adopted standards of safety and recommended practices in air navigation and has brought into being international aids to navigation, national and international procedures facilitating international civil aviation, and international conventions relating to private international law. Each independant state also has national laws relating to civil aviation, and a fairly large body of jurisprudence exists, particularly in the United States.

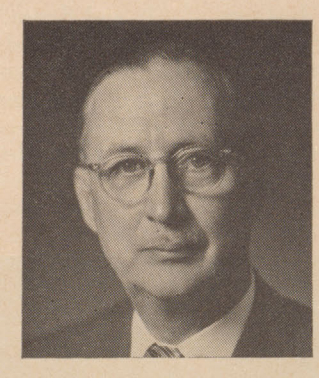

Lawyers Must Adapt

It is the duty of lawyers and politicians to adapt the law to changing circumstances. This has proven to be extremely difficult, in so far as aviation is concerned, on account of the rapid growth of air transport and the constantly increasing speed of aircraft brought about by technological improvements. In 1919, 3,500 revenue passengers were carried by the world's scheduled air services and in 1958, the number of revenue passengers carried was over 100,000,000. These figures are exclusive of Russia and China. In this changing environment the Institute of Air and Space Law at McGill University performs a valuable service to the air transport industry in the training of aviation lawyers.

The Institute provides instruction in all phases of aviation law, national and international, including the right to fly in the airspace, the liabilities of air carriers and operators of airports at common law and under the civil law, the conditions contained in traffic documents, laws relating to the financing of the purchase of aircraft and the regulations of governments relating to scheduled and non-scheduled national and international flights. In addition, the Institute provides facilities for original research work.

Study International Problems

With respect to the penetration of outer space, the Institute devotes time to a study of the international problems which have arisen and which may arise in this interesting field. It is important for the preservation of international peace that the penetration of outer space should proceed in harmony and for the general good of mankind. The Institute's space studies are directed towards this objective.

A. B. ROSEVEAR, Q.C., B.A. 16, Director of the Institute of Air and Space Law, has devoted the greater part of his life to the practice of law. He was first associated with aviation when he served as a fighter pilot in the First World War. During the Second World War, he served as commanding officer of the University Air Training Squadron, Royal Canadian Air Force, at the University of Manitoba, and recently retired from the position of General Attorney of Trans-Canada Air Lines. He has also represented Canada at a number of conferences relating to international civil aviation.

The Institute of International Air Law was established at McGill in 1951. After seven successful academic years the name of the Institute was changed in 1958 to the Institute of Air and Space Law. The change of name was made because of the great public interest in the legal problems arising out of the penetration of outer space by rockets fired from the earth.

The Institute only accepts into its classes post-graduate law students or members of the Bar. Over 100 have now passed through its portals and of these, 40 have qualified for the Master of Laws degree. Former students of the institute now hold important civil aviation posts throughout the world.

Since its establishment in 1951, the teachers and students of the institute have written and published many articles and brochures on aviation law. In addition, books on aviation law have been published by its graduates.

The students of the Institute have available at McGill and ICAO libraries books and documents relating to air law. The law and technical officers of ICAO and IATA have been very helpful to the Institute during the past nine years of its existence. They have not only assisted individual students in their work but have delivered guest lectures.

The Institute was also fortunate in obtaining as its first two Directors Professor John C. Cooper and Dr. Eugène Pépin, respectively. Each of these learned men has contributed greatly to the knowledge of air law through publications, lectures and advice to aviation authorities throughout the world. They were well known in the field of aviation law before coming to the Institute and they have left their mark upon its work.

The Institute is fortunate in having obtained as staff lecturers, Dr. G. F. Fitzgerald, Senior Legal Officer of the Legal Bureau of ICAO, and Dr. Julian Gazdik of the Law Branch of IATA. Professor Maxwell Cohen of the McGill Faculty of Law also delivers lectures to students of the Institute on related subjects.

Guest Lecturers

During the present academic session the Institute has or will welcome as guest lecturers distinguished scholars, technicians and men prominent in civil aviation, including Professor John C. Cooper, the Deputy Minister of Transport, the President of Trans-Canada Air Lines, prominent officials of ICAO and IATA, the Chairman of the Air Transport Board, and other distinguished persons.

The Institute is a truly international academic body. Its students have come from many different countries. The class of 1959-60 consists of students from India, France, South Viet Nam, Italy, the United States, and Canada.

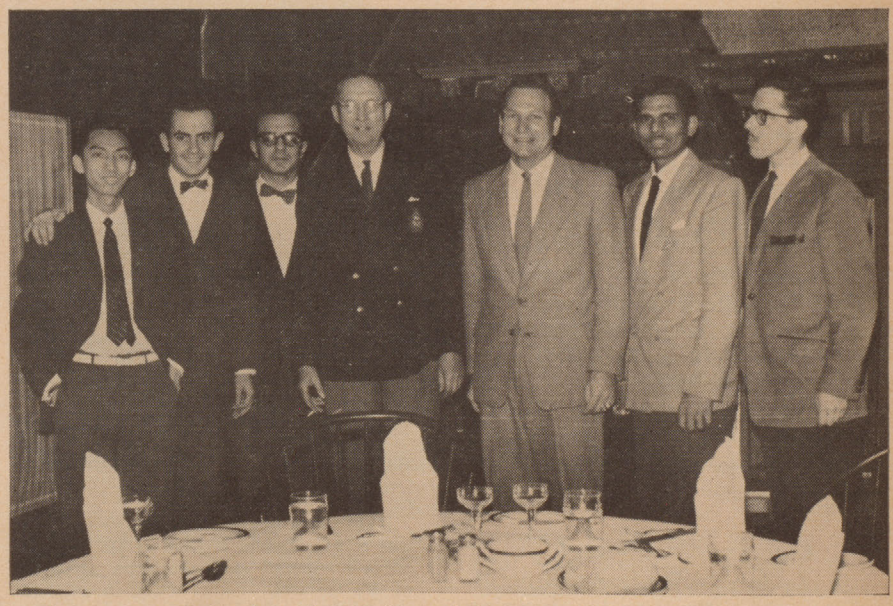

In April 1952, the Institute received a grant from the Carnegie Foundation of $20,000 for scholarships for students of the British Commonwealth and for expenses of visiting lecturers. In August of that year the Rockefeller Foundation made a grant of $12,000 for post-graduate students to be used during the sessions of 1952-53 and 1953-54. These grants have long since been exhausted. The expense of operating the Institute is assumed by McGill University.

It was feared that when the Carnegie and Rockefeller grants were exhausted the Institute would not be able to continue its work. The energy and resourcefulness of Dr. Pépin were, however, underestimated. He succeeded in interesting the Colombo Plan, the Canada Council, the foreign offices of various governments and the armed services of a few countries in the work of the Institute. As a result, a number of scholarships for foreign students were made available and a few members of the armed services of various countries, including Canada, were given leave of absence to attend the Institute.

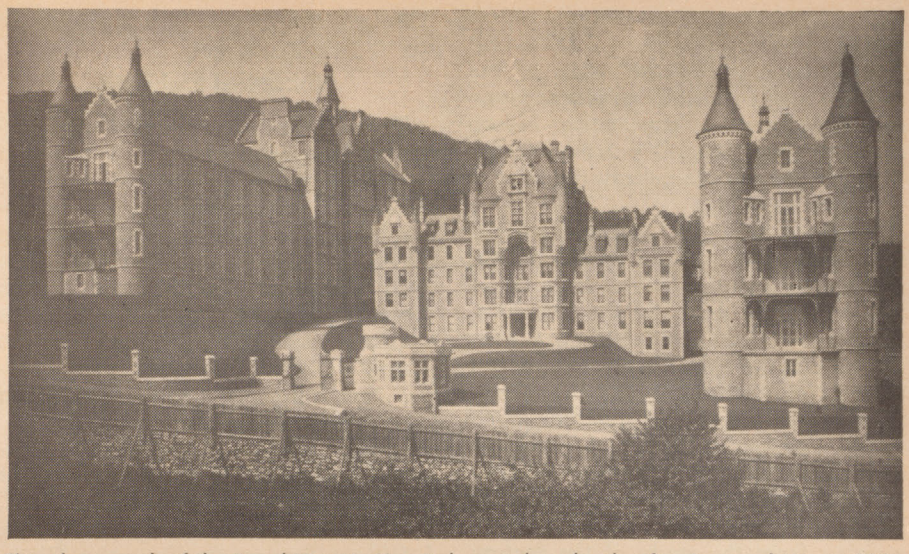

Honour to McGill

The Institute of Air and Space Law has brought further honour and distinction to the name McGill throughout the world. Many problems in aviation law have been discussed in articles and treatises written by its members. Further problems in aviation law will arise in the future and there is a need in the world for specialists in aviation law. Much useful work lies ahead for many years to come. It is the writer's fervent hope that the study of and research into the problems of air law and the orderly control of space will not diminish but increase. Financial help for students is required, however, if the Institute's work is to continue. In order to qualify for admission to the Bar law students are usually required to spend about eight years in university and law school. They are rarely able to finance another year in law school out of their own resources. It follows that post-graduate scholarships are essential if the Institute is to continue its work. This applies to Canadian as well as foreign students.

The Institute not only teaches law. It is a place where young men from all parts of the world may come and, in the freedom of academic life, discuss the problems of their respective countries and of the world. A graduate of the Institute, therefore, should have acquired during his year at McGill an international viewpoint by reason of his contacts with his colleagues in law from many parts of the world. He also should have learned that humanity can only be saved through world order under the law as developed by men of good will everywhere.

The six members of the class of 1959-60 at the Institute of Air and Space Law represent six different countries. They are shown above with the Director of the Institute, A. B. Rosevear, Q.C., from left to right: Dinh Son, South Viet Nam; Michel Barousse, France; Giuseppe Guerreri, Italy; Mr. Rosevear; Hank Prominski, United States; Rajnikant Pandya, India; and Michel Vary, Ottawa.

This photograph of the Royal Victoria Hospital was taken shortly after its completion in 1894.

The Stage is almost set to receive the Actors: the former Interns who plan, early in November, to attend the First Reunion at

Montreal's "Old Vic"

By Martin A. Entin, MD '45

THE population of Montreal was about 250,000 when Royal Victoria Hospital opened its doors and the first intern joined the Resident Staff of the Hospital on January 2, 1894. Through the years, as succeeding generations brought greater demands and challenges, the physical facilities of the Royal Victoria Hospital have been expanded, modified and enlarged; the expansion of the Hospital thus reflects the general growth and development of Montreal and of the whole of Canada. This period of almost three generations witnessed the tremendous increase of population as well as rapid progress in the development of medicine.

The small intern staff of 1894, seven in number, was vitally important to the function of the Hospital, then as now: it is the resident staff who carry out the actual care of the patients under the direction of the attending doctor. At the turn of the century the number of housemen had increased to 13; today, there are more than 180 residents and interns in the many Departments. Although their work is arduous, well equipped libraries, attractive grounds, swimming pool and tennis courts provide recreation during the periods of relaxation when off duty.

In the past 66 years a total of 2300 interns and residents have participated in the growth and development of the various Departments and Institutes which collectively comprise the Royal Victoria Hospital as it is known today.

The Hospital is readying itself to welcome its former housemen on November 3, 4 and 5, 1960 at the First Home-Coming Convention, the plans for which were started over one year ago. Many of the members of the former Royal Victoria Hospital house staff will be coming back after an absence of some years to renew their acquaintance with the "Old Vic"; they will find many changes in the physical appearance, although most of the original buildings are intact. The Ross Memorial Pavilion and the Women's Pavilion were opened in 1917 and 1926 respectively to the north of the Main Portion of the hospital.

In order to keep up with the demands of growing population, the newer developments in Medical and Surgical fields and the increased needs for teaching and research facilities, the Old Departments have been expanded and new Departments and Sub-Departments have been established. In 1928, a new Sub-Department of Neurology and Neurosurgery was created. Under the guidance of Dr. Wilder Penfield and the late Dr. W. C. Cone this section evolved into an autonomous Institute in 1934 and occupies a separate building just East of the Hospital. Sub-Departments of Orthopaedics, Dermatology, Metabolism, Plastic Surgery, Hematology, Allergy and others have been added. In 1958, a Cardio-respiratory Unit was established jointly with Montreal Children's Hospital. The Sub-Department of Cardiac Surgery was added in 1957.

Two new wings have been added in recent years: the New Surgical Wing in 1955 and the New Medical Wing in 1959. These two ten-story buildings have been skillfully fitted in among the older buildings so that the general configuration has not been disturbed.

Open House at R.V.H.

The Convention will begin with an "Open House" at Royal Victoria Hospital on Thursday, November 3. Each Department will welcome its own former residents and will help to renew old acquaintances. In a way this

will be a time for symbolic stock taking. Since 1894 almost 2300 young doctors have joined the ranks of the resident staff to acquire practical medical and surgical experience before plunging into general practice or before pursuing graduate training toward a chosen specialty.

Although it is the accepted role of the University to train graduate students, much of the factual training of the doctors is done by the hospitals. With the establishment of the University Clinic at the Royal Victoria Hospital in 1924 under the late Dr. J. C. Meakins, a tremendous impetus was given to the investigative aspect of Medicine. From this modest beginning evolved a large number of research activities which are being carried out today, ranging from the study of the factors concerning gaseous transport in the lung to the mechanism of the action of hormones. A similar programme exists in the Department of Experimental Surgery.

To acquaint the returning former house staff with the progress that has been made, the various departments of the Royal Victoria Hospital are preparing exhibits, panel discussions and formal papers. The following departments are organizing their own programmes: Anaesthesia, Medicine, Neurology and Neurosurgery, Obstetrics and Gynaecology, Ophthalmology, Otolaryngology, Psychiatry, Radiology, Surgery and Urology. In addition, there will be operating clinics in the morning and panel discussions on topics of general interest in the afternoon.

Historical Exhibits

The Committee on historical exhibits has assembled material that should prove of interest to members of the resident staff, including photographs of the resident staff over the years, old instruments and other items.

Of particular interest will be the actual reproduction of the old wards equipped with the furniture of the period and staffed by the nurses wearing the uniforms which were "the rage" at the turn of the century.

Almost worthy of the title of "historical document" is the comprehensive Directory of the Former House Staff. This Directory was compiled by Dr. J. Gilbert Turner, the Executive Director of Royal Victoria Hospital and by his tireless staff, and contains names, addresses and other pertinent data on all former residents from AAVIK to ZUMSTEIN. About ten per cent of the total number are in the In Memoriam list.

Scientific Session

Friday, November 4, 1960 is designated as the combined R.V.H.-McGill Day and will be dedicated to scientific presentation. All McGill medical graduates are invited to attend this session. The formal programme will be under the chairmanship of Dr. Lloyd G. Stevenson, Dean of the Faculty of Medicine, McGill University, and will open with the welcome addresses from the representatives of the Medical Board of the Royal Victoria Hospital and from Dr. F. Cyril James, Principal of McGill University. The papers that follow will be presented by the distinguished members of the Medical Faculty and the Teaching Hospital of McGill University. Dr. Newell W. Philpott, Emeritus Professor of Obstetrics and Gynaecology, McGill University and Past President, American College of Surgeons will speak on the influence of Montreal medicine on the international scene. Dr. Ronald V. Christie, Professor of Medicine, McGill University and Physician-in-Chief, Royal Victoria Hospital will speak on the subject of lifetime interest — recognition and management of respiratory failure. Dr. Rocke Robertson, Professor of Surgery, McGill University and Surgeon-in-Chief, Montreal General Hospital will trace the activities of McGill surgeons from "Buggy to Jet", Dr. Jessie Boyd Scriver, formerly Associate Professor of Paediatrics and Consultant in Paediatrics at Royal Victoria and Montreal Children's Hospital will consider some aspects of viral infections in Paediatrics.

Dr. Francis McNaughton, Professor of Neurology, McGill University and Neurologist-in-Chief of Montreal Neurological Institute will give a glimpse of William V. Cone, the late Neurosurgeon-in-Chief of the Montreal Neurological Institute. Dr. Hugh E. Burke, Assistant Professor of Medicine, McGill University, Executive Director, Royal Edward Laurentian Hospital will speak on clinical impact of recent experimental studies of tuberculosis. Dr. W. J. McNally, Professor of Otolaryngology, McGill University and Otolaryngologist-in-Chief, Royal Victoria Hospital will give a paper on "Otolaryngology, Industry and Space Travel". The morning session will be concluded by consideration of the problems of a Surgical Department in a Community Teaching Hospital by Dr. G. Gavin Miller, Emeritus Professor of Surgery, McGill University, formerly Surgeon-in-Chief, Royal Victoria Hospital.

Friday afternoon session will be dedicated to presentations by former Royal Victoria Hospital House Staff who attained prominence in their repective fields outside Montreal.

We know already that a large number of former house staff are coming to this Reunion, many with wives and children. Reservations are coming in daily. The reunion promises to be a memorable event.

The resident staff of the R.V.H., 1902-1903. Standing, left to right: Dr. W. W. Francis, Dr. J. C. Colby, Dr. L. C. Harris, Dr. J. D. Dixon, Dr. J. R. Goodall, Dr. L. D. Mason, Dr. N. C. Jones, Dr. F. P. L. Cantlie. Seated, from left to right: Dr. T. R. Byers, Mr. W. W. Wooton, Dr. C. K. Russell, Mr. J. J. Robson, Dr. E. Penner, Dr. E. J. Mullally.

Richard Pennington, *University Librarian*
muses over Canadian culture,
the problems of the biographer and biography,
brought on by his struggle as editor
of the papers of

"My Disreputable Cousin"

Any Library in time, if of a generously receptive nature, will, like an attractive woman, become a repository of romantic mementos. Even the University Library at McGill. It will be long, of course, before we have anything comparable to the rich deposits of the English libraries — the letters that Shelley should not have written, the stories Swinburne had the bad taste to write, the confessions a Naval Secretary wrapped in the decent obscurity of code, the secret memoirs of Courts, the unpublishable records of old families.

We shall have to wait some time yet for such desiderata; for, as an Extension Lecturer here at McGill once pointed out in explaining the thinness of our literature, Canadian life has not yet attained a sufficient complexity, a rich enough mixture of good and evil, to produce the ripe fruits of a well-manured culture. We still have an excess of the simple virtues, and this, although pleasant enough, is quite different from the maturity that comes with the vices of age, and from the generations of wrong-doing, nobleness, hatred, violence, idealism, sudden death and heroism. If you add up one wife, a four-door sedan and an unmortgaged cottage, you may get happiness; but this does not equal civilisation, nor does it satisfy human beings for long.

So that the records that our libraries accumulate are for the most part unexciting enough, unless we can occasionally acquire something from that decadent European continent that it is every Canadian's ambition to visit periodically. Such as that manuscript by the Comte de Boulainvilliers, which is at McGill, '*très fort et qui n'a jamais été imprimé*' which exposed the theological superstitions of his day; or that long correspondence by Mr. Ruskin that reveals the unfortunate weakness that underlay his fiery idealism and his indefatiguable rhetoric (the same weakness, it is amusing to reflect, that inspired the indefatiguable and fiery dittos of Mr. Carlyle); or even, to come down very low in the literary scale, the memoirs of my disreputable cousin which are just being published in England and which a far-too adventurous publisher — Mr. McClelland — is soon to issue in Canada.

The difficult task of editing them fell to me, since the memoirs are part of the mass of documents that I have called the Peterley family papers and that are now deposited in the University Library's manuscript collection. A difficult task, both because the diarist had in the mere 14 years of his literary life preserved every document, written or printed, that had any connection with himself, and because one has to make up ones mind about the nature of biography.

There is a point of view that since life itself is haphazard, untidy, indiscriminating and inartistic, the biography should be all this too in order to reproduce life in all its richness. So that everything goes in — the love letter as well as the letter of thanks to the vicar for calling to see if his rheumatism is better, the school report and the account of a distant relative who was accidentally drowned at sea. It is an English practice developed perhaps from a misunderstanding of Boswell's method, although its ablest practitioners are on this side of the water but the other side of the border, such as Miss Lowell who overlay Keats.

I cannot help thinking there is confusion here between life which is realism and literature which is artifice, between the psychologist's couch and the biographer's study. Life itself is not to be recaptured by a realistic imitation; but the illusion of it may be created by purely illusory means — or else like Plutarch you may, if you can, describe the man in 20 pages. This is assuming that the patient in the literary operating theatre is worth the trouble and the pathological condition justifies the surgeon's skill. Too often this is an assumption that is unthinkingly made, and the labours of the biographer are lavished on the exemplary civil servant, the model husband, or the irreproachable clergyman; and the world — and the publisher too — is the poorer by two volumes of 750 Demy Octavo pages. Meanwhile the reading public obstinately continues to prefer Trader Horn, or Ralph Rashleigh and other all-too-human types. The reading public is sound: in a human document it is nearness to the human that is interesting, not remoteness from it. Which is a warning to social reformers and idealists not to struggle too hard to achieve Utopia too soon, since once attained the human race will die from boredom.

Which recalls me to the problem of the biographical writer: he does not have to be as boring as life sometimes is nor encumber himself with all the impedimenta of his subject. He can throw out the laundry bills and the business letters; and, avoiding the mechanics of living, try to suggest its dynamic. It is not the visit to Uncle Edward that is important but the completely irrelevant thoughts your subject may have had when stepping into the train that was to take him there. As I have said in the preface to the printed memoirs: It is not the biographical story that justifies the printing of an intimate journal. That justification is to be found, if at all, in the revelation of that inner life of fugitive images in

(*Continued on page 22*)

Over 60 McGill Classes

Several Weekends Involved as Home

As the Autumn Issue of The McGill News goes to press over 60 groups are busily arranging menus, hotel rooms, tours, tickets, lectures for their class or school reunions this fall. Among the major attractions this year are the first Graduates' Seminar, the first School of Social Work Reunion, and the Royal Victoria Hospital House Staff Convention. Details for these and other events are given on this page and are followed by a resume of individual class activities.

Homecoming Weekend

Most classes will come back to the campus on October 21 and 22 and are arranging their own class activities around the following general programme: *Friday, October 21 — 2:00 to 4:00 p.m.* — Graduates' Seminar on Architecture — First Lecture.

Saturday, October 22—9:00 a.m. —12:00 a.m. — Campus tours as arranged through Reunion Chairmen.

—10:00—12:00 a.m. — Graduates' Seminar on Architecture — Second Lecture.

—12:00 a.m.—Buffet luncheon, Sir Arthur Currie Gymnasium.

—2:00 p.m.—Football game, McGill vs Toronto.

—4:30 p.m.—Principal's reception for classes prior to and including 1940, in Redpath Hall.

The McGill Alumnae are holding a meeting in the Engineering Building on Monday evening, October 24. Mr. Evan Turner, Director of the Montreal Museum of Fine Arts will speak on "Variations on the Abstract Idea" and the Alumnae Scholarships will be awarded to this year's winners. All visiting Alumnae who are still in town are cordially invited to attend.

First Social Work Reunion

The Alumni of the School of Social Work are organizing a stimulating and useful programme to get the first of many reunions off to a good start. Built around the theme "Social Change — a Challenge to Social Work" it will reflect the fact that this is one of the few schools giving training in International Social Work.

Mr. Tom Mboya, member, Kenya Legislative Council and General Secretary, Kenya Federation of Labour, has accepted their invitation to speak on the challenges facing the Social workers, particularly those from other cultures in Africa today, at the Montreal High School auditorium, Friday evening, October 21. Interested graduates of all faculties are invited to attend. On Saturday morning there will be a professional seminar under the chairmanship of Dr. Charles Hendrie, Dean of the School of Social Work, University of Toronto. This reunion will close with a dinner, Saturday evening, at which the Distinguished Alumnus Award will be made to a graduate who has contributed outstandingly in this field.

Physical Education

The biennial reunion comes up for this school in 1960 and individual classes are hearing about any events additional to the Homecoming Weekend programme. So far, the classes of '48 — '51 incl., '53, '59 and '60 are getting together.

Macdonald College Reunion

For all classes. Mr. R. W. Heslop is in charge of arrangements and reports a football game against Bishop's will be followed by the annual branch meeting and reception. A barbecue supper and dance close out the activities. There will be an award to the class with highest percentage attendance.

Dentistry

Most classes that are planning a reunion are tying in with the Fall Clinics of the Montreal Dental Club, October 18-21. Two classes, Dentistry '55 and '56 will hold reunion gatherings in Ottawa at the Convention of the Canadian Dental Association, September 25-28.

Medicine

Reunion dates for Medical Classes split this year. Some classes have chosen to tie in with the Royal Victoria Hospital Convention for Former House Staff, Nov. 3-5, while others will reunite over Homecoming Week-end.

Classes Holding Reunions

Information given here is the latest available at press time and is liable to change. Your reunion chairman will have more recent information and can be reached c/o Reunions Office, Graduates' Society, Martlet House, 3618 University Street, Montreal:

September 25-28:

Dentistry '55 — Chairman: Dr. D. Peter McGibbon. Present plans are for a split-reunion; part of the class going to Ottawa in conjunction with the C.D.A. Convention and the rest of the class in Montreal.

Dentistry '56 — Co-Chairmen: Dr. Henry Husolo and Dr. Frank Shamy. Reunion to be held in Ottawa along with C.D.A. Convention.

October 15:— Macdonald College Reunion Day. See story elsewhere on this page.

Will Reunite This Fall

coming Activity Grows in Popularity

October 21-23:— Homecoming Weekend.

Arts '10 — Chairman: Rev. Frank Stanton, suggests a class, perhaps with R.V.C. '10, on Friday evening.

R.V.C. '10 — Chairman: Miss Katherine Trenholme. Plans are for a luncheon at the home of Miss Emma Lawlor on Friday and possibly a joint effort with Arts '10 (see above).

Science '10 — Chairman: Mr. George Kohl. Class registration and meeting centre in Martlet Room, 3618 University Street, Friday evening and Saturday. Campus Tour is available Saturday morning. Class cocktails and stag dinner that night at the University Club, with separate dinner and theatre party for wives. The whole class is invited to the Gordon Hansons' in Como (buses leave from McGill) for Sunday Buffet lunch.

Arts '15 — Chairman: Brig. Robert Fraser. The class has been invited to join in with Science '15.

Science '15 — Chairman: Mr. M. Stuart Nelson. Plans include a Seaway tour on Friday morning with a cocktail party in the evening; campus tour on Saturday morning and Class dinner at the Ritz Carlton Hotel that night, with a separate evening for the ladies.

R.V.C. '15 — No chairman available but Science '15 invites the several members who can come, to their cocktail party Friday evening and to share their table at the Saturday buffet lunch.

Arts '20 — Chairman: Mr. E. M. Greaves: A number of ideas " in the pot" but planning not yet completed.

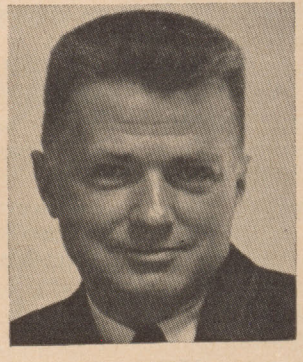

Commerce '20 — No chairman but members invited to join in with Arts '20.

Law '20 — Chairman: Mr. Dawson A. McDonald. Plans not yet completed.

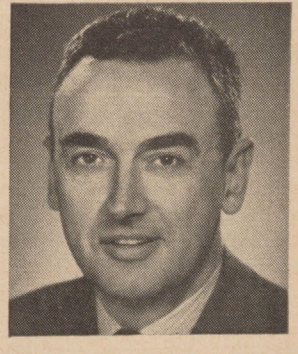

FIRST GRADUATES' SEMINAR
Architecture

The objective: To provide graduates coming to reunions with a chance to continue their education. For some time the University, many of her graduates and the Society have felt a growing need to provide graduates with a programme of learning. This year, with the help of a prominent Yale Alumnus in Montreal, it has been possible to take the first step and present this Seminar.

The subject: Architecture chosen because it is a field which affects us all in every occupation.

Prof. Paul Rudolph

Prof. John Bland

The plan: All members of reunion classes will receive an announcement of the lectures, a reading list and registration form. To ensure that only those genuinely interested will apply, a small registration fee will be charged. Two lectures, accompanied by slides, will be given, one by Professor Paul Rudolph of Yale University and one by Professor John Bland of McGill. Their lectures, based on the assumption that advanced reading will have been done, will be followed by question periods.

The place: Room 304, McConnell Engineering Building.

The times: Professor Paul Rudolph, 2:00 p.m., Friday, Oct. 21.
Professor John Bland, 10:00 a.m., Saturday, Oct. 22.

Medicine '20 — Chairman: Dr. G. D. Little. A short clinical programme on Friday will be followed by the class dinner, Vice Regal Suite, Ritz Carlton Hotel.

Science '20 — Chairman: Mr. H. L. Mahaffey. Plans in progress.

Arts '25 — Chairman: Mr. J. Floyd Innes — A class dinner will be held Saturday evening.

Commerce '25 — Chairman: Mr. H. Walton Blunt. Plans are being made for a Reception Friday evening, a tour of the campus Saturday morning, with a class dinner in the evening. Sunday, there will be a cocktail party to close the weekend.

Dentistry '25 — Chairman: Dr. V. H. Jekyll.

Medicine '25 — Chairman: Dr. E. G. Wight.

R.V.C. '25 — Chairman: Miss Edith Baker. Plans made for a possible lecture Friday evening, and a class dinner at the University Women's Club on Saturday evening.

Science '25 — Co-Chairmen: Mr. F. C. Thompson and Mr. Herbert Norris — Class registration and a Cocktail party at the Ritz Carlton on Friday evening. Saturday evening, a class dinner at the University Club.

Commerce '30 — Chairman: Mr. Geoffrey C. Jones.

Law '30 — Chairman: Mr. Boyd Millen.

R.V.C. '30 — Co-Chairmen: Miss Margaret Robertson and Miss Eleanor O'Halloran. Plans have been made for a campus tour on Saturday morning, and a Cocktail Party and Banquet in the evening.

Science '30 — Chairman: Mr. R. H. Yeomans. Class activities consist of a Campus Tour on Saturday morning, and a Cocktail Party and Banquet in the evening.

Arts & Science '35 — Chairman: Mr. C. F. Carsley.

Commerce '35 — Chairman: Mr. Walter Markham. A Stag Dinner at the Montreal Racket Club on Friday evening and a mixed cocktail party at Mr. Markham's home on Saturday evening.

Engineering '35 — Chairman: Mr. R. F. Herzer. So far plans have been made for a Buffet lunch at the Queen Elizabeth Hotel, on Friday — followed by a tour of T.C.A.'s Overhaul and Maintenance Base at Dorval. Friday evening there is a cocktail party and mixed banquet, also at the Queen Elizabeth. On Saturday morning, there will be a Campus Tour, and plans for Saturday evening are as yet indefinite.

Law '35 — Chairman: Mr. J. Brendan O'Connor. Programme is set up for a Class Dinner at the University Club on Friday evening, and a Buffet Supper Saturday evening, at the home of Mr. & Mrs. D. L. Gales.

Medicine '35 — Chairman: Dr. L. C. Haslam.

R.V.C. '35 — Chairman: Mrs. Janet King.

Arts & Science '40 — Chairman: Mr. M. N. Davies. Plans all completed for a Reception and Class Dinner — mixed — at the University Club on Friday evening.

Commerce '40 — Chairman: Mr. R. G. Keefer. Tentative plans for a Campus Tour on Saturday morning and a class dinner in the evening.

Engineering '40 — Chairman: Mr. C. H. Duffy. Registration, Cocktails and Dinner on Friday evening; Tour of Engineering Building on Saturday morning are presently on the programme.

Law '40 — Chairman: Mr. Hugh Doheny. A cocktail party will be held at George Atkinson's and a class dinner later.

R.V.C. '40 — Chairman: Miss Kay Currie. Plans include a Class Dinner Friday evening at the Windsor Hotel.

Arts & Science '45 — Chairman: Mr. Irwin D. Leopold. Plans here are for an informal class dinner.

R.V.C. '45 — Chairman: Miss Helen R. Leavitt: There will be a class dinner Friday night at the Montreal Badminton and Squash Club, and a Campus Tour on Saturday morning.

Arts & Science '50 — Chairman: Mr. J. Peter Kohl. Cocktails on Friday evening; Saturday a campus tour in the morning followed by a dinner and dance in the evening.

Commerce '50 — Chairman: Mr. Baird S. Davies. For the men, a stag Friday evening and on Saturday night a mixed Reunion Party.

Dentistry '50 — Chairman: Dr. Peter A. Lefebvre.

Engineering '50 — Chairman: Mr. John Newman. A Stag and Ladies' Cocktail Party to be held Friday evening. On Saturday morning the Campus Tour and then a Dinner-Dance on Saturday evening at the Windsor Plaza.

Dentistry '55 — Chairman: Dr. Peter McGibbon.

Engineering '55 — Chairman: Mr. Jack Gillies. Tentative plans include a stag party on Friday evening; Saturday morning a tour of the Engineering building and a dance on Saturday night.

October 28th & 29th

Science '17 — Chairman: Mr. W. McG. Gardner. Plans have been arranged for a Reception and Buffet to be held Friday evening succeeded by a Cocktail Hour and a Buffet Supper on Saturday night.

November 3, 4 & 5 — R.V.H.

Medicine '30 — Chairman: Dr. G. A. Simpson. No definite plans as yet, but tentatively will go along with the R.V.H. programme, with a class cocktail party and class dinner, on Saturday evening.

Medicine '50 — Chairman: Dr. J. B. I. Sutherland.

Medicine '55 — Chairman: Dr. Charles Scriver. Tentatively the programme has been set for an informal party at the home of John Gutelius on Thursday evening, a "Scientific Session" on Friday and some type of social function on Friday evening.

My Disreputable Cousin . . .

(*Continued from page 19*)

the mind and fitful impulses of the heart — that inner life which with most of us goes unrecorded, and which it is the duty of the official biography to conceal.

So that, of the six bound volumes of the journal proper (or improper), the 17 portfolios and the bundles of official documents that fill the boxes at McGill, there was little left by the time that I had been through them, and I found there was not much to add to the shorter autobiographical narrative that the diarist had written out on his last voyage.

'Disreputable'? Well, that is for the title; and, as every graduate of journalism will know, the connection between the heading and the text can be tenuous. All the same, the journal which this idler in drawing rooms so industriously kept is not likely to become popular as a Sunday School prize. It deals, with the cynicism of truth, with the period of the *entre-deux-guerres*, the years 1926 to 1939, and it gives a frank picture of the doomed and disillusioned generation of that unedifying period. Like many of his contemporaries, Cousin David achieved nothing either useful or ornamental. He idled away his time, his money, the patience of his friends and the forebearance of the women whose lives he brightened or disturbed or ruined. But with a strange persistence this unprincipled *flaneur* conscientiously set down his failure in such successful prose that we are presented with a picture of a period, and of a minor character in it, that may almost justify the wasted life that produced it.

Ted Taylor Reports . . .

(*Continued from page 14*)

area is always exceedingly interesting and by the time this is read they will once again have held their increasingly popular Bar-B-Q before the Stampede starts.

Vancouver, June 2, 1960

A thoroughly enjoyable reception buffet meeting was held at the delightful home of Dr. Frank Skinner. More than 100 graduates, wives and friends took advantage of the opportunity to renew old friendships and make new ones. This is a very active branch and the representation at this, as at all their events, ranged from the early 1900's up to graduates from the previous year.

Victoria, June 3, 1960

Once again an executive ran into unforeseeable problems which reduced attendance at their annual dinner meeting. The medical association decided to hold their meeting on the same evening and so unfortunately many doctors were forced to miss this event. The plans for the future under the new executive have been made with everyone in mind.

Trail, June 7, 1960

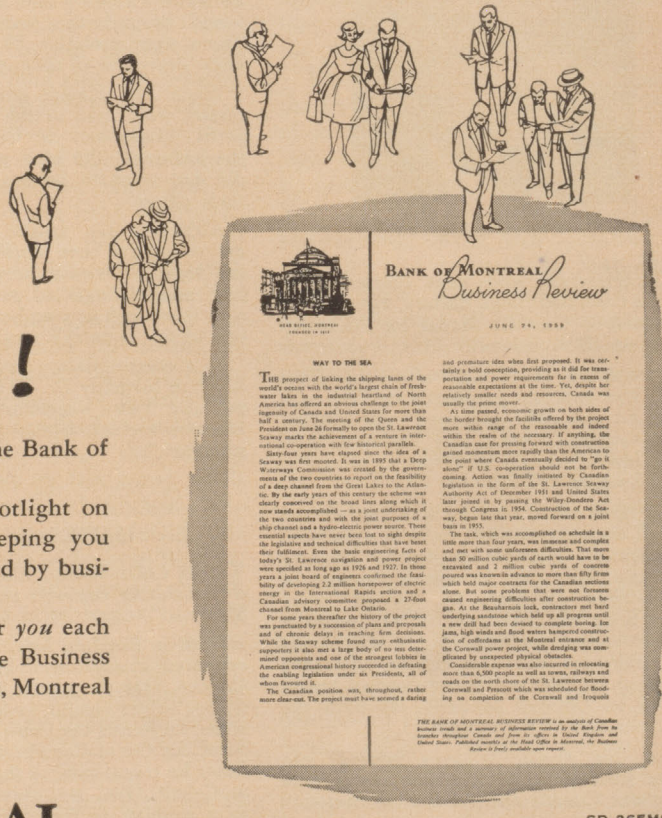

There was a large group gathered at the home of Dr. Wilson for the buffet supper, reception and meeting. With almost 100 per cent of the graduates of the area present they set an attendance score that other branches will have to step lively to match.

Southern California

Among those attending the annual meeting at Los Angeles were, left to right: A. R. Moodie, MD '10, Douglas McKinnon, MD '27, Walter deM. Scriver, MD '21 of Montreal, who was a guest at the meeting, and Gordon R. Dempsay, MD '25. Just visible in the background over Dr. Scriver's right shoulder is Arden R. Hedge, MD '38, who was elected president of the McGill Society of Southern California.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

Obituaries

THE HON. BROOKE CLAXTON

The Hon. Brooke Claxton, BCL '21, Canada's Minister of National Defence from 1946 to 1954 — the period of this country's greatest peacetime military buildup — died in Ottawa June 13 after a long and courageous battle against cancer.

Mr. Claxton, who left politics July 1, 1954 to join the Metropolitan Life Insurance Company as vice-president and general manager for Canada and who served as chairman of the Canada Council from its inception in 1957, refused to recognize his lethal illness and kept working at home for several weeks before his death.

Mr. Claxton was born August 23, 1898, in the Montreal riding of St. Lawrence-St. George, which he later represented in Parliament for 14 years. At the age of 17, he left

Hon. Brooke Claxton

McGill University and went overseas with the 10th Canadian Siege Battery. He won the Distinguished Conduct Medal for "devotion to duty on all occasions".

He returned to McGill after the First World War and was graduated in 1921 with honors in law. He practised with Stairs, Dixon, Claxton, Senecal and Turnbull, later taught law at McGill and was appointed a King's Counsel in 1939.

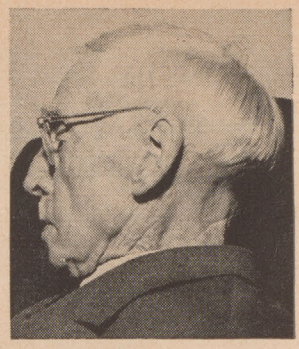

Only three years after he was first elected to the Commons in 1940 he was appointed parliamentary assistant to Prime Minister Mackenzie King and became a member of the "kitchen cabinet", the picked group around King which did exploratory work on new government policies. Mr. Claxton was responsible for drafting family allowance legislation in 1944 and he was named health minister on October 23, 1944. He built the new department from scratch.

Upon his death, tributes poured into Ottawa from political and military leaders throughout Canada and the United States.

HENRY J. HAGUE, Q.C.

Henry John Hague, Q.C., BA '82, BCL '85, who held the title of McGill's oldest living graduate, died in Montreal August 16, less than two months short of his 99th birthday.

Born at Cobourg, Ont., Mr. Hague came to Montreal as a youth and following graduation from McGill, he set up practice in this

Henry J. Hague

city. His distinguished service at the Quebec Bar spanned an era of vigorous growth in Canada and in Montreal.

When he went into partial retirement in 1935, Mr. Hague celebrated his Golden Jubilee in the legal profession with three fellow graduates: Chief Justice R.A.E. Greenshields, A.G.B. Claxton, Q.C., and George F. O'Halloran of Ottawa.

At a celebration in his honor on his 95th birthday, Mr. Hague told a reporter that campus life in the "good old days" was less exciting but was more appealing. "There was no air of formality and independence that is found around the university these days. There were probably 30 in my year and I knew every one of them personally", he said.

When Mr. Hague attended Law School, classes were held in the old Molson's Bank at St. James and St. Peter streets because the lecturers, who were practising barristers, did not want to be too far removed from their offices.

Although Mr. Hague had declared his career to have been a quiet one, members of the legal profession agreed that he had a long and distingished record in civil litigation cases and as member and later head of one of the country's most famous law firms.

In a congratulatory note to Mr. Hague on his 95th birthday Dr. F. Cyril James, Principal and Vice-Chancellor wrote ". . . with affection and admiration we salute our senior graduate."

JAMES C. KEMP

James Colin Kemp, BSc '08, a well-known consulting engineer and executive died in Montreal August 20 in his 79th year.

Born in London, England, Mr. Kemp was educated at Clifton College and University College, Oxford, where he obtained his BA degree before coming to McGill. Upon graduation, he joined the Consolidated Mining and Smelting Co. of Canada in British Columbia. Later he transferred to the Drummond Mines at Cobalt, Ont., and then came to Montreal as a member of the staff of R.A. Ross and Co., consulting engineers.

During the First World War, Mr. Kemp went overseas as adjutant of the 60th Battalion, Victoria Rifles of Canada. He rose to the rank of brigade major, was wounded, mentioned in dispatches and was awarded the DSO and MC for bravery.

In 1945 Mr. Kemp took over the position of managing director of George S. Armstrong & Co. (Canada) Ltd., industrial engineers and management consultants. Since 1951, he was a consulting engineer.

In his younger years, Mr. Kemp was well-known as a runner and for many years he held the McGill and intercollegiate records for the mile and half-mile. He was also a noted marksman and was a member of Canada's Bisley team in 1900.

Mr. Kemp was a member of many professional associations and played a prominent role in community organizations. For many years he served as alderman in the City of Westmount.

DR. J. S. SMIT

Dr. John Surman Smit, BA '28, MD '32, medical officer, master area, of the Bell Telephone Co., died in Montreal August 19 at the age of 55 years.

As an undergraduate at McGill, Dr. Smit was active in university life, being editor-in-chief of The McGill Daily, vice-president of the Students' Council, medical representative to the Council and President of the Student Christian Association. He also belonged to the Players Club, the Osler Society and the Lachine Rowing Club.

Dr. Smit received post-graduate training at the Montreal General Hospital, the Laurentian Sanatorium, and the Toronto Hospital for Sick Children and accepted appointments on the medical staff of several companies.

From 1946 to 1950 he was assistant medical officer of health for the City of Westmount, and from 1946 to 1957 served as consulting surgeon, McGill Athletic Board.

He joined the Bell as a part time staff physician in 1950 and was appointed medical officer, administration in 1955 and the following year became medical officer for the company's Eastern area. During the Second World War, he served with the army in Canada and overseas.

Prof. W. C. J. Meredith

DEAN MEREDITH

McGill University's Dean of Law, William Campbell James Meredith, Q.C., died in Montreal August 27 after a lengthy illness. Born in Montreal February 6, 1904, Mr. Meredith was the son of the late Dr. F. E. Meredith, K.C., D.C.L., and Annie M. Van Koughnet, and the grandson of the late Sir William C. Meredith, Chief Justice of Quebec.

Admitted to the Bar in 1927, Mr. Meredith practised with the firm of Meredith, Holden, Heward and Holden until his appointment as Dean of Law here in 1950.

WILLIAM M. COUPER, Q.C.

William Mason Couper, Q.C., BCL '02, noted Montreal lawyer, died July 14 at his Westmount, Que. home. Born in Montreal, Mr. Couper, upon graduation from McGill, entered into partnership with James Cranshaw, who at the time was writing the Criminal Code of Canada. Mr. Couper later opened his own office and continued his practise for 50 years, until his retirement.

DR. J. GERALD M. OLMSTEAD

Dr. J. Gerald M. Olmstead, MD '25, for many years state-appointed chief pediatrician and examiner of the Hartford (Conn.) Juvenile Court, died at his home in Hartford July 10 at the age of 59. A native of Ancaster, Ont., Dr. Olmstead, in addition to his private practice, was also former chief attending pediatrician at McCook Memorial Hospital; courtesy staff pediatrician at Hartford, St. Francis and Mt. Sinai Hospitals; examiner for Hartford Girl Scouts, Connecticut Children's Aid Society, Junior League Day Nursery and the Union for Home Work Day Nursery.

DR. PETER S. SKINNER

Dr. Peter Searle Skinner, MD '26, prominent Bangor (Maine) orthopedic surgeon, died May 5 at his Bangor residence at the age of 62. Dr. Skinner was born in Halifax, N.S., and after graduation from McGill, he joined the orthopedic staff of the Eastern Maine General Hospital, and had practised medicine and orthopedic surgery in Bangor for the past 30 years.

The Principal... *(Continued from page 7)*

Associates and from other generous friends — will be financially enabled to move forward toward goals that seemed impossible of achievement a few years ago.

Centenary of Confederation

In 1967, a short seven years from now, Canada will be celebrating the centenary of Confederation and — in a world where the great majority of sovereign states are younger in years as well as poorer in economic resources — such a moment of maturity is also the occasion for spiritual and mental stock-taking. What part is Canada to play in the maintenance of world peace? What part in the effort to raise the standards of health and welfare among the hundreds of millions of people who live in those areas that we label 'underdeveloped'?

The answer to these questions must, in very large measure, be provided by Canada's universities. Only in our universities can we develop young Canadians who will have the technological knowledge and human understanding to go out to distant countries to aid them in their struggle for efficient government and economic growth. Only in our universities can we offer opportunities for professional and post-graduate study to those students from Africa, Asia and South America who wish to qualify themselves for greater service to their own communities. Let us always remember that the development of the universities of the U.S.S.R. during the past fifteen years is responsible for much more than Sputniks and the prospect of man's flight into space. It is responsible for the work of the thousands of young Russians who are today on technical assistance or educational missions in other parts of the world.

Canada, oldest independent Dominion in the British Commonwealth, has a great opportunity. Canadians know, and are known by, the United States. They are known to, and appreciated by, the people of the U.S.S.R. but our lack of knowledge of languages prevents us from attaining a reciprocal understanding.

Importance of Humanities

During the years that lie immediately ahead of us, the contribution of Canadian universities in the fields of the humanities — in language, in history, in economics and in political science — can be of even greater importance than their work in the field of the physical and biological sciences, important as these are. It is in the field of human understanding, in the diminution of tensions, that Canadians have the greatest opportunity to make outstanding contributions to the solution of the problems that confront the world, so that reiterated emphasis on the humanities and social sciences is more significant, as we approach the centennial of Confederation, than the steady Canadian progress in the many fields of physical or medical science. The new B.A. curriculum at McGill, the work of the Institute of Islamic Studies, the proposals for additional student residences and the project of a new students' union — all of these are just as significant as the splendid new McConnell Engineering Building, the Medical Sciences Centre that we expect to erect on McIntyre Park or the new Biological Sciences Building.

These are the widening horizons to which the vision of McGill University can stretch out as a result of the settlement of the government grants controversy and the steady growth of the Alma Mater Fund. Truly, as Tennyson said, this year is "a bringer of new things" — new opportunities — "to this grey spirit, yearning in desire to follow knowledge like a sinking star beyond the utmost bound of human thought."

The Faculty... *(Continued from page 10)*

Prof. J. H. Mennie, PhD, associate professor of chemistry and assistant to the chairman of the department has been appointed general director of the Physical Sciences Centre. The centre houses the physical sciences, chemistry, physics, geology and applied mathematics. Prof. Mennie succeeds Prof. J. U. MacEwan, metallurgical engineering.

Dr. Donald E. Armstrong, PhD, has been named director of the School of Commerce, succeeding Prof. Eric Kierans, who resigned on his appointment as president of the Montreal Stock Exchange. Prof. Armstrong came to McGill from the University of Alberta with a BA and BCom. As a Bronfman Fellow, he obtained his PhD at McGill and in 1951 became assistant professor of commerce.

Dr. Robert Allan Cleghorn has been promoted to the rank of Professor of Psychiatry. He came to McGill in 1946 as director of the laboratory for experimental therapeutics at the Allan Memorial Institute.

Prof. Henry Avison, chairman of the Department of English and director of adult education at Macdonald College has been appointed Director of Extension at McGill. He succeeds Prof. H. S. Howes, department of electrical engineering, who will continue his teaching and research in that department. Under Prof. Howes' leadership during the past 10 years, extension has developed into one of the most important and successful operations of the university. Prof. Avison, a native of British Columbia, obtained his BA and MA degrees at McGill and joined the Faculty of Agriculture in 1940.

Two promotions have been announced in the Department of Mathematics. Assistant Professors George Findlay and W. A. Waugh have been named Associate Professors. Five new appointments in this department are: Dr. Arwel Evans (MSc, University of Wales, PhD, Cambridge) associate professor; Dr. R. H. Boyer (MS Carnegie, DPhil Oxford) assistant professor; Dr. M. T. Grisaru (BA Toronto, MA PhD Princeton) assistant professor; Dr. Anatole Joffe (PhD Cornell) assistant professor; George Cavadias (BSc Athens, MSc McGill) assistant professor.

Dr. Maxwell J. Dunbar, who has attained international recognition for his work on the Arctic, has been promoted to the rank of Professor of Zoology. A graduate of Oxford, Prof. Dunbar first jointed the McGill staff as a demonstrator in zoology in 1940.

WHERE THEY ARE
and what they're doing

Being a compendium of what has reached us since the last issue. *The McGill News* would like to be more complete in its coverage and would be grateful to branch secretaries, and other graduates, for collecting and forwarding any worthy news items they see.

'95 **Norman J. Dawes,** Eng '95, of Montreal, has accepted an invitation to be honorary chairman of the forthcoming public appeal to finance an expansion program for the Lachine General Hospital.

'06 **C. V. Christie,** BSc '06, has been engaged by the City of Westmount as a consulting engineer for the design and office supervision of a power transformer and controlling switchgear.

'13 **Rose Lariviere,** BA '13, of Chicago, presented a paper at the 1960 International Conference on General Semantics held in Honolulu this summer under the auspices of the University of Hawaii.

'14 **J. D. McKeown,** BA '14, of Montreal, is now chairman of the board of H.M. Long Ltd.

'16 **F. Philippe Brais,** BCL '16, has been made a life governor of the Junior Chamber of Commerce for Hampstead, Outremont, Town of Mount Royal and Westmount.

A NATION-WIDE INVESTMENT SERVICE

Through our branch offices across Canada, we are able to offer a personal investment service to investors in every part of the Dominion. Interchange of information between branch offices permits us to give investors a clear idea of localized conditions. Each branch commands the services of our Statistical Department at Head Office which is equipped to analyze and study investment portfolios.

Our nation-wide organization is available to investors for discussion of their investment problems, and to Canadian corporations desirous of doing any financial or refunding operations.

Marriages

Abbott: At Montreal, on June 25, 1960, Lewis William Abbott, BCL '59, and Urve Korre.

Alexandor-Singer: At New York, recently, David Alexandor, BA '59, and Madeleine Singer, BA '59.

Alrod: At Montreal, on June 26, 1960, Robert H. Alrod, BSc '58, and Doreen Blackman.

Averback: At Montreal, recently, Bernice Averback, MacTeach '54, and Eric Rothfleisch.

Barshaw: At Montreal, recently, Wilma Barshaw, BSc '55, MSc '56, and Albert Padwa.

Belcourt - Daly: At Montreal, on June 4, 1960, John David Belcourt, BEng '59, and Andrea Louise Daly, BA '59.

Bertrand: At Westmount, on May 7, 1960, Robert Bertrand, BEng '59, and Ann Elizabeth Woods.

Bigman: At Montreal, recently, Susan Bigman, BA '59, and Howard W. Zuckerman.

Billings: At Coral Gables, Fla., recently, Mrs. Ann Skafte Billings, BSc/HEc '55, and Neil E. Piper.

Black: At Montreal, on May 14, 1960, Carol P. Black, BA '58, and John M. Anderson.

Blatt: At Montreal, recently, Clarence Blatt, BCom '56, and Geraldine Sulsky.

Blau: At Montreal, recently, Sandra L. Blau, BA '59, and Hy Jack Katz.

Bruce: At Ottawa, on July 9, 1960, Sandra Bruce, BSc/HEc '59, and Grant McDonald.

Budge - McNally: At Montreal, on May 7, 1960, Donald Campbell Budge, BCom '59, and Ann F. McNally, BSc '59.

Buka: At Lac Marois, Que., on June 4, 1960, Norman John Buka, BSc '58, Md '60, and Susan Doreen Gerrie.

Burrows: At Ottawa, on June 18, 1960, Donald Richard Burrows, BCom '53, and Judith Cruickshank.

Cambridge: At Belleville, Ont., recently, Ronan M. Cambridge, BEng '53, and Elizabeth Anne Sonne.

Cavell - Powers: At Edmonton, recently, Ronald G. Cavell, BSc '58, and Patricia Anne Powers, BSc '58.

Chipman: At Minneapolis, recently, John Somerset Chipman, BA '47, MA '48, and Margaret Ellesson.

Crittendon: At Montreal, on June 11, 1960, Harold A. Crittendon, DipAgr '56, and Evelyn Irene Herron.

Demarque: At Montreal, on June 11, 1960, Marie-Antoinette Demarque, BA '58, and Noel Falaise.

Depocas: At Montreal, on July 16, 1960, John Depocas, BCom '57, and Lise Roux.

Dingman: At Montreal, on June 3, 1960, Elizabeth Dingman, BA '59, and Hartland John McKoewn.

Donovan: Recently, Jane Donovan, BA '55, and Giuseppe Guarneri.

Douville: At Montreal, recently, Jean-Eudes Douville, BCom '58, and Lucille Girard.

Feldman: At Montreal, recently, Norman Feldman, BSc '59, and Beverley Sue Rubin.

Fieldman - Yaphe: At Ste. Anne de Bellevue, Que., recently, Michael Fieldman, BSc '59, and Andrea Yaphe, BA '59.

Flynn: At Montreal, on May 14, 1960, Elizabeth Flynn, BA '57, and Wilfred James LaVigne.

Foote - Scharfe: At Westmount, on June 25, 1960, Gerald William Foote, BSc/Agr '59, and Patricia Ann Scharfe, BSc/HEc '59.

Friedman: At Montreal, recently, Philip Friedman, BCom '58, and Naomi Schnarch.

Friedman - Gavsie: At Montreal, recently, Robert Harry Friedman, BA '54, BCom '56, and Phyllis Lee Gavsie, BA '60.

Gelfand - Kornbluth: At Montreal, recently, Brahm Gelfand, BA '57, BCL '60, and Judith Kornbluth, DipPT '58, OT '59.

Genest: At Ottawa, recently, George Genest, BEng '55, MEng '58, and Dorothy Erma Morehouse.

Gilbey: At Lennoxville, Que., on May 7, 1960, May Elizabeth Gilbey, BSc/HEc '56, and Kenneth George Copland.

Gushul: At Montreal, on July 1, 1960, William Gushul, BEng '56, and Helene Chalifour.

Hamill: At Toronto, recently, Geraldine Norma Hamill, BSc/HEc '51, and Thomas Campbell Clarke.

Hamilton - Patton: At Westmount, on May 21, 1960, Philip Hamilton, BEng '54, and Judy Patton, BA '54.

Hamilton - Aird: At Lennoxville, Que., on May 14, 1960, Robert D. Hamilton, BSc/Agr '59, and Ann Elizabeth Aird, BSc/HEc '58.

Hart: At Montreal, recently, Lorne Hart, BA '58, and Heather Rita Bernstein.

Haworth: At Drummondville, Que., on July 2, 1960, Eileen M. Haworth, BSc/HEc '57, and Joseph Young Hickman.

Hayden - Thomas: At Montreal, on June 2, 1960, Peter Hayden, BSc '55, MD '60, and Hilary J. Thomas, BSc '59.

Henderson: At Montreal, on July 16, 1960, Patricia Henderson, BSc '59, and Robert Walkington.

Hicks: At St. Lambert, Que., on May 21, 1960, Marian Hicks, BA '52, BLS '53, and Alan R. Caughlin.

Hill: At Dorval, Que., on July 9, 1960, Joan Hill, BSc '57, and Christopher Reibmayr.

Huggard: On April 16, 1960, Richard J. Huggard, BSc/Agr '58, and Marjorie MacRae.

Hughes: At Lennoxville, Que., on April 9, 1960, Kelvin John Hughes, BEng '57, and Sara Woodward.

Jenkins: At Montreal, on May 7, 1960, Sharon Anne Jenkins, PT '57, BSc/P&OT '59, and Thomas Peter Thornton.

Johnson: At Montreal, on June 11, 1960, John Peter Johnson, BCom '54, and Rosemary Eleanor Richardson.

Jones: At Vancouver, recently, Robert Code Jones, MD '53, and Valentine Bush.

Kolisnyk: At Montreal, on May 28, 1960, Zen Kolisnyk, BEng '55, and Adona Macyshyn.

Korcz: At Montreal, recently, Victor Korcz, BEng '56, and Ann Bryja.

Labow: At Montreal, recently, Samuel Barry Labow, BSc '58, and Eleanor Ann Rubin.

Lehman - Boon: At Montreal, on June 25, 1960, Geoffrey William Lehman, BA '49, MD '53, DipMed '59, and Barbara Joan Boon, BSc '55.

Levy: At Montreal, in May, 1960, Gerald Levy, BCom '56, and Donna Belitzky.

Little: At Hatley, Que., recently, Russell Thomas Little, BSc/Agr '58, and Diane Whiteman.

Loebel: On June 26, 1960, Elizabeth Loebel, BSc/PhyEd '56, and Arthur Lesser.

Lough: At Montreal, recently, John Lough, BSc '55, MD '57, and Beverley Ann Hickey.

MacKay: At Quebec, on June 18, 1960, Peter Grant MacKay, BEng '57, and Mary Laura Bleau.

Mason: At Montreal, recently, William Edward Mason, BSc '49, MD '51, DipMed '57, and Katalin Kerner.

LEONARDO DA VINCI *possessed what was possibly the greatest diversification of talents of any man in history. Besides being an artist, he was also an engineer and inventor. Reproduced here are original Da Vinci sketches for a winch with ratchet control.*

DIVERSIFICATION

Diversity, together with versatility and ingenuity, are among Canadian Vickers' most valued assets . . . and in building fine mining equipment, like the massive jaw crusher illustrated below, Canadian Vickers again displays the range and diversification of its engineering skills.

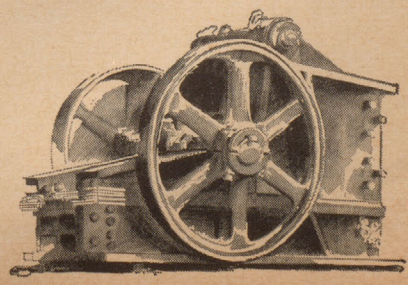

Equipment and machines, large and small, for every imaginable industrial need, are designed and manufactured in Canadian Vickers' shops, thus fulfilling their pledge: "If Industry Needs It . . . Canadian Vickers Builds It . . . Better."

Hydraulic Machinery • Industrial Boilers • Chemical Process Equipment • Special Machinery Equipment • Ships • Pulp and Paper Equipment • Mining Equipment • Marine Equipment

longest dome ride in the world

Daily service between Montreal-Vancouver; Toronto-Vancouver

The meter that measures our standard of living

It measures kilowatt-hours ... and as the kilowatt-hours grow, it indicates the ever-greater role of electricity in making our lives easier and more enjoyable.

Abundant low-cost electricity probably contributes more to our standard of living than any other factor. It creates opportunity for industry and business ... it speeds the production of goods ... it opens the way to hundreds of thousands of better-paying jobs for Canadians.

Kilowatt-hours cost so little—but think of what they can do. In the home, low-cost electricity can bring a world of convenience, comfort and service. Planned lighting brings glare-free new pleasure and charm to every room—at the flick of a finger. In the kitchen and laundry electrical appliances save time and toil. Television and many other products contribute to our leisure and entertainment.

Are *you* making full use of inexpensive electricity?

LIVE BETTER ELECTRICALLY

To make full use of modern electrical equipment—in home, office or factory—an adequate wiring system is essential. Your local power company, provincial Electric Service League or any qualified electrical contractor will assist you in planning to "Live Better ... Electrically."

CANADIAN GENERAL ELECTRIC COMPANY LIMITED

Manufacturer of equipment that generates, transmits and distributes electricity ... and the wide variety of products that put it to work in home and industry

FOR BUSINESS FACTS ABOUT

South America

ROYAL BANK MANAGER IN SOUTH AMERICA PICKS UP POINTERS ON PERU'S OVERSEAS TRADE AT THE SEAPORT OF CALLAO

The Royal Bank of Canada has operated its own branches in South America for over 40 years. Officers of the bank speak the language, know the people and their ways of doing business, are a ready source of information.

Should you wish to explore trade and business possibilities in South America the wise course is to "ask the man who works there". You can reach him through the Head Office of The Royal Bank of Canada, or your local branch.

In 5 years

...what?

Five years may see a big change in your responsibilities. Five years may see a big change in your life insurance needs. For these very reasons, Sun Life of Canada offers its *new* ***ADJUSTABLE POLICY***, the policy that gives you four options at the end of five years so that you can decide what type of life insurance coverage best suits you *at that time.*

For example, will you still be insurable? One of the options offers you increased coverage with no further medical evidence . . or . . **Will you want a larger income for your retirement years?** Another option allows you to change your policy to an endowment at age 65 . . or . . **Will you want to reduce your premium outlay without reducing your protection?** Then you can change your policy to a lower premium, whole life policy . . . Or you also have the option of keeping your original policy — which will be fully paid for at age 65 — in effect. This plan may meet your personal and family insurance needs for a lifetime.

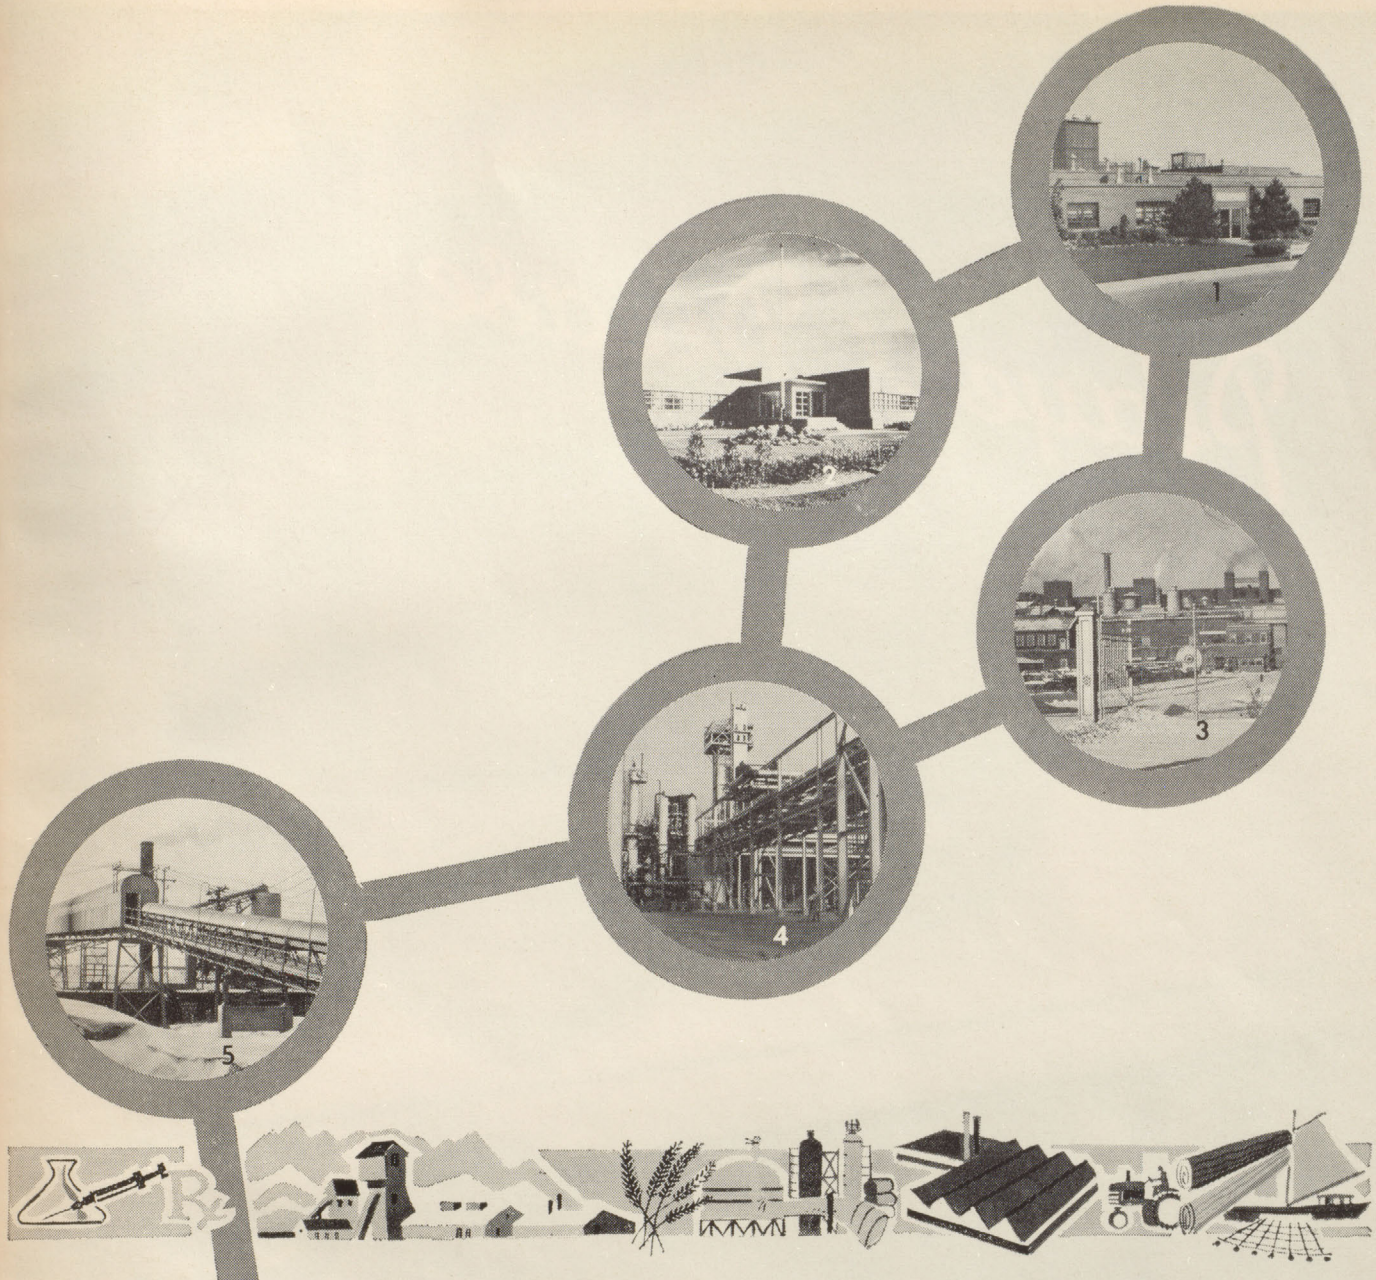

With its four valuable options, Sun Life's **Adjustable Policy** looks to your future and considers

- **your financial circumstances**
- **your family's protection**
- **your retirement income**
- **your insurability**

Let the Sun Life agent in your neighborhood put you and your family on the right road to security. **Why not ask him today for full details of this flexible new policy?**

SUN LIFE ASSURANCE COMPANY OF CANADA

One of the great life insurance companies of the world

...linked to almost every phase of Canadian life

Chemicals produced in the six modern plants of Cyanamid of Canada Limited form important links in many chains of industrial development . . . development that benefits almost every phase of Canadian life.

The larger and more complex Cyanamid grows, the greater is its need of well-educated Canadians with vision and vitality . . . promising young people who can play significant roles in the spheres of Canadian mining, paper-making, plastics, textiles, pharmaceuticals, general industry and agriculture.

Cyanamid's confidence in this country's growing economy is reflected in its substantial investment and plans for expansion. The Cyanamid pattern of development is one that continually creates opportunities for individual advancement and accomplishment.
